TABLE OF CONTENTS

	Page
INTRODUCTION	vii
EXPLANATORY NOTES	viii
I - LAND	
Table	
1 Land use	3
2 Irrigation in specified countries	9
3 Number and area of agricultural holdings	11
II - POPULATION	
4 Total population	15
5 Agricultural population and population economically active in agriculture	21
6 Agricultural population: Continental and world estimates	24
III - FAO INDEX NUMBERS OF AGRICULTURAL PRODUCTION	
7 FAO regional index numbers of agricultural production	27
8 FAO regional index numbers of population and per caput agricultural production	28
9 FAO country index numbers of food production	29
10 FAO country index numbers of total agricultural production	30
11 FAO country index numbers of per caput food production	31
12 FAO country index numbers of per caput total agricultural production	32
IV - CROPS	
13 Summary of major crops	35
14 Wheat	37
15 Rye	43
16 Barley	46
17 Oats	51
18 Mixed grain	55
19 Maize	57
20 Millet and sorghum	65
21 Rice (paddy)	74
22 Buckwheat	80
23 Miscellaneous cereals	81
24 Summary of all cereals - Area	83
25 Summary of all cereals - Production	86
26 Sugar cane	89
27 Sugar beets	94
28 Centrifugal sugar (raw value)	97
29 Noncentrifugal sugar	101
30 Potatoes	102
31 Sweet potatoes and yams	109
32 Cassava	115
33 Onions	120
34 Tomatoes	126
35 Cabbages	131
36 Cauliflowers	135
37 Green beans	138
38 Green peas	142
39 Cucumbers and gherkins	145
40 Cantaloupes and other melons	148
41 Watermelons	150
42 Dry beans	152
43 Dry peas	158
44 Dry broad beans	162
45 Chick-peas	165
46 Lentils	168
47 Pigeon peas	171
48 Cow peas	172
49 Vetch	175
50 Lupins	177
51 Other pulses and unspecified pulses	179
52 Apples	182
53 Pears	184
54 Plums and prunes	186
55 Cherries	188
56 Peaches	190
57 Apricots	192
58 Strawberries	194
59 Raspberries	195
60 Other berry fruits	196
61 Grapes, total	197
62 Grapes for wine	200
63 Wine	202
64 Raisins	204
65 Oranges and tangerines	205
66 Grapefruit	208
67 Lemons, limes and other citrus fruit	210
68 Dates	212
69 Figs, total	213
70 Dried figs	214
71 Bananas	215
72 Pineapples	220
73 Olives, total	222
74 Olives for oil	223
75 Olive oil	224
76 Palm kernels	225
77 Palm oil	226
78 Soybeans	227
79 Groundnuts	230
80 Cottonseed	235
81 Linseed	240
82 Hempseed	244
83 Rapeseed	245
84 Sesame seed	248
85 Sunflower seed	252
86 Castor beans	255
87 Tung nuts	258
88 Tung oil	258
89 Coconuts	259
90 Copra	261
91 Coffee	263
92 Cocoa beans	266
93 Tea	269
94 Hops	271
95 Tobacco	273
96 Cotton (lint)	279
97 Flax fibre	284
98 Hemp fibre	287
99 Jute	290
100 Abaca	293
101 Agaves	294
102 Other hard fibres	297
103 Natural rubber	299
V - LIVESTOCK NUMBERS AND PRODUCTS	
104 Summary of livestock numbers, major species	303
105 Summary of livestock products	305
106 Horses, mules, and asses	306
107 Cattle	313
108 Cows	318
109 Pigs	321
110 Sheep	326
111 Goats	331
112 Buffaloes	336
113 Camels	338
114 Poultry	340
115 Meat - Beef and veal, pork, and mutton and lamb, production from slaughtered animals	346
116 Meat - Beef and veal, pork, and mutton and lamb, production from indigenous animals	351
117 Other meat - Edible offal, poultry, horse, and other	360
118 Number of animals slaughtered	364
119 Average carcass weight	373
120 Average liveweight of animals slaughtered	380
121 Edible pig fat	383
122 Tallow and inedible pig fat	385
123 Milk	387
124 Milk yield per milking cow	395
125 Butter	398
126 Cheese	400
127 Condensed and evaporated milk	402
128 Dried milk	404
129 Hen eggs	406
130 Beehives	412
131 Honey	414
132 Fresh cocoons and raw silk	416
133 Wool	418
134 Hides and skins	421
VI - FOOD SUPPLY	
135 Net food supply per caput - Quantity	433
136 Net food supply per caput - Calories	439
137 Net food supply per caput - Proteins	444
138 Net food supply per caput - Fats	449
VII - MEANS OF PRODUCTION	
Commercial fertilizers	
139 Nitrogen, production	457
140 Nitrogen, consumption	459
141 Phosphate, production	463
142 Phosphate, consumption	465
143 Potash, production	469
144 Potash, consumption	470
Farm machinery	
145 Tractors	474
146 Garden tractors	483
147 Combined harvester-threshers	486
148 Milking machines	489
Pesticides	
Insecticides	
149 DDT and related compounds	491
150 Benzene hexachloride and lindane	493
151 Aldrin	495
152 Dieldrin	497
153 Chlordane	499
154 Toxaphene	501
155 Organo phosphorous compounds	502
156 Arsenicals	505
157 Mineral oils and dinitro compounds	507
158 Botanical insecticides	509
159 Endrin and other insecticides	511
Fungicides	
160 Sulphur and compounds	514
161 Copper and compounds	516
162 Mercury compounds	518
163 Dithiocarbamates	519
164 Captan and other fungicides	520
165 Fumigants	522
166 Herbicides	524
167 Rodenticides	526
168 Other pesticides and animal dips	528
VIII - PRICES	
Prices of agricultural commodities	
169 Wheat	532
170 Rye	534
171 Barley	535
172 Oats	536
173 Maize	537
174 Sorghum and millet	538
175 Miscellaneous feedstuffs	539
176 Rice	540
177 Sugar cane	543
178 Cane sugar	544
179 Sugar beets	545
180 Beet sugar	546
181 Potatoes	547
182 Sweet potatoes	548
183 Pulses	549
184 Cassava, tapioca, and sago	551
185 Onions	552
186 Tomatoes	553
187 Apples and pears	554
188 Citrus fruit	555
189 Dried fruit	557
190 Bananas	559
191 Tree nuts	560
192 Oilseeds	562
193 Fats and oils	566
194 Margarine	570
195 Coffee	571
196 Cocoa beans	572
197 Tea	573
198 Pepper	574
199 Wine	575

Table	Page
VIII - PRICES (concluded)	
200 Tobacco	576
201 Cotton	577
202 Wool	578
203 Miscellaneous fibres	579
204 Rubber	581
205 Hides and skins	582
206 Beef cattle	583
207 Sheep and lambs	585
208 Pigs	586
209 Bacon	587
210 Poultry	588
211 Fluid milk	590
212 Condensed milk, evaporated milk, and milk powder	591
213 Butter	592
214 Cheese	593
215 Eggs	594
216 Fish	595
217 Forest products	596
Export prices and freight rates	
218 Export prices	598
219 Maritime freight rates	
A. Tramp shipping freight rates	611
B. Index numbers of ocean freight rates	613
Prices of means of production	
220 Fertilizers	
A. Wholesale prices	614
B. Prices paid by farmers per 100 kg of plant nutrient	616
221 Tractors and farm machinery, prices paid by farmers	656
Index numbers of prices	
222 Index numbers of prices received and paid by farmers	660
223 Index numbers of agricultural and general wholesale prices	665
224 Index numbers of retail prices of food and cost of living	667
IX - WAGES	
225 Farm wages	677
NOTES ON THE TABLES	
General	691
Land	691
Population	692
FAO index numbers of agricultural production	693
Crops	698
Livestock numbers and products	702
Food supply	704
Means of production	704
Prices	705
COUNTRY NOTES	706
WEIGHTS, MEASURES AND CONVERSION FACTORS	707
SPANISH GLOSSARY	763

TABLE DES MATIÈRES

	Page
INTRODUCTION	x
NOTES EXPLICATIVES	xi
I - TERRES	
Tableau	
1 Utilisation des terres	3
2 Irrigation dans certains pays	9
3 Nombre et superficie des exploitations agricoles	11
II - POPULATION	
4 Population totale	15
5 Population agricole et population économiquement active dans l'agriculture	21
6 Population agricole: Estimations par continent et pour le monde	24
III - NOMBRES-INDICES FAO DE LA PRODUCTION AGRICOLE	
7 Nombres-indices FAO par région de la production agricole	27
8 Nombres-indices FAO par région de la population et de la production agricole par habitant	28
9 Nombres-indices FAO par pays de la production alimentaire	29
10 Nombres-indices FAO par pays de la production agricole totale	30
11 Nombres-indices FAO par pays de la production alimentaire par habitant	31
12 Nombres-indices FAO par pays de la production agricole totale par habitant	32
IV - CULTURES	
13 Sommaire des principales cultures	35
14 Blé	37
15 Seigle	43
16 Orge	46
17 Avoine	51
18 Mélanges de grains	55
19 Maïs	57
20 Millet et sorgho	65
21 Riz (paddy)	74
22 Sarrasin	80
23 Céréales diverses	81
24 Sommaire de toutes les céréales - Superficie	83
25 Sommaire de toutes les céréales - Production	86
26 Canne à sucre	89
27 Betteraves à sucre	94
28 Sucre centrifugé (valeur brute)	97
29 Sucre non centrifugé	101
IV - CULTURES (suite)	
30 Pommes de terre	102
31 Patates et ignames	109
32 Manioc	115
33 Oignons	120
34 Tomates	126
35 Choux	131
36 Choux-fleurs	135
37 Haricots verts	138
38 Petits pois	142
39 Concombres et cornichons	145
40 Cantaloups et autres melons	148
41 Pastèques	150
42 Haricots secs	152
43 Pois secs	158
44 Fèves sèches	162
45 Pois chiches	165
46 Lentilles	168
47 Pois cajans	171
48 Pois à vache	172
49 Vesces	175
50 Lupins	177
51 Autres légumineuses non spécifiées	179
52 Pommes	182
53 Poires	184
54 Prunes et pruneaux	186
55 Cerises	188
56 Pêches	190
57 Abricots	192
58 Fraises	194
59 Framboises	195
60 Autres fruits à baies	196
61 Vignes, total	197
62 Raisins à cuve	200
63 Vin	202
64 Raisins secs	204
65 Oranges et mandarines	205
66 Pamplemousses	208
67 Citrons, limes et autres agrumes	210
68 Dattes	212
69 Figues, total	213
70 Figues sèches	214
71 Bananes	215
72 Ananas	220
73 Olives, total	222
74 Olives pour huile	223
75 Huile d'olive	224
76 Palmistes	225
77 Huile de palme	226
78 Soja	227
79 Arachides	230
80 Graines de coton	235
81 Graines de lin	240
82 Graines de chanvre	244
83 Graines de colza	245
84 Graines de sésame	248
85 Graines de tournesol	252
86 Graines de ricin	255
87 Noix d'abrasin	258
88 Huile d'abrasin	258
IV - CULTURES (fin)	
89 Noix de coco	259
90 Coprah	261
91 Café	263
92 Fèves de cacao	266
93 Thé	269
94 Houblon	271
95 Tabac	273
96 Coton (fibre)	279
97 Lin, filasse	284
98 Chanvre, filasse	287
99 Jute	290
100 Abaca	293
101 Agaves	294
102 Autres fibres dures	297
103 Caoutchouc naturel	299
V - ÉLEVAGE ET PRODUITS DE L'ÉLEVAGE	
104 Récapitulation des effectifs du cheptel, par principales espèces	303
105 Récapitulation des principaux produits de l'élevage	305
106 Chevaux, mulets et ânes	306
107 Bovins	313
108 Vaches	318
109 Porcins	321
110 Ovins	326
111 Caprins	331
112 Buffles	336
113 Chameaux	338
114 Volailles	340
115 Viande - Bœuf et veau, porc et mouton et agneau, production des animaux abattus	346
116 Viande - Bœuf et veau, porc et mouton et agneau, production provenant d'animaux indigènes	351
117 Autres viandes - Abats comestibles, volaille, cheval, etc.	360
118 Nombre d'animaux abattus	364
119 Poids carcasse moyen	373
120 Poids vif moyen des animaux abattus	380
121 Graisse de porc comestible	383
122 Suif et graisse de porc non comestible	385
123 Lait	387
124 Rendement de lait par vache laitière	395
125 Beurre	398
126 Fromage	400
127 Lait condensé et évaporé	402
128 Lait en poudre	404
129 Œufs de poule	406
130 Ruches	412
131 Miel	414
132 Cocons frais et soie grège	416
133 Laine	418
134 Cuirs et peaux	421

Tableau — *Page*

VI – DISPONIBILITÉS ALIMENTAIRES

135 Disponibilités alimentaires nettes par habitant - Quantité 433
136 Disponibilités alimentaires nettes par habitant - Calories 439
137 Disponibilités alimentaires nettes par habitant - Protéines 444
138 Disponibilités alimentaires nettes par habitant - Lipides 449

VII – MOYENS DE PRODUCTION

Engrais commerciaux

139 Engrais azotés, production 457
140 Engrais azotés, consommation .. 459
141 Engrais phosphatés, production 463
142 Engrais phosphatés, consommation 465
143 Engrais potassiques, production 469
144 Engrais potassiques, consommation 470

Machines agricoles

145 Tracteurs 474
146 Motoculteurs 483
147 Moissonneuses-batteuses 486
148 Trayeuses 489

Produits antiparasitaires

Insecticides

149 DDT et composés de la même famille 491
150 Hexachlorocyclohexane et lindane 493
151 Aldrine 495
152 Dieldrine 497
153 Chlordane 499
154 Toxaphène 501
155 Composés organiques phosphorés 502
156 Préparations arsenicales 505
157 Huiles minérales et composés dinitrés 507
158 Insecticides botaniques 509
159 Endrine et autres insecticides 511

Fongicides

160 Soufre et composés du soufre 514
161 Cuivre et composés cupriques 516
162 Composés mercuriels 518
163 Dithiocarbamates 519
164 Captane et autres fongicides .. 520
165 Produits pour fumigations 522

Tableau — *Page*

VII - MOYENS DE PRODUCTION (fin)

166 Herbicides 524
167 Produits contre les rongeurs .. 526
168 Autres produits antiparasitaires et produits pour bains antiparasitaires 528

VIII – PRIX

Prix des produits agricoles

169 Blé 532
170 Seigle 534
171 Orge 535
172 Avoine 536
173 Maïs 537
174 Sorgho et millet 538
175 Divers aliments du bétail 539
176 Riz 540
177 Canne à sucre 543
178 Sucre de canne 544
179 Betteraves à sucre 545
180 Sucre de betterave 546
181 Pommes de terre 547
182 Patates 548
183 Légumineuses 549
184 Manioc, tapioca et sagou 551
185 Oignons 552
186 Tomates 553
187 Pommes et poires 554
188 Agrumes 555
189 Fruits secs 557
190 Bananes 559
191 Noix 560
192 Graines oléagineuses 562
193 Matières grasses 566
194 Margarine 570
195 Café 571
196 Fèves de cacao 572
197 Thé 573
198 Poivre 574
199 Vin 575
200 Tabac 576
201 Coton 577
202 Laine 578
203 Fibres diverses 579
204 Caoutchouc 581
205 Cuirs et peaux 582
206 Bovins de boucherie 583
207 Moutons et agneaux 585
208 Porcs 586
209 Bacon 587
210 Volailles 588
211 Lait liquide 590

Tableau — *Page*

VIII - PRIX (fin)

212 Lait condensé, lait évaporé et lait en poudre 591
213 Beurre 592
214 Fromage 593
215 Œufs 594
216 Poisson 595
217 Produits des forêts 596

Prix à l'exportation et frets

218 Prix à l'exportation 598
219 Taux de frets maritimes
A. Taux de frets des « tramps » 611
B. Nombres-indices des taux de frets maritimes 613

Prix des moyens de production

220 Engrais
A. Prix de gros 614
B. Prix payés par les agriculteurs par 100 kg de principes fertilisants 616
221 Tracteurs et machines agricoles, prix payés par les agriculteurs 656

Nombres-indices des prix

222 Nombres-indices des prix reçus et payés par les agriculteurs 660
223 Nombres-indices des prix des produits agricoles et des prix de gros généraux 665
224 Nombres-indices des prix de détail des aliments et du coût de la vie 667

IX – SALAIRES

225 Salaires agricoles 677

INTRODUCTION

This is the twenty-second issue of the *Production Yearbook*. It contains annual data on all important aspects of food and agriculture, including population, index numbers of agricultural and of food production, food supplies, prices, freight rates, and wages.

The publication of the Yearbook has been made possible by the cooperation of governments which have supplied most of the information in the form of replies to FAO annual questionnaires. Collaboration with various agencies has continued in order to achieve conformity in the presentation of international figures. The assistance of these agencies is gratefully acknowledged.

Continuous efforts have been made to enhance from year to year the utility of the *Production Yearbook*. In the present volume, the section on crops includes new tables on cucumbers and gherkins, cantaloups and other melons, watermelons, strawberries, raspberries, and other berry fruit, while the section dealing with prices includes a new table on export prices of selected agricultural products.

The tables in this volume have been prepared partly by computers. Data on crops, livestock, and livestock products are shown for two five-year averages (1948-52 and 1952-56) and also for individual years from 1963 to 1967.

Tables on food supply have been limited to those showing data from national balance sheets. Data from food consumption surveys will be published in due course in FAO's *Review of food consumption surveys*.

As in the two preceding editions, this volume also includes a large number of estimates made by FAO on area and production of major crops and on livestock numbers and products, where no official or semiofficial figures were available from the countries themselves. The publication of these estimates gives the countries concerned a chance to examine them and it is hoped they will provide FAO with more appropriate figures than those given herein.

EXPLANATORY NOTES

Symbols

Definitions of symbols used in the tables:

- • Unofficial figure, except in the case of tables on population where * indicates United Nations estimate
- — None, in negligible quantity (less than one half of the unit indicated) or entry not applicable
- ... Data not available
- ( ) Data not included in continental, regional and world totals, either because they are components of a country total, or because they refer to a different series which is not to be included in the totals
- *F* FAO estimate

To divide the decimals from the whole number a period (.) is used.

In the case of computer-processed tables, a number placed at the left side of a country name indicates that an explanatory note can be found at the end of the table concerned. Also at the end of the table can be found the explanation of the abbreviations (denoted by one to five letters) placed under the name of the country.

Time reference

In the 1965 and earlier issues of the Yearbook, statistics on area and production of crops were presented on the basis of the split-year time reference period $n/n+1$, with the explanation that statistics for the Northern Hemisphere pertained generally to the harvests of the spring, summer and autumn of the year n, but for the more southerly regions of this hemisphere they represented harvests continuing into the early part of the following year $n+1$; and that for the Southern Hemisphere data related to crops generally harvested in the latter part of the year n and in the first part of the following year $n+1$. Detailed explanation on the adoption of this time reference policy was given in the Introduction to previous issues of the Yearbook.

As initiated in the 1966 edition of the Yearbook, the time reference policy is based on the calendar-year period. That is to say, the data for any particular crop refer to the calendar year in which the entire harvest or bulk of the harvest took place. Hence, the calendar-year annotation is used in the tables and the data of the countries are shown under these years according to this criterion.

There are a few exceptions to this general policy. The reference period for sugar, sugar beets, and sugarcane depends on the date on which the sugar campaign begins, and harvests and sugar production corresponding to the sugar campaign starting any time between March of the year n and February of the following year $n+1$ have been shown under the reference year $n/n+1$. Similarly, by long internationally accepted custom, the time reference for the cocoa crop is the period October to September, although one important producing country (Brazil) follows a different crop year.

It should also be noted that the adoption of a calendar-year time reference period inevitably means that, in a number of cases, crops assigned by countries to a particular split year may appear under different calendar years in the international tables.

With regard to livestock numbers, the dates of enumeration are specified for each country. They have been grouped into 12-month periods ending 30 September of the year stated. The statistics on livestock products are given for calendar years, unless otherwise specified.

For prices, the time reference of each annual average is indicated by showing the months included in the season at the head of each column of price data and entering the averages under the calendar year in which the beginning month of the season falls. In the case of wholesale, export and import prices, annual averages for many series have been calculated on the calendar-year rather than the split-year basis. Annual producer prices are compiled on a split-year basis, following, in most cases, national statistical practices. Thus the producer price statistics correspond to the production statistics entered in the Yearbook under the same calendar year.

FAO index numbers of agricultural production have been calculated on the basis of a calendar-year reference period as defined above.

Crop areas

Figures for crop areas generally refer to harvested areas. In the tables on cereals, sugarcane, and tea, countries for which data are available only for sown area and not for harvested area are footnoted accordingly. For tables on grapes, abaca, agaves, and other hard fibres, the data shown generally refer to the planted area.

Yields per hectare

All yields per hectare for individual countries are computed from detailed production and area data. Yields for continental, regional, and world totals are computed from the totals shown.

Totals

Continental, regional, and world totals are shown for land use and population data, for crops (with a few exceptions), for major species of livestock, for meat, eggs, wool, cocoons (fresh) and raw silk production, as well as for fertilizers and tractors. China (Mainland), if included in the body of the table, is shown below the total for Asia and is excluded from the Asia and Far East totals. Likewise, the figures for the U.S.S.R. are excluded from the total for Europe.

Following the same principle, the world total includes all countries listed in the table. In particular, China (Mainland) and the U.S.S.R. are included in the world total if they are listed in the body of the table.

The geographical coverage of any total is thus explicitly indicated, enabling the reader to assess its adequacy. While every effort has been made to obtain as complete a coverage as practicable, there are a number of tables (on millet and sorghum, sweet potatoes and yams, cassava, pulses, fresh vegetables, fruits [except total grapes], rapeseed, buffaloes, camels, fertilizers, and tractors) where, because of the paucity of information from the countries, the geographical coverage cannot be said to be complete.

One word may be added about country estimates not shown in the tables but included in the totals. These estimates are, in general, only rough estimates of orders of magnitude valid only for adjusting the totals. In some cases the totals have been further adjusted for deficient coverage within a country. For example, the official figure for meat production may refer only to inspected slaughter, but, wherever practicable, such figures have been inflated so as to correspond to full production in making up the continental, regional, and world totals. All such cases have been indicated in the relevant tables.

Averages

Averages in the crops and livestock tables refer generally to a period of five years. Two such averages are given for the periods 1948-52 and 1952-56.

As far as possible, these averages are computed from official data. When these were not available for the entire period, reliable unofficial estimates were used for the period not covered by official information; otherwise the average is limited to a number of years less than the full period.

Averages for continental, regional, and world totals are, however, always based on the full period, using, if necessary, estimates which allow for known trends for the missing years.

Terminology

In a number of African countries and in Indonesia, the data are shown separately for "Farms and estates" and for "Villages." For Africa, generally included under "Farms and estates" are the crops grown and the livestock kept on estates and farms which are mainly operated on a commercial basis and adequately covered by the annual agricultural surveys. Under "Villages" are included the crops grown and the livestock kept generally under traditional agricultural conditions. For Indonesia, "Farms and estates" indicate large and commercial farms, while "Villages" indicate small farms.

Notes on the tables and country notes

For a number of tables and countries the figures require more explanation and qualification than is possible here or in the footnotes to the individual tables. Explanation of these points, as well as other elements, including changes in territorial coverage, classification of countries by FAO regions, etc., are given in the Notes on the Tables and Country Notes at the end of the volume.

As a general rule, data in the Yearbook relate to the country specified with its present *de facto* boundaries. Country names and continental groupings follow, in general, the *Nomenclature of geographic areas for statistical purposes*, published by the Statistical Office of the United Nations, New York, 1 January 1949, taking into account subsequent revisions by that office.

The Notes on the Tables also include small tables giving statistical information on spelt, poppyseed, total fruit, nuts and vegetables, rock phosphate, and ground rock phosphate used for direct application. The information contained therein refers to selected countries only. An additional table shows livestock numbers, expressed in livestock units by continents and regions.

Conversion factors

The table of conversion factors on unit weight of selected commodities and countries has been included at the end of this volume, as in the previous issue of the Yearbook. For more detailed conversion factors the reader is referred to FAO's *Technical conversion factors for agricultural commodities*.

INTRODUCTION

Le présent volume, qui constitue la vingt-deuxième édition de l'*Annuaire de la production*, contient des données annuelles sur tous les aspects importants de l'alimentation et de l'agriculture (population, nombres-indices de la production agricole et alimentaire, disponibilités alimentaires, prix, taux de fret et salaires).

La publication de l'Annuaire est rendue possible par le concours apporté par les gouvernements qui fournissent la plupart des renseignements en répondant aux questionnaires annuels de la FAO. Afin de normaliser davantage la présentation des statistiques internationales, la FAO continue de collaborer avec divers organismes qu'elle tient à remercier ici de leur concours.

On s'efforce sans cesse tous les ans d'améliorer l'utilité de l'*Annuaire de la production*. Dans le présent volume, la section traitant des cultures contient de nouveaux tableaux relatifs aux concombres et cornichons, cantaloups et autres melons, pastèques, fraises, framboises et autres fruits à baies, tandis que la section traitant des prix contient un nouveau tableau sur les prix à l'exportation de certains produits agricoles.

Les tableaux du présent volume ont été établis en partie à l'aide d'ordinateurs. Les données sur les cultures, l'élevage et les produits de l'élevage sont présentées pour deux moyennes de cinq ans (1948-52 et 1952-56), ainsi que pour chaque année de 1963 à 1967.

Les tableaux sur les disponibilités alimentaires se limitent à ceux qui contiennent des données provenant des bilans nationaux. Les données concernant les enquêtes sur la consommation alimentaire seront publiées en temps utile dans le *Recueil d'enquêtes sur la consommation alimentaire* établi par la FAO.

Comme dans les deux précédentes éditions, le présent volume contient un grand nombre d'estimations que la FAO a établies à propos de la superficie et de la production des principales cultures, ainsi que de l'élevage et de ses produits, lorsqu'elle ne disposait pas de sources officielles ou semi-officielles dans les pays eux-mêmes. Leur publication donne aux pays intéressés l'occasion de les examiner, et il faut espérer que ces pays fourniront à la FAO des données meilleures que celles qu'elle publie cette année.

NOTES EXPLICATIVES

Les signes conventionnels sont les suivants:

- * Renseignement non officiel, sauf pour les tableaux relatifs à la population. dans lesquels le signe * indique une estimation des Nations Unies
- — Néant, négligeable (inférieur à la moitié de l'unité visée) ou n'ayant pas lieu de figurer
- ... Renseignement non disponible
- ( ) Donnée non comprise dans les totaux continentaux, régionaux et mondiaux parce qu'il s'agit d'un élément du total national ou d'une série différente qui ne doit pas être incluse dans les totaux
- F Estimation de la FAO

Un point (.) sépare la partie fractionnaire du nombre entier.

Dans les tableaux élaborés à l'aide d'ordinateurs, un numéro placé à la gauche du nom d'un pays indique qu'une note explicative figure à la fin du tableau en question. On trouvera également à la fin du tableau l'explication des abréviations (indiqués par une à cinq lettres) figurant sous le nom du pays.

Période de référence

Dans l'Annuaire de 1965 et dans ceux qui l'avaient précédé, les statistiques des superficies et de la production des cultures étaient présentées sur la base de la campagne $n/n + 1$; il était toutefois précisé que, pour l'hémisphère nord, les statistiques se rapportaient le plus souvent aux récoltes du printemps, de l'été et de l'automne de l'année n et, pour les régions méridionales de cet hémisphère, aux récoltes s'étendant sur le début de l'année suivante $n + 1$; pour l'hémisphère sud, il s'agissait des récoltes généralement effectuées à la fin de l'année n et au cours du premier semestre de l'année suivante $n + 1$. Dans les précédents volumes de l'Annuaire, l'Introduction contenait des explications détaillées sur la méthode qui était alors suivie pour les périodes de référence.

Comme on a commencé à le faire dans l'édition de 1966 de l'Annuaire, les périodes de référence se fondent sur l'année civile. En d'autres termes, les données relatives à une culture se rapportent à l'année civile au cours de laquelle l'intégralité ou le gros de la récolte s'effectue. Ce sont donc des années civiles qui figurent dans les tableaux et les données des pays sont présentées selon ces critères dans les colonnes relatives à ces années.

Il y a toutefois lieu de signaler un petit nombre d'exceptions. Pour le sucre, la betterave à sucre et la canne à sucre, la période de référence dépend de la date à laquelle commence la campagne sucrière; les récoltes et la production de sucre correspondant à la campagne sucrière, qui peut commencer à n'importe quelle date entre le mois de mars de l'année n et le mois de février de l'année suivante $n + 1$, apparaissent sous la période de référence $n/n + 1$. De même, depuis longtemps la coutume internationale veut que, pour la récolte de cacao, la période de référence soit la campagne octobre à septembre, encore qu'un pays producteur important (Brésil) adopte une campagne différente.

Il convient aussi de noter que l'adoption de l'année civile comme période de référence implique inévitablement que, dans un certain nombre de cas, les récoltes indiquées par les pays comme ayant été effectuées au cours d'une campagne donnée peuvent figurer sous des années civiles différentes dans les tableaux internationaux.

Pour les effectifs du cheptel, on a indiqué pour chaque pays les dates des recensements. Les chiffres sont groupés en période de 12 mois se terminant le 30 septembre de l'année indiquée. Sauf indication contraire, les statistiques des produits d'origine animale se rapportent à l'année civile.

Pour les prix, on indique la période de référence de chaque moyenne annuelle en mentionnant les mois compris dans la campagne en tête de chaque colonne de données de prix et en faisant figurer les moyennes sous chaque année civile au cours de laquelle commence le mois de la campagne. Dans le cas des prix de gros, exportation et importation, les moyennes annuelles de beaucoup de séries ont été calculées sur la base de l'année civile plutôt que sur celle de la campagne. Les prix annuels à la production sont calculés sur la base de la campagne selon la pratique suivie dans la plupart des cas pour les statistiques nationales. Ainsi les statistiques des prix à la production correspondent aux statistiques de production figurant dans l'Annuaire sous la même année civile.

Les nombres-indices FAO de la production agricole ont été calculés sur la base de l'année civile selon la méthode indiquée ci-dessus.

Superficie des cultures

Il s'agit en général de la superficie récoltée. Pour les céréales, la canne à sucre et le thé, les pays pour lesquels on ne dispose de données que sur la superficie ensemencée (et non sur la superficie récoltée) sont signalés par une note de bas de page. Pour la vigne, l'abaca, les agaves et les autres fibres dures, il s'agit en général de la superficie plantée.

Rendements à l'hectare

Les rendements nationaux à l'hectare sont établis à partir de statistiques détaillées de la production et des superficies. Les rendements continentaux, régionaux et mondiaux sont généralement calculés à partir des totaux indiqués.

Totaux

On a donné les totaux continentaux, régionaux et mondiaux en ce qui concerne l'utilisation des terres, la population, les cultures (à quelques exceptions près), les principales espèces animales, la production de viande, d'œufs, de laine, de cocons (frais) et de soie brute, les engrais et les tracteurs. La Chine continentale, si elle figure dans le corps d'un tableau, apparaît sous le total pour l'Asie et n'est pas comprise dans les totaux pour l'Asie et l'Extrême-Orient. De même, les chiffres relatifs à l'U.R.S.S. ne figurent pas dans les totaux pour l'Europe.

En vertu du même principe, sont compris dans les totaux mondiaux tous les pays figurant dans les tableaux. En particulier, la Chine continentale et l'U.R.S.S. sont comprises dans les totaux mondiaux si elles figurent dans le corps des tableaux.

L'étendue géographique de n'importe quel total étant donc bien precisée, le lecteur peut se rendre compte de l'intérêt qu'il présente pour lui. On s'est efforcé au maximum de faire en sorte que le champ couvert soit aussi complet que possible; il y a toutefois un certain nombre de tableaux (millet et sorgho, patates et ignames, manioc, légumineuses, légumes frais, fruits [sauf vignes, total], graines de colza, buffles, chameaux, engrais et tracteurs) dont le champ géographique ne saurait prétendre être complet étant donné la rareté des renseignements fournis par les pays.

Un mot encore au sujet des estimations relatives aux pays qui, sans figurer dans les tableaux, sont compris dans les totaux. D'une manière générale, il ne s'agit guère que d'estimations très approximatives, donnant une idée de l'ordre de grandeur, et qui ne valent que pour ajuster les totaux. Dans certains cas, ces derniers ont même été ajustés encore pour tenir compte de l'insuffisance du champ couvert à l'intérieur d'un pays. C'est ainsi que le chiffre officiel de la production de viande s'applique parfois aux seuls abattages inspectés mais, chaque fois qu'on l'a pu, on l'a gonflé de telle sorte qu'il corresponde à la production complète lors de l'établissement des totaux continentaux, régionaux et mondiaux. Tous ces cas sont mentionnés dans les tableaux pertinents.

Moyennes

De manière générale, dans les tableaux concernant les cultures et l'élevage, les moyennes se rapportent à une période quinquennale. Deux moyennes sont fournies, l'une pour 1948-52 et l'autre pour 1952-56.

Ces moyennes sont autant que possible calculées d'après des données officielles. Lorsqu'on ne disposait pas de telles données pour la période entière, on a utilisé des estimations non officielles dignes de foi pour la partie qui n'était pas couverte par les renseignements officiels; autrement, on a limité la moyenne à un nombre d'années inférieur à la période entière.

Toutefois, pour les moyennes relatives aux totaux continentaux, régionaux et mondiaux, on se fonde toujours sur la période entière, en utilisant des estimations tenant compte, le cas échéant, pour les années manquantes, des tendances connues.

Terminologie

Pour plusieurs pays africains et pour l'Indonésie, l'Annuaire contient des données distinctes pour les « Fermes et grands domaines » et pour les « Villages ». Pour l'Afrique, sous « Fermes et grands domaines » figurent les cultures et le cheptel des grands domaines et fermes qui sont exploités principalement sur une base commerciale et que les enquêtes annuelles sur l'agriculture couvrent de façon suffisante. Sous « Villages » figurent les cultures et le cheptel exploités selon les méthodes traditionnelles. Pour l'Indonésie, « Fermes et grands domaines » se rapportent à de grandes exploitations commerciales tandis que « Villages » se rapportent à de petites exploitations.

Notes sur les tableaux et sur les pays

Dans plusieurs cas, les données appellent des explications et des réserves qu'il n'était pas possible d'indiquer ici ou dans les notes au bas des tableaux. On trouvera dans les Notes sur les tableaux et les Notes sur les pays, en fin de volume, les détails nécessaires, ainsi que des renseignements sur les changements territoriaux, la classification des pays par région selon la FAO, etc.

En règle générale, les données figurant dans l'Annuaire s'appliquent aux pays indiqués dans les limites de leurs frontières de fait actuelles. Pour les noms de pays et le groupement par continent, on a suivi d'une manière générale la *Nomenclature of geographical areas for statistical purposes*, publiée par le Bureau de statistique des Nations Unies (New York, 1er janvier 1949), en tenant compte des révisions effectuées depuis par ce Bureau.

Les Notes sur les tableaux comportent aussi de petits tableaux donnant des renseignements statistiques sur l'épeautre, les graines de pavot, les fruits, les fruits à coques et les légumes (totaux), les phosphates naturels et les phosphates naturels broyés utilisés en application directe. Ces renseignements ne concernent qu'un certain nombre de pays. Un autre tableau donne les effectifs du bétail exprimés en unités-bétail par continent et région.

Coefficients de conversion

Comme dans le volume précédent de l'Annuaire, le tableau des coefficients de conversion pour les poids unitaires de certains produits et pour certains pays figure en fin de volume. Pour plus de détails, le lecteur est prié de consulter la publication *Facteurs de conversion techniques pour les produits agricoles*, publiée par la FAO.

INTRODUCCION

Este volumen, que constituye la vigésimosegunda edición del *Anuario de Producción*, contiene datos anuales sobre todos los aspectos importantes de la agricultura y la alimentación, entre ellos los de población, números índices de la producción agrícola y alimentaria, provisión de comestibles, precios, fletes y salarios.

La publicación de este Anuario ha resultado posible gracias a la cooperación prestada por los gobiernos, los cuales han proporcionado la mayor parte de los datos en sus respuestas a los cuestionarios anuales que les envió la FAO. Para lograr cierta uniformidad en la presentación de cifras internacionales se ha seguido colaborando con varios organismos, a todos los cuales se les agradece la ayuda prestada.

No se han escatimado esfuerzos para aumentar de año en año la utilidad de este Anuario. En el presente volumen, la sección sobre cultivos comprende nuevos cuadros sobre pepinos y pepinillos, cantalupos y otros melones, sandías, fresas, frambuesas y otras bayas. La sección relativa a precios comprende un nuevo cuadro sobre precios de exportación de distintos productos agrícolas. Los cuadros de este volumen han sido preparados en parte mediante calculadoras. Se consignan datos sobre cultivos, ganados y productos pecuarios referidos a dos promedios quinquenales (v. gr. 1948-52 y 1952-56) y asimismo a cada uno de los años que van de 1963 a 1967.

Los cuadros sobre provisión de comestibles se limitan a aquellos en que se consignan datos procedentes de las hojas nacionales de balance de alimentos. Los datos tomados de las encuestas sobre consumo de alimentos se publicarán a su debido tiempo en el *Review of Food Consumption Surveys* (Análisis de las Encuestas del Consumo Alimentario) de la FAO.

Como en las dos anteriores ediciones, este volumen comprende también un gran número de estimaciones hechas por la FAO sobre superficie y producción de los principales cultivos y sobre número de cabezas de ganado y productos pecuarios en los casos en que no ha sido posible recurrir a fuentes oficiales o semioficiales de los países mismos. La publicación de tales estimaciones brinda a los países interesados la oportunidad de examinarlas, confiándose en que faciliten a la FAO cifras más exactas de las que aquí se consignan.

NOTAS EXPLICATIVAS

Símbolos

A continuación se indica la significación de los símbolos utilizados en los cuadros:

- * Cifras extraoficiales, salvo en el caso de los cuadros sobre población, en que el asterisco significa estimación de las Naciones Unidas.
- — Nada, cantidad insignificante (menos de la mitad de la unidad indicada) o partida no aplicable
- ... No se dispone de datos
- ( ) Datos no incluidos en los totales continentales, regionales y mundiales por ser componentes de un total nacional o por referirse a una serie distinta que no debe incluirse en los totales
- *F* Estimación de la FAO

Los decimales se separan de los enteros por un punto (.).

Tratándose de cuadros elaborados con calculadoras, el número que aparece a la izquierda del nombre de un país indica que se encontrará una nota explicativa al final del cuadro de que se trate. También al final del cuadro se hallará la explicación de las abreviaturas (de una a cinco letras) que figuran debajo del nombre del país.

Período de referencia

En la edición de 1965 y anteriores de este Anuario, las estadísticas de superficie y producción de cultivos se ajustaban al período de referencia *n/n+1*, advirtiéndose que las estadísticas correspondientes al hemisferio norte se referían por lo común a las cosechas de primavera, verano y otoño del año *n*, pero que las relativas a las regiones más meridionales de dicho hemisferio correspondían a recolecciones que se prolongaban hasta principios del año siguiente *n+1*; y que, tratándose del hemisferio sur, tales datos se referían a cosechas recogidas en general en la última parte del año *n* y durante el primer semestre del año siguiente *n+1*. En la *Introducción* a anteriores ediciones del *Anuario de Producción* se expone detenidamente la adopción de esta norma en cuanto a períodos de referencia.

Como se empezó a hacer en la edición de 1966 del Anuario, el período de referencia se basa en el año civil, es decir, los datos correspondientes a un determinado cultivo se refieren al año civil en que se recogió la totalidad o el grueso de la cosecha. Por tanto, en los cuadros se hace uso del año civil y los datos de los países figuran debajo de estos años con arreglo a tal criterio.

Esta norma general tiene algunas excepciones. El período de referencia del azúcar, la remolacha azucarera y la caña de azúcar depende de la fecha en que dé comienzo la campaña azucarera y las cosechas y producción de azúcar correspondientes a la campaña azucarera que empiece en cualquier momento comprendido entre marzo del año *n* y febrero del año siguiente *n+1* se consignan debajo del período de referencia *n/n+1*. Análogamente, siguiendo una costumbre internacional aceptada hace largo tiempo, el período de referencia de la cosecha del cacao es el año octubre-septiembre, si bien un importante país productor (Brasil) adopta un distinto año agrícola para este producto.

Debe hacerse notar asimismo que la adopción de un período de referencia basado en el año civil significa inevitablemente que, en varios casos, las cosechas asignadas por los países a un determinado año emergente pueden aparecer bajo distintos años civiles en los cuadros internacionales.

Por lo que respecta a la población pecuaria se especifican para cada país las fechas de la enumeración. Se han agrupado en períodos de doce meses que terminan el 30 de septiembre del año que se indica. Las estadísticas de productos pecuarios se refieren a años civiles, salvo indicación en contrario.

Por lo que se refiere a los precios, el período de referencia de cada promedio anual se indica consignando los meses que la temporada comprende en la cabecera o epígrafe de cada columna de datos de precios y anotando los promedios debajo del año civil a que corresponde el mes inicial de la temporada. En el caso de los precios al por mayor, de exportación y de importación, se han calculado los promedios anuales de muchas series basándolos en el año civil y no en el emergente. Los precios anuales al productor se compilan con arreglo al año emergente siguiendo, en la mayoría de los casos, las prácticas estadísticas nacionales. De esta manera, las estadísticas de precios al productor corresponden a las estadísticas de producción consignadas en el Anuario bajo el mismo año civil.

Los números índices de la FAO de la producción agrícola se han calculado ajustándose al período de referencia del año civil según antes se define.

Superficies de cultivo

Las cifras relativas a superficies de cultivo se refieren generalmente a la superficie cosechada. En los cuadros sobre cereales, caña de azúcar y té se ha puesto una nota al pie en el caso de los países acerca de los cuales sólo se dispone de datos sobre superficie sembrada, pero no sobre la superficie cosechada. En los cuadros sobre uvas, abacá, agaves y otras fibras duras, los datos consignados se refieren en general a la superficie plantada.

Rendimientos por hectárea

Todos los rendimientos por hectárea de cada país se han calculado a base de datos detallados de producción y superficie. Los rendimientos continentales, regionales y mundiales se han calculado a base de los totales indicados.

Totales

Se dan totales continentales, regionales y mundiales de aprovechamiento de la tierra y población, cultivos (con unas cuantas excepciones), principales especies de ganado y producción de carne, huevos, lana, capullos (frescos) y seda cruda, así como de fertilizantes y tractores. La China continental, si se incluye en el cuerpo del cuadro, se consigna debajo del total para Asia y se excluye de los totales para Asia y el Lejano Oriente. Asimismo, las cifras relativas a la U.R.S.S. se excluyen del total correspondiente a Europa.

Siguiendo el mismo principio, el total mundial comprende todos los países consignados en el cuadro. En particular, la China continental y la U.R.S.S. se incluyen en el total mundial si figuran en el cuerpo del cuadro.

Queda, pues, indicada explícitamente la composición geográfica de cualquier total, lo que permite que el lector juzgue su suficiencia. Aunque no se han escatimado esfuerzos para que tal composición sea lo más completa posible, hay unos cuantos cuadros (sobre mijo y sorgo, batatas y ñame, yuca, legumbres, hortalizas frescas, frutas [excepto toda clase de uvas], semilla de colza, búfalos, camellos, fertilizantes y tractores) que no pueden calificarse de completos en el aspecto geográfico, debido a lo escaso de la información facilitada por los países.

Conviene hacer una advertencia acerca de las estimaciones sobre países que no figuran en los cuadros, pero que se incluyen en los totales. Por lo general, tales cifras son, tan sólo, estimaciones sumamente aproximadas de órdenes de magnitud y que únicamente son válidas para reajustar los totales. En algunos casos, los totales han sido reajustados ulteriormente para compensar la deficiencia de información dentro de un país. Por ejemplo, la cifra oficial sobre producción de carne puede referirse exclusivamente a la que es objeto de inspección, pero siempre que ha sido posible al establecer los totales continentales, regionales y mundiales se ha procedido a aumentar tales cifras de modo que correspondan a la producción total. Todos estos casos han sido indicados en los cuadros correspondientes.

Promedios

Los promedios que aparecen en los cuadros sobre cultivos y ganados se refieren en general a un período de cinco años. Se consignan dos de tales promedios para los períodos 1948-52 y 1952-56.

En la medida de lo posible, estos promedios se han calculado a base de datos oficiales. Cuando no se ha dispuesto de éstos para todo el período, se ha hecho uso de estimaciones extraoficiales fidedignas correspondientes al período no comprendido por la información oficial; en caso contrario, el promedio se limita a un número de años menor que el comprendido por todo el período.

Sin embargo, los promedios de los totales continentales, regionales y mundiales se basan siempre en el período completo, recurriendo, de ser necesario, a estimaciones, y descontándose las tendencias bien comprobadas para los años cuyos datos no se conocen.

Terminología

Tratándose de varios países africanos y de Indonesia, se consignan datos separadamente para « Granjas y grandes haciendas » y para « Aldeas ». En el caso de Africa se incluyen generalmente en « Granjas y grandes haciendas » los cultivos levantados y las cabezas de ganado criadas en grandes explotaciones y fincas que se explotan principalmente con carácter comercial y que las encuestas agrícolas anuales abarcan en medida suficiente. En el término « Aldeas » se incluyen los cultivos levantados y las cabezas de ganado criadas en general en condiciones de agricultura tradicional. Tratándose de Indonesia, el concepto « Granjas y grandes haciendas » indica explotaciones grandes y de carácter comercial; el término « Aldeas » indica pequeñas fincas.

Notas sobre cuadros y países

Las cifras de algunos cuadros y países requieren más aclaraciones y reservas de las que es posible dar en esta sección y en las notas al pie de cada cuadro. Al final del volumen, en las Notas sobre los cuadros y en las Notas sobre países se exponen estos puntos, así como los demás elementos, incluso cambios en la extensión territorial, clasificación de los países por regiones de la FAO, etc.

Como regla general, los datos del Anuario se refieren al país especificado con sus actuales fronteras *de facto*. Para los nombres de los países y las agrupaciones continentales se sigue, en general, la *Nomenclature of geographic areas for statistical purposes*, publicada por la Oficina de Estadística de las Naciones Unidas el 1 de enero de 1949 en Nueva York, teniendo en cuenta las revisiones posteriores introducidas por dicha oficina.

Las Notas sobre los cuadros comprenden también pequeños cuadros en los que se da información estadística sobre escanda, fosforita y fosforita pulverizada empleada para la aplicación directa. La información en ellos contenida se refiere exclusivamente a determinados países. En otro cuadro se consigna la población pecuaria expresada en unidades ganaderas, por continentes y regiones.

Coeficientes de conversión

El cuadro de coeficientes de conversión sobre unidades de peso de distintos productos y países se ha incluido al final del presente volumen, como en el anterior Anuario. Para mayor información se remite al lector a la publicación de la FAO titulada *Coeficientes y normas de conversión para productos agropecuarios*.

PREFATORY NOTE

Territorial changes

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the Food and Agriculture Organization of the United Nations concerning the legal status of any country or territory or of its authorities, or concerning the delimitation of its frontiers.

NOTE PRÉLIMINAIRE

Modifications territoriales

Les désignations utilisées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies pour l'alimentation et l'agriculture aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières.

NOTA PRELIMINAR

Cambios territoriales

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de la Organización de las Naciones Unidas para la Agricultura y la Alimentación, juicio alguno sobre la condición jurídica de ninguno de los países o territorios citados o de sus autoridades, ni respecto de la delimitación de sus fronteras.

NOTE- THESE INDEX NUMBERS ARE CALCULATED BY FAO ON A UNIFORM BASIS EMPLOYING REGIONALLY CONSTANT WEIGHTS. THEY DIFFER FROM NATIONAL INDEX NUMBERS PRODUCED BY THE COUNTRIES THEMSELVES BECAUSE OF DIFFERENCES IN CONCEPTS OF PRODUCTION, COVERAGE, WEIGHTS, TIME REFERENCE OF THE PRODUCTION DATA AND METHODS OF CALCULATION. THEY ARE NOT SUBSTITUTES FOR NATIONAL INDEX NUMBERS. WHENEVER REVISED BASIC DATA ARE REPORTED, THE INDEX NUMBERS PREVIOUSLY PUBLISHED ARE REVISED ACCORDINGLY. FOR FURTHER INFORMATION ON THE CALCULATION OF THE FAO INDEX NUMBERS, REFERENCE MAY BE MADE TO THE NOTES ON THE TABLES.

NOTE- CES NOMBRES-INDICES SONT CALCULES PAR LA FAO SUR UNE BASE UNIFORME, A L AIDE DE COEFFICIENTS DE PONDERATION CONSTANT PAR REGION. PAR SUITE DE DIFFERENCES DANS LES NOTIONS DE PRODUCTION, LE CHAMP COUVERT, LES COEFFICIENTS DE PONDERATION, LA PERIOD DE REFERENCE DES DONNEES DE PRODUCTION ET LES METHODES DE CALCUL UTILISEES, ILS NE CONCORDENT PAS AVEC CEUX QU ETABLISSENT LES PAYS EUX-MEMES. ILS NE REMPLACENT PAS LES NOMBRES-INDICES NATIONAUX. CHAQUES FOIS QUE DES DONNEES DE BASE REVISEES SONT ENVOYEES, LES NOMBRES-INDICES PUBLIES ANTERIEUREMENT SONT REVISES EN CONSEQUENCE. POUR D AUTRES RENSEIGNEMENTS SUR LE CALCUL DES NOMBRES-INDICES FAO, ON PEUT SE REPORTER AUX NOTES SUR LES TABLEAUX.

NOTE- THESE INDEX NUMBERS ARE CALCULATED BY FAO ON A UNIFORM BASIS EMPLOYING REGIONALLY CONSTANT WEIGHTS. THEY DIFFER FROM NATIONAL INDEX NUMBERS PRODUCED BY THE COUNTRIES THEMSELVES BECAUSE OF DIFFERENCES IN CONCEPTS OF PRODUCTION, COVERAGE, WEIGHTS, TIME REFERENCE OF THE PRODUCTION DATA AND METHODS OF CALCULATION. THEY ARE NOT SUBSTITUTES FOR NATIONAL INDEX NUMBERS. WHENEVER REVISED BASIC DATA ARE REPORTED, THE INDEX NUMBERS PREVIOUSLY PUBLISHED ARE REVISED ACCORDINGLY. FOR FURTHER INFORMATION ON THE CALCULATION OF THE FAO INDEX NUMBERS, REFERENCE MAY BE MADE TO THE NOTES ON THE TABLES.

NOTE- CES NOMBRES-INDICES SONT CALCULES PAR LA FAO SUR UNE BASE UNIFORME, A L AIDE DE COEFFICIENTS DE PONDERATION CONSTANT PAR REGION. PAR SUITE DE DIFFERENCES DANS LES NOTIONS DE PRODUCTION, LE CHAMP COUVERT, LES COEFFICIENTS DE PONDERATION, LA PERIOD DE REFERENCE DES DONNEES DE PRODUCTION ET LES METHODES DE CALCUL UTILISEES, ILS NE CONCORDENT PAS AVEC CEUX QU ETABLISSENT LES PAYS EUX-MEMES. ILS NE REMPLACENT PAS LES NOMBRES-INDICES NATIONAUX. CHAQUES FOIS QUE DES DONNEES DE BASE REVISEES SONT ENVOYEES, LES NOMBRES-INDICES PUBLIES ANTERIEUREMENT SONT REVISES EN CONSEQUENCE. POUR D AUTRES RENSEIGNEMENTS SUR LE CALCUL DES NOMBRES-INDICES FAO, ON PEUT SE REPORTER AUX NOTES SUR LES TABLEAUX.

TABLE 24- SUMMARY OF ALL CEREALS - AREA

1000 HECTARES

TABLEAU 24- SOMMAIRE DE TOUTES LES CEREALES - SUPERFICIE

1000 HECTARES

NOTE- ALL THE CEREALS SHOWN IN THIS YEARBOOK (TABLES 14 - 23) ARE INCLUDED IN THIS TABLE.

1 - AREA SOWN
2 - FROM 1963 ONWARD, FAO ESTIMATES
3 - FAO ESTIMATES
4 - INCOMPLETE COVERAGE
5 - RICE ONLY.

NOTE- SONT INCLUSES DANS CE TABLEAU TOUTES LES CEREALES PRESENTEES DANS CET ANNUAIRE (TABLEAUX 14 - 23).

1 - SUPERFICIE ENSEMENCEE
2 - DEPUIS 1963, ESTIMATIONS DE LA FAO
3 - ESTIMATIONS DE LA FAO
4 - ETENDUE INCOMPLETE
5 - RIZ SEULEMENT

TABLE 25- SUMMARY OF ALL CEREALS - PRODUCTION

TABLE 25- SUMMARY OF ALL CEREALS - PRODUCTION

1000 METRIC TONS

TABLEAU 25- SOMMAIRE DE TOUTES LES CEREALES - PRODUCTION

1000 TONNES METRIQUES

NOTE- ALL THE CEREALS SHOWN IN THIS YEARBOOK (TABLES 14 - 23) ARE INCLUDED IN THIS TABLE.

1 - FROM 1963 ONWARD, FAO ESTIMATES
2 - UNOFFICIAL DATA
3 - INCOMPLETE COVERAGE
4 - RICE ONLY

NOTE- SONT INCLUSES DANS CE TABLEAU TOUTES LES CEREALES PRESENTEES DANS CET ANNUAIRE (TABLEAUX 14 - 23).

1 - DEPUIS 1963, ESTIMATIONS DE LA FAO
2 - CHIFFRES NON OFFICIELS
3 - ETENDUE INCOMPLETE
4 - RIZ SEULEMENT

TOT = CANE AND BEET SUGAR

CANNE = SUCRE DE CANNE
BETT = SUCRE DE BETTERAVE
TOT = SUCRE DE CANNE ET DE BETTERAVE

1 - CALENDAR YEAR REFERRING TO FIRST PART OF SPLIT YEAR
2 - YEARS JULY-JUNE
3 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
4 - INCLUDES THE SUGAR EQUIVALENT OF FANCY MOLASSES
5 - CALENDAR YEAR REFERRING TO SECOND PART OF SPLIT YEAR
6 - TEL QUEL
7 - YEARS JUNE-MAY
8 - INCLUDES SUGAR (RAW VALUE) REFINED FROM GUR
9 - 96 NET TITRE

1 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
2 - ANNEES JUILLET-JUIN
3 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
4 - Y COMPRIS L EQUIVALENT EN SUCRE DES MELASSES AYANT UNE HAUTE TENEUR EN SUCRE
5 - ANNEE CIVILE (SECOND MILLESIME INDIQUE)
6 - TEL QUEL
7 - ANNEES JUIN-MAY
8 - Y COMPRIS LE SUCRE (EN EQUIVALENT DE SUCRE BRUT) RAFFINE A PARTIR DU GUR
9 - TITRANT 96 NET

NOTE- THE INFORMATION AVAILABLE FOR THE MAJORITY OF COUNTRIES IS INSUFFICIENT TO DETERMINE WHETHER PRODUCTION ESTIMATES RELATE TO TOTAL PRODUCTION (INCLUDING OIL EXTRACTED FROM OLIVE RESIDUES), OR TO VIRGIN OILS EXTRACTED BY MECHANICAL METHODS ONLY. IN SOME CASES, DATA MAY REFER TO EDIBLE PRODUCTION ONLY, WHICH MAY INCLUDE SOME QUANTITIES OF OIL EXTRACTED FROM OLIVE RESIDUES.

NOTE- DANS LA MAJORITE DES CAS, ON NE DISPOSE PAS DE RENSEIGNEMENTS SUFFISANTS POUR DETERMINER SI LES CHIFFRES REPRESENTENT LA PRODUCTION TOTALE D HUILE (Y COMPRIS L HUILE EXTRAITE DES RESIDUS D OLIVE), OU SEULEMENT LA PRODUCTION D HUILE VIERGE EXTRAITE MECANIQUEMENT. DANS CERTAINS CAS, LES CHIFFRES PEUVENT SE RAPPORTER A LA PRODUCTION D HUILE COMESTIBLE SEULEMENT, LAQUELLE PEUT COMPRENDRE CERTAINES QUANTITES D HUILE EXTRAITE DE RESIDUS D OLIVE.

LE 81- LINSEED

AREA = 1000 HECTARES
PRODUCTION = 1000 METRIC TONS
YIELD = 100 KG/HECTARE

TOTAL AREA HARVESTED FOR FIBRE AND FOR SEED. YIELDS HAVE BEEN COMPUTED ON THE BASIS OF SUCH AREA.

- FLAX GROWN FOR SEED ONLY
- AVERAGE OF 2 YEARS (FIRST AVERAGE)
- AVERAGE OF 2 YEARS (SECOND AVERAGE)
- AVERAGE OF 4 YEARS (SECOND AVERAGE)
- AVERAGE OF 3 YEARS (FIRST AVERAGE)
- AVERAGE OF 4 YEARS (FIRST AVERAGE)
- 1950 (FIRST AVERAGE)
- 1948 (FIRST AVERAGE)
- AVERAGE OF 3 YEARS (SECOND AVERAGE)

TABLEAU 81- GRAINES DE LIN

SUPERFICIE = 1000 HECTARES
PRODUCTION = 1000 TONNES METRIQUES
RENDEMENT = 100 KG/HECTARE

SE RAPPORTENT A TOUTE LA SUPERFICIE CULTIVEE POUR LA FILASSE ET POUR LA GRAINE. LE RENDEMENT A ETE CALCULE SUR LA BASE DE CETTE SUPERFICIE.

1 - LIN CULTIVE SEULEMENT POUR LA GRAINE
2 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
4 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
5 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
6 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
7 - 1950 (PREMIERE MOYENNE)
8 - 1948 (PREMIERE MOYENNE)
9 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - USED IN AGRICULTURE
4 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
5 - 1947/48 (FIRST AVERAGE)
6 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
7 - ON AGRICULTURAL HOLDINGS
8 - 1955/56 (SECOND AVERAGE)
9 - INCLUDING MADEIRA
10 - INCLUDING MADEIRA
11 - ON AGRICULTURAL HOLDINGS. FROM 1952/53 GREAT BRITAIN ONLY
12 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
13 - 1952/53 (SECOND AVERAGE)
14 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
15 - 1951/52 (SECOND AVERAGE)
16 - 1950/51 (FIRST AVERAGE)
17 - 1949/50 (FIRST AVERAGE)
18 - 1951/52 (FIRST AVERAGE)
19 - 1953/54 (SECOND AVERAGE)
20 - 1948/49 (FIRST AVERAGE)
21 - REGISTERED FOR TAXATION
22 - FROM YEAR 1947/48 TO 1952/53, DATE OF ENUMERATION MIDYEAR:FROM 1953/54 ONWARD, DECEMBER
23 - 1954/55 (SECOND AVERAGE)
24 - ON FARMS AND ESTATES
25 - DATA RELATE TO NORTHERN REGION ONLY
26 - ON ALL HOLDINGS OF 4 HECTARES AND OVER

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - EMPLOYES POUR L AGRICULTURE
4 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
5 - 1947/48 (PREMIERE MOYENNE)
6 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
7 - DANS LES EXPLOITATIONS AGRICOLES
8 - 1955/56 (DEUXIEME MOYENNE)
9 - Y COMPRIS MADERE
10 - Y COMPRIS MADERE
11 - DANS LES EXPLOITATIONS AGRICOLES. A PARTIR DE 1952/53 GRANDE-BRETAGNE SEULEMENT.
12 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
13 - 1952/53 (DEUXIEME MOYENNE)
14 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
15 - 1951/52 (DEUXIEME MOYENNE)
16 - 1950/51 (PREMIERE MOYENNE)
17 - 1949/50 (PREMIERE MOYENNE)
18 - 1951/52 (PREMIERE MOYENNE)
19 - 1953/54 (DEUXIEME MOYENNE)
20 - 1948/49 (PREMIERE MOYENNE)
21 - SOUMIS A L IMPOT
22 - POUR 1947/48-1952/53, LA DATE DU DENOMBREMENT MILIEU DE L ANNEE:DEPUIS 1953/54, DECEMBRE
23 - 1954/55 (DEUXIEME MOYENNE)
24 - DANS LES FERMES ET GRANDS DOMAINES
25 - REGION SEPTENTRIONALE SEULEMENT
26 - DANS TOUTES LES EXPLOITATIONS D AU MOINS 4 HECTARES

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

FARM = ON FARMS AND ESTATES
VILL = VILLAGES

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - INCLUDING EAST BERLIN
4 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - ON AGRICULTURAL HOLDINGS
7 - 1955/56 (SECOND AVERAGE)
8 - INCLUDING MADEIRA
9 - INCLUDING BUFFALOES
10 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
11 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
12 - 1950/51 (FIRST AVERAGE)
13 - 1951/52 (SECOND AVERAGE)
14 - 1951/52 (FIRST AVERAGE)
15 - 1952/53 (SECOND AVERAGE)
16 - ON AGRICULTURAL HOLDINGS. FROM 1960/61 ONWARD. INCLUDING ALASKA AND HAWAII
17 - 1949/50 (FIRST AVERAGE)
18 - 1954/55 (SECOND AVERAGE)
19 - 1948/49 (FIRST AVERAGE)
20 - 1953/54 (SECOND AVERAGE)
21 - FROM YEAR 1947/48 TO 1952/53, DATE OF ENUMERATION MIDYEAR; FROM 1953/54 ONWARD, DECEMBER
22 - ON FARMS AND ESTATES
23 - REGISTERED FOR TAXATION
24 - ON ALL HOLDINGS OF 4 HECTARES AND OVER

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

FERM = FERMES ET GRANDS DOMAINES
VILL = VILLAGES

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - Y COMPRIS BERLIN EST
4 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - DANS LES EXPLOITATIONS AGRICOLES
7 - 1955/56 (DEUXIEME MOYENNE)
8 - Y COMPRIS MADERE
9 - Y COMPRIS LES BUFFLES
10 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
11 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
12 - 1950/51 (PREMIERE MOYENNE)
13 - 1951/52 (DEUXIEME MOYENNE)
14 - 1951/52 (PREMIERE MOYENNE)
15 - 1952/53 (DEUXIEME MOYENNE)
16 - DANS LES EXPLOITATIONS AGRICOLES. A PARTIR DE 1960/61 Y COMPRIS ALASKA ET HAWAII
17 - 1949/50 (PREMIERE MOYENNE)
18 - 1954/55 (DEUXIEME MOYENNE)
19 - 1948/49 (PREMIERE MOYENNE)
20 - 1953/54 (DEUXIEME MOYENNE)
21 - POUR 1947/48-1952/53, LA DATE DU DENOMBREMENT MILIEU DE L ANNEE; DEPUIS 1953/54, DECEMBRE
22 - DANS LES FERMES ET GRANDS DOMAINES
23 - SOUMIS A L IMPOT
24 - DANS TOUTES LES EXPLOITATIONS D AU MOINS 4 HECTARES

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

A = COWS AND HEIFERS 2 YEARS OF AGE AND OVER.
B = COWS INCLUDING HEIFERS IN CALF KEPT PRIMARILY FOR MILK

1 - DAIRY COWS
2 - 1950/51 (FIRST AVERAGE)
3 - 1955/56 (SECOND AVERAGE)
4 - INCLUDING COWS KEPT FOR MILK AND DRAUGHT PURPOSES
5 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
6 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
7 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
8 - COWS AND HEIFERS IN CALF
9 - EXCLUDING ANIMALS ON AGRICULTURAL HOLDINGS UNDER 1 HECTARE
10 - INCLUDING BUFFALO COWS
11 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
12 - COWS AND HEIFERS ONE YEAR OLD AND OVER
13 - ALL COWS INCLUDING HEIFERS IN MILK AND IN CALF
14 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
15 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
16 - 1951/52 (FIRST AVERAGE)
17 - 1951/52 (SECOND AVERAGE)
18 - FROM 1960/61 ONWARD, INCLUDING ALASKA AND HAWAII
19 - ALL FEMALES OVER 3 YEARS OLD
20 - FIGURES ARE BASED ON 1960 CENSUS
21 - KEPT PRIMARILY FOR MEAT PRODUCTION
22 - ON FARMS AND ESTATES
23 - 1949/50 (FIRST AVERAGE)
24 - 1954/55 (SECOND AVERAGE)
25 - COWS AND HEIFERS 1 YEAR OLD AND OVER KEPT FOR MILK
26 - EXCLUDING ESTIMATES FOR URBAN AREAS

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

A = VACHES ET GENISSES DE 2 ANS ET PLUS.
B = VACHES ET GENISSES PLEINES POUR LA PRODUCTION DE LAIT

1 - VACHES LAITIERES
2 - 1950/51 (PREMIERE MOYENNE)
3 - 1955/56 (DEUXIEME MOYENNE)
4 - Y COMPRIS LES VACHES LAITIERES ET DE TRAIT
5 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
6 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
7 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
8 - VACHES ET GENISSES EN ETAT DE GESTATION
9 - NON COMPRIS LES ANIMAUX DANS LES EXPLOITATIONS AGRICOLES DE MOINS DE 1 HECTARE
10 - Y COMPRIS LES BUFFLONNES
11 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
12 - VACHES ET GENISSES DE 1 AN ET AU-DESSUS
13 - TOUTES LES VACHES, Y COMPRIS LES GENISSES EN PERIODE DE LACTATION OU EN ETAT DE GESTATION
14 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
15 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
16 - 1951/52 (PREMIERE MOYENNE)
17 - 1951/52 (DEUXIEME MOYENNE)
18 - A PARTIR DE 1960/61, Y COMPRIS ALASKA ET HAWAII
19 - TOUTES FEMELLES DE PLUS DE 3 ANS
20 - DONNEES BASEES SUR LE RECENSEMENT DE 1960
21 - ELEVEES SURTOUT POUR LA PRODUCTION DE VIANDE
22 - DANS LES FERMES ET GRANDS DOMAINES
23 - 1949/50 (PREMIERE MOYENNE)
24 - 1954/55 (DEUXIEME MOYENNE)
25 - VACHES ET GENISSES LAITIERES AYANT AU MOINS 1 AN
26 - NON COMPRIS LES ESTIMATIONS POUR LES ZONES URBAINES

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES

FARM = ON FARMS AND ESTATES
VILL = VILLAGES

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - INCLUDING EAST BERLIN
4 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - ON AGRICULTURAL HOLDINGS
7 - INCLUDING MADEIRA
8 - 1955/56 (SECOND AVERAGE)
9 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
10 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
11 - 1950/51 (FIRST AVERAGE)
12 - 1951/52 (SECOND AVERAGE)
13 - 1954/55 (SECOND AVERAGE)
14 - 1951/52 (FIRST AVERAGE)
15 - 1952/53 (SECOND AVERAGE)
16 - ON AGRICULTURAL HOLDINGS. FROM 1960/61 ONWARD, INCLUDING ALASKA AND HAWAII
17 - 1949/50 (FIRST AVERAGE)
18 - FARMS ONLY
19 - 1948/49 (FIRST AVERAGE)
20 - FROM YEAR 1947/48 TO 1952/53, DATE OF ENUMERATION MIDYEAR; FROM 1953/54 ONWARD, DECEMBER
21 - ON FARMS AND ESTATES
22 - REGISTERED FOR TAXATION

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

FERM = FERMES ET GRANDS DOMAINES
VILL = VILLAGES

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - Y COMPRIS BERLIN EST
4 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - DANS LES EXPLOITATIONS AGRICOLES
7 - Y COMPRIS MADERE
8 - 1955/56 (DEUXIEME MOYENNE)
9 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
10 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
11 - 1950/51 (PREMIERE MOYENNE)
12 - 1951/52 (DEUXIEME MOYENNE)
13 - 1954/55 (DEUXIEME MOYENNE)
14 - 1951/52 (PREMIERE MOYENNE)
15 - 1952/53 (DEUXIEME MOYENNE)
16 - DANS LES EXPLOITATIONS AGRICOLES.A PARTIR DE 1960/61 Y COMPRIS ALASKA ET HAWAII
17 - 1949/50 (PREMIERE MOYENNE)
18 - FERMES SEULEMENT
19 - 1948/49 (PREMIERE MOYENNE)
20 - POUR 1947/48-1952/53, LA DATE DU DENOMBREMENT MILIEU DE L ANNEES; DEPUIS 1953/54, DECEMBRE
21 - DANS LES FERMES ET GRANDS DOMAINES
22 - SOUMIS A L IMPOT

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

FARM = ON FARMS AND ESTATES
VILL = VILLAGES

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
4 - 1951/52 (SECOND AVERAGE)
5 - INCLUDING EAST BERLIN
6 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
7 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
8 - ON AGRICULTURAL HOLDINGS
9 - INCLUDING MADEIRA
10 - 1955/56 (SECOND AVERAGE)
11 - 1952/53 (SECOND AVERAGE)
12 - 1951/52 (FIRST AVERAGE)
13 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
14 - 1950/51 (FIRST AVERAGE)
15 - ON AGRICULTURAL HOLDINGS. FROM 1960/61 ONWARD, INCLUDING ALASKA AND HAWAII
16 - 1949/50 (FIRST AVERAGE)
17 - 1954/55 (SECOND AVERAGE)
18 - 1948/49 (FIRST AVERAGE)
19 - 1953/54 (SECOND AVERAGE)
20 - DATA SUBMITTED BY MINISTRY OF FINANCE. ANIMALS OVER ONE YEAR OLD
21 - REGISTERED FOR TAXATION
22 - FROM YEAR 1947/48 TO 1952/53, DATE OF ENUMERATION MIDYEAR; FROM 1953/54 ONWARD, DECEMBER
23 - ANIMALS OVER ONE YEAR REGISTERED FOR TAXATION
24 - CONTINUOUS CENSUS

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

FERM = FERMES ET GRANDS DOMAINES
VILL = VILLAGES

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
4 - 1951/52 (DEUXIEME MOYENNE)
5 - Y COMPRIS BERLIN EST
6 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
7 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
8 - DANS LES EXPLOITATIONS AGRICOLES
9 - Y COMPRIS MADERE
10 - 1955/56 (DEUXIEME MOYENNE)
11 - 1952/53 (DEUXIEME MOYENNE)
12 - 1951/52 (PREMIERE MOYENNE)
13 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
14 - 1950/51 (PREMIERE MOYENNE)
15 - DANS LES EXPLOITATIONS AGRICOLES. A PARTIR DE 1960/61 Y COMPRIS ALASKA ET HAWAII
16 - 1949/50 (PREMIERE MOYENNE)
17 - 1954/55 (DEUXIEME MOYENNE)
18 - 1948/49 (PREMIERE MOYENNE)
19 - 1953/54 (DEUXIEME MOYENNE)
20 - DONNEES FOURNIES PAR LE MINISTERE DES FINANCES. ANIMAUX AYANT PLUS D UN AN
21 - ANIMAUX SOUMIS A L IMPOT
22 - POUR 1947/48-1952/53, LA DATE DU DENOMBREMENT MILIEU DE L ANNEE; DEPUIS 1953/54, DECEMBRE
23 - ANIMAUX AYANT PLUS D UN AN SOUMIS A L IMPOT
24 - RECENSEMENT CONTINU

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

FARM = ON FARMS AND ESTATES
VILL = VILLAGES

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
4 - 1948/49 (FIRST AVERAGE)
5 - ANIMALS OVER 6 MONTHS OLD
6 - 1947/48 (FIRST AVERAGE)
7 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
8 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
9 - ON AGRICULTURAL HOLDINGS
10 - INCLUDING MADEIRA
11 - 1955/56 (SECOND AVERAGE)
12 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
13 - 1949/50 (FIRST AVERAGE)
14 - 1950/51 (FIRST AVERAGE)
15 - 1951/52 (SECOND AVERAGE)
16 - 1951/52 (FIRST AVERAGE)
17 - 1954/55 (SECOND AVERAGE)
18 - 1952/53 (SECOND AVERAGE)
19 - TEXAS ONLY
20 - 1953/54 (SECOND AVERAGE)
21 - REGISTERED FOR TAXATION
22 - ON FARMS AND ESTATES
23 - ANIMALS OVER ONE YEAR OLD REGISTERED FOR TAXATION
24 - FROM 1956/57, ANIMALS REGISTERED FOR TAXATION ONLY

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

FERM = FERMES ET GRANDS DOMAINES
VILL = VILLAGES

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
4 - 1948/49 (PREMIERE MOYENNE)
5 - ANIMAUX AGES DE PLUS DE 6 MOIS
6 - 1947/48 (PREMIERE MOYENNE)
7 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
8 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
9 - DANS LES EXPLOITATIONS AGRICOLES
10 - Y COMPRIS MADERE
11 - 1955/56 (DEUXIEME MOYENNE)
12 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
13 - 1949/50 (PREMIERE MOYENNE)
14 - 1950/51 (PREMIERE MOYENNE)
15 - 1951/52 (DEUXIEME MOYENNE)
16 - 1951/52 (PREMIERE MOYENNE)
17 - 1954/55 (DEUXIEME MOYENNE)
18 - 1952/53 (DEUXIEME MOYENNE)
19 - SEULEMENT LE TEXAS
20 - 1953/54 (DEUXIEME MOYENNE)
21 - ANIMAUX SOUMIS A L IMPOT
22 - DANS LES FERMES ET GRANDS DOMAINES
23 - ANIMAUX AYANT PLUS D UN AN SOUMIS A L IMPOT
24 - DEPUIS 1956/57, ANIMAUX SOUMIS A L IMPOT SEULEMENT

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - 1947/48 (FIRST AVERAGE)
4 - 1955/56 (SECOND AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
7 - 1951/52 (SECOND AVERAGE)
8 - FROM YEAR 1947/48 TO 1952/53, DATE OF ENUMERATION MIDYEAR; FROM 1953/54 ONWARD, DECEMBER
9 - 1951/52 (FIRST AVERAGE)

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
3 - 1947/48 (PREMIERE MOYENNE)
4 - 1955/56 (DEUXIEME MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
7 - 1951/52 (DEUXIEME MOYENNE)
8 - POUR 1947/48-1952/53, LA DATE DU DENOMBREMENT MILIEU DE L ANNEE; DEPUIS 1953/54, DECEMBRE
9 - 1951/52 (PREMIERE MOYENNE)

NOTE- SPLIT YEARS OCTOBER/SEPTEMBER.
DATE OF ENUMERATION (MONTH) IS INDICATED UNDER THE NAME OF THE COUNTRIES.

1 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
2 - FROM 1947/48 TO 1958/59 LAYING HENS ONLY
3 - 1949/50 (FIRST AVERAGE)
4 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
5 - ADULT BIRDS
6 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
7 - ADULT BIRDS.INCLUDES GUINEA FOWL.
8 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
9 - INCLUDES GEESE AND TURKEYS
10 - INCLUDES GUINEA FOWL
11 - 1953/54 (SECOND AVERAGE)
12 - 1951/52 (SECOND AVERAGE)
13 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
14 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
15 - INCLUDES GEESE
16 - ON AGRICULTURAL HOLDINGS
17 - 1948/49 (FIRST AVERAGE)
18 - INCLUDING MADEIRA
19 - 1954/55 (SECOND AVERAGE)
20 - FROM 1947/48 TO 1959/60 DATE OF ENUMERATION IS APRIL
21 - 1951/52 (FIRST AVERAGE)
22 - LAYING HENS ONLY
23 - FROM 1947/48 TO 1956/57 DATE OF ENUMERATION IS OCTOBER
24 - 1952/53 (SECOND AVERAGE)
25 - 1950/51 (FIRST AVERAGE)
26 - ON AGRICULTURAL HOLDINGS. FROM 1962/63 ONWARD, INCLUDING ALASKA AND HAWAII
27 - 1955/56 (SECOND AVERAGE)
28 - MAJOR PRODUCERS ONLY
29 - 1947/48 (FIRST AVERAGE)
30 - ON FARMS AND ESTATES
31 - INCLUDING PAPUA

NOTE- ANNEES FRACTIONNEES OCTOBRE/SEPTEMBRE.
LA DATE DU DENOMBREMENT (MOIS) EST INDIQUEE AU-DESSOUS DES NOMS DES PAYS.

1 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
2 - POUR 1947/48-1958/59, POULES PONDEUSES SEULEMENT
3 - 1949/50 (PREMIERE MOYENNE)
4 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
5 - VOLAILLES ADULTES
6 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
7 - VOLAILLES ADULTES.Y COMPRIS LES PINTADES
8 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
9 - Y COMPRIS LES OIES ET LES DINDONS
10 - Y COMPRIS LES PINTADES
11 - 1953/54 (DEUXIEME MOYENNE)
12 - 1951/52 (DEUXIEME MOYENNE)
13 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
14 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
15 - Y COMPRIS LES OIES
16 - DANS LES EXPLOITATIONS AGRICOLES SEULEMENT
17 - 1948/49 (PREMIERE MOYENNE)
18 - Y COMPRIS MADERE
19 - 1954/55 (DEUXIEME MOYENNE)
20 - 1947/48-1959/60, DATE DU DENOMBREMENT, AVRIL
21 - 1951/52 (PREMIERE MOYENNE)
22 - POULES PONDEUSES SEULEMENT
23 - 1947/48-1956/57, DATE DU DENOMBREMENT, OCTOBRE
24 - 1952/53 (DEUXIEME MOYENNE)
25 - 1950/51 (PREMIERE MOYENNE)
26 - DANS LES EXPLOITATIONS AGRICOLES.A PARTIR DE 1962/63 Y COMPRIS ALASKA ET HAWAII
27 - 1955/56 (DEUXIEME MOYENNE)
28 - PRODUCTEURS SUR GRANDE ECHELLE SEULEMENT
29 - 1947/48 (PREMIERE MOYENNE)
30 - DANS LES FERMES ET GRANDS DOMAINES
31 - Y COMPRIS PAPOUASIE

TABLE 115- MEAT- BEEF AND VEAL, MUTTON AND LAMB, AND PORK- PRODUCTION FROM SLAUGHTERED ANIMALS.

1000 METRIC TONS

TABLEAU 115- VIANDE- BOEUF ET VEAU, MOUTON ET AGNEAU, ET PORC- PRODUCTION DES ANIMAUX ABATTUS.

B = BEEF, VEAL, AND BUFFALO MEAT.

M = MUTTON AND LAMB, INCLUDING GOAT MEAT.

P = PORK, INCLUDING BACON AND HAM, IN FRESH EQUIVALENT

TOT. = TOTAL (B + M + P)
COM = COMMERCIAL PRODUCTION, EXCLUDING FARM SLAUGHTER.

INS = INSPECTED PRODUCTION, I.E. FROM ANIMALS SLAUGHTERED UNDER GOVERNMENTAL SUPERVISION.
NS = PRODUCTION NOT SPECIFIED. IT IS BELIEVED THAT IN MOST CASES THE FIGURES REFER TO INSPECTED OR COMMERCIAL PRODUCTION ONLY.
TOT = TOTAL PRODUCTION FROM BOTH COMMERCIAL AND FARM SLAUGHTER.

DATA ARE GIVEN IN TERMS OF CARCASS WEIGHT, EXCLUDING LARD.

B = VIANDE DE BOEUF ET DE VEAU, Y COMPRIS LA VIANDE DE BUFFLE.
M = VIANDE DE MOUTON ET D AGNEAU, Y COMPRIS LA VIANDE DE CHEVRE.
P = VIANDE DE PORC, Y COMPRIS LE BACON ET LE JAMBON, EN EQUIVALENT DE VIANDE FRAICHE
TOT. = TOTAL (B + M + P)
COM = PRODUCTION COMMERCIALE, A L EXCLUSION DE L ABATTAGE FAMILIAL.
INS = PRODUCTION SOUMISE A INSPECTION, C EST-A-DIRE DES ANIMAUX ABATTUS SOUS CONTROLE OFFICIEL.
NS = NON SPECIFIEE. ON PENSE QUE, POUR LA PLUPART DES PAYS, IL NE S AGIT QUE DE LA PRODUCTION SOUMISE A INSPECTION OU DE LA PRODUCTION COMMERCIAL.
TOT = PRODUCTION TOTALE, COMPRENANT LA VIANDE PROVENANT DE L ABATTAGE FAMILIAL AUSSI BIEN QUE COMMERCIAL.

LES DONNEES SONT EXPRIMEES EN POIDS CARCASSE; ELLES NE

	TOT.	1602	1827	2521	2578	2495	2427	2590	TOT.

B = BEEF, VEAL, AND BUFFALO MEAT.

M = MUTTON AND LAMB, INCLUDING GOAT MEAT.

P = PORK, INCLUDING BACON AND HAM, IN FRESH EQUIVALENT

TOT. = TOTAL (B + M + P)
COM = COMMERCIAL PRODUCTION, EXCLUDING FARM SLAUGHTER.

INS = INSPECTED PRODUCTION, I.E. FROM ANIMALS SLAUGHTERED UNDER GOVERNMENTAL SUPERVISION.
NS = PRODUCTION NOT SPECIFIED. IT IS BELIEVED THAT IN MOST CASES THE FIGURES REFER TO INSPECTED OR COMMERCIAL PRODUCTION ONLY.
TOT = TOTAL PRODUCTION FROM BOTH COMMERCIAL AND FARM SLAUGHTER.

DATA ARE GIVEN IN TERMS OF CARCASS WEIGHT, EXCLUDING LARD, TALLOW AND OFFALS, EXCEPT AS OTHERWISE SPECIFIED, DATA REFER TO PRODUCTION FROM INDIGENOUS ANIMALS ONLY, INCLUDING WHERE APPLICABLE, THE MEAT EQUIVALENT OF EXPORTED LIVE ANIMALS.

TOTALS INCLUDE ALSO ESTIMATES OF TOTAL PRODUCTION FOR MOST OF THE COUNTRIES REPORTING ONLY COMMERCIAL OR INSPECTED.

B = VIANDE DE BOEUF ET DE VEAU, Y COMPRIS LA VIANDE DE BUFFLE.
M = VIANDE DE MOUTON ET D AGNEAU, Y COMPRIS LA VIANDE DE CHEVRE.
P = VIANDE DE PORC, Y COMPRIS LE BACON ET LE JAMBON, EN EQUIVALENT DE VIANDE FRAICHE
TOT. = TOTAL (B + M + P).
COM = PRODUCTION COMMERCIALE, A L EXCLUSION DE L ABATTAGE FAMILIAL.
INS = PRODUCTION SOUMISE A INSPECTION, C EST-A-DIRE DES ANIMAUX ABATTUS SOUS CONTROLE OFFICIEL.
NS = NON SPECIFIEE. ON PENSE QUE, POUR LA PLUPART DES PAYS, IL NE S AGIT QUE DE LA PRODUCTION SOUMISE A INSPECTION OU DE LA PRODUCTION COMMERCIALE.
TOT = PRODUCTION TOTALE, COMPRENANT LA VIANDE PROVENANT DE L ABATTAGE FAMILIAL AUSSI BIEN QUE COMMERCIAL.

LES DONNEES SONT EXPRIMEES EN POIDS CARCASSE; ELLES NE COMPRENNENT PAS LE SAINDOUX, LE SUIF NI LES ABATS, SAUF INDICATION CONTRAIRE. LES CHIFFRES SE RAPPORTENT UNIQUEMENT A LA PRODUCTION PROVENANT D ANIMAUX INDIGENES ET COMPRENNENT, LE CAS ECHEANT, L EQUIVALENT EN VIANDE DES ANIMAUX EXPORTES SUR PIED.
LES TOTAUX COMPRENNENT EGALEMENT DES ESTIMATIONS DE LA PRODUCTION TOTALE POUR LA PLUPART DES PAYS QUI DONNENT SEULEMENT LA RODUCTION COMMERCIALE OU SOUMISE A INSPECTION.

1 - INCLUDING SLAUGHTER FATS
2 - INCLUDING SLAUGHTER FATS AND EDIBLE OFFALS
3 - INCLUDING LARD
4 - ADJUSTED FROM LIVE WEIGHT TO CARCASS WEIGHT
5 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
6 - 1950 (FIRST AVERAGE)
7 - YEAR ENDING 30 SEPTEMBER
8 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
9 - INCLUDING FATS

1 - Y COMPRIS LES GRAISSES D ABATTAGE
2 - Y COMPRIS LES ABATS COMESTIBLES ET LES GRAISSES D ABATTAGE
3 - Y COMPRIS LE SAINDOUX
4 - POIDS CARCASSE CALCULE A PARTIR DU POIDS VIF
5 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
6 - 1950 (PREMIERE MOYENNE)
7 - ANNEE FINISSANT LE 30 SEPTEMBRE
8 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
9 - Y COMPRIS LES GRAISSES

TABLE 116- MEAT- BEEF AND VEAL, MUTTON AND LAMB, AND PORK- PRODUCTION FROM INDIGENOUS ANIMALS.

NOTE- DATA ON HORSE MEAT ARE GIVEN IN TERMS OF CARCASS WEIGHT (THUS EXCLUDING TALLOW AND OFFALS); POULTRY MEAT DATA ARE GENERALLY GIVEN IN TERMS OF DRESSED WEIGHT. OFFAL REFERS ONLY TO EDIBLE OFFAL, AND MEAT FROM OTHER ANIMALS REFERS TO MEAT PRODUCED FROM RABBITS, GAME, REINDER, CAMELS, AS APPLICABLE. EDIBLE OFFAL REFERS TO THE ANIMALS SLAUGHTERED WITHIN NATIONAL BOUNDARIES. FOR THE COVERAGE OF OFFALS (COMMERCIAL, INSPECTED, ETC.) SEE THE NOTATION UNDER THE COUNTRY NAME IN TABLE 115.

1 - INCLUDING SLAUGHTER FATS
2 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
4 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
5 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
6 - 1956 (SECOND AVERAGE)
7 - INCLUDING EDIBLE OFFAL AND SLAUGHTER FATS
8 - 1950 (FIRST AVERAGE)
9 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
10 - LIVE WEIGHT
11 - INCLUDING MEAT FROM OTHER SMALL ANIMALS
12 - 1952 (SECOND AVERAGE)
13 - YEARS ENDING 30 SEPTEMBER
14 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
15 - 1952 (FIRST AVERAGE)
16 - YEARS ENDING 30 JUNE
17 - SLAUGHTER WEIGHT
18 - SLAUGHTER WEIGHT - INCLUDING HORSE MEAT
19 - 1949 (FIRST AVERAGE)
20 - INSPECTED PRODUCTION
21 - LIVE WEIGHT, YEAR ENDING 30 SEPTEMBER
22 - 1948 (FIRST AVERAGE)
23 - YEAR ENDING SEPTEMBER, ON FARMS AND ESTATES
24 - 1953 (SECOND AVERAGE)
25 - FROM 1948 TO 1957, ON FARMS AND ESTATES ONLY
26 - YEARS BEGINNING 1 JULY

NOTE- POUR LA VIANDE DE CHEVAL, LES DONNEES SONT EXPRIMEES EN POIDS CARCASSE (PAR CONSEQUENT SANS LE SUIF ET LES ABATS); POUR LA VOLAILLE, ELLES LE SONT EN GENERAL EN POIDS PARE. PAR ABATS, ON ENTEND SEULEMENT LES ABATS COMESTIBLES; PAR AUTRES VIANDES, CELLES DE LAPIN, DE RENNE, DE CHAMEAU OU LE GIBIER, SELON LE CAS. LES ABATS COMESTIBLES SE REFERENT AUX ANIMAUX ABATTUS DANS LE PAYS. POUR SAVOIR DE QUELLE PRODUCTION D ABATS COMESTIBLES IL S AGIT (COMMERCIALE, SOUMISE A INSPECTION, ETC.), SE REPORTER A L INDICATION DONNEE SOUS LES NOMS DES PAYS AU TABLEAU 115.

1 - Y COMPRIS LES GRAISSES D ABATTAGE
2 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
4 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
5 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
6 - 1956 (DEUXIEME MOYENNE)
7 - Y COMPRIS LES ABATS COMESTIBLES ET LES GRAISSES D ABATTAGE

A = CATTLE; B = CALVES; C = BUFFALOES; D = SHEEP;
E = LAMBS; F = GOATS; G = KIDS; H = PIGS; I = HORSES.

TOT = TOTAL; COM = COMMERCIAL; INS = INSPECTED;
NS = NOT SPECIFIED (SEE NOTE AT THE END OF TABLE 115).

CARCASS WEIGHTS GENERALLY EXCLUDE EDIBLE OFFAL, LARD, AND TALLOW.

1 - INCLUDING SLAUGHTER FATS
2 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
3 - 1952 (FIRST AVERAGE)
4 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - 1956 (SECOND AVERAGE)
7 - UP TO 1956, INCLUDING LAMBS
8 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
9 - AVERAGE OF 2 YEARS (SECOND AVERAGE)

A = GROS BOVINS; B = VEAUX; C = BUFFLES; D = MOUTONS;
E = AGNEAUX; F = CHEVRES; G = CHEVREAUX; H = PORCINS;
I = CHEVAUX.
TOT = TOTALE; COM = COMMERCIALE; INS = SOUMISE A INSPECTION;
NS = NON SPECIFIEE (VOIR LA NOTE A LA FIN DU TABLEAU 115).

LE POIDS CARCASSE NE COMPREND PAS, EN GENERAL, LES ABATS COMESTIBLES, LE SAINDOUX ET LE SUIF.

1 - Y COMPRIS LES GRAISSES D ABATTAGE
2 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
3 - 1952 (PREMIERE MOYENNE)
4 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - 1956 (DEUXIEME MOYENNE)
7 - JUSQU A 1956, Y COMPRIS LES AGNEAUX
8 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
9 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)

TABLE 119- AVERAGE CARCASS WEIGHT

KILOGRAMS

10 - INCLUDING LARD
11 - 1952 (SECOND AVERAGE)
12 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
13 - INCLUDING LAMBS
14 - REFER TO ANIMALS SLAUGHTERED IN PUBLIC SLAUGHTER HOUSES
15 - RELATES TO 1959 (63)
16 - RELATES TO 1962 (63)
17 - 1955 (SECOND AVERAGE)
18 - RELATES TO 1961 (63)
19 - EXCLUDING ALASKA AND HAWAII
20 - 1953 (SECOND AVERAGE)
21 - COVERAGE IS FOR 70 TOWNS ONLY WITH A POPULATION OF A LITTLE OVER 2 MILLION
22 - RELATES TO 1958 (63)
23 - 1949 (FIRST AVERAGE)
24 - 1948 (FIRST AVERAGE)
25 - YEAR BEGINNING 1 MARCH
26 - 1951 (FIRST AVERAGE)
27 - ON FARMS AND ESTATES-INCLUDING GOATS

28 - YEAR ENDING 30 SEPTEMBER - ON FARMS AND ESTATES

29 - ON FARMS AND ESTATES
30 - YEAR BEGINNING 1 JULY
31 - YEAR ENDING 30 SEPTEMBER

TABLEAU 119- POIDS CARCASSE MOYEN

KILOGRAMMES

10 - Y COMPRIS LE SAINDOUX
11 - 1952 (DEUXIEME MOYENNE)
12 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
13 - Y COMPRIS LES AGNEAUX
14 - LES DONNEES SE RAPPORTENT AUX ANIMAUX ABATTUS DANS LES ABATTOIRS PUBLICS
15 - LE CHIFFRE SE RAPPORTE A 1959 (63)
16 - LE CHIFFRE SE RAPPORTE A 1962 (63)
17 - 1955 (DEUXIEME MOYENNE)
18 - LE CHIFFRE SE RAPPORTE A 1961 (63)
19 - A L EXCLUSION D ALASKA ET HAWAII
20 - 1953 (DEUXIEME MOYENNE)
21 - LES DONNEES SE RAPPORTENT A 70 VILLES DONT LA POPULATION TOTALE NE DEPASSE GUERE 2 MILLIONS
22 - LE CHIFFRE SE RAPPORTE A 1958 (63)
23 - 1949 (PREMIERE MOYENNE)
24 - 1948 (PREMIERE MOYENNE)
25 - ANNEES COMMENCANT LE 1 MARS
26 - 1951 (PREMIERE MOYENNE)
27 - DANS LES FERMES ET GRANDS DOMAINES-Y COMPRIS LES CHEVRES
28 - ANNEES FINISSANT LE 30 SEPTEMBRE-DANS LES FERMES ET GRANDS DOMAINES
29 - DANS LES FERMES ET GRANDS DOMAINES
30 - ANNEES COMMENCANT LE 1 JUILLET
31 - ANNEES FINISSANT LE 30 SEPTEMBRE

TABLE 121- PRODUCTION OF EDIBLE PIG FAT

100 METRIC TONS

TABLEAU 121- PRODUCTION DE GRAISSE DE PORC COMESTIBLE

100 TONNES METRIQUES

A = QUANTITIES REPORTED AS UNRENDERED PIG FAT
B = QUANTITIES REPORTED AS LARD AND/OR RENDERED PIG FAT

T = TOTAL (A + B)

1 - COMMERCIAL PRODUCTION
2 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
4 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
5 - 1955 (SECOND AVERAGE)
6 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
7 - YEAR ENDING 30 JUNE
8 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
9 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
10 - 1952 (FIRST AVERAGE)
11 - 1948 (FIRST AVERAGE)
12 - 1952 (SECOND AVERAGE)
13 - ON FARMS AND ESTATES
14 - YEARS ENDING 30 SEPTEMBER

A = QUANTITES DECLAREES COMME GRAISSE DE PORC NON FONDUE
B = QUANTITES DECLAREES COMME SAINDOUX OU GRAISSE DE PORC FONDUE
T = TOTALE (A + B)

1 - PRODUCTION COMMERCIALE
2 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
4 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
5 - 1955 (DEUXIEME MOYENNE)
6 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
7 - ANNEE FINISSANT LE 30 JUIN
8 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
9 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
10 - 1952 (PREMIERE MOYENNE)
11 - 1948 (PREMIERE MOYENNE)
12 - 1952 (DEUXIEME MOYENNE)
13 - DANS LES FERMES ET GRANDS DOMAINES
14 - ANNEES FINISSANT LE 30 SEPTEMBRE

F = ON FARMS AND ESTATES
V = VILLAGES

NOTE- MILK PRODUCTION GENERALLY EXCLUDES MILK SUCKED BY YOUNG ANIMALS BUT INCLUDES MILK FED TO THEM.

1 - INCLUDING MILK SUCKED BY YOUNG ANIMALS
2 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
4 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - 1952 (SECOND AVERAGE)
7 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
8 - 1952 (FIRST AVERAGE)
9 - 1956 (SECOND AVERAGE)
10 - INCLUDING BUFFALO MILK
11 - INCLUDING GOAT MILK
12 - MILK DELIVERED TO DAIRIES
13 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
14 - 1948 (FIRST AVERAGE)
15 - 1950 (FIRST AVERAGE)
16 - 1954 (SECOND AVERAGE)
17 - YEAR ENDING 30 JUNE
18 - FROM 1961 ONWARD, INCLUDING ALASKA AND HAWAII
19 - YEARS BEGINNING 1 APRIL
20 - YEARS ENDING 31 JULY
21 - 1951 (FIRST AVERAGE)
22 - 1949 (FIRST AVERAGE)
23 - YEAR ENDING 30 SEPTEMBER
24 - YEARS ENDING 30 JUNE.EXCLUDES MILK FED TO LIVESTOCK. PRODUCTION ON FARMS AND ESTATES ONLY
25 - 1953 (SECOND AVERAGE)
26 - YEAR BEGINNING 1 JULY
27 - INCLUDING PAPUA-INCLUDING GOAT MILK
28 - FROM 1948 THROUGH 1960 YEARS ENDING 30 JUNE;FROM 1961 ONWARD YEARS ENDING 31 MAY

F = FERMES ET GRANDS DOMAINES
V = VILLAGES

NOTE- LA PRODUCTION NE TIENT GENERALEMENT PAS COMPTE DU LAIT TETE AU PIS PAR LES VEAUX, MAIS TIENT COMPTE DU LAIT AUTREMENT FOURNI A CES ANIMAUX.

1 - Y COMPRIS LE LAIT TETE AU PIS PAR LES JEUNES ANIMAUX

A = HORSE HIDES; B = CATTLE AND BUFFALO HIDES; C = CALF SKINS; D = SHEEP SKINS; E = GOAT SKINS; F = PIG SKINS; G = CAMEL HIDES.

FRS = RAW, FRESH
SAL = SALTED
DRY = DRY
NS = UNSPECIFIED

IN THE CASE OF SOME COUNTRIES, IT IS NOT CLEAR WHETHER CATTLE HIDES INCLUDE CALFSKINS, AND WHETHER LAMBSKINS ARE INCLUDED IN SHEEPSKINS AND GOATSKINS.

A = PEAUX DE CHEVAL; B = PEAUX DE BOVINS ET DE BUFFLES; C = PEAUX DE VEAU; D = PEAUX DE MOUTON; E = PEAUX DE CHEVRE; F = PEAUX DE PORC; G = PEAUX DE CHAMEAU.

FRS = BRUTES, FRAICHES
SAL = SALEES
DRY = SECHEES
NS = NON SPECIFIEES

DANS LE CAS DE CERTAINS PAYS, ON IGNORE SI LES PEAUX DE BOVINS COMPRENNENT CELLES DE VEAU ET SI LES PEAUX D AGNEAU ET DE CHEVREAU SONT COMPRISES DANS CELLES DE MOUTON ET DE CHEVRE.

A = HORSE HIDES; B = CATTLE AND BUFFALO HIDES; C = CALF SKINS; D = SHEEP SKINS; E = GOAT SKINS; F = PIG SKINS; G = CAMEL HIDES.

FRS = RAW, FRESH
SAL = SALTED
DRY = DRY
NS = UNSPECIFIED

IN THE CASE OF SOME COUNTRIES, IT IS NOT CLEAR WHETHER CATTLE HIDES INCLUDE CALFSKINS, AND WHETHER LAMBSKINS ARE INCLUDED IN SHEEPSKINS AND GOATSKINS.

1 - AVERAGE OF 3 YEARS (SECOND AVERAGE)

A = PEAUX DE CHEVAL; B = PEAUX DE BOVINS ET DE BUFFLES; C = PEAUX DE VEAU; D = PEAUX DE MOUTON; E = PEAUX DE CHEVRE; F = PEAUX DE PORC; G = PEAUX DE CHAMEAU.

FRS = BRUTES, FRAICHES
SAL = SALEES
DRY = SECHEES
NS = NON SPECIFIEES

DANS LE CAS DE CERTAINS PAYS, ON IGNORE SI LES PEAUX DE BOVINS COMPRENNENT CELLES DE VEAU ET SI LES PEAUX D AGNEAU ET DE CHEVREAU SONT COMPRISES DANS CELLES DE MOUTON ET DE CHEVRE.

1 = MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)

TABLE 134B- PRODUCTION OF HIDES AND SKINS (NUMBER)

THOUSANDS

2 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
3 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
4 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
5 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
6 - INCLUDING CALFSKINS
7 - INCLUDING LAMBSKINS
8 - 1952 (FIRST AVERAGE)
9 - INCLUDING GOATSKINS
10 - PURCHASED BY SOCIALIZED COMMERCIAL ORGANIZATIONS
11 - DOMESTICALLY PRODUCED HIDES AND SKINS USED BY TANNING INDUSTRY
12 - INCLUDING KIPS
13 - 1952 (SECOND AVERAGE)
14 - RECORDED SALES
15 - RECORDED SALES-INCLUDING LAMBSKINS
16 - 1956 (SECOND AVERAGE)
17 - RELATES TO 1961 (63)
18 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
19 - INCLUDING KIDSKINS
20 - RELATES TO 1962 (63)
21 - EXPORTS
22 - EXPORTS-INCLUDING GOATSKINS
23 - 1950 (FIRST AVERAGE)
24 - 1955 (SECOND AVERAGE)
25 - YEARS BEGINNING 1 JULY
26 - YEARS BEGINNING 1 JULY - INCLUDING LAMBSKINS
27 - EXPORTS-INCLUDING CALFSKINS

TABLEAU 134B- PRODUCTION DE CUIRS ET PEAUX (NOMBRE)

MILLIERS

2 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
3 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
4 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
5 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
6 - Y COMPRIS LES PEAUX DE VEAU
7 - Y COMPRIS LES PEAUX D AGNEAU
8 - 1952 (PREMIERE MOYENNE)
9 - Y COMPRIS LES PEAUX DE CHEVRE
10 - ACHATS EFFECTUES PAR DES ORGANISATIONS COMMERCIALES SOCIALISEES
11 - CUIRS ET PEAUX DE PRODUCTION NATIONALE UTILISES PAR LES TANNERIES
12 - Y COMPRIS LES KIPS
13 - 1952 (DEUXIEME MOYENNE)
14 - VENTES ENREGISTREES
15 - VENTES ENREGISTREES-Y COMPRIS LES PEAUX D AGNEAU
16 - 1956 (DEUXIEME MOYENNE)
17 - LE CHIFFRE SE RAPPORTE A 1961 (63)
18 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
19 - Y COMPRIS LES PEAUX DE CHEVREAU
20 - LE CHIFFRE SE RAPPORTE A 1962 (63)
21 - EXPORTATIONS
22 - EXPORTATIONS- Y COMPRIS LES PEAUX DE CHEVRE
23 - 1950 (PREMIERE MOYENNE)
24 - 1955 (DEUXIEME MOYENNE)
25 - ANNEES COMMENCANT LE 1 JUILLET
26 - ANNEES COMMENCANT LE 1 JUILLET- Y COMPRIS LES PEAUX D AGNEAU
27 - EXPORTATIONS - Y COMPRIS LES PEAUX DE VEAU

T - TENTATIVE DATA.

1 - SPLIT YEARS ARE INDICATED BY A STROKE, E.G. 1951/-53/ INDICATES 1951/52-1953/54.

2 - IN TERMS OF FLOUR AND MILLED RICE

3 - BOLIVIA INCLUDES BANANAS AND PLANTAINS UNDER STARCHY FOODS. COSTA RICA, DOMINICAN REPUBLIC, ECUADOR, EL SALVADOR, GUATEMALA, HONDURAS, JAMAICA, MEXICO, NICARAGUA, PANAMA, SURINAM, VENEZUELA, CAMEROON, GABON, GHANA, IVORY COAST, KENIA, MADAGASCAR, TANGANYIKA, UGANDA INCLUDE PLANTAINS UNDER STARCHY FOODS. PERU INCLUDES PLANTAINS STARTING WITH 1960-62, AND BANANAS STARTING WITH 1966. MALAYA-SINGAPORE INCLUDES BANANAS UNDER STARCHY FOODS.

4 - IN TERMS OF REFINED SUGAR; INCLUDING CRUDE SUGAR, SYRUPS, HONEY AND OTHER SUGAR PRODUCTS.

5 - SHELLED EQUIVALENT FOR NUTS; INCLUDING COCOA BEANS. CHINA (TAIWAN) INCLUDES SOYBEAN CURD IN TERMS OF SOYBEAN. JAPAN INCLUDES -MISO- AND -SHOYU- (SOYBEAN PREPARATIONS) IN TERMS OF SOYBEAN. JAPAN UP TO 1953 IN TERMS OF EDIBLE WEIGHT.

6 - IN TERMS OF FRESH EQUIVALENT; INCLUDING PROCESSED VEGETABLES.

7 - IN TERMS OF FRESH EQUIVALENT; INCLUDING PROCESSED FRUITS.

8 - INCLUDING POULTRY AND GAME; EXPRESSED IN TERMS OF DRESSED CARCASS WEIGHT, INCLUDING EDIBLE OFFALS.

9 - IN TERMS OF FRESH EQUIVALENT.

10- ESTIMATED EDIBLE WEIGHT.

11- MILK AND MILK PRODUCTS EXCLUDING BUTTER, EXPRESSED IN TERMS OF FRESH MILK. HOWEVER U.A.R., INDIA, AND PAKISTAN INCLUDE MILK FOR MAKING BUTTER.

12- U.A.R., INDIA AND PAKISTAN EXCLUDE BUTTER. IRELAND EXCLUDES MARINE OILS AND FATS FOR 1963-65 AND 1967.

13- UP TO 1958/59 EXCLUDING THE SAAR.

14- REFERS TO FISCAL YEAR, APRIL-MARCH.

15- SPLIT YEARS STARTING WITH 1959/60.

16- DATA ON CONSUMPTION OF COCONUTS, BANANAS AND PLANTAINS INCLUDE INDIAN JUNGLE POPULATION.

17- DATA RELATE TO AN AREA COVERING 87% OF THE POPULATION.

T - CHIFFRES SUJETS A REVISION.

1 - LES ANNEES SOUS FORME FRACTIONNEE, P. E. 1951/-53/ SIGNIFIE 1951/52-1953/54.

2 - EN EQUIVALENT DE FARINE ET DE RIZ USINE.

3 - LA BOLIVIE COMPREND LES BANANES ET LES PLANTAINS DANS LES FECULENTS. COSTA RICA, REP. DOMINICAINE, EL SALVADOR, EQUATEUR, GUATEMALA, HONDURAS, JAMAIQUE, MEXIQUE, NICARAGUA PANAMA, SURINAM, VENEZUELA, CAMEROUN, GABON, GHANA, COTE-IVOIRE, KENYA, MADAGASCAR, TANGANYIKA, OUGANDA COMPRENNENT LES PLANTAINS DANS LES FECULENTS. PERU COMPREND LES PLANTAI DEPUIS 1960-62, ET LES BANANES DEPUIS 1966. MALAYSIE-SINGAP COMPREND LES BANANES DANS LES FECULENTS.

4 - EN EQUIVALENT DE SUCRE RAFFINE; COMPREND LE SUCRE BRUT, LES SIROPS, LE MIEL ET LES AUTRES PRODUITS SUCRES.

5 - NOIX ECALEES; Y COMPRIS LES FEVES DE CACAO. LA CHINE (TAIWAN COMPREND LE CAILLE DE SOYA EN EQUIVALENT DE SOYA. LE JAPON COMPREND LE -MISO- ET LE -SHOYU-(PREPARATIONS A BASE DE SOY EN EQUIVALENT DE SOYA. LE JAPON JUSQU EN 1953 EN EQUIVALENT DU POIDS DE LA PARTIE COMESTIBLE.

6 - EN EQUIVALENT DE LEGUMES FRAIS, Y COMPRIS LES LEGUMES TRAITES.

7 - EN EQUIVALENT DE FRUITS FRAIS, Y COMPRIS LES FRUITS TRAITES

8 - COMPREND LA VOLAILLE ET LE GIBIER; CHIFFRES EXPRIMES EN POI CARCASSE HABILLEE, Y COMPRIS LES ABATS COMESTIBLES.

9 - EN EQUIVALENT D OEUFS FRAIS.

10- ESTIMATION DU POIDS DE LA PARTIE COMESTIBLE.

11- LAIT ET PRODUITS LAITIERS,AUTRES QUE LE BEURRE, EN EQUIVALE DE LAIT FRAIS; A L EXCLUSION DE LA R.A.U. DE L INDE ET DU P KISTAN QUI COMPRENNENT LE LAIT UTILISE EN BEURRERIE.

12- LA R.A.U., L INDE ET LE PAKISTAN NE COMPRENNENT PAS LE BEUR L IRLANDE NE COMPREND PAS LES HUILES ET GRAISSES PROVENANT D ANIMAUX MARINS POUR 1963-65 ET 1967.

13- JUSQU EN 1958/59, SARRE EXCLUE.

14- EXERCICE FINANCIER , AVRIL-MARS.

15- ANNEES FRACTIONNEES A PARTIR DE 1959/60.

16- LES DONNEES SUR LA CONSOMMATION DE NOIX DE COCOS, DE BANANE ET DES PLANTAINS COMPRENNENT CELLES DE LA POPULATION VIVANT DANS LA JUNGLE.

17- LES DONNEES SE RAPPORTENT A UNE SUPERFICE OU VIVENT 87% DE POPULATION.

NOTE- SPLIT YEARS JULY-JUNE.

1 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
2 - FROM 1948/49 TO 1958/59 TOTAL PRODUCTION OF PRIMARY AMMONIA
3 - FERTILIZER YEAR AUGUST-JULY 64/5 65/6 66/7 67/8
4 - FERTILIZER YEAR MAY-APRIL. INCLUDES PRODUCTION FOR TECHNICAL PURPOSES (48/49 TO 63/64)
5 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
6 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
7 - 1950/51 (FIRST AVERAGE)
8 - 1955/56 (SECOND AVERAGE)
9 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
10 - FERTILIZER YEAR JUNE-MAY
11 - FERTILIZER YEAR JUNE-MAY 64/5 65/6 66/7 67/68
12 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
13 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
14 - PRODUCTION OF 3753000 METRIC TONS OF NITROGEN AS OFFICIALY REPORTED FOR 1967 WAS ASSUMED TO INCLUDE ALSO TECHNICAL NITROGEN
15 - PRODUCTION FOR FERTILIZER PURPOSES
16 - EXCLUDING SODIUM NITRATE
17 - 1952/53 (FIRST AVERAGE)
18 - 1956/57 (SECOND AVERAGE)
19 - GUANO
20 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5 65/6
21 - AVERAGE OF 2 YEARS (FIRST AVERAGE)

NOTE- ANNEES FRACTIONNEES JUILLET-JUIN.

1 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
2 - DEPUIS 1948/49 JUSQU A 1958/59 PRODUCTION TOTALE D AMMONIAQUE
3 - CAMPAGNE AOUT-JUILLET 64/5 65/6 66/7 67/8
4 - CAMPAGNE MAI-AVRIL. Y COMPRIS LA PRODUCTION UTILISEE A DES FINS TECHNIQUES (48/49 A 63/64)
5 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
6 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
7 - 1950/51 (PREMIERE MOYENNE)
8 - 1955/56 (DEUXIEME MOYENNE)
9 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
10 - CAMPAGNE JUIN-MAI
11 - CAMPAGNE JUIN-MAI 64/5 65/6 66/7 67/68
12 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
13 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
14 - LES DONNEES OFFICIELLES POUR 1967 DE 3753000 TONNES DE NITROGENE SONT SUPPOSEES COMPRENDRE DES QUANTITES UTILISEES A DES FINS TECHNIQUES
15 - DESTINE A LA FABRICATION D ENGRAIS
16 - NON COMPRIS NITRATE DE SODIUM
17 - 1952/53 (PREMIERE MOYENNE)
18 - 1956/57 (DEUXIEME MOYENNE)
19 - GUANO
20 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 64/5 65/6
21 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)

NOTE - SPLIT YEARS JULY-JUNE

1 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
2 - 1952/53 (FIRST AVERAGE)
3 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
4 - FERTILIZER YEAR AUGUST-JULY
5 - FERTILIZER YEAR MAY-APRIL 48/49 TO 63/64
6 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
7 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
8 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
9 - 1950/51 (FIRST AVERAGE)
10 - 1955/56 (SECOND AVERAGE)
11 - FERTILIZER YEAR JUNE-MAY
12 - DELIVERIES BY MANUFACTURERS TO FIRST BUYERS AND DELIVERIES OF IMPORTED FERTILIZERS, WHETHER FOR STRAIGHT APPLICATION OR FOR FURTHER PROCESSING BY OTHER MANUFACTURERS INTO COMPOUNDS
13 - FERTILIZER YEAR JUNE-MAY 64/5 65/6 66/7 67/68
14 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
15 - FERTILIZER YEAR APRIL-MARCH
16 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
17 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 66/7 67/8
18 - 1952/53 (SECOND AVERAGE)
19 - INCLUDES HAWAII AND PUERTO RICO
20 - 1949/50 (FIRST AVERAGE)
21 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 65/6 66/7
22 - JANUARY - OCTOBER ONLY 67/8
23 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5 65/6 66/7 67/8
24 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 67/8
25 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 67/8
26 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 65/6
27 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5
28 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 65/6 66/7 67/8
29 - FROM 1948/49 THROUGH 1966/67 INCLUDES MALAWI AND ZAMBIA. 1967/68 INCLUDES MALAWI
30 - FERTILIZER YEAR NOVEMBER-OCTOBER 63/64 66/7

NOTE- ANNEES FRACTIONNEES JUILLET-JUIN

1 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
2 - 1952/53 (PREMIERE MOYENNE)
3 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
4 - CAMPAGNE AOUT-JUILLET
5 - CAMPAGNE MAI-AVRIL 48/49 A 63/64
6 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
7 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
8 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
9 - 1950/51 (PREMIERE MOYENNE)
10 - 1955/56 (DEUXIEME MOYENNE)
11 - CAMPAGNE JUIN-MAI
12 - LIVRAISONS DES FABRICANTS AUX PREMIERS ACHETEURS ET LIVRAISONS D ENGRAIS IMPORTES DESTINES SOIT A L APPLICATION DIRECTE, SOIT A LA TRANSFORMATION EN ENGRAIS COMPOSES PAR D AUTRES FABRICANTS
13 - CAMPAGNE JUIN-MAI 64/5 65/6 66/7 67/68
14 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
15 - CAMPAGNE AVRIL-MARS
16 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
17 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 66/7 67/8
18 - 1952/53 (DEUXIEME MOYENNE)
19 - Y COMPRIS HAWAII ET PORTO RICO
20 - 1949/50 (PREMIERE MOYENNE)
21 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 63/4 64/5 65/6 66/7
22 - JANVIER-OCTOBRE SEULEMENT 67/8
23 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 64/5 65/6 66/7 67/8
24 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 67/8
25 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 63/4 64/5 67/8
26 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 65/6
27 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 64/5
28 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 65/6 66/7 67/8
29 - DEPUIS 1948/49 JUSQU A 1966/67 Y COMPRIS MALAWI ET ZAMBIE.1967/68 Y COMPRIS MALAWI
30 - CAMPAGNE NOVEMBRE-OCTOBRE 63/4 66/7

NOTE- SPLIT YEARS JULY-JUNE
DATA EXCLUDE GROUND ROCK PHOSPHATE

1 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
2 - EXCLUDING OTHER CITRATE SOLUBLE PHOSPHATES
3 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
4 - 1948/49 (FIRST AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - FERTILIZER YEAR AUGUST-JULY
7 - FERTILIZER YEAR MAY-APRIL. INCLUDES PRODUCTION FOR TECHNICAL PURPOSES 48/49 TO 63/64
8 - FERTILIZER YEAR MAY-APRIL 64/5 65/6 66/7 67/8
9 - 1950/51 (FIRST AVERAGE)
10 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
11 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
12 - 1949/50 (FIRST AVERAGE)
13 - FERTILIZER YEAR JUNE-MAY
14 - FERTILIZER YEAR JUNE-MAY 64/5 65/6 66/7 67/8
15 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
16 - 1951/52 (FIRST AVERAGE)
17 - 1952/53 (FIRST AVERAGE)
18 - 1956/57 (SECOND AVERAGE)
19 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 66/7
20 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
21 - GUANO
22 - CALENDAR YEAR REFERRING TO THE FIRST PART OF SPLIT YEAR 64/5 65/6
23 - CALENDAR YEAR REFERRING TO THE FIRST PART OF SPLIT YEAR 65/6
24 - INCLUDES MALAWI AND ZAMBIA

NOTE- ANNEES FRACTIONNEES JUILLET-JUIN
LES DONNEES NE COMPRENNENT PAS LES PHOSPHATES NATURELS BROYES

1 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
2 - NON COMPRIS LES AUTRES PHOSPHATES SOLUBLES DANS LE CITRATE
3 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
4 - 1948/49 (PREMIERE MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - CAMPAGNE AOUT-JUILLET
7 - CAMPAGNE MAI-AVRIL. Y COMPRIS LA PRODUCTION UTILISEE A DES FINS TECHNIQUES 48/49 A 63/64
8 - CAMPAGNE MAI-AVRIL 64/5 65/6 66/7 67/8
9 - 1950/51 (PREMIERE MOYENNE)
10 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
11 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
12 - 1949/50 (PREMIERE MOYENNE)
13 - CAMPAGNE JUIN-MAI
14 - CAMPAGNE JUIN-MAI 64/5 65/6 66/7 67/8
15 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
16 - 1951/52 (PREMIERE MOYENNE)
17 - 1952/53 (PREMIERE MOYENNE)
18 - 1956/57 (DEUXIEME MOYENNE)
19 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 66/7
20 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
21 - GUANO
22 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 64/5 65/6
23 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 65/6
24 - Y COMPRIS MALAWI ET ZAMBIE

NOTE- SPLIT YEARS JULY-JUNE
DATA EXCLUDE GROUND ROCK PHOSPHATE

1 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
2 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
3 - EXCLUDING OTHER CITRATE SOLUBLE PHOSPHATES
4 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
5 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
6 - INCLUDES GROUND ROCK PHOSPHATE
7 - FERTILIZER YEAR AUGUST-JULY
8 - FERTILIZER YEAR MAY-APRIL
9 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
10 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
11 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
12 - 1950/51 (FIRST AVERAGE)
13 - FERTILIZER YEAR JUNE-MAY
14 - FIGURES COVER MANUFACTURERS DELIVERIES TO MERCHANTS OR TO FARMERS, WHETHER IN COMPOUND FORM OR STRAIGHT, PLUS IMPORTED FERTILIZERS DELIVERED FOR DIRECT APPLICATION
15 - FERTILIZER YEAR JUNE-MAY 64/5 65/6 66/7 67/8
16 - FERTILIZER YEAR APRIL-MARCH
17 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5 65/6 66/7 67/8
18 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 66/7 67/68
19 - 1952/53 (FIRST AVERAGE)
20 - 1952/53 (SECOND AVERAGE)
21 - 1949/50 (FIRST AVERAGE)
22 - INCLUDES HAWAII AND PUERTO RICO.FROM 1964/65 ONWARD, TOTAL P2O5 AVAILABLE
23 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 65/6 66/7
24 - JANUARY-OCTOBER ONLY 67/8
25 - 1953/54 (SECOND AVERAGE)
26 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 67/8
27 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 67/8
28 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 65/6
29 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5
30 - 1956/57 (SECOND AVERAGE)
31 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
32 - 1951/52 (FIRST AVERAGE)
33 - FROM 1948/49 THROUGH 1966/67 INCLUDES MALAWI AND ZAMBIA. 1967/68 INCLUDES MALAWI
34 - 1954/55 (SECOND AVERAGE)
35 - FERTILIZER YEAR NOVEMBER-OCTOBER 63/4 66/7

NOTE- ANNEES FRACTIONNEES JUILLET-JUIN
LES DONNEES NE COMPRENNENT PAS LES PHOSPHATES NATURELS BROYES

1 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE)
2 - MOYENNE DE 2 ANNEES (DEUXIEME MOYENNE)
3 - NON COMPRIS LES AUTRES PHOSPHATES SOLUBLES DANS LE CITRATE
4 - MOYENNE DE 2 ANNEES (PREMIERE MOYENNE)
5 - MOYENNE DE 3 ANNEES (DEUXIEME MOYENNE)
6 - Y COMPRIS LE PHOSPHATE NATUREL BROYE
7 - CAMPAGNE AOUT-JUILLET
8 - CAMPAGNE MAI-AVRIL
9 - MOYENNE DE 4 ANNEES (PREMIERE MOYENNE)
10 - MOYENNE DE 3 ANNEES (PREMIERE MOYENNE)
11 - MOYENNE DE 4 ANNEES (DEUXIEME MOYENNE)
12 - 1950/51 (PREMIERE MOYENNE)
13 - CAMPAGNE JUIN-MAI
14 - LES CHIFFRES COMPRENNENT LES LIVRAISONS DES FABRICANTS AUX NEGOCIANTS ET AUX AGRICULTEURS SOUS FORME D ENGRAIS COMPOSES OU DE PRODUITS SIMPLES, PLUS LES LIVRAISONS D ENGRAIS IMPORTES DESTINES A L APPLICATION DIRECTE
15 - CAMPAGNE JUIN-MAI 64/5 65/6 66/7 67/8
16 - CAMPAGNE AVRIL-MARS
17 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 64/5 65/6 66/7 67/8
18 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 66/7 67/8
19 - 1952/53 (PREMIERE MOYENNE)
20 - 1952/53 (DEUXIEME MOYENNE)
21 - 1949/50 (PREMIERE MOYENNE)
22 - Y COMPRIS HAWAII ET PORTO RICO. A PARTIR DE 1964/65 TOTAL P2O5 UTILISABLE
23 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 63/4 64/5 65/6 66/7
24 - JANVIER-OCTOBRE SEULEMENT 67/8
25 - 1953/54 (DEUXIEME MOYENNE)
26 - ANNEE CIVILE (PREMIER MILLESIME INDIQUE) 67/8

TABLE 144- COMMERCIAL POTASH FERTILIZERS - CONSUMPTION

100 METRIC TONS OF K20

NOTE- SPLIT YEARS JULY-JUNE

1 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR
2 - 1952/53 (SECOND AVERAGE)
3 - AVERAGE OF 2 YEARS (FIRST AVERAGE)
4 - AVERAGE OF 3 YEARS (SECOND AVERAGE)
5 - FERTILIZER YEAR AUGUST-JULY
6 - FERTILIZER YEAR MAY-APRIL
7 - AVERAGE OF 3 YEARS (FIRST AVERAGE)
8 - AVERAGE OF 4 YEARS (SECOND AVERAGE)
9 - 1950/51 (FIRST AVERAGE)
10 - 1955/56 (SECOND AVERAGE)
11 - FERTILIZER YEAR JUNE-MAY
12 - DELIVERIES BY MANUFACTURERS TO FIRST BUYERS AND DELIVERIES OF IMPORTED FERTILIZERS, WHETHER FOR STRAIGHT APPLICATION OR FOR FURTHER PROCESSING BY OTHER MANUFACTURERS INTO COMPOUNDS
13 - FERTILIZER YEAR JUNE-MAY 64/5 65/6 66/7 67/8
14 - FERTILIZER YEAR APRIL-MARCH
15 - AVERAGE OF 4 YEARS (FIRST AVERAGE)
16 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5 65/6 66/7 67/8
17 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 66/7 67/8
18 - 1952/53 (FIRST AVERAGE)
19 - AVERAGE OF 2 YEARS (SECOND AVERAGE)
20 - INCLUDES HAWAII AND PUERTO RICO
21 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 65/6 66/7
22 - JANUARY-OCTOBER ONLY 67/8
23 - 1953/54 (SECOND AVERAGE)
24 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 67/8
25 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 63/4 64/5 67/8
26 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 67/8
27 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 64/5
28 - 1956/57 (SECOND AVERAGE)
29 - CALENDAR YEAR REFERRING TO THE FIRST PART OF THE SPLIT YEAR 65/6
30 - 1951/52 (FIRST AVERAGE)
31 - FROM 1948/49 THROUGH 1966/67 INCLUDES MALAWI AND ZAMBIA. 1967/68 INCLUDES MALAWI
32 - FERTILIZER YEAR NOVEMBER-OCTOBER 63/4 66/7

[1] Initial payment only.

Producer prices

Argentina: On wagon, in port, Buenos Aires, government-fixed producer price; 1955 through 1960, 1962 through 1963 and from 1965, semi-hard; 1961 and 1964, hard; 1955 through 1959, grade 2; 1960, 1962 through 1963 and from 1965, grade 1; 1955 through 1959, bagged; from 1960, bulk.

Belgium: Average producer price, excluding taxes and premiums, leading markets.

Canada: No. 1 Northern, basis in store Fort William-Port Arthur, total realized price to producers for sales to the Canadian Wheat Board.

France: Domestic, fair average quality, including taxes and premiums where applicable; through July 1961, official base price to producers; August 1961-July 1962, minimum official base price to producers; from August 1962, government-guaranteed repurchase price.

Germany, Fed. Rep. of: Weighted average producer price for all types and sales.

Ireland: Government-fixed producer price for deliveries to grower's nearest shipping point or to purchaser's premises for certain bushelling weights; to June 1957, bushelling 60-63 lb; from July 1957, bushelling 61-62 lb; moisture 22-25 %.

Italy: Soft, producer price, Padua.

Japan: Government-fixed producer price, including package.

Netherlands: Average producer price; moisture 17 %.

South Africa: Class B, Grade 1, bagged, government-fixed producer price, f.o.r.

Sweden: Winter, normal quality, weighted average of government-fixed producer price, after deduction of farmers' contribution to crop failure insurance.

United Arab Republic: Middling Hindi, 94 % purity, government-fixed producer price.

United Kingdom: Weighted average producer price, including payments under Home Grown Cereals Deficiency Payments Scheme.

United States: Average producer price, including an allowance for unredeemed loans; not including, from 1964, domestic and export certificates of 70 and 25 cents respectively.

[1] Versement initial seulement.

Prix à la production

Argentine: Sur wagon, au port, Buenos Aires, prix officiel à la production; de 1955 à fin 1960, de 1962 à fin 1963 et depuis 1965, demi-dur; 1961 et 1964, dur; de 1955 à fin 1959, N° 2; 1960, de 1962 à fin 1963 et depuis 1965, N° 1; de 1955 à fin 1959, en sacs; depuis 1960, en vrac.

Belgique: Prix moyen à la production sur les marchés régulateurs du pays, taxes et primes non comprises.

Canada: N° 1, du Nord, en entrepôt, Fort William-Port Arthur, prix total réalisé par les producteurs pour ventes à la Commission canadienne du blé.

France: Tendre, loyal et marchand, récolte métropolitaine, taxes comprises et primes s'il y a lieu; jusqu'à fin juillet 1961, prix de base officiel à la production; août 1961-juillet 1962, prix minimum de base officiel à la production; depuis août 1962, prix de rétrocession garanti.

Allemagne, Rép. féd. d': Prix moyen pondéré à la production pour toutes les catégories et toutes les ventes.

Irlande: Prix officiel à la production du blé livré au centre d'expédition le plus proche de l'exploitation ou à l'entrepôt de l'acheteur, pour certains poids au bushel; jusqu'en juin 1957, 60-63 lb au bushel; depuis juillet 1957, 61-62 lb au bushel; humidité 22-25 %.

Italie: Blé tendre, prix à la production, Padoue.

Japon: Prix officiel à la production, y compris emballage.

Pays-Bas: Prix moyen à la production; 17 % d'humidité.

Afrique du Sud: Blé de première qualité de la catégorie B, en sacs, prix officiel à la production, franco gare.

Suède: Blé d'hiver de qualité normale, moyenne pondérée du prix officiel à la production, après déduction de la prime versée par les agriculteurs à l'assurance-récolte.

République arabe unie: « Middling Hindi », blé pur à 94 %, prix officiel à la production.

Royaume-Uni: Prix moyen pondéré à la production, y compris les versements au titre du *Home Grown Cereals Deficiency Payments Scheme*.

Etats-Unis: Prix moyen à la production, compte tenu des prêts non remboursés; non compris, depuis 1964, les certificats de commercialisation pour les ventes intérieures et pour l'exportation, de 70 et 25 cents respectivement.

PORCS
Australie: Prix à l'exportation. – Pays-Bas: Viande de porc, refroidie, fraîche, prix à l'exportation. – Nouvelle-Zélande: Viande de porc, fraîche, réfrigérée ou congelée, moyenne pondérée (de toutes qualités) des prix mensuels à l'exportation. – Pologne: Poids de la carcasse parée, moyenne annuelle pondérée des prix mensuels à l'exportation.

BACON
Pologne: Moyenne annuelle pondérée des prix mensuels à l'exportation.

JAMBON
Pologne: Moyenne annuelle pondérée des prix mensuels à l'exportation.

VOLAILLES
Pays-Bas: I - Poules, prix à l'exportation. II - Poulets et canards d'un jour, prix à l'exportation.

LAIT LIQUIDE
Pays-Bas: Entier et standardisé, frais, prix à l'exportation.

LAIT ÉVAPORÉ OU CONDENSÉ
Royaume-Uni: I - Evaporé ou condensé, séparé ou écrémé, moyenne simple des prix mensuels à l'exportation. II - Evaporé ou condensé, entier, sucré, moyenne simple des prix mensuels à l'exportation. III - Evaporé ou condensé, entier, non sucré, moyenne simple des prix mensuels à l'exportation.

MILK POWDER

Australia: Milk and cream dried or powdered, export price. – **United Kingdom**: I - Whole, simple average of monthly export prices. II - Other than whole, simple average of monthly export prices.

BUTTER

Australia: Export price. – **Kenya**: Fresh or salted and including melted, simple average of monthly export prices, f.o.b. Mombasa. – **Netherlands**: Export price. – **New Zealand**: Creamery, weighted average of monthly export prices. – **Sweden**: In kegs, export price.

CHEESE

Australia: Export price. – **Netherlands**: All kinds, export price. – **New Zealand**: Cheddar, finest first grade, weighted average of export prices.

CASEIN

New Zealand: Weighted average of monthly export prices.

EGGS

Australia: I - In shell, export price. II - Not in the shell, export price. – **Netherlands**: In shell, excluding hatching eggs, export price. – **Poland**: Weighted annual average of monthly export prices.

PYRETHRUM EXTRACT

Kenya: Simple average of monthly export prices.

LAIT EN POUDRE

Australie: Lait et crème secs ou en poudre, prix à l'exportation. – **Royaume-Uni**: I - Entier, moyenne simple des prix mensuels à l'exportation. II - Autre que entier, moyenne simple des prix mensuels à l'exportation.

BEURRE

Australie: Prix à l'exportation. – **Kenya**: Frais ou salé et y compris le beurre fondu, moyenne simple des prix mensuels à l'exportation, f.o.b. Mombasa. – **Pays-Bas**: Prix à l'exportation. – **Nouvelle-Zélande**: Beurre de beurrerie, moyenne pondérée des prix mensuels à l'exportation. – **Suède**: En barillets, prix à l'exportation.

FROMAGE

Australie: Prix à l'exportation. – **Pays-Bas**: Toutes qualités, prix à l'exportation. – **Nouvelle-Zélande**: Cheddar, surchoix, moyenne pondérée des prix à l'exportation.

CASÉINE

Nouvelle-Zélande: Moyenne pondérée des prix mensuels à l'exportation.

ŒUFS

Australie: I - En coquilles, prix à l'exportation. II - Autres qu'en coquilles, prix à l'exportation. – **Pays-Bas**: En coquilles, non compris les œufs à couver, prix à l'exportation. – **Pologne**: Moyenne annuelle pondérée des prix mensuels à l'exportation.

EXTRAIT DE PYRÈTHRE

Kenya: Moyenne simple des prix mensuels à l'exportation.

NOTE: The national index numbers were recalculated on the base 1963 = 100, for the purpose of international comparability. All indices refer to tramp shipping, except those for the Federal Republic of Germany, which also include rates by liner.

Denmark: Weighted average of quotations for commodities carried by Danish ships to and from Danish ports. The routes selected are given equal weights within each commodity.

Germany, Fed. Rep. of: Trip charter: weighted average of quotations by ships of all flags to and from ports between Antwerp and Hamburg inclusive. Liner services: weighted average of rates ruling on important routes to and from ports between Antwerp and Hamburg and Hamburg and Bremen.

Netherlands: Weighted average of quotations for commodities unloaded in Netherlands ports and carried by ships over 500 G.R.T.

Norway: Trip charter: weighted average of quotations for selected commodities carried by ships of all flags on selected routes of the world. Through 1959, routes are given equal weights within each commodity. From 1960, weights were derived from 4 500 fixtures reporting during the base period July 1965-June 1966. Time charter: average, for charters running less than a year, of oil burning (including diesel) vessels. Through 1959, vessels of 9 000-11 000 dead weight tons. From 1960, vessels of 10 000-25 000 dead weight tons with speed 10 to 16½ knots. Weights were derived from 1 300 fixtures reporting during base period July 1965-June 1966.

United Kingdom: Trip charter-general: weighted average of quotations of ships of all flags on important routes all over the world in which U.K. tramp ships were engaged in 1960. Weights for routes and commodities are based on relative proportion of freight revenue earned by the U.K. tramp fleet in 1960. Time charter: includes only quotations for motor vessels of 9 000 tons and over, dead weight, engaged either in round voyages or for periods of not more than nine months.

NOTE: Les indices nationaux ont été recalculés sur la base 1963 = 100 aux fins de la comparabilité internationale. Tous les indices se rapportent aux transports par tramps, sauf pour l'Allemagne dont les indices comprennent aussi les taux des lignes régulières.

Danemark: Moyenne pondérée des taux pour les marchandises transportées par des navires danois à destination ou en provenance de ports danois. Les routes choisies ont été affectées d'un coefficient uniforme pour chaque produit donné.

Allemagne, Rép. féd. d': Affrètements au voyage: moyenne pondérée des taux pour navires battant tous pavillons à destination ou en provenance d'Anvers, de Hambourg ou d'un port intermédiaire. Services réguliers: moyenne pondérée des frets sur des trajets importants, partant des ports situés entre Anvers et Hambourg et Hambourg et Brême ou y aboutissant.

Pays-Bas: Moyenne pondérée des taux des marchandises débarquées dans les ports des Pays-Bas et transportées par des bateaux de plus de 500 T.J.B.

Norvège: Affrètements au voyage: moyenne pondérée des taux pour certaines marchandises transportées par navires battant tous pavillons, sur certaines routes du monde. Jusqu'à fin 1959, les routes ont été affectées d'un coefficient uniforme pour chaque produit donné. Depuis 1960, poids obtenus à partir de 4 500 conditions d'affrètement connues pendant la période de base juillet 1965-juin 1966. Affrètements à temps: moyenne pour les affrètements de moins d'un an de navires chauffant au mazout (y compris le diesel). Jusqu'à fin 1959, navires de 9 000 à 11 000 tonnes. Depuis 1960, navires de 10 000 à 25 000 tonnes ayant une vitesse de 10 à 16 ½ nœuds. Coefficients de pondération dérivés de 1 300 conditions d'affrètement connues pendant la période de base juillet 1965-juin 1966.

Royaume-Uni: Affrètements au voyage: moyenne pondérée des taux des navires battant tous pavillons sur toutes les importantes routes du monde sur lesquelles naviguait en 1960 la flotte britannique de tramps. Les coefficients pour les routes et les produits sont basés sur la proportion relative du revenu de la flotte britannique de tramps en 1960. Affrètements à temps: ne comprend que les taux pour navires à moteur de 9 000 tonnes dw et plus, pour des affrètements aller et retour ou des affrètements ne dépassant pas neuf mois.

[1] July-June. – [2] July-May.

AMMONIUM SULPHATE

Germany, Fed. Rep. of: Approximately 21 % N, bulk, wholesale price, delivered purchaser's railway station. No deductions made for producer subsidies.

Japan: 20.6 % N, wholesale price, Tokyo.

United Kingdom: For not less than 2-ton lots, average of quotations at four markets. No deductions made for producer subsidies. Through 1958, 20.6 % N; 1959, 20.8-21.0 % N; from 1960, 21.0 % N; 1950 through 1962, delivered buyer's nearest railway station; from 1963, delivered to farm.

United States: Average bulk price, f.o.b. inland producing ovens.

AMMONIUM NITRATE

France: 34.5 % N, including taxes, f.o.b. factory

Germany, Fed. Rep. of: "Kalkammonsalpeter," bulk, wholesale price; through 1963, delivered purchaser's railway station; from July 1964, 10-200 quintal lots at warehouse; through June 1962, 20.5 % N; from July 1962 through June 1967, 22 % N; from July 1967, 23 %. No deductions made for producer subsidies.

United Kingdom: Through 1959, "Nitro-Chalk" for domestic consumption, 6-ton bulk lots; from 1960, lime; through 1962, delivered farmer's nearest station; from 1963, delivered to farm; through 1961, 15.5 % N; from 1962, 21 % N. No deductions made for producer subsidies.

United States: Domestic, 33.5 % N, bagged, f.o.b.

SODIUM NITRATE

United States: 16.0-16.3 % N, imported, crude, bagged, f.o.b. cars, port warehouses, New York.

UREA

United States: 45% N, agricultural, bags, producer to first buyer, carlots (30 tons), delivered East, Friday price.

BASIC SLAG

France: 18 % P_2O_5, bulk, carlots, wholesale price, including taxes, f.o.r.

Germany, Fed. Rep. of: 16 % P_2O_5, bulk, wholesale price, excluding sacking, basis Aachen-Rothe Erde. No deductions made for producer subsidies.

United Kingdom: Through 1962, 14 % P_2O_5, for not less than 2-ton lots, delivered buyer's nearest railway station, average of quotations at four markets; from 1963, 12 % P_2O_5, delivered to farm. No deductions made for producer subsidies.

[1] Juillet-juin. – [2] Juillet-mai.

SULFATE D'AMMONIAQUE

Allemagne, Rép. féd. d': Dosant environ 21 % de N, en vrac, prix de gros livré gare de l'acheteur. Pas de déductions pour les subventions à la production.

Japon: Dosant 20,6 % de N, prix de gros, Tokyo.

Royaume-Uni: Pour des lots non inférieurs à 2 tonnes, moyenne des cotes sur quatre marchés. Pas de déductions pour les subventions à la production. Jusqu'à fin 1958, dosant 20,6 % de N; 1959, dosant 20,8-21,0 % de N; depuis 1960, dosant 21 % de N; jusqu'à fin 1962, livré gare la plus proche de l'acheteur; depuis 1963, livré à la ferme.

Etats-Unis: Prix moyen, en vrac, f.o.b. usines à l'intérieur du pays.

NITRATE D'AMMONIAQUE

France: 34,5 % de N, taxes comprises, f.o.b. usine.

Allemagne, Rép. féd. d': « Kalkammonsalpeter », en vrac, prix de gros; jusqu'à fin 1963, livré gare de l'acheteur; depuis juillet 1964, pour quantités variant de 10 à 200 quintaux, à l'entrepôt; jusqu'à fin juin 1962, dosant 20,5 % de N; de juillet 1962 à fin juin 1967, dosant 22 % de N; depuis juillet 1967, 23 % de N. Pas de déductions pour les subventions à la production.

Royaume-Uni: Jusqu'à fin 1959, « Nitro-chalk » pour consommation intérieure, lots en vrac de 6 tonnes; depuis 1960, « lime »; jusqu'à fin 1962, livré gare la plus proche de l'exploitation; depuis 1963, livré à la ferme; jusqu'à fin 1961, dosant 15,5 % de N; depuis 1962, dosant 21 % de N. Pas de déductions pour les subventions à la production.

Etats-Unis: National, 33,5 % de N, en sacs, f.o.b.

NITRATE DE SODIUM

Etats-Unis: 16,0-16,3 % de N, provenant de l'importation, brut, en sacs, f.o.b. wagon, entrepôts maritimes, New York.

URÉE

Etats-Unis: 45 % de N, pour l'agriculture, en sacs, du producteur au premier acheteur, par charge de wagon (30 tonnes), franco gares de l'est des Etats-Unis, cours du vendredi.

SCORIES DE DÉPHOSPHORATION

France: Scories Thomas, moulues à 18 % de P_2O_5, en vrac, par wagon complet, prix de gros, taxes comprises, franco gare.

Allemagne, Rép. féd. d': 16 % de P_2O_5, en vrac, prix de gros, sacs non compris, Aix-la-Chapelle-Rothe Erde. Pas de déductions pour les subventions à la production.

Royaume-Uni: Jusqu'à fin 1962, 14 % de P_2P_5, pour des lots non inférieurs à 2 tonnes, livré gare la plus proche de l'acheteur, moyenne des cotes sur quatre marchés; depuis 1963, 12 % P_2O_5, livré à la ferme. Pas de déductions pour les subventions à la production.

[1] July-June. – [2] July-May.

CONCENTRATED SUPERPHOSPHATE

United States: Triple, pulverized, 48 % or more P_2O_5, wholesale price, s.p.a., bulk, f.o.b. East Tampa, Florida.

SUPERPHOSPHATE

France: 16 % P_2O_5, bulk, 20-ton lots, on wagon, wholesale price, f.o.r.

Germany, Fed. Rep. of: 18 % P_2O_5, soluble, bulk, 15-ton minimum sale, wholesale price, basis Hildesheim-Mannheim/Ludwigshafen. From November 1956, free receiver's station. No deductions made for producer subsidies.

Italy: 16 to 18 % P_2O_5, wholesale price, warehouse, Milan.

United Kingdom: 18 % P_2O_5, for not less than 2-ton lots, average of quotations at four markets; through 1962, delivered buyer's nearest railway station; from 1963, delivered to farm. No deductions made for producer subsidies.

United States: Run of pile, bulk, under 22 % P_2O_5, average wholesale price, f.o.b. Baltimore.

MURIATE OF POTASH

France: Bulk, for agricultural use, wholesale price, f.o.r., excluding sacking and taxes; through April 1959, 58 % K_2O; from May 1959, 60 % K_2O.

Germany, Fed. Rep. of: 40 % K_2O, bulk, wholesale price, delivered purchaser's railway station. No deductions made for producer subsidies.

United States: 60 % K_2O, domestic, bulk, average wholesale price, f.o.b. mines.

SULPHATE OF POTASH

France: 48 % K_2O, bulk, 20-ton lots, on wagon, wholesale price, including tax where applicable, f.o.r.

Germany, Fed. Rep. of: 48 % K_2O, bulk, wholesale price, delivered purchaser's railway station. No deductions made for producer subsidies.

[1] Juillet-juin. – [2] Juillet-mai.

SUPERPHOSPHATE CONCENTRÉ

Etats-Unis: Superphosphate triple, pulvérisé, dosant 48 % ou plus de P_2O_5, prix de gros, s.p.a., en vrac, f.o.b. East Tampa (Floride).

SUPERPHOSPHATE

France: Dosant 16 % de P_2O_5, en vrac, par 20 tonnes, sur wagon, prix de gros, franco gare.

Allemagne, Rép. féd. d': Dosant 18 % de P_2O_5, soluble, en vrac, pour ventes d'au moins 15 tonnes, prix de gros, Hildesheim/Ludwigshafen. Depuis novembre 1956, livré franco gare du destinataire. Pas de déductions pour les subventions à la production.

Italie: Dosant 16 à 18 % de P_2O_5, prix de gros au magasin, Milan.

Royaume-Uni: Dosant 18 % de P_2O_5, pour lots non inférieurs à 2 tonnes, moyenne des cotes sur quatre marchés; jusqu'à fin 1962, livré à la gare la plus proche de l'acheteur; depuis 1963, livré à la ferme. Pas de déductions pour les subventions à la production.

Etats-Unis: Pris sans triage, en vrac, dosant moins de 22 % de P_2O_5, prix moyen de gros, f.o.b. Baltimore.

CHLORURE DE POTASSIUM

France: En vrac, à usage agricole, prix de gros, franco gare, sacherie et taxes non comprises; jusqu'à fin avril 1959, 58 % de K_2O; depuis mai 1959, 60 % de K_2O.

Allemagne, Rép. féd. d': Dosant 40% de K_2O, en vrac, prix de gros, livré gare de l'acheteur. Pas de déductions pour les subventions à la production.

Etats-Unis: Dosant 60 % de K_2O, production intérieure, en vrac, prix moyen de gros, f.o.b. mines.

SULFATE DE POTASSIUM

France: Dosant 48 % de K_2O, en vrac, par 20 tonnes sur wagon, prix de gros, taxes comprises s'il y a lieu, franco gare.

Allemagne, Rép. féd. d': Dosant 48 % de K_2O, en vrac, prix de gros, livré gare de l'acheteur. Pas de déductions pour les subventions à la production.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Austria: Prices for fertilizers in 20-ton lots at nearest railway station. Subsidies on phosphate and potash fertilizers are paid to fertilizer manufacturers and transport agencies. Nitrogenous fertilizers are unsubsidized. Single superphosphate: subsidy of 125 schillings ($4.81) in 1962/63, and 1963/64, 95 schillings ($3.65) in 1964/65 and 1965/66, 160 schillings ($6.15) in 1966/67, and 80 schillings ($3.08) in 1967/68. Concentrated superphosphate: subsidy of 95 schillings ($3.65) in 1965/66, 165 schillings ($6.35) in 1966/67, and 80 schillings ($3.08) in 1967/68. Basic slag: subsidy of 228 schillings ($8.79) in 1962/63, 219 schillings ($8.43) in 1963/64, 174 schillings ($6.70) in 1964/65, 187 schillings ($7.19) in 1965/66, 194 schillings ($7.47) in 1966/67, and 97 schillings ($3.72) in 1967/68. Potassium sulphate: subsidy of 95.7 schillings ($3.68) in 1962/63, 92.8 schillings ($3.57) in 1963/64, 71.4 schillings ($2.75) in 1964/65, 89.3 schillings ($3.43) in 1965/66 and 1966/67, and 41.1 schillings ($1.58) in 1967/68. Muriate (*a*): 60 % K_2O: subsidy of 35 schillings ($1.35) in 1962/63, 39 schillings ($1.51) in 1963/64, 32 schillings ($1.22) in 1964/65, 35 schillings ($1.35) in 1965/66 and 1966/67, and 25 schillings ($0.96) in 1967/68. Muriate (*b*): 40 % K_2O: subsidy of 47.5 schillings ($1.83) in 1962/63, 55 schillings ($2.12) in 1963/64, 37.5 schillings ($1.44) in 1964/65, 46 schillings ($1.76) in 1965/66 and 1966/67, and 35 schillings ($1.35) in 1967/68.

Belgium: No subsidies. Sodium nitrate: Chilean. Muriate (*a*): 60 % K_2O. Muriate (*b*): 40 % K_2O. Simple superphosphate, 1965/66 through 1967/68, and potash fertilizers, bulk.

Bulgaria: Calendar year. Sodium nitrate: Chilean. Superphosphate: granulated.

Czechoslovakia: Prices at nearest retail store or at farmer's nearest railway station. Calendar year.

NOTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

Autriche: Prix pour lots de 20 tonnes d'engrais à la gare la plus proche. Des subventions pour les engrais phosphatés et potassiques sont versées aux fabricants et aux compagnies de transport. Les engrais azotés ne sont pas subventionnés. Superphosphate simple: subvention de 125 schillings ($4,81) en 1962/63 et 1963/64, de 95 schillings ($3,65) en 1964/65 et 1965/66, de 160 schillings ($6,15) en 1966/67, et de 80 schillings ($3,08) en 1967/68. Superphosphate concentré: subvention de 95 schillings ($3,65) en 1965/66, de 165 schillings ($6,35) en 1966/67, et de 80 schillings ($3,08) en 1967/68. Scories de déphosphoration: subvention de 228 schillings ($8,79) en 1962/63, 219 schillings ($8,43) en 1963/64, de 174 schillings ($6,70) en 1964/65, de 187 schillings ($7,19) en 1965/66, de 194 schillings ($7,47) en 1966/67, et de 97 schillings ($3,72) en 1967/68. Sulfate de potassium: subvention de 95,7 schillings ($3,68) en 1962/63, 92,8 schillings ($3,57) en 1963/64, de 71,4 schillings ($2,75) en 1964/65, de 89,3 schillings ($3,43) en 1965/66 et 1966/67, et de 41,1 schillings ($1,58) en 1967/68. Chlorure de potassium (*a*): 60 % K_2O: subvention de 35 schillings ($1,35) en 1962/63, 39 schillings ($1,51) en 1963/64, de 32 schillings ($1,22) en 1964/65, de 35 schillings ($1,35) en 1965/66 et 1966/67, et de 25 schillings ($0,96) en 1967/68. Chlorure de potassium (*b*): 40 % K_2O: subvention de 47,5 schillings ($1,83) en 1962/63, de 55 schillings ($2,12) en 1963/64, de 37,5 schillings ($1,44) en 1964/65, de 46 schillings ($1,76) en 1965/66 et 1966/67, et de 35 schillings ($1,35) en 1967/68.

Belgique: Pas de subvention. Nitrate de soude: du Chili. Chlorure de potassium (*a*): 60 % K_2O. Chlorure de potassium (*b*): 40 % K_2O. Superphosphate simple, de 1965/66 à fin 1967/68, et engrais potassiques, en vrac.

Bulgarie: Année civile. Nitrate de soude: du Chili. Superphosphate: granulé.

Tchécoslovaquie: Prix au magasin de détail le plus proche ou à la gare de chemin de fer la plus proche. Année civile.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Denmark: Prices for urea are at nearest port; for other fertilizers at nearest railway station. Ammonium sulphate: subsidy of 18.1 kroner ($2.62) in 1962/63 and 1963/64, 16.7 kroner ($2.42) in 1964/65, 17.1 kroner ($2.48) in 1965/66, 15.7 kroner ($2.27) in 1966/67, and 16.2 kroner ($2.23) in 1967/68. Ammonium nitrates: calcium ammonium nitrate; subsidy of 17.3 kroner ($2.50) in 1962/63 and 1963/64, 16.2 kroner ($2.35) in 1964/65, 16.5 kroner ($2.39) in 1965/66, 15.0 kroner ($2.17) in 1966/67, and 15.8 kroner ($2.18) in 1967/68. Sodium nitrate: Chilean; subsidy of 21.9 kroner ($3.17) in 1962/63, 22.5 kroner ($3.26) in 1963/64, 21.9 kroner ($3.17) in 1964/65, 23.1 kroner ($3.34) in 1965/66, 20.0 kroner ($2.90) in 1966/67, and 24.4 kroner ($3.36) in 1967/68. Calcium nitrate: subsidy of 18.7 kroner ($2.71) in 1962/63 and 1963/64, 17.4 kroner ($2.52) in 1964/65, 18.1 kroner ($2.62) in 1965/66, 16.1 kroner ($2.33) in 1966/67, and 16.1 kroner ($2.22) in 1967/68. Urea: subsidy of 14.3 kroner ($2.07) in 1962/63 and 1963/64, 13.0 kroner ($1.88) in 1964/65, 13.3 kroner ($1.93) in 1965/66, 11.7 kroner ($1.69) in 1966/67, and 12.2 kroner ($1.68) in 1967/68. Single superphosphate: subsidy of 11.7 kroner ($1.69) in 1962/63 and 1963/64, 11.1 kroner ($1.61) in 1964/65, 11.7 kroner ($1.69) in 1965/66, 11.1 kroner ($1.61) in 1966/67, and 11.6 kroner ($1.60) in 1967/68. Basic slag: free Danish-German frontier; subsidy of 9.3 kroner ($1.35) in 1962/63, 10.0 kroner ($1.45) in 1963/64 and 1964/65, 10.6 kroner ($1.53) in 1965/66, 10.0 kroner ($1.45) in 1966/67, and 11.0 kroner ($1.52) in 1967/68. Potassium sulphate: subsidy of 8.8 kroner ($1.27) in 1962/63, 9.0 kroner ($1.30) in 1963/64, 8.4 kroner ($1.22) in 1964/65, 8.6 kroner ($1.24) in 1965/66, 7.8 kroner ($1.13) in 1966/67, and 8.2 kroner ($1.13) in 1967/68. Muriate (*a*): 59 % K_2O; subsidy of 5.8 kroner ($0.84) in 1962/63, 5.6 kroner ($0.81) in 1963/64, 5.4 kroner ($0.78) in 1964/65, 5.6 kroner ($0.81) in 1965/66, 4.9 kroner ($0.71) in 1966/67, and 4.7 kroner ($0.65) in 1967/68.

Finland: Prices at nearest railway station for minimum lots of 13 tons. Subsidies are paid to fertilizer manufacturers. Ammonium sulphate: subsidy of 11.1 markkaa ($3.47) in 1962/63. Calcium nitrate: subsidy of 61.3 markkaa ($19.16) in 1962/63, and 0.22 markkaa ($0.06) in 1963/64. Single superphosphate: subsidy of 11.5 markkaa ($3.59) in 1962/63, 15.5 markkaa ($4.84) in 1963/64, and 7.0 markkaa ($2.19) in 1964/65.

France: Through 1963/64, prices at nearest railway station. From 1964/65, prices at retail stores, except for basic slag which throughout the period is in bulk in carlots of 20 tons at a railway station more than 400 km from Thionville, Season: May-April. No subsidies. Sodium nitrate: Chilean. Muriate (*a*): 60 % K_2O.

Germany, Fed. Rep. of: Prices at nearest railway station for minimum lots of 20 tons. Subsidies of approximately 10 % in 1962/63 were paid to farmers. Ammonium nitrate: calcium ammonium nitrate. Calcium cyanamide: oiled. Muriate (*a*): 50 % K_2O; (*b*) 40 % K_2O.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

anemark: Prix de l'urée au port le plus proche; pour les autres engrais prix à la gare la plus proche. Sulfate d'ammoniaque: subvention de 18,1 kroner ($2,62) en 1962/63 et 1963/64, de 16,7 kroner ($2,42) en 1964/65, de 17,1 kroner ($2,48) en 1965/66, de 15,7 kroner ($2,27) en 1966/67, et de 16,2 kroner ($2,23) en 1967/68. Nitrates d'ammoniaque: de chaux; subvention de 17,3 kroner ($2,50) en 1962/63 et 1963/64, de 16,2 kroner ($2,35) en 1964/65, de 16,5 kroner ($2,39) en 1965/66, de 15,0 kroner ($2,17) en 1966/67, et de 15,8 kroner ($2,18) en 1967/68. Nitrate de soude: du Chili; subvention de 21,9 kroner ($3,17) en 1962/63, de 22,5 kroner ($3,26) en 1963/64, de 21,9 kroner ($3,17) en 1964/65, de 23,1 kroner ($3,34) en 1965/66, de 20,0 kroner ($2,90) en 1966/67, et de 24,4 kroner ($3,36) en 1967/68. Nitrate de chaux: subvention de 18,7 kroner ($2,71) en 1962/63 et 1963/64, de 17,4 kroner ($2,52) en 1964/65, de 18,1 kroner ($2,62) en 1965/66, de 16,1 kroner ($2,33) en 1966/67, et de 16,1 kroner ($2,22) en 1967/68. Urée: subvention de 14,3 kroner ($2,07) en 1962/63 et 1963/64, de 13,0 kroner ($1,88) en 1964/65, de 13,3 kroner ($1,93) en 1965/66, de 11,7 kroner ($1,69) en 1966/67, et de 12,2 kroner ($1,68) en 1967/68. Superphosphate simple: subvention de 11,1 kroner ($1,69) en 1962/63 et 1963/64, de 11,1 kroner ($1,61) en 1964/65, de 11,7 kroner ($1,69) en 1965/66, de 11,1 kroner ($1,61) en 1966/67, et de 11,6 kroner ($1,60) en 1967/68. Scories de déphosphoration: franco frontière germano-danoise; subvention de 9,3 kroner ($1,35) en 1962/63, de 10,0 kroner ($1,45) en 1963/64 et 1964/65, de 10,6 kroner ($1,53) en 1965/66, de 10,0 kroner ($1,45) en 1966/67, et de 11,0 kroner ($1,52) en 1967/68. Sulfate de potassium: subvention de 8,8 kroner ($1,27) en 1962/63, de 9,0 kroner ($1,30) en 1963/64, de 8,4 kroner ($1,22) en 1964/65, de 8,6 kroner ($1,24) en 1965/66, de 7,8 kroner ($1,13) en 1966/67, et de 8,2 kroner ($1,13) en 1967/68. Chlorure de potassium (*a*): 59 % K_2O; subvention de 5,8 kroner ($0,84) en 1962/63, de 5,6 kroner ($0,81) en 1963/64, de 5,4 kroner ($0,78) en 1964/65, de 5,6 kroner ($0,81) en 1965/66, de 4,9 kroner ($0,71) en 1966/67, et de 4,7 kroner ($0,65) en 1967/68.

Finlande: Prix à la gare la plus proche pour des lots non inférieurs à 13 tonnes. Des subventions sont versées aux fabricants. Sulfate d'ammoniaque: subvention de 11,1 markkaa ($3,47) en 1962/63. Nitrate de chaux: subvention de 61,3 markkaa ($19,16) en 1962/63 et de 0,22 markkaa ($0,06) en 1963/64. Superphosphate simple: subvention de 11,5 markkaa ($3,59) en 1962/63, de 15,5 markkaa ($4,84) en 1963/64 et de 7,0 markkaa ($2,19) en 1964/65.

France: Jusqu'à fin 1963/64, prix à la gare la plus proche. Depuis 1964/65 prix chez le détaillant, sauf les scories de déphosphoration qui pendant toute la période sont en vrac par wagons de 20 tonnes dans une gare à plus de 400 km de Thionville. Campagne: mai-avril. Pas de subvention. Nitrate de soude: du Chili. Chlorure de potassium (*a*): 60 % K_2O.

Allemagne, Rép. féd. d': Prix à la gare la plus proche pour des lots non inférieurs à 20 tonnes. En 1962/63, des subventions d'environ 10 % ont été payées aux cultivateurs. Nitrate d'ammoniaque: de chaux. Cyanamide calcique: huilée. Chlorure de potassium (*a*): 50 % K_2O; (*b*): 40 % K_2O.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Germany, Fed. Rep. of: Prices at nearest railway station for minimum lots of 20 tons. Subsidies of approximately 10 % in 1962/63 were paid to farmers. Ammonium nitrate: calcium ammonium nitrate. Calcium cyanamide: oiled. Muriate (*a*): 50 % K_2O; (*b*): 40 % K_2O.

Greece: Ammonium sulphate: subsidy of 9 drachmas ($0.29) in 1964/65, 76 drachmas ($2.53) in 1965/66, 190 drachmas ($6.33) in 1966/67, and 214 drachmas ($7.14) in 1967/68; no subsidies in 1962/63 and 1963/64. Ammonium nitrate: subsidy of 38 drachmas ($1.27) in 1964/65, 179 drachmas ($5.97) in 1965/66, 142 drachmas ($4.73) in 1966/67, and 125 drachmas ($4.18) in 1967/68. Sodium nitrate: Chilean; subsidy of 59 drachmas ($1.97) in 1966/67, and 52 drachmas ($1.75) in 1967/68. Calcium nitrate: subsidy of 74 drachmas ($2.47) in 1965/66, 107 drachmas ($3.57) in 1966/67, and 139 drachmas ($4.65) in 1967/68; no subsidies in 1962/63, 1963/64 and 1964/65. Single superphosphate: subsidy of 114 drachmas ($3.80) in 1962/63, 100 drachmas ($3.33) in 1963/64, 143 drachmas ($4.76) in 1964/65, 140 drachmas ($4.67) in 1965/66, and 186 drachmas ($6.20) in 1966/67 and 1967/68. Concentrated superphosphate: subsidy of 62 drachmas ($2.07) in 1964/65, 61 drachmas ($2.03) in 1965/66, and 87 drachmas ($2.90) in 1966/67 and 1967/68. Potassium sulphate: subsidy of 64 drachmas ($2.13) in 1962/63, 66 drachmas ($2.20) in 1963/64, 67 drachmas ($2.25) in 1964/65, 83 drachmas ($2.76) in 1965/66, and 110 drachmas ($3.67) in 1966/67 and 1967/68.

Hungary: Calendar year. Prices at nearest railway station. Subsidies are paid to fertilizer manufacturers in the form of grants. Ammonium sulphate: subsidy of 193 forints ($8.21) in 1965 and 1966, and 50 forints ($2.11) in 1967. Ammonium nitrate: subsidy of 193 forints ($8.23) in 1965 and 1966, and 47 forints ($2.02) in 1967. Urea: subsidy of 197 forints ($8.39) in 1965 and 1966, and 43 forints ($1.83) in 1967. Simple superphosphate: subsidy of 294 forints ($12.52) in 1965 and 1966. and 314 forints ($13.37) in 1967. Potassium sulphate: subsidy of 223 forints ($9.48) in 1967. Muriate (*a*): 60 % K_2O; subsidy of 122 forints ($5.19) in 1967. Muriate (*b*): 40 % K_2O; subsidy of 133 forints ($5.66) in 1967. Amounts of subsidies not stated for other years.

Iceland: Prices at warehouse. Concentrated superphosphate: subsidy of 102 kroner ($2.37) in 1962/63. Muriate (*a*): 50 % K_2O, subsidy of 50 kroner ($1.17) in 1962/63.

Superphosphate concentré: subvention de 62 drachmes ($2,07) en 1964/65, de 61 drachmes ($2,03) en 1965/66, de 87 drachmes ($2,90) en 1966/67 et 1967/68. Sulfate de potassium: subvention de 64 drachmes ($2,13) en 1962/63, de 66 drachmes ($2,20) en 1963/64, de 67 drachmes ($2,25) en 1964/65, de 83 drachmes ($2,76) en 1965/66 et de 110 drachmes ($3,67) en 1966/67 et 1967/68.

Hongrie: Année civile. Prix à la gare la plus proche. Des subventions sont versées aux fabricants sous forme de primes. Sulfate d'ammoniaque: subvention de 193 forints ($8,21) en 1965 et 1966, et de 50 forints ($2,11) en 1967. Nitrate d'ammoniaque: subvention de 193 forints ($8,23) en 1965 et 1966, et de 47 forints ($2,02) en 1967. Urée: subvention de 197 forints ($8,39) en 1965 et 1966, et de 43 forints ($1,83) en 1967. Superphosphate simple: subvention de 294 forints ($12,52) en 1965 et 1966, et de 314 forints ($13,37) en 1967. Sulfate de potassium: subvention de 223 forints ($9,48) en 1967. Chlorure de potassium (*a*): 60 % K_2O; subvention de 122 forints ($5,19) en 1967. Chlorure de potassium (*b*): 40 % K_2O; subvention de 133 forints ($5,66) en 1967. Les montants des subventions ne sont pas donnés pour les autres années.

Islande: Prix à l'entrepôt. Superphosphate concentré: subvention de 102 kroner ($2,37) en 1962/63. Chlorure de potassium (*a*): 50 % K_2O; subvention de 50 kroner ($1,17) en 1962/63.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Ireland: Prices at retail store. Season: April-March. No subsidies on nitrogenous fertilizers. Subsidies are paid to fertilizer manufacturers and importers. Single superphosphate: granulated; includes prices of non-returnable jute sacks; subsidy of £2.84 ($7.95) in 1962/63, 1963/64, 1964/65 and 1965/66, £3.06 ($8.57) in 1966/67, and £3.06 ($8.12) in 1967/68. Basic slag: subsidy of £1.63 ($4.57) in 1962/63, 1963/64, 1964/65, and 1965/66, £1.81 ($5.08) in 1966/67, and £1.81 ($4.81) in 1967/68. Potassium sulphate: subsidy of £0.83 ($2.31) in 1962/63, 1963/64, 1964/65, 1965/66, and 1966/67, and £0.83 ($2.19) in 1967/68. Muriate (*a*): 60 % K_2O; subsidy of £0.82 ($2.30) in 1962/63, 1963/64, 1964/65, 1965/66, and 1966/67, and £0.82 ($2.17) in 1967/68.

Italy: No subsidies. Sodium nitrate: Chilean. Muriate (*a*): 50/52 % K_2O; (*b*): 40/42 % K_2O.

Luxembourg: Prices at nearest railway station. No subsidies. Sodium nitrate: Chilean. Potash fertilizers, bulk. Muriate (*a*): 60 % K_2O. Muriate (*b*): 40 % K_2O. Crude potash salts: 20 % K_2O.

Malta: Average wholesale prices for fertilizers in bags of 50 or 100 kg.

NOTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

Irlande: Prix de vente au détail. Campagne: avril-mars. Pas de subvention pour les engrais azotés. Des subventions sont versées aux fabricants et aux importateurs. Superphosphate simple: granulé; y compris le prix des sacs de jute non rendus; subvention de £2,84 ($7,95) en 1962/63, 1963/64, 1964/65 et 1965/66, de £3,06 ($8,57) en 1966/67, et de £3,06 ($8,12) en 1967/68. Scories de déphosphoration: subvention de £1,63 ($4,57) en 1962/63, 1963/64, 1964/65 et 1965/66, de £1,81 ($5,08) en 1966/67, et de £1,81 ($4,81) en 1967/68. Sulfate de potassium: subvention de £0,83 ($2,31) en 1962/63, 1963/64, 1964/65, 1965/66 et 1966/67, et de £0,83 ($2,19) en 1967/68. Chlorure de potassium (*a*): 60 % K_2O; subvention de £0,82 ($2,30) en 1962/63, 1963/64, 1964/65, 1965/66 et 1966/67, et de £0,82 ($2,17) en 1967/68.

Italie: Pas de subvention. Nitrate de soude: du Chili. Chlorure de potassium (*a*): 50/52 % K_2O; (*b*): 40/42 % K_2O.

Luxembourg: Prix à la gare la plus proche. Pas de subvention. Nitrate de soude: du Chili. Engrais potassiques, en vrac. Chlorure de potassium (*a*): 60 % K_2O. Chlorure de potassium (*b*): 40 % K_2O. Sels de potasse bruts: 20 % K_2O.

Malte: Prix de gros moyens pour engrais en sacs de 50 ou 100 kg.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Netherlands: Phosphate and potash fertilizers, May-April. No subsidies. Sodium nitrate: Chilean. Muriate (*a*): 60 % K_2O; (*b*): 40 % K_2O.
I - Prices ex store retailer. The price for muriate 20 % K_2O was 41.0 guilders ($11.3) in 1962/63, and 42.0 guilders ($11.6) in 1963/64.
II - Prices delivered free at the farm. The price for muriate 20 % K_2O was 42.5 guilders ($11.7) in 1962/63, 43.5 guilders ($12.0) in 1963/64, 45.0 guilders ($12.4) in 1964/65, 46.0 guilders ($12.7) in 1965/66, 45.5 guilders ($12.6) in 1966/67, and 45.0 guilders ($12.4) in 1967/68.

Norway: Weighted average of prices in different districts (about one third of sales at retail store). Subsidies are paid to transport agencies, small holders, and fertilizer manufacturers and importers. Ammonium nitrate: calcium ammonium nitrate. Single superphosphate: subsidy of 45.6 kroner ($6.38) in 1962/63 through 1967/68. Basic slag: subsidy of 42.9 kroner ($6.01) in 1962/63 through 1967/68. Amounts of subsidies not stated for potassium sulphate and muriate (*a*): 50 % K_2O. Muriate (*b*): 40 % K_2O: subsidy of 8 kroner ($1.12) in 1962/63 through 1967/68.

Poland: Calendar year. Muriate (*a*): 48-52 % K_2O. Muriate (*b*): 38-42 % K_2O.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

ys-Bas: Engrais phosphatés et potassiques, mai-avril. Pas de subvention. Nitrate de soude: du Chili. Chlorure de potassium (*a*): 60% K_2O; (*b*): 40% K_2O.

I - Prix au magasin de détail. Le prix pour le chlorure de potassium 20 % K_2O était de 41,0 florins ($11,3) en 1962/63 et de 42,0 florins ($11,6) en 1963/64.

II - Prix libre à l'exploitation. Le prix pour le chlorure de potassium 20 % K_2O était de 42,5 florins ($11,7) en 1962/63, de 43,5 florins ($12,0) en 1963/64, de 45,0 florins ($12,4) en 1964/65, de 46,0 florins ($12,7) en 1965/66, de 45,5 florins ($12,6) en 1966/67, et de 45,0 florins ($12,4) en 1967/68

Norvège: Moyenne pondérée des prix dans différents districts (environ le tiers des ventes s'effectue au détail). Des subventions sont versées aux compagnies de transport, petits exploitants, fabricants et importateurs. Nitrate d'ammoniaque: de chaux. Superphosphate simple: subvention de 45,6 kroner ($6,38) de 1962/63 à 1967/68. Scories de déphosphoration: subvention de 42,9 kroner ($6,01) de 1962/63 à 1967/68. Les montants des subventions ne sont pas déclarés pour le sulfate de potassium et le chlorure de potassium (*a*): 50 % K_2O. Chlorure de potassium (*b*): 40 % K_2O; subvention de 8 kroner ($1.12) de 1962/63 à 1967/68.

Pologne: Année civile. Chlorure de potassium (*a*): 48-52 % K_2O. Chlorure de potassium (*b*): 38-42 % K_2O.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Poland: Calendar year. Urea: through 1963, 42 % N. Single superphosphate: granulated.

Portugal: Prices paid at nearest railway station. Season: 1962/63, August-July, from 1963/64, July-June. Subsidies paid to fertilizer manufacturers. Calcium cyanamide subsidy of 473 escudos ($16.5) in 1962/63. Potassium sulphate: subsidy of 70 escudos ($2.4) in 1962/63. Muriate (*a*): 50 % K_2O; subsidy of 62 escudos ($2.2) in 1962/63.

Spain: Prices at nearest railway station or at retail store. A subsidy on transport costs equalizes prices for nitrogenous fertilizers and basic slag to farmers in all parts of the country. In addition, wheat growers receive a subsidy on nitrogenous fertilizers, calcium superphosphate, and basic slag. Ammonium nitrate: calcium ammonium nitrate. Single superphosphate: through 1963/64, prices for bulk fertilizer f.o.b. factory. Sodium nitrate: Chilean. Calcium cyanamide: oiled. Muriate (*a*): 50 % K_2O.

Sweden: Prices at nearest railway station. Season: June-May. No subsidies. Ammonium nitrate: calcium ammonium nitrate. Sodium nitrate: Chilean. Superphosphate, since 1964/65, granulated. Muriate (*a*): 1961/62 through 1963/64, 50 % K_2O; from 1964/65, 60 % K_2O.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

ogne: Année civile. Urée: jusqu'à fin 1963, 42 % N. Superphosphate simple: ranulé.

rtugal: Prix à la gare la plus proche. Campagne: 1962/63, août-juillet; depuis 963/64, juillet-juin. Les subventions sont versées aux fabricants d'engrais. Cyanamide calcique: subvention de 473 escudos ($16,5) en 1962/63. Sulfate e potassium: subvention de 70 escudos ($2,4) en 1962/63. Chlorure de otassium (*a*): 50 % K_2O; subvention de 62 escudos ($2,2) en 1962/63.

Espagne: Prix à la gare la plus proche ou au magasin de détail. Une subvention sur les frais de transport uniformise dans tout le pays les prix de vente aux agriculteurs des engrais azotés et des scories de déphosphoration. En outre, les producteurs de blé reçoivent une subvention pour les engrais azotés et le superphosphate de calcium. Nitrate d'ammoniaque: de chaux. Superphosphate simple: jusqu'à 1963/64, prix pour engrais en vrac, f.o.b. usine. Nitrate de soude: du Chili. Cyanamide calcique: huilée. Chlorure de potassium (*a*): 50 % K_2O.

Suède: Prix à la gare la plus proche. Campagne: juin-mai. Pas de subvention. Nitrate d'ammoniaque: de chaux. Nitrate de soude: du Chili. Superphosphate, depuis 1964/65, granulé. Chlorure de potassium (*a*): de 1961/62 à 1963/64, 50 % K_2O; depuis 1964/65, 60 % K_2O.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Switzerland: Prices at nearest railway station for 10-ton carlots. No subsidies. Muriate (*b*): 40 % K_2O.

United Kingdom: Season: through 1963/64, July-June; from 1964/65, June-May. Prices for 6-ton lots. Ammonium sulphate and sodium nitrate: subsidy of £3.77 ($10.6) in 1962/63, £3.53 ($9.9) in 1963/64, £3.32 ($9.3) in 1964/65, £3.12 ($8.7) in 1965/66 and 1966/67, and £2.91 ($7.52) in 1967/68. Ammonium nitrate: calcium ammonium nitrate; subsidy of £3.75 ($10.5) in 1962/63, £3.50 ($9.8) in 1963/64, £3.25 ($9.1) in 1964/65, £3.05 ($6.7) in 1965/66 and 1966/67, and £2.85 ($7.37) in 1967/68. Calcium cyanamide: subsidy of £3.86 ($10.8) in 1962/63, £3.61 ($10.1) in 1963/64, £3.40 ($9.5) in 1964/65, £3.12 ($8.7) in 1965/66 and 1966/67, and £2.91 ($7.52) in 1967/68. Single superphosphate: subsidy of £2.99 ($8.4) in 1962/63, £2.79 ($7.8) in 1963/64, £2.63 ($7.4) in 1964/65, £2.46 ($6.9) in 1965/66 and 1966/67, and £2.34 ($6.05) in 1967/68. Basic slag: subsidy of £2.01 ($5.7) in 1962/63, £2.05 ($5.7) in 1963/64, £1.84 ($5.2) in 1964/65, £1.64 ($4.6) in 1965/66 and 1966/67, and £1.60 ($4.14) in 1967/68. Potash fertilizers: 1967/68, free on rail or free to lorry at port or port works.

Isle of Man: Season: June-May. Prices at nearest railway station. Subsidies are allowed to farmers in respect of quantities not less than 200 kg as a total of all fertilizers, but are paid to fertilizer manufacturers and local merchants. Single superphosphate and concentrated superphosphate (47 % P_2O_5): subsidy of £3.49 ($9.8) in 1962/63, £2.79 ($7.8) in 1963/64, £2.63 ($7.4) in 1964/65, £2.46 ($6.9) in 1965/66 and 1966/67, and £2.34 ($6.04) in 1967/68. Basic slag: subsidy of £1.72 ($4.8) in 1962/63, £1.93 ($5.4) in 1963/64, £1.80 ($5.0) in 1964/65, £1.68 ($4.7) in 1965/66 and 1966/67, and £1.49 ($3.86) in 1967/68. Potassium sulphate and muriate (60 % K_2O): subsidy of £1.32 ($3.7) in 1962/63, £1.23 ($3.4) in 1963/64, £1.16 ($3.2) in 1964/65, £1.09 ($3.1) in 1965/66 and 1966/67, and £1.02 ($2.63) in 1967/68.

Yugoslavia: Calendar year. Prices paid by farmers with subsidies deducted. Ammonium nitrate: calcium ammonium nitrate.

NOTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

Suisse: Prix à la gare la plus proche pour chargements de 10 tonnes. Pas de subvention. Chlorure de potassium (*b*): 40 % K_2O.

Royaume-Uni: Campagne: jusqu'à 1963/64 compris, juillet-juin; depuis 1964/65, juin-mai. Prix pour lots de 6 tonnes longues. Sulfate d'ammoniaque et nitrate de soude: subvention de £3,77 ($10,6) en 1962/63, de £3,53 ($9,9) en 1963/64, de £3,32 ($9,3) en 1964/65, de £3,12 ($8,7) en 1965/66 et 1966/67, et de £2,91 ($7,52) en 1967/68. Nitrate d'ammoniaque: de chaux; subvention £2,91 ($7,52) en 1967/68. Nitrate d'ammoniaque: de chaux; subvention de £3,75 ($10,5) en 1962/63, de £3,50 ($9,8) en 1963/64, de £3,25 ($9,1) en 1964/65, de £3,05 ($6,7) en 1965/66 et 1966/67, et de £2,85 ($7,37) en 1967/68. Cyanamide calcique: subvention de £3,86 ($10,8) en 1962/63, de £3,61 ($10,1) en 1963/64, de £3,40 ($9,5) en 1964/65, de £3,12 ($8,7) en 1965/66 et 1966/67, et de £2,91 ($7,52) en 1967/68. Superphosphate simple: subvention de £2,99 ($8,4) en 1962/63, de £2,79 ($7,8) en 1963/64, de £2,63 ($7,4) en 1964/65, de £2,46 ($6,9) en 1965/66 et 1966/67, et de £2,34 ($6,05) en 1967/68. Scories de déphosphoration: subvention de £2,02 ($5,7) en 1962/63, de £2,05 ($5,7) en 1963/64, de £1,84 ($5,2) en 1964/65, de £1,64 ($4,6) en 1965/66 et 1966/67, et de £1,60 ($4,14) en 1967/68. Engrais potassiques: 1967/68, franco chemin de fer ou franco camion au port ou aux docks.

Ile de Man: Campagne: juin-mai. Prix à la gare la plus proche. Des subventions sont accordées aux agriculteurs pour des quantités non inférieures à 200 kg au total d'engrais de toute sorte et sont versées aux fabricants et commerçants locaux uniquement. Superphosphate simple et superphosphate concentré (47 % P_2O_5): subvention de £3,49 ($9,8) en 1962/63, de £2,79 ($7,8) en 1963/64, de £2,63 ($7,4) en 1964/65, de £2,46 ($6,9) en 1965/66 et 1966/67, et de £2,34 ($6,04) en 1967/68. Scories de déphosphoration: subvention de £1,72 ($4,8) en 1962/63, de £1,93 ($5,4) en 1963/64, de £1,80 ($5,0) en 1964/65, de £1,68 ($4,7) en 1965/66 et 1966/67, et de £1,49 ($3,86) en 1967/68. Sulfate de potassium et chlorure de potassium (60 % K_2O); subvention de £1,32 ($3,7) en 1962/63, de £1,23 ($3,4) en 1963/64, de £1,16 ($3,2) en 1964/65, de £1,09 ($3,1) en 1965/66 et 1966/67, et de £1,02 ($2,63) en 1967/68.

Yougoslavie: Année civile. Prix payés par les agriculteurs après déduction des subventions. Nitrate d'ammoniaque: de chaux.

b) 20-45 % K_2O	—	—	—	—	—	—	—	—	—	—	—	—

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Martinique: No subsidies

Mexico: Prices f.o.b. factory. No subsidies. Ammonium nitrate, urea, and concentrated superphosphate, in bags.

Nicaragua: Retail prices at warehouse. Calendar year. No subsidies. Sodium nitrate: Chilean.

Panama: Calendar year. No subsidies.

Puerto Rico: Subsidies which are not deducted from prices shown are paid to farmers on coffee plantations at the rate of $15 per cuerda for renewal of crops three-to-four years old and at the rate of $7.50 per cuerda for other crops. $30 per ton of fertilizer is paid for planting "kudzu" grass. Sodium nitrate: Chilean and synthetic.

United States: Prices paid by farmers at varying points of delivery. Under Agricultural Conservation Program there is cost-sharing arrangement with farmers for fertilizers as well as other requisites, but this is not considered a subsidy. Sodium nitrate: Chilean and synthetic.

Argentina: No subsidies.

Chile: Calendar year. Prices shown for Chilean sodium nitrate are quoted at farmers' nearest railway station, with a 30 % subsidy deducted in 1962. Prices shown for phosphate and potash fertilizers are quoted at warehouses of the State Bank, with a 50 % subsidy deducted in 1962.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

rtinique: Pas de subvention.

xique: Prix f.o.b. usine. Pas de subvention. Nitrate d'ammoniaque, urée, t superphosphate concentré, en sacs.

caragua: Prix au détail à l'entrepôt. Année civile. Pas de subvention. Nirate de soude: du Chili.

ama: Année civile. Pas de subvention.

rto Rico: Les subventions, qui ne sont pas déduites des prix indiqués, ont versées aux agriculteurs pour les plantations de café, à raison de $15 ar cuerda pour le renouvellement des cultures âgées de trois ou quatre ans, et de $7,50 par cuerda pour les autres. Un versement de $30 par tonne d'engrais est accordé pour la plantation de l'herbe « kudzu ». Nitrate de soude: du Chili et synthétique.

Etats-Unis: Prix payés par les agriculteurs pour livraisons en différents endroits. L'*Agricultural Conservation Program* prévoit une participation aux frais encourus par les agriculteurs pour les engrais et pour d'autres biens nécessaires, mais elle n'est pas considérée comme une subvention. Nitrate de soude: du Chili et synthétique.

Argentine: Pas de subvention.

Chili: Année civile. Pour le nitrate de soude du Chili les prix s'entendent livraison à la gare la plus proche de l'agriculteur, déduction faite de la subvention (30 %) en 1962. Pour les engrais phosphatés et potassiques, ils s'entendent aux entrepôts de la Banque de l'Etat, déduction faite de la subvention (50%) en 1962.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Surinam: Retail prices for fertilizer bought by the kilogramme; for purchases by the ton prices are approximately 30 % lower. Calendar year. No subsidies.

Uruguay: Prices f.o.b. factory. Ammonium nitrate and urea: subsidy of 150 pesos in 1964/65 and 800 pesos in 1965/66 and 1966/67. Single superphosphate: subsidy of 181 pesos in 1964/65, 505 pesos in 1965/66, and 705 pesos in 1966/67. Concentrated superphosphate: subsidy of 90 pesos in 1964/65. Basic slag: subsidy of 184 pesos in 1964/65, 517 pesos in 1965/66, and 719 pesos in 1966/67. Subsidy payments are distributed in the following proportions: 66 % to farmers, 33 % to manufacturers, and 1 % to transport agencies.

Venezuela: Prices f.o.b. factory for material in 50-kg sacks. No subsidies. Ammonium nitrate: calcium ammonium nitrate.

Burma: Prices at nearest sales point in government-organized, nonprofit sales.

Cambodia: Season: May-April. Subsidies in the 1966/67 season amounting to about one third of the price are allocated in the following proportions: 20 % to farmers, 2 % to manufacturers, 5 % to transport agencies, and 7 % to cooperatives. Ammonium sulphate: subsidy of 711 riels. Urea: subsidy of 500 riels. Muriate: subsidy of 197 riels.

Ceylon: Prices at government retail stores. 1962/63 through 1964/65, season: April-March. From 1966, calendar year. Through 1964/65, prices shown reflect a subsidy of 50 % on cash purchases. This subsidy and a subsidy of 33 1/3 % on credit purchases were valid through 1966. In 1967, the farmer received a rebate of the difference between the 50 % and 33 1/3 % subsidy if the loan was repaid within 270 days. From 1968, uniform subsidies for both cash and credit sales.

China, Taiwan: Prices at farmers' nearest railway station. No subsidies. Ammonium nitrate: calcium ammonium nitrate.

NOTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

Surinam: Prix de vente au détail pour les engrais achetés au kilogramme; les prix pour les achats par tonne sont approximativement 30 % plus bas. Année civile. Pas de subvention.

Uruguay: Prix f.o.b. fabrique. Nitrate d'ammoniaque et urée: subvention de 150 pesos en 1964/65 et de 800 pesos en 1965/66 et 1966/67. Superphosphate simple: subvention de 181 pesos en 1964/65, de 505 pesos en 1965/66 et de 705 pesos en 1966/67. Superphosphate concentré: subvention de 90 pesos en 1964/65. Scories de déphosphoration: subvention de 184 pesos en 1964/65, de 517 pesos en 1965/66 et de 719 pesos en 1966/67. Les subventions sont distribuées dans les proportions suivantes: 66 % aux agriculteurs, 33 % aux fabricants et 1 % aux agences de transport.

Venezuela: Prix f.o.r. fabrique pour les engrais en sacs de 50 kg. Pas de subvention. Nitrate d'ammoniaque: de chaux.

Birmanie: Prix au point de vente le plus proche pour les ventes sans profit organisées par le gouvernement.

Cambodge: Campagne: mai-avril. Des subventions pendant la campagne 1966/67 se montant à environ un tiers du prix sont distribuées dans les proportions suivantes: 20 % aux agriculteurs, 2 % aux fabricants, 5 % aux agences de transport et 7 % aux coopératives. Sulfate d'ammoniaque: subvention de 711 riels. Urée: subvention de 500 riels. Chlorure de potassium: subvention de 197 riels.

Ceylan: Prix aux magasins de détail de l'Etat. 1962/63 à fin 1964/65, campagne: avril-mai. Depuis 1966, année civile. Jusqu'à fin 1964/65, les prix reflètent une subvention de 50 % sur les ventes au comptant. Cette subvention et une subvention de 33 1/3 % étaient effectives jusqu'à fin 1966. En 1967, les agriculteurs étaient remboursés de la différence entre 50 % et 33 1/3 % de la subvention si la prestation était remboursée dans les 270 jours. Depuis 1968, les subventions pour les ventes au comptant et à crédit sont uniformisées.

Chine, Taïwan: Prix à la gare la plus proche de l'agriculteur. Pas de subvention. Nitrate d'ammoniaque: de chaux.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Cyprus: 1967, calendar year. Prices at retail store. No subsidies.

India: Prices do not include sales tax and other local taxes. The prices of potassium sulphate from 1964/65 and muriate from 1962/63 are f.o.r. port. No uniform subsidy is given throughout India. In some states a subsidy of 25 % of cost is granted on phosphate fertilizers. Another subsidy covers cost of transport of fertilizer in hilly areas and areas difficult of accession. In other areas, a subsidy of 25 % of cost is allowed on nitrogenous fertilizers and 50 % on phosphatic fertilizers. Sodium nitrate: Chilean. Ammonium nitrate: calcium ammonium nitrate.

Indonesia: Season: April-March. Prices at distributor warehouses in village. No subsidies. Muriate: 50-60 % K_2O.

Iraq: Season: April-March. Prices at retail store. Ammonium nitrate: ammonium sulphate nitrate.

Israel: Prices at factory gate, except muriate and sulphate of potash which are at store in Tel Aviv and urea which is at port. Subsidies are paid to manufacturers on nitrogenous and phosphate fertilizers. The price of sacks is excluded. Ammonium nitrate: calcium ammonium nitrate. Single superphosphate: powdered.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

ypre: 1967, année civile. Prix de vente au détail. Pas de subvention.

de: Les prix ne comprennent pas les impôts sur les ventes et les autres taxes ocales. Les prix du sulfate de potassium depuis 1964/65 et du chlorure de otassium depuis 1962/63 sont f.o.r. port. Le montant de la subvention n'est as uniforme dans l'ensemble du pays; dans certains Etats, une subvention de 25% sur le prix d'achat est octroyée pour les engrais phosphatés. Une autre subvention couvre le coût de transport des engrais dans les régions montagneuses et d'accès difficile. Dans d'autres régions, on octroie une subvention de 25 % sur le prix d'achat pour les engrais azotés et de 50 % pour les engrais phosphatés. Nitrate de soude: du Chili. Nitrate d'ammoniaque: de chaux.

Indonésie: Campagne: avril-mars. Prix aux entrepôts des distributeurs dans les villages. Pas de subvention. Chlorure de potassium: 50-60 % K_2O.

Irak: Campagne: avril-mars. Prix de vente au détail. Nitrate d'ammoniaque: de sulfate.

Israël: Prix sortie usine, sauf pour le chlorure et le sulfate de potassium, en magasin à Tel Aviv, et l'urée qui est au port. Les fabricants reçoivent des subventions pour les engrais azotés et phosphatés. Le prix des sacs est à part. Nitrate d'ammoniaque: de chaux. Superphosphate simple: en poudre.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Nepal: Prices at sales depot. No subsidies.

Pakistan, East: Prices shown with deduction of subsidy (approximately 53 %) to maintain prices at the level established in August 1961. No subsidy allowed to the Pakistan Tea Association, Pakistan Tobacco Company, and sugar estates. Urea: through 1963/64, 46 % N; from 1964/65, 40 %.

Pakistan, West: Subsidy of 50 % has been deducted from prices shown.

Philippines: Prices at retail store. Under the rice and corn programme prices paid by farmers were based on half the procurement costs plus incidental expenses through December 1963. From January 1964, no subsidies.

Saudi Arabia: Prices shown for 1963/64 are at port.

TE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

al: Prix au dépôt de ventes. Pas de subvention.

istan oriental: Prix après déduction de la subvention (en général 53 %) estinée à maintenir les prix au niveau fixé en août 1961. Aucune subvention 'est accordée à la Pakistan Tea Association, à la Pakistan Tobacco Company et aux grandes plantations de canne à sucre. Urée: jusqu'à 1963/64 compris, 46 % N; depuis 1964/65, 40 % N.

Pakistan occidental: La subvention de 50 % est déduite des prix indiqués.

Philippines: Prix de vente au détail. Les programmes concernant le riz et le maïs prévoyaient que les prix payés par les agriculteurs étaient calculés sur la base de la moitié des frais d'achat, majorée des faux frais jusqu'à fin décembre 1963. Depuis janvier 1964, aucune subvention.

Arabie saoudite: Les prix indiqués pour 1963/64 s'entendent au port.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Singapore: No subsidies. 1962 through 1964, calendar year, prices ex warehouse: from 1965/66, prices f.o.r. Singapore godown.

Syria: Prices at warehouse. No subsidies. Cooperatives are entitled to 5 % deduction from price of fertilizers when bought from the Agricultural Bank. Sodium nitrate: Chilean. Superphosphate: through 1964/65, granular; from 1965/66, powdered.

Thailand: Prices c.i.f. Bangkok. No subsidies.

Turkey: Calendar year. Prices at retail store. Subsidy on nitrogenous fertilizers only is paid to manufacturers to compensate for their losses. Ammonium nitrate: calcium ammonium nitrate.

Algeria: Prices ex warehouse except superphosphate (46 %) which is c.i.f. Algiers. Phosphate fertilizers, bulk.

Botswana: Prices f.o.r. factory, Durban. No subsidies.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Chad: In 1962/63 the Government distributed fertilizers free to farmers; in 1963/64 farmers paid approximately one third of the cost, and in 1964/65 approximately two thirds. Corresponding prices paid by the Government for these fertilizers at farmers' nearest delivery point were 15 238 CFA francs ($61.7) in 1962/63 and 14 762 CFA francs ($59,8) in 1963/64 and 1964/65 for ammonium sulphate, and 9 333 CFA francs ($37.8) in 1962/63 and 10 000 CFA francs ($40.5) in 1963/64 and 1964/65 for concentrated superphosphate.

Dahomey: Prices at stores of Société nationale pour le développement rural which is subsidized by the Government. Through 1962 the subsidy was equal to half the value. In 1963 it was fixed at 10 000 CFA francs per ton of fertilizer, i.e., 4 761 CFA francs ($19.3) per 100 kg of plant nutrient in ammonium sulphate and 1 667 CFA francs ($6.8) per 100 kg of plant nutrient in muriate of potash.

Gambia: Subsidies deducted from prices shown are paid to fertilizer manufacturers and transport agencies. Ammonium sulphate: subsidy of £4.9 ($13.7) in 1963/64 and £8.0 ($22.4) in 1964/65. Single superphosphate: subsidy of £3.3 ($9.2) in 1963/64, £2.3 ($6.4) in 1964/65, and £2.8 ($7.8) in 1965/66. Muriate: subsidy of £4.9 ($13.7) in 1963/64 and £8.0 ($22.4) in 1964/65.

Ghana: Subsidies deducted from prices shown are paid to fertilizer manufa turers. Ammonium sulphate: subsidy of 2.4 cedis ($2.8) in 1965/66, 2 cedis ($3.0) in 1966/67, and 9.4 cedis ($9.3) in 1967/68. Simple superphosphat subsidy of 1.64 cedis ($2.0) in 1965/66, 1.64 cedis ($2.1) in 1966/67, an 10.9 cedis ($10.8) in 1967/68. Potassium sulphate: subsidy of 1.4 ced ($1.6) in 1965/66, 1.4 cedis ($1.7) in 1966/67, and 3.7 cedis ($3.8) in 1967/6 Potassium chloride: subsidy of 0.5 cedi ($0.6) in 1965/66 and 1966/67, an 2.2 cedis ($2.2) in 1967/68.

Ivory Coast: Prices at store, Abidjan. Subsidies are granted to cocoa an coffee farmers at the rate of one third of purchase price, and to rice farme at the rate of 50 % of purchase price in 1963, 40 % in 1964, 30 % in 196 and 20 % in 1966.

Kenya: Prices f.o.r. Mombasa. Season: November-October. Ammoniu nitrate: ammonium sulphate nitrate. Single superphosphate: subsidy 36 shillings ($5.0) in 1963/64, 39 shillings ($5.4) in 1964/65, and 42 shillin ($5.9) in 1965/66. Concentrated superphosphate: subsidy of 37 shillin ($5.2) in 1963/64, 36 shillings ($5.1) in 1964/65, and 40 shillings ($5.5) 1965/66.

Lesotho: Prices at retail store. Straight nitrogenous and phosphate fertilize were sold to farmers at factory cost, but retail stores received a subsid Ammonium nitrate: calcium ammonium nitrate: subsidy of 2.9 rands ($4. in 1965/66, 2.4 rands ($3.4) in 1966/67 and 1967/68. Simple superphosphat subsidy of 3.8 rands ($5.3) in 1965/66, and 5.0 rands ($7.0) in 1966/67 a 1967/68.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

had: En 1962/63, l'Etat a distribué gratuitement les engrais aux agriculteurs; en 1963/64, les agriculteurs ont payé environ le tiers du prix coûtant et en 1964/65 environ les deux tiers. Les prix correspondants payés par l'Etat pour ces engrais livrés aux points les plus proches des agriculteurs étaient de 15 238 francs CFA ($61,7) en 1962/63 et de 14 762 francs CFA ($59,8) en 1963/64 et 1964/65 pour le sulfate d'ammoniaque, et de 9 333 francs CFA ($37,8) en 1962/63 et de 10 000 francs CFA ($40,5) en 1963/64 et 1964/65 pour le superphosphate concentré.

ahomey: Prix aux magasins de la Société nationale pour le développement rural, subventionnée par l'Etat, jusqu'à fin 1962, la subvention était égale à la moitié de la valeur. En 1963, elle a été fixée à 10 000 francs CFA par tonne d'engrais, soit 4 761 francs CFA ($19,3) pour 100 kg d'éléments fertilisants pour le sulfate d'ammoniaque et de 1 667 francs CFA ($6,8) pour 100 kg d'éléments fertilisants pour le chlorure de potassium.

ambie: Les subventions déduites des prix indiqués sont payées aux fabricants d'engrais et aux agences de transport. Sulfate d'ammoniaque: subvention de £4,9 ($13,7) en 1963/64 et £8,0 ($22,4) en 1964/65. Superphosphate simple: subvention de £3,3 ($9,2) en 1963/64, £2,3 ($6,4) en 1964/65, et £2,8 ($7,8) en 1965/66. Chlorure de potassium: subvention de £4,9 ($13,7) en 1963/64 et £8,0 ($22,4) en 1964/65

Ghana: Les subventions déduites des prix indiqués sont payées aux fabricants d'engrais. Sulfate d'ammoniaque: subvention de 2,4 cedis ($2,8) en 1965/66, de 2,4 cedis ($3,0) en 1966/67, et de 9,4 cedis ($9,3) en 1967/68. Superphosphate simple: subvention de 1,64 cedi ($2,0) en 1965/66, de 1,64 cedi ($2,1) en 1966/67, et de 10,9 cedis ($10,8) en 1967/68. Sulfate de potassium: subvention de 1,4 cedi ($1,6) en 1965/66, de 1,4 cedi ($1,7) en 1966/67, et de 3,7 cedis ($3,8) en 1967/68. Chlorure de potassium: subvention de 0,5 cedi ($0,6) en 1965/66 et 1966/67, et de 2,2 cedis ($2,2) en 1967/68.

Côte-d'Ivoire: Prix aux magasins, Abidjan. Des subventions, de l'ordre du tiers du prix d'achat, sont octroyées aux planteurs de cacao et de café et de l'ordre de 50 % du prix d'achat en 1963, de 40 % en 1964, de 30 % en 1965 et de 20 % en 1966 aux riziculteurs.

Kenya: Prix franco sur wagon Mombasa. Campagne: novembre-octobre. Nitrate d'ammoniaque: sulfo-nitrate d'ammoniaque. Superphosphate simple: subvention de 36 shillings ($5,0) en 1963/64, 39 shillings ($5,4) en 1964/65, et 42 shillings ($5,9) en 1965/66. Superphosphate concentré: subvention de 37 shillings ($5,2) en 1963/64, 36 shillings ($5,1) en 1964/65, et 40 shillings ($5,5) en 1965/66.

Lesotho: Prix de vente au détail. Les engrais azotés et phosphatés simples étaient vendus aux agriculteurs au prix usine, mais les magasins de vente au détail recevaient une subvention. Nitrate d'ammoniaque: de chaux; subvention de 2,9 rands ($4,1) en 1965/66 et de 2,4 rands ($3,4) en 1966/67 et 1967/68. Superphosphate simple: subvention de 3,8 rands ($5,3) en 1965/66 et de 5,0 rands ($7,0) en 1966/67 et 1967/68.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Libya: Calendar year. Prices at retail store. Subsidy paid to sellers was 20 % in 1963 and 1964; in 1965 it was 34 % on ammonium sulphate and single superphosphate and 26 % on other fertilizers; and in 1966 and 1967 it was 34 % on all fertilizers.

Madagascar: Season: March-February. Prices at retail store. 1964/65, subsidies, which were granted only to rice cultivators in the Plateau region, have not been deducted from prices shown. Ammonium sulphate: 1965/66 through 1967/68, subsidy of 4 762 francs ($19.3)). Urea: 1965/66 through 1967/68, subsidy of 2 174 francs ($8.8). Muriate: 1965/66 through 1967/68, subsidy of 1 667 francs ($6.8).

Malawi: Prices f.o.r. Limbe, for fertilizer in 100-lb bags. Trust land farmers buying fertilizer from the Farmers' Marketing Board receive a 50 % subsidy.

Mali: Subsidies deducted from prices shown are as follows: ammonium sulphate: 6 667 CFA francs ($27.0) in 1964/65, 6 286 CFA francs ($25.5) in 1965/66, and 4 000 CFA francs ($16.2) in 1966/67. Urea: 5 652 CFA francs ($22.9) in 1964/65 and 1965/66, and 4 565 CFA francs ($18.5) in 1966/67. Superphosphate: 3 684 CFA francs ($14.9) from 1964/65 through 1966/67. Basic slag: 2 889 CFA francs ($11.7) in 1964/65, 2 667 CFA francs ($10.8) in 1965/66, and 2 444 CFA francs ($9.9) in 1966/67. Muriate: 1 200 CFA francs ($4.9) from 1964/65 through 1966/67.

Mauritania: Prices charged to farmers by the Bureau of Agriculture. No subsidies.

Mauritius: From 1965, calendar year. Prices at retail store. No subsidies. Sodium nitrate: through 1964/65, synthetic; from 1965, Chilean.

TE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

ye: Année civile. Prix de vente au détail. Les subventions payées aux vendeurs étaient de 20 % en 1963 et 1964; en 1965 elles étaient de 34 % sur le ulfate d'ammoniaque et le superphosphate simple, et de 26 % sur les autres ngrais; et en 1966 et 1967 elles étaient de 34 % sur tous les engrais.

dagascar: Campagne: mars-février. Prix de vente au détail. 1964/65, les ubventions, qui étaient accordées seulement aux cultivateurs de riz dans région du Plateau, ne sont pas déduites des prix indiqués. Sulfate d'amoniaque: 1965/66 à fin de 1967/68, subvention de 4 762 francs ($19,3). Urée: 1965/66 à fin de 1967/68, subvention de 2 174 francs ($8,8). Chlorure e potassium: 1965/66 through 1967/68, subvention de 1 667 francs ($6,8).

Malawi: Prix franco sur wagon, Limbe, pour des engrais en sacs de 100 lb. Les agriculteurs qui cultivent des terres domaniales et qui achètent les engrais à l'Office de commercialisation des agriculteurs touchent une subvention de 50 %.

Mali: Les subventions déduites des prix indiqués sont les suivantes: Sulfate d'ammoniaque: 6 667 francs CFA ($27,0) en 1964/65, 6 286 francs CFA ($25,5) en 1965/66 et 4 000 francs CFA ($16,2) en 1966/67. Urée: 5 652 francs CFA ($22,9) en 1964/65 et en 1965/66, et 4 565 francs CFA ($18,5) en 1966/67. Superphosphate: 3 684 francs CFA ($14,9) de 1964/65 à 1966/67. Scories de déphosphoration: 2 889 francs CFA ($11,7) en 1964/65, 2 667 francs CFA ($10,8) en 1965/66 et 2 444 francs CFA ($9,9) en 1966/67. Chlorure de potassium: 1 200 francs CFA ($4,9) de 1964/65 à 1966/67.

Mauritanie: Prix facturés aux agriculteurs par la Direction de l'agriculture. Pas de subvention.

Maurice: Depuis 1965, année civile. Prix de vente au détail. Pas de subvention. Nitrate de soude: jusqu'à fin 1964/65, synthétique; depuis 1965, du Chili.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Morocco: Prices at factory, Casablanca. Small-scale farmers received a rebate of 5 dirhams ($0.99) per 100 kg of fertilizer. For fertilizer demonstrations a rebate of 25 % of the price is given on nitrogenous and complex fertilizers. Payment is made to farmers through cooperatives. Sodium nitrate: synthetic.

Nigeria: Prices at port and farm gate. Season: April-March. Government subsidy in the form of transportation and handling services keeps prices uniform throughout the country.

Nigeria: Western Region: Prices at farm gate. Season: April-March. Ammonium sulphate: subsidy of £3.8 ($10.6) in 1964/65 and £4.8 ($13.4) in 1965/66, 1966/67 and 1967/68. Simple superphosohate: subsidy of £2.2 ($6.2) in 1964/65 and 1965/66, £3.3 ($9.2) in 1966/67, and £2.8 ($7.8) in 1967/68. Muriate: subsidy of £1.0 ($2.8) in 1964/65, 1965/66 and 1966/67, and £0.7 ($2.0) in 1967/68.

Reunion: Calendar year. No subsidies.

Rhodesia, Southern: Prices f.o.r. Salisbury. Season: April-March. No subsidies. Sodium nitrate: synthetic.

Sierra Leone: Prices at farmer's nearest agricultural station. Ammonium sulphate: subsidy of 8.9 leones ($12.5) in 1965/66 and 1966/67 and 8.9 leones ($11.4) in 1967/68. Simple superphosphate: subsidy of 7.6 leones ($10.6) in 1965/66 and 1966/67 and 7.6 leones ($9.7) in 1967/68. Potassium sulphate: subsidy of 3.7 leones ($5.2) in 1965/66 and 1966/67 and 3.7 leones ($4.7) in 1967/68.

South Africa: Calendar year. Prices f.o.r. factory For delivery from stocks in country store, railage and a handling charge of 1.5 rands ($2.10) per ton are added. Subsidy deducted of 2 rands ($2.80) per ton of fertilizer.

Sudan: No subsidies, but fertilizers are sold to farmers by government and semi-government agencies at cost plus transport, storage, etc.

Swaziland: 1963/64 and 1964/65, prices at retail store. 1966/67, prices at manufacturer's railway station. Prices at farmer's nearest railway station are on the average 7.0 rands higher per short ton of fertilizer.

TE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

oc: Prix à l'usine. Casablanca. Les petits exploitants ont bénéficié d'une emise de 5 dirhams ($0,99) par 100 kg d'engrais. Pour les démonstrations 'engrais, il est consenti une remise de 25 % sur le prix des engrais azotés t complexes. Le versement aux agriculteurs est effectué par l'entremise es coopératives. Nitrate de soude: synthétique.

eria: Prix au port et à l'entrée des exploitations. Campagne: avril-mars. Une subvention de l'Etat (sous forme de services de transport et de manutention) assure l'uniformité des prix dans l'ensemble du pays.

eria: Région occidentale: Prix au port et à l'entrée des exploitations. ampagne: avril-mars. Sulfate d'ammoniaque: subvention de £3,8 ($10,6) n 1964/65 et de £4,8 ($13,4) en 1965/66, 1966/67 et 1967/68. Superphosphate mple: subvention de £2,2 ($6,2) en 1964/65 et 1965/66, de £3,3 ($9,2 n 1966/67, et de £2,8 ($7,8) en 1967/68. Chlorure de potassium: subvention e £1,0 ($2,8) en 1964/65, 1965/66, et 1966/67, et £0,7 ($2,0) en 1967/68.

Réunion: Année civile. Pas de subvention.

Rhodésie du Sud: Prix franco sur wagon Salisbury. Campagne: avril-mars. Pas de subvention. Nitrate de soude: synthétique

Sierra Leone: Prix à la station agricole la plus proche de la ferme. Sulfate d'ammoniaque: subvention de 8,9 leones ($12,5) en 1965/66 et 1966/67, et de 8,9 leones ($11,4) en 1967/68. Superphosphate simple: subvention de 7,6 leones ($10,6) en 1965/66 et 1966/67, et de 7,6 leones ($9,7) en 1967/68. Sulfate de potassium: subvention de 3,7 leones ($5,2) en 1965/66 et 1966/67 et de 3,7 leones ($4,7) en 1967/68.

Afrique du Sud: Année civile. Prix franco sur wagon à l'usine. Pour les livraisons à partir des entrepôts de campagne, il y a lieu d'ajouter les frais de transport et de manutention (1,5 rand [$2,10] par tonne). La subvention de 2 rands ($2,80) par tonne d'engrais a été déduite.

Soudan: Pas de subvention, mais l'Etat et des organismes semi-officiels vendent les engrais aux agriculteurs au prix coûtant, majoré des frais de transport, d'emmagasinage, etc.

Swaziland: 1963/64 et 1964/65, prix de vente au détail. 1966/67, prix gare du fabricant. Les prix à la gare la plus proche de la ferme sont majorés en moyenne de 7,00 rands par tonne courte (907,18 kg).

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Togo: Prices at wharf.

Tunisia: Prices at retail store. Ammonium sulphate: subsidy of 3.3 dinars ($6.3) in 1964/65 and 1965/66. Ammonium nitrate: subsidy of 3.0 dinars ($5.7) in 1964/65 and 1965/66. Calcium nitrate: subsidy of 3.9 dinars ($7.4) in 1964/65 and 1965/66. Urea: subsidy of 3.0 dinars ($5.8) in 1964/65 and 1965/66.

Uganda: 1962/63 and 1963/64, prices f.o.r. Kampala except for superphosphate which is f.o.r. Tororo. 1967/68, prices at retail store. Ammonium nitrate: ammonium sulphate nitrate.

United Arab Republic: Season: November-October. Official retail prices at nearest delivery centres. No subsidies. Ammonium nitrate: calcium ammonium nitrate. Sodium nitrate: Chilean.

Upper Volta: Prices at retail store.

Zambia: Season: April-March. 1963/64, prices f.o.b. factory. From 1964/65 through 1966/67, prices at farmer's nearest railway station. Ammonium nitrate: calcium ammonium nitrate.

American Samoa: Prices at port.

go: Prix à quai.

nisie: Prix de vente au détail. Sulfate d'ammoniaque: subvention de 3,3 dinars ($6,3) en 1964/65 et 1965/66. Nitrate d'ammoniaque: subvention de 3,0 dinars ($5,7) en 1964/65 et 1965/66. Nitrate de chaux: subvention de 3,9 dinars ($7,4) en 1964/65 et 1965/66. Urée: subvention de 3,0 dinars ($5,8) en 1964/65 et 1965/66.

Ouganda: 1962/63 et 1963/64, prix franco sur wagon Kampala, sauf pour le superphosphate franco sur wagon Tororo. 1967/68, prix de vente au détail. Nitrate d'ammoniaque: de sulfate.

République arabe unie: Campagne: novembre-octobre. Prix au détail officiels aux centres de livraison les plus proches. Pas de subvention. Nitrate d'ammoniaque: de chaux. Nitrate de soude: du Chili.

Haute-Volta: Prix de vente au détail.

Zambie: Campagne: avril-mars. 1963/64, prix f.o.b. usine. De 1964/65 à fin de 1966/67, prix à la gare la plus proche. Nitrate d'ammoniaque: de chaux.

Samoa américain: Prix au port.

NOTE: Prices are those paid by farmers at the farm gate and relate to the twelve-month period beginning 1 July. They are shown with subsidies deducted wherever possible. Exceptions to these general features are given in the footnotes presented by country.

Australia: Prices f.o.r. Yarraville, except calcium ammonium nitrate and urea which are ex works. Subsidies paid to fertilizer manufacturers. Ammonium sulphate: subsidy of $1.91 ($2.14) in 1962/63, $2.07 ($2.32) in 1963/64, $3.81 ($4.27) in 1964/65 and 1965/66, and $11.69 ($13.09) in 1966/67 and 1967/68. Ammonium nitrate: calcium ammonium nitrate; subsidy of $7.87 ($8.81) in 1966/67 and 1967/68. Sodium nitrate (Chilean) and urea: subsidy of $7.87 ($8.81) in 1966/67 and 1967/68. Single superphosphate: subsidy of $2.68 ($3.00) from 1963/64 through 1967/68.

Fiji: Prices at retail store. 1966 and 1967, calendar year. Subsidies paid to farmers under programme commencing 21 February 1962. Ammonium sulphate: subsidy of £4.4 ($11.2) in 1962/63, 1963/64, and 1964/65, £3.4 ($8.7) in 1966, and £4.0 ($9.9) in 1967. Urea: subsidy of £3.3 ($8.3) in 1962/63 1963/64, and 1964/65, £2.5 ($6.3) in 1966 and £2.8 ($7.0) in 1967. Singl superphosphate: subsidy of £3.0 ($7.5) in 1962/63, 1963/64, and 1964/65 £3.4 ($8.7) in 1966, and £3.6 ($9.0) in 1967. Potassium sulphate: subsid of £2.2 ($5.5) in 1962/63, 1963/64, and 1964/65, £2.4 ($6.1) in 1966, and £2. ($5.8) in 1967. Muriate: subsidy of £1.5 ($3.7) in 1967.

Guam: Retail prices.

New Zealand: Prices at retail store or f.o.b. factory except basic slag whic is f.o.b. port. From August 1965, subsidy is paid to manufacturers to cove two thirds of transport cost from works to farms in excess of N.Z. $3.0 a ton.

Pacific Islands (U.S. Adm.): Prices f.o.b. United States or Japanese port Fertilizers are sold through government farm stores at these prices plu additional handling costs.

OTE: Les prix sont ceux qui sont payés par les agriculteurs à l'entrée de l'exploitation; ils se réfèrent à la période de 12 mois commençant le 1er juillet. Ils sont donnés, chaque fois que possible, déduction faite de la subvention. Les exceptions à ces caractéristiques générales sont indiquées dans les notes de bas de page présentées par pays.

stralie: Prix franco sur wagon, Yarraville, à l'exception du nitrate d'ammoniaque de chaux et urée qui sont sortie usine. Subventions payées aux fabricants. Sulfate d'ammoniaque: subvention de $1,91 ($2,14) en 1962/63, $2,07 ($2,32) en 1963/64, $3,81 ($4,27) en 1964/65 et 1965/66 et de $11,69 ($13,09) en 1966/67 et 1967/68. Nitrate d'ammoniaque: de chaux; subvention de $7,87 ($8,81) en 1966/67 et 1967/68. Nitrate de soude (du Chili) et urée: subvention de $7,78 ($8,81) en 1966/67 et 1967/68. Superphosphate simple: subvention de $2,68 ($3,00) de 1963/64 à fin de 1967/68.

ji: Prix de vente au détail. 1966 et 1967, année civile. Les subventions sont payées aux exploitants selon le programme commençant le 21 février 1962. Sulfate d'ammoniaque: subvention de £4,4 ($11,2) en 1962/63, 1963/64 et 1964/65, de £3,4 ($8,7) en 1966, et de £4,0 ($9,9) en 1967. Urée: subvention de £3,3 ($8,3) en 1962/63, 1963/64 et 1964/65, de £2,5 ($6,3) en 1966, et de £2,8 ($7,0) en 1967. Superphosphate: subvention de £3,0 ($7,5) en 1962/63, 1963/64 et 1964/65, de £3,4 ($8,7) en 1966, et de £3,6 ($9,0) en 1967. Sulfate de potassium: subvention de £2,2 ($5,5) en 1962/63, 1963/64 et 1964/65, de £2,4 ($6,1) en 1966 et de £2,3 ($5,8) en 1967. Chlorure de potassium: subvention de £1,5 ($3,7) en 1967.

Guam: Prix de vente au détail.

Nouvelle-Zélande: Prix de vente au détail ou f.o.b. usine, sauf pour les scories de déphosphoration qui est f.o.r. port. Depuis août 1965, si le coût du transport de l'usine à l'exploitation dépasse $3,00 N.Z. par tonne, les fabricants touchent une subvention qui couvre les deux tiers de la différence.

Iles du Pacifique (Adm. E.-U.): Prix f.o.b. ports des Etats-Unis ou du Japon. Les engrais sont vendus, par l'intermédiaire de magasins de l'Etat, à ces prix, majorés des frais de manutention.

NOTE: For a description of the methods of calculation of these index series, see 1960 Yearbook, p. 463-468. Descriptions of subsequently revised series were presented in the *Production Yearbook 1961*, p. 374, for Austria; in the *Production Yearbook 1962*, p. 375, for Australia and the United Kingdom; in the *Production Yearbook 1964*, p. 417, for Japan; and in the *Production Yearbook 1965*, p. 431, for Brazil and the Federal Republic of Germany; and in the *Monthly Bulletin of Agricultural Economics and Statistics*, May 1962, for France.
The symbol † indicates a break in the series; data following it were computed on a revised basis.

[1] Annual averages refer to crop year: Australia, June-June; Denmark, Germany (Fed. Rep.), India (Uttar Pradesh), Italy, Netherlands, Puerto Rico, South Africa, United Kingdom, July-June; Japan, April-March; India (Punjab) and Sweden, September-August; Israel, October-September. – [2] Not included in the general index. – [3] From 1966/67, new index, base: October 1965-September 1966 = 100.

NOTE: Ces nombres-indices ont été calculés selon les méthodes indiquées dans l'Annuaire de 1960, p. 463-468. Des indications sur les séries ultérieurement révisées, ont paru dans l'*Annuaire de la production 1961*, p. 374 (Autriche), dans l'*Annuaire de la production 1962*, p. 37 (Australie et Royaume-Uni), dans l'*Annuaire de la production 1964* p. 417 (Japon), et dans l'*Annuaire de la production 1965*, p. 431 (Brés et République fédérale d'Allemagne), et dans le *Bulletin mensuel Économie et statistique agricoles* (numéro de mai 1962, France).
Le signe † indique une interruption dans la série; les chiffres qui suivent ont été calculés sur une base révisée.

[1] Les moyennes annuelles se rapportent à la campagne agricole: Australie juin-juin; Danemark, Allemagne (Rép. féd.), Inde (Uttar Pradesh), Italie, Pay Bas, Porto Rico, Afrique du Sud, Royaume-Uni, juillet-juin; Japon, avril-mar Inde (Pendjab) et Suède, septembre-août; Israël, octobre-septembre. – [2] No compris dans l'indice général. – [3] Depuis 1966/67, nouvel indice, base: oct bre 1965-septembre 1966 = 100.

NOTE: National index numbers were converted, wherever possible, to the base 1963 = 100, for the purpose of international comparability. Index numbers of agricultural prices relate to prices of farm products of animal and vegetable origin, excluding forestry products and fodder, unless otherwise specified.

The symbol † indicates a break in the series, data following it being computed on a revised basis.

[1] Home consumption of foodstuffs and industrial raw materials. – [2] Beginning 1966, base: 1964 = 100. – [3] Index of foodstuffs (Iran, prior to 1959). – [4] Including processed foodstuffs. – [5] Sector approach. – [6] Prior to 1960, excluding the Saar. – [7] Not a subdivision of the general index (Iraq, beginning 1962). – [8] Base: July 1963-June 1964 = 100. Twelve months beginning 1 July of year stated. – [9] Prior to 1959, base: 1959 = 100. – [10] Base: July 1962-June 1963 = 100. Twelve months ending 30 June of year stated. – [11] Producers' prices of industrial products. – [12] Source: Fundaçao Getúlio Vargas. – [13] Including noncultivated forest products except timber. – [14] 1954. – [15] Base: October 1962-September 1963 = 100. Prior to January 1967, the index is computed from controlled prices. – [16] Prior to 1959, Teheran only, base: 1958 = 100. – [17] Edible farm products.

NOTE: Toutes les fois que cela a été possible, les nombres-indices nationaux ont été ramenés à la période de base 1963 = 100, afin d'en assurer la comparabilité sur le plan international. Les nombres-indices des prix agricoles se rapportent aux prix des produits agricoles d'origine animale et végétale, à l'exclusion des produits forestiers et du fourrage, sauf indication contraire.

Le signe † indique une interruption dans la série; les chiffres qui le suivent sont calculés sur une base révisée.

[1] Consommation de produits alimentaires et matières premières industrielles dans le pays. – [2] A partir de 1966, base: 1964 = 100. – [3] Indice des produits alimentaires (Iran, avant 1959). – [4] Y compris les produits alimentaires préparés. – [5] Sur la base des différents secteurs de l'économie. – [6] Avant 1960, non compris la Sarre. – [7] Pas un élément de l'indice général (Irak, à partir de 1962). – [8] Base: juillet 1963-juin 1964 = 100. Douze mois commençant le 1er juillet de l'année indiquée. – [9] Avant 1959, base: 1959 = 100. – [10] Base: juillet 1962-juin 1963 = 100. Douze mois finissant le 30 juin de l'année indiquée. – [11] Produits industriels; prix à la production. – [12] Source: Fundaçao Getúlio Vargas. – [13] Y compris les produits forestiers non cultivés, sauf le bois. – [14] 1954. – [15] Base: octobre 1962-septembre 1963 = 100. Avant janvier 1967, l'indice est calculé à partir des prix contrôlés. – [16] Avant 1959, Téhéran seulement, base: 1958 = 100. – [17] Produits agricoles comestibles.

NOTE: National index numbers were converted, wherever possible, to the base 1958 = 100, for the purpose of international comparability.

The symbol † indicates a break in the series; data following it were computed on a revised basis.

[1] Prior to 1958, Vienna only. – [2] Base: 1958 = 100 (Austria and China (Taiwan), prior to 1958; British Honduras and French Polynesia, prior to 1959). – [3] Base: 1966 = 100 (Austria and Somalia, beginning 1967; Barbados, beginning 1966). – [4] Excluding rent (Austria, prior to 1958; Denmark, prior to 1965; Grenada, prior to 1964; West Malaysia, prior to 1959). – [5] Index of state retail prices. – [6] 1954. – [7] Base: 1964 = 100 (Denmark, beginning 1965; Paraguay and Algeria, beginning 1964). – [8] Prior to 1962, index for Paris. – [9] Base: 1962 = 100 (France, Federal Republic of Germany, Panama, Mauritius, and Tunisia, prior to 1962; Uruguay, prior to 1963). – [10] Including tobacco (Federal Republic of Germany and Tunisia, beginning 1962). – [11] Prior to 1960, excluding the Saar. – [12] 1954. – [13] Prior to 1959, Athens only. – [14] Base: 1959 = 100 (Greece, Laos, and West Malaysia, prior to 1959; Singapore and Fiji, prior to 1960). – [15] Including direct taxes (Iceland, beginning 1959; South Africa, prior to 1958). – [16] Base: 1965 = 100 (Luxembourg, beginning 1966; Grenada, beginning 1964). – [17] Average of less than 12 months. – [18] Excluding compulsory social insurance and wage tax. – [19] Base: 1960 = 100 (Spain, prior to 1961; Peru, Thailand, and Nigeria, prior to 1960). – [20] Base: 1967 = 100 (Switzerland, beginning 1967). – [21] Base: 1961 = 100 (United Kingdom, prior to 1962; Paraguay, prior to 1964; Algeria, prior to 1963; Mozambique, prior to 1961). – [22] San José metropolitan area; prior to 1965, San José city only. – [23] San Salvador, Mejicanos, and Villa Delgado. – [24] Prior to 1964, agricultural labourers. – [25] Including soap, fuel, light, and tobacco. – [26] Excluding miscellaneous. – [27] Excluding rent and miscellaneous. – [28] Excluding compulsory social security. – [29] Prior to 1964, excluding Alaska and Hawaii. – [30] December. – [31] Georgetown and New Amsterdam. – [32] Prior to 1962, including fuel. – [33] Working class. – [34] 1953 and 1957, middle-class public servants, Taipei only. – [35] Beginning 1965, base: September 1963-August 1964 = 100. – [36] Beginning 1964, new series. – [37] Prior to 1964, 28 cities only. – [38] Prior to 1966, Seoul only. – [39] Civil servants. – [40] Beginning 1959, all races (Malays, Chinese, and Indians). Prior to 1959, Malay labourers in Kuala Lumpur only. – [41] Industrial workers. – [42] Source: Central Bank of the Philippines. – [43] Beginning 1960, all races. Prior to 1960, Asians only. – [44] Former Aden only. – [45] Prior to 1962, 19 food articles, soap, kerosene and cigarettes; base: 1962 = 100. – [46] Prior to 1960, Bangkok only. – [47] Excluding clothing, rent, and miscellaneous (Mozambique, prior to 1961). – [48] Europeans. – [49] Excluding clothing and rent (Tunisia, prior to 1962). – [50] Middle class. – [51] Additional index for Europeans. – [52] Lower-income group. – [53] Africans. – [54] March. – [55] White population. – [56] Low-salaried officials. – [57] Beginning 1960, Indian and Fijian workers. Prior to 1960, Indian workers in Suva only.

NOTE: Toutes les fois que cela a été possible, les nombres-indices nationaux ont été ramenés à la période de base 1958 = 100, afin d'en assurer la comparabilité sur le plan international.

Le signe † indique une interruption dans la série; les chiffres qui le suivent ont été calculés sur une base révisée.

[1] Avant 1958, Vienne seulement. – [2] Base: 1958 = 100 (Autriche et Chine (Taïwan), avant 1958; Honduras britannique et Polynésie française, avant 1959). – [3] Base: 1966 = 100 (Autriche et Somalie, depuis 1967; Barbade, depuis 1966). – [4] Loyer exclu (Autriche, avant 1958; Danemark, avant 1965; Grenade, avant 1964; Malaisie occidentale, avant 1959). – [5] Indice des prix de détail de l'Etat. – [6] 1954. – [7] Base: 1964 = 100 (Danemark, depuis 1965; Paraguay et Algérie, depuis 1964). – [8] Avant 1962, indice pour Paris. – [9] Base: 1962 = 100 (France, République fédérale d'Allemagne, Panama, Maurice et Tunisie, avant 1962; Uruguay, avant 1963). – [10] Y compris le tabac (République fédérale d'Allemagne et Tunisie, depuis 1962). – [11] Avant 1960, non compris la Sarre. – [12] 1954. – [13] Avant 1959, Athènes seulement. – [14] Base: 1959 = 100 (Grèce, Laos et Malaisie occidentale, avant 1959; Singapour et Fidji, avant 1960). – [15] Y compris les impôts directs (Islande, depuis 1959; Afrique du Sud, avant 1958). – [16] Base: 1965 = 100 (Luxembourg, depuis 1966; Grenade, depuis 1964). – [17] Moyenne de moins de 12 mois. – [18] Non compris les assurances sociales obligatoires et les impôts sur le revenu. – [19] Base: 1960 = 100 (Espagne, avant 1961; Pérou, Thaïlande et Nigeria, avant 1960). – [20] Base: 1967 = 100 (Suisse, depuis 1967). – [21] Base: 1961 = 100 (Royaume-Uni, avant 1962; Paraguay, avant 1964; Algérie, avant 1963; Mozambique, avant 1961). – [22] Région métropolitaine de San José; avant 1965, ville de San José seulement. – [23] San Salvador, Mejicanos et Villa Delgado. – [24] Avant 1964, travailleurs agricoles. – [25] Y compris le savon, les combustibles, l'éclairage et le tabac. – [26] Non compris le groupe divers. – [27] Non compris les groupes loyer et divers. – [28] Non compris la sécurité sociale obligatoire. – [29] Avant 1964, non compris l'Alaska et Hawaii. – [30] Décembre. – [31] Georgetown et New Amsterdam. – [32] Avant 1962, y compris les combustibles. – [33] Classe ouvrière. – [34] 1953 et 1957, fonctionnaires de la classe moyenne, Taipeh seulement. – [35] Depuis 1965, base: septembre 1963-août 1964 = 100. – [36] Depuis 1964, nouvelle série. – [37] Avant 1964, 28 villes seulement. – [38] Avant 1966, Séoul seulement. – [39] Fonctionnaires. – [40] Depuis 1959, toutes les races (malésiennes, chinoises et indiennes); avant 1959, ouvriers malais à Kuala-Lumpur seulement. – [41] Travailleurs dans l'industrie. – [42] Source: Banque centrale des Philippines. – [43] Depuis 1960, toutes les races. Avant 1960, Asiatiques seulement. – [44] Ancien territoire d'Aden seulement. – [45] Avant 1962, 19 articles d'alimentation, le savon, le pétrole lampant, et les cigarettes; base: 1962 = 100. – [46] Avant 1960, Bangkok seulement. – [47] Non compris les groupes habillement, loyer, et divers (Mozambique, avant 1961). – [48] Européens. – [49] Non compris les groupes habillement et loyer (Tunisie, avant 1962). – [50] Classe moyenne. – [51] Indice supplémentaire pour européens. – [52] Familles ayant un revenu modique. – [53] Africains. – [54] Mars. – [55] Population blanche. – [56] Fonctionnaires subalternes. – [57] Depuis 1960, travailleurs indiens et fidjiens. Avant 1960, travailleurs indiens à Suva seulement.

C - Complete wage (worker remunerated wholly in cash).

P - Cash part of remuneration when received partly in cash and partly in kind. Payment in kind may include the following estimates as indicated: (*a*) value of board; (*b*) value of lodging.

EUROPE

Austria: I - Permanent labourers, horse drivers, male.
II - Permanent labourers, milkers, female.
III - Day labourers, horse drivers, male.
IV - Day labourers, milkers, female.

Belgium: I - General farm hands, adults, male.
II - General farm hands, adults, female.
III - Day labourers, adults, male.
IV - Day labourers, adults, female.
V - Day labourers, adults, male.
VI - Day labourers, adults, female.

Bulgaria: I - State farms, agricultural workers, male and female.
II - State farms, auxiliary farm workers, male and female.
III - State farms, all workers, including salaried employees.

C - Montant total du salaire (travailleurs entièrement rémunérés en espèces).

P - Partie de la rémunération payée en espèces (travailleurs rémunérés en partie en espèces, en partie en nature). Dans la rémunération en nature peuvent figurer les estimations ci-après: (*a*) valeur des repas; (*b*) valeur du logement.

EUROPE

Autriche: I - Ouvriers permanents, conducteurs de chevaux.
II - Ouvrières permanentes, trayeuses.
III - Journaliers, conducteurs de chevaux.
IV - Journalières, trayeuses.

Belgique: I - Ouvriers agricoles, adultes.
II - Ouvrières agricoles, adultes.
III - Journaliers, adultes.
IV - Journalières, adultes.
V - Journaliers, adultes.
VI - Journalières, adultes.

Bulgarie: I - Fermes de l'Etat, ouvriers et ouvrières agricoles.
II - Fermes de l'Etat, auxiliaires de ferme, hommes et femmes.
III - Fermes de l'Etat, ensemble des travailleurs, y compris les employés.

AFRICA

Kenya: III - Casual day labourers, adults, male.
IV - Casual day labourers, adults, female.

Malawi: I - All African workers, including salaried employees, male and female.
II - All non-African workers, including salaried employees, male and female.

Mauritius: I - Day labourers, sugarcane plantations, male; through 1960, minimum daily earnings; from 1961, average daily earnings.
II - Day labourers, sugarcane plantations, female; average daily earnings.

Morocco: I - Adult workers, permanent and seasonal, male, minimum rates.
II - Adult workers, permanent and seasonal, female, minimum rates.

Nigeria: I - Skilled workers, male.
II - Unskilled workers, male

Reunion: Day labourers, adults, male and female.

Rhodesia, Southern: I - Africans, all workers in agriculture and forestry, male and female.
II - Non-Africans, all workers in agriculture and forestry, including salaried employees, male and female.

Senegal: Skilled workers, male.

AFRIQUE

Kenya: III - Journaliers occasionnels, adultes.
IV - Journalières occasionnelles, adultes.

Malawi: I - Ensemble des travailleurs africains, hommes et femmes, y compris les employés.
II - Ensemble des travailleurs non africains, hommes et femmes, y compris les employés.

Maurice: I - Journaliers, plantations de canne à sucre; jusqu'à fin 1960, gains journaliers minimaux; depuis 1961, gains journaliers moyens.
II - Journalières, plantations de canne à sucre; gains journaliers moyens.

Maroc: I - Ouvriers adultes, permanents et saisonniers, taux minimaux.
II - Ouvrières adultes, permanentes et saisonnières, taux minimaux.

Nigeria: I - Ouvriers qualifiés.
II - Ouvriers non qualifiés.

Réunion: Journaliers, adultes, hommes et femmes.

Rhodésie du Sud: I - Africains, ensemble des travailleurs agricoles et sylvicoles, hommes et femmes.
II - Non-Africains, ensemble des travailleurs agricoles et sylvicoles, y compris les employés, hommes et femmes.

Sénégal: Ouvriers qualifiés.

NOTES ON THE TABLES

GENERAL

Regional totals

Regional totals are given in all tables in which continental otals are shown. They appear even when identical with con- inental totals or easily derivable from them, in order to avoid ny possible ambiguity.

Because of rounding, regional totals may not always add p to continental totals. The seven regions into which the vorld is divided for the purpose of FAO analytical studies are iven below:

Europe (excl. U.S.S.R.)

Albania, Andorra, Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, Faeroe Islands, Finland, France, Germany (Eastern, Federal Republic, Berlin), Gibraltar, Greece (incl. the Dodecanese), Hungary, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway (incl. Jan Mayen, Svalbard), Poland, Portugal (incl. Azores, Madeira), Romania, San Marino, Spain (incl. Balearic and Canary Islands), Sweden, Switzerland, United Kingdom (incl. Channel Islands, Isle of Man), Vatican, Yugoslavia.

North America

Bermuda, Canada, Greenland, St. Pierre and Miquelon, United States (including Alaska, Hawaii).

Latin America

Antigua, Argentina, Bahamas, Barbados, Bolivia, Brazil, British Honduras, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador (incl. Galapagos Islands), El Salvador, Falkland Islands (Malvinas), French Guiana, Grenada, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Mexico, Montserrat, Netherlands Antilles, Nicaragua, Panama, Panama Canal Zone, Paraguay, Peru, Puerto Rico, St. Kitts-Nevis, St. Lucia, St. Vincent, Surinam, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, Venezuela, Virgin Islands (U.K.), Virgin Islands (U.S.).

Near East

Africa

Libya (Cyrenaica, Tripolitania, Fezzan), Sudan, United Arab Republic.

Asia

Afghanistan, Bahrain, Cyprus, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Muscat and Oman, Qatar, Saudi Arabia, Southern Yemen (former Federation of South Arabia), Syria, Trucial Oman, Turkey, Yemen.

Far East (excl. Mainland China)

Bhutan, Bonin Islands, Brunei, Burma, Cambodia, Ceylon, China (Taiwan), Christmas Islands (Austral. Adm.), Hong Kong, India (incl. Goa, Daman, Diu), Indonesia (incl. West Irian), Japan, North Korea, Republic of Korea, Laos, Macau, Malaysia (Sabah, Sarawak, West Malaysia), Maldive Islands, Mongolia, Nepal, Pakistan, Philippines, Portuguese Timor, Ryukyu Islands, Singapore, Thailand, North Viet-Nam, Republic of Viet-Nam.

Africa

Algeria, Angola, Botswana, Burundi, Cameroon (Eastern Cameroon, Western Cameroon), Cape Verde Islands, Central African Republic, Chad, Comoro Islands, Congo (Brazzaville), Democratic Republic of the Congo, Dahomey, Equatorial Guinea (Fernando Póo, Rio Muni), Ethiopia, French Territory of the Afars and the Issas, Gabon, Gambia, Ghana, Guinea, Ifni, Ivory Coast, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia (former South West Africa), Niger, Nigeria (Eastern Region, Lagos, Northern Region, Western Region), Portuguese Guinea, Reunion, Southern Rhodesia, Rwanda, St. Helena, São Tomé and Principe, Senegal, Seychelles, Sierra Leone, Somalia (former British Somaliland, former Italian Somaliland), South Africa, Spanish North Africa (Ceuta, Melilla, others), Spanish Sahara (Rio de Oro, Saguia el Hamra), Swaziland, Tanzania (Tanganyika, Zanzibar), Togo, Tunisia, Uganda, Upper Volta, Zambia.

Oceania

American Samoa, Australia, British Solomon Islands, Canton and Enderbury Islands, Cocos (Keeling) Islands, Cook Islands, Fiji, French Polynesia, Gilbert and Ellice Islands, Guam, Johnston Island, Midway Islands, Nauru, New Caledonia, New Guinea (Austral. Adm.), New Hebrides, New Zealand (including Campbell and Kermadec Islands), Niue, Norfolk Island, Pacific Islands (U.S. Adm.), Papua, Pitcairn, Tokelau Islands, Tonga, Wake Island, Western Samoa.

LAND

Land use

This table attempts to bring together data on land use hroughout the world. It should be borne in mind when con- dering this table that definitions used by reporting govern- ents vary considerably and items classified under the same ategory often relate to greatly differing kinds of land. Fur- hermore, for a number of countries, data are either not vailable for certain land categories or are incomplete in heir coverage.

In the compilation of the table, the following definitions were adopted:

1. *Total area* refers to the total area of the country, including area under inland water bodies.

2. *Land area* refers to total area, but excludes area under inland water bodies. The definition of inland water bodies generally includes major rivers and lakes but excludes small waters.

3. *Arable land and land under permanent crops* includes land under crops (double-cropped areas are counted only once), land temporarily fallow, temporary meadows for mowing or pasture, land under market and kitchen gardens (including cultivation land under market and kitchen gardens (including cultivation under glass), and land under fruit trees, vines, shrubs, and rubber plantations. Within the scope of this definition there may be wide variations among reporting countries: the dividing line between temporary and permanent meadows, for instance, is rather indefinite; the period of time during which land not planted is considered fallow varies widely; many countries, particularly in Asia, Africa and South America, give data only for area under crops and, often, only that under major crops.

4. *Permanent meadows and pastures* refers to land under herbaceous forage crops, other than rotation grasses and clovers. In terms of the actual data classified under it, "permanent meadows and pastures" remains loosely defined because of the indefinite dividing line between this category and (*a*) temporary meadows, usually included under arable land, and (*b*) pastures (producing some wood from scattered trees and from shrubs) often included under forests.

5. *Forested land* includes all lands under natural or planted stands of trees of present or potential value. The question of savannas, desert scrubs, second growths, and mixed lands raises the same problem as under item 4.

6. *Unused but potentially productive.* In most cases this is subjectively determined by the reporting governments and represents anything from land being presently reclaimed to land which may in the future be put to agricultural use or be used for forests.

7. *Built-on area, wasteland, and other* includes land occupied by buildings, parks and ornamental gardens, roads or lanes, barren land, wasteland, land under water bodies, and any other land not specifically listed under items 3 through 6.

No continental, regional, or world totals have been computed for the data in column 6 because of the paucity of information. However, in computing the continental, regional, and world totals, available data on potentially productive land have been aggregated with the sum of the data in column 7 in the category "Other area," which covers all land not used for agriculture or forestry, whether it is considered potentially productive or not. In computing continental, regional, and world totals for columns 3 to 5, estimates not shown in the tables have been included for some countries when official data were lacking but some basis for estimates existed. Allowance was made for these estimates in computing the totals for the category "Other area."

Estimates used for Europe, North and Central America, and Oceania are a negligible fraction of the total. Estimates for South America and Africa are less than 1 percent and for Asia less than 4 percent of the total area of the respective continents.

Among the changes in data shown in the previous editions of this Yearbook, those relating to Europe and North America are mostly due to actual changes in the various land-use categories. For other continents, most of the changes reflect general improvement in statistical information on land use and in its interpretation for the classification used in this table. In cases where no statistical information on land use is available (mainly countries of Central and South America, Asia, and Africa), an attempt was made to estimate the magnitude of various land-use categories on the basis of other relevant statistical information and of general geographical information.

Irrigation

An attempt has been made in this table to bring together all available data on irrigated land throughout the world. Unless otherwise indicated, data relate to arable land and land under tree crops receiving the necessary water supply, in addition to precipitation, by irrigation schemes, thus excluding land receiving water by uncontrolled floods and irrigated permanent meadows and pastures. Definitions, wherever possible, are given in the footnotes. In general, figures refer to irrigable land rather than to land actually cultivated under irrigation in any particular year, and they cover land irrigated by canals, tanks, wells, artesian bores and sprinklers, either all year round or only during the dry season.

It should be borne in mind that these figures are not internationally comparable since definitions of "irrigated land" vary widely from country to country. No attempt has, therefore, been made to compute continental, regional, and world totals.

Number and area of agricultural holdings

Table 3 presents data on the number and area of holdings from the censuses taken within the framework of the 1960 World Census of Agriculture.

Generally, countries have used in their censuses FAO's concept of agricultural holding, that is, as consisting of all land which is used wholly or partly for agricultural production and is operated by one person — the holder — alone or with the assistance of others, without regard to title, size or location (livestock kept for agricultural purposes without agricultural land is also considered as constituting a holding). A number of countries, however, somewhat deviated from this definition by restricting the enumeration to those holdings which conformed to certain additional criteria and which fell above certain lower limits as to size of holding, or size of operation, or both. The more important modifications are explained in the footnotes to the table. They should be kept in mind when comparability between countries is envisaged.

Figures for holdings without land, shown separately, refer mainly to the establishments and units not possessing agricultural land but producing livestock or livestock products, e.g., piggeries, hatcheries, poultry batteries, city dairies with livestock, livestock kept by nomadic tribes, rabbitries, apiaries, etc.

POPULATION

Total population

Table 4 presents, for each country and territory of the world, average midyear estimates of the total population for the periods 1948-52 and 1952-56 and annual midyear estimates for the period 1963-67.

As a rule, these are the figures which countries make available to the United Nations Statistical Office for inclusion in its publications on demographic statistics. There are, however, a number of breaks in these series. For this reason FAO undertook in 1966 an extensive evaluation of the available series in order to establish the most plausible figures to be used in FAO's work. The FAO estimates were published for the first time in the 1966 issue of the *Production Yearbook*. During 1967, the United Nations undertook a similar analysis and began to include their estimates in their statistical publications. These United Nations estimates (indicated by the symbol *) have been included in Table 4 whenever they are comparable with the corresponding FAO estimates. Where there were considerable discrepancies, or where no United Nations estimates were available, the FAO estimates (indicated by an F) have been retained. This matter is at present under consideration by the United Nations and the specialized agencies concerned in order to establish in the near future a uniform set of population figures to be used throughout the United Nations family.

Countries with a population of at least 1 million for which the discrepancies between the 1950 and 1965 figures published by the United Nations and the FAO estimates given in this Yearbook exceed 2.5 percent are the following:

Country	Year	Figure published by United Nations	FAO estimate [1]
		..... *Thousands*	
Afghanistan	1965	15 051	15 500
China, Mainland	1950	560 000	547 000
	1965	700 000	764 000
Pakistan	1965	102 876	113 000
Saudi Arabia	1965	6 750	4 300
Somalia	1950	1 886	1 650
Syria	1965	5 200	5 600
Tunisia	1950	3 621	3 500
Venezuela	1950	4 962	5 230
	1965	8 722	9 240
Yemen	1965	5 000	5 200

[1] Indicated by an F in Table 4.

In some areas no comprehensive and reasonably reliable population count has been made recently. Therefore, the estimates of the population of several areas of the world must be regarded as conjectural.

All data relate generally to the present-in-area (*de facto*) population within the present geographical boundaries. Wherever sufficient information was available on displaced persons, indigenous groups, or other groups ordinarily excluded from the official data of a country, the estimates have been adjusted to include them.

Agricultural population and population economically active in agriculture

Table 5 presents for selected countries data on agricultural population and on population economically active (total as well as in agriculture) for 1965. The data relate to national boundaries as of 1965. For purposes of comparison, the corresponding data on total populations are also shown in the table.

Agricultural population is defined as all persons depending for their livelihood on agriculture. This comprises all persons actively engaged in agriculture and their nonworking dependents. In accordance with Division 0 of the International Standard Industrial Classification of all Economic Activities, agriculture is understood to include forestry, hunting, and fishing.

In general, the *economically active population* is defined as all persons engaged in an economic activity, whether as employers, own-account workers, salaried employees, or unpaid workers assisting in the operation of a family farm or business. Similarly, the population economically active in agriculture includes all economically active persons engaged principally in agriculture, forestry, hunting, and fishing. This general definition differs somewhat from country to country. In some countries, for example, the estimates are based on data relating to all persons reporting an occupation, whether or not they were actually working at the time of the census or survey; in others, on data regarding persons actually employed during a specified short period, unemployed persons seeking work being excluded. The comparability of the data is also limited by different statistical treatment, from country to country, of unpaid family workers, particularly housewives. Furthermore, some countries report information on economic activity for persons of all ages, others only for persons of specified ages, e.g., 14 years and over.

Information on the economically active population is available for many countries from national censuses and surveys and is published by the International Labour Office. For the purpose of this table, these data have been, whenever necessary, prorated by FAO to 1965.

Information on agricultural population from national censuses and surveys is extremely scarce. There is, however, a close relationship between the agricultural population and the population economically active in agriculture, on which, as mentioned above, data are available for many countries. Similarly, the agricultural population is related to the rural population, information on which is available from the population censuses, and to farm population, information on which is available from the agricultural censuses. These relationships were used by FAO to estimate the agricultural population. These FAO estimates relating to the year 1965 were published for the first time in the 1966 issue of the *Production Yearbook*. In this issue, they have been repeated except where more recent information, either on the economically active population or on the rural population, has become available, in which case the earlier estimates have been revised.

For a number of countries data on the population economically active in agriculture is already available for 1966, 1967, and 1968. These are given in the following table:

Country	Year	Total population	Economically active population		
			Total	In agriculture	Percent in agriculture
		..... *Thousands*			
Australia	1966	11 541	4 856	457	9
Barbados	1966	247	93	23	24

Agricultural population: continental and world estimates

Table 6 gives continental and world totals of agricultural population, as defined above in relation to Table 5, for 1965, together with the corresponding data on total population.

FAO INDEX NUMBERS OF AGRICULTURAL PRODUCTION

Production data presented on the basis of calendar-year time reference have been used in calculating index numbers, starting with the 1966 issue of the Yearbook. Accordingly, the new series of index numbers reflect calendar-year, rather than the previously published split-year, changes in agricultural production, as well as revisions made to the data themselves. Index numbers of food production cover the following commodity groups: cereals, starchy roots, sugar, pulses, edible oil crops, nuts, fruit, vegetables, wine, cocoa, livestock and livestock products. The index numbers of total agricultural

TABLE A. - LIST OF REGIONAL AND WORLD WEIGHTS FOR COMMODITIES INCLUDED IN THE FAO INDEX NUMBERS OF AGRICULTURAL PRODUCTION

OTE: Figures in parentheses ( ) represent regional or world weights which are used for those countries where conversion factors are not obtainable. A dash —) indicates either negligible production or that data on production are not available.

For poultry and other meat, the conversion factors for the various countries in a region are the same as the average of that region. – [5] Weighted averages f the seven regions. Used also for eastern Europe and U.S.S.R.

roduction cover all of the items included in food production nd, in addition, tea, coffee, industrial oilseeds, tobacco, fibres vegetable and animal), and rubber. The index numbers show he relative level of the aggregate volume of agricultural produc- ion flowing to all sectors other than agriculture itself for each ear covered in comparison with the time comparison base eriod 1952-56 = 100. For this purpose agricultural com- nodities used in the agricultural production process are deducted rom the total production. The deduction items include live- tock feed, i.e., agricultural products fed as such and semi- rocessed feed such as oilcakes and bran as well as imported eed, seed and production waste, to the extent that adequate stimates are possible.

The index numbers are computed by a Laspeyres' type formula, pplying average regional wheat-based price relatives as weights. he regional wheat-based price relatives of commodities are the rithmetic averages of the national wheat-based price relatives weighted by the country production of the commodities concerned. The national wheat-based price relative consists of the national producer price of the commodity expressed as a percentage of the national producer price of an equal weight of wheat. In most cases the prices represent averages of producer prices for the 1952-56 period.

The regional wheat-based price relatives (expressed in percentages) currently used for weighting are presented in Table A.

Meat production for index number purposes is in terms of liveweight, estimated by applying conversion factors to the carcass weight figures appearing in Table 116 (Production from indigenous animals) and Table 117 (Other meat), except for the United States country series and the North America regional series where the direct liveweight estimate of the United States livestock production including changes in inventory is used. These conversion factors are obtained, in most cases, as an average of such factors for the period 1961-65 and are presented in Table B.

The index numbers of total population by region and regional groupings are calculated on the series of adjusted FAO mid-year estimates. For the 1948-52 average, the 1950 midyear estimate is used.

The FAO calculation of index numbers of agricultural production for OECD member countries was in the past fully co-ordinated with the OECD calculation. OECD will shift its series to the calendar-year time reference basis when the base period and the methodology will be revised. For purpose of comparison, the OECD index numbers series for European OECD member countries on the split-year basis are given in Table C.

CROPS

Wheat and spelt

Available data for spelt have been included with those for wheat except for the U.S.S.R. where they are included in miscellaneous grains. Separate figures for spelt are reported by certain countries, as shown in the following table.

PRODUCTION OF SPELT IN SPECIFIED COUNTRIES

Country	Area					Production				
	1948-52	1952-56	1965	1966	1967	1948-52	1952-56	1965	1966	1967

U.S.S.R.	...	...	52	54	34	...	...	41	63	46

Mixed grain

The figures refer to all grain mixtures reported as "mixed grain," including mixtures of bread grains, feed grains, bread and feed grains, and occasionally grains and pulses. The composition of these mixtures varies from region to region and from year to year.

Practically, Scandinavian countries grow only feed grain mixtures, while in other western European countries bread grain mixtures still retain some significance. The tendency in recent years has been a shift to feed grain away from bread grain mixtures.

Millet and sorghum

Millet and sorghum are grown chiefly as feed for livestock and poultry in Europe and North America, but are used to a large extent as food in Asia, Africa, and the U.S.S.R.

Millet includes the five varieties which are of dietary importance: cattail millet (*Pennisetum glaucum*), also known as pearl millet or, in India, as "bajra"; finger millet (*Eleusine coracana*), known in India as "ragi"; bread millet (*Panicum miliaceum*), also called proso; foxtail millet (*Setaria italica*), or Italian millet; and barnyard millet (*Echinochloa crusgalli*), also often called Japanese millet.

Sorghum (*Sorghum vulgare*) includes many varieties, such as kafir or kafircorn, milo, feterita, durra, and sorgo. Data for China (Mainland) refer to the group of sorghums called "kaoliang" and those for India to the group identified as "jowar." In the case of Argentina, the data published up to the 1960 issue of this Yearbook referred to one kind of sorghum, viz., Sudan grass. Since then the series published relates to the aggregate of the four kinds of sorghum produced in the country, viz., (*a*) *sorgo granifero* (kafir); (*b*) *sorgo del Sudán* (Sudan grass); (*c*) *sorgo azucarado*, and (*d*) *sorgo garavi* (negro).

Wherever possible, statistics are given separately for millet and sorghum, but many countries, especially in Africa, do not make any distinction between the two grains in their reports; in such cases, combined figures are given. Separate continental and world totals are shown for millet, sorghum, and unspecified (a combination of the two).

The statistics shown for Europe and for the Americas are considered as representative of the total crop. Data for Africa and Asia, however, are incomplete because much of the quantity produced is not covered by the statistical reporting services. There are no data at all for some countries and no estimates have been made for them.

Sugar cane and sugar beets

Area and production data on sugar cane and sugar beets cover generally all crops harvested, except the crops grown explicitly for feed. Most of the production is used for the production of centrifugal and noncentrifugal sugar; however, in several countries important quantities of sugar cane are used also for seed, feed, fresh consumption, the manufacture of alcohol and other uses, and, in the case of sugar beets, for feed and alcohol.

Centrifugal sugar

Sugar produced from beet and cane by the centrifugal process is shown, as far as possible, in terms of raw value. Data reported by the countries as refined sugar have therefore generally been converted to a raw basis at 92 parts refined to 100 parts raw. Where no specification is provided, figures are given in terms of *tel quel*, which is the actual physical weight of all the centrifugal sugar produced. Molasses and syrups have been excluded unless otherwise stated. Low grade cane sugar produced in Central and South America and in the Far East is included in the table in some cases under the local names of, e.g., "panela" and "gur." The total of all such production is shown as noncentrifugal sugar.

Sweet potatoes and yams

Sweet potatoes and yams, important root crops in tropical and subtropical countries, do not belong to the same botanical family but are frequently reported together. For many producing countries no information is available, and even where data are available, the reporting suffers from the difficulty of statistically evaluating crops that are grown on many small plots and consumed locally.

Cassava

The cassava plant, which belongs to the manihot family, is of two main types: the bitter (*Manihot utilissima*) and sweet (*M. dpi*).

Except as otherwise specified, the data are intended to refer to fresh cassava, but the wide variations in yield per hectare suggest that some of the production figures may relate to dry weight (about 40 percent of fresh weight) or to tapioca (about

0 percent of fresh weight). Generally, yields of fresh sweet assava are expected to vary from 7 to 10 metric tons per hectare nd yields of fresh bitter cassava from 13 to 18 metric tons er hectare.

Some countries, where the production of cassava is of considrable local importance, cannot be shown in the table because f lack of statistics. On the other hand, for a certain number f countries shown in the table, production data seem to refer nore to potential production than to harvested production. Although the data suffer from such incompleteness in coverage nd from a certain lack of uniformity, it is believed that the ontinental, regional, and world totals give a valid indication f year-to-year changes in the size of this crop.

Onions and tomatoes

The data for countries listed generally refer to field and narket garden production only. Most of the countries listed n the tables are the major importers or exporters of onions nd tomatoes. The continental and regional totals, though elated to the limited number of countries listed, are nevertheess believed to give a reliable indication of these crops, insofar s they influence international trade.

In the table for onions, data have been specified as green nd/or dry onions wherever such classification or specification vas available.

Cabbages, cauliflowers, beans and peas harvested green, cucumbers and gherkins, cantaloupes and other melons, watermelons

Cabbages. The main varieties of cabbages included in the able are: red, white, and savoy cabbages; China cabbages; russels sprouts, green kale, and sprouting broccoli.

Cauliflowers. Where possible, data on heading broccoli are lso included in the figures.

Beans and peas harvested green. Data refer to beans (*Phaseolus* nd *Dolichos* species only) and peas (*Pisum sativum* and *P. arvense*), oth harvested green. Wherever possible, a distinction has een made between snap or string beans, i.e., beans with edible ods, and green-shell beans, i.e., beans with inedible pods. he beans are classified into one or the other category depending n their variety or the stage of ripeness at which they are arvested.

For all the above vegetables statistics are unavailable in a arge number of countries; consequently, continental and vorld totals are not calculated except for Europe. Also, the eported data do not have the same coverage in all countries. t appears that, generally, the estimates refer to crops grown n the field and in market gardens mainly for sale, thus excluding rops cultivated in kitchen gardens or small family gardens rown mainly for household consumption.

Pulses

The tables on pulses were compiled by grouping the varieties s follows:

- Dry beans (*Phaseolus vulgaris, P. lunatus, P. aureus, P. radiatus, P. mungo,* and *P. angularis*)
- Dry peas (*Pisum sativum* and *P. arvense*)
- Dry broad beans (*Vicia faba*)
- Chick-peas (*Cicer arietinum*)
- Lentils (*Lens esculenta* or *Ervum lens*)
- Pigeon peas (*Cajanus* spp.)
- Cowpeas (*Vigna sinensis*)
- Vetch (*Vicia sativa*)
- Lupins (*Lupinus* spp.)
- Other pulses (*Dolichos* spp., *Lathyrus* spp., *Voandzeia subterranea, Trigonella foenum graecum,* etc.)

The tables show total production of crops harvested for ry grain, whether used for food or feed.

Wherever known, the inclusion of an area of pulses grown with ther crops has been specified. In continental, regional, and world totals such an area has been included to its full extent, thus somewhat overstating the area under pulses and understating yields computed on the basis of total area.

Apples, pears, plums and prunes, cherries, peaches, apricots

Data refer to total production on a fresh fruit basis used either for direct consumption or industrial uses. Whenever possible, separate data are shown for fruit for table use and fruit for processing. Similarly, separate data are shown, as far as possible, for cherries and sour cherries, and for peaches and nectarines.

Strawberries, raspberries, and other berries

Data generally refer to commercial production of berries cultivated for direct consumption, industrial uses, or for other purposes. Production from wild berries, if included in the statistics of some countries, refers to production mainly for commercial purposes. Although the data on these crops may be incomplete or are unavailable for some countries, it is believed that the continental, regional, and world totals which include only the countries listed give a reasonable indication of the year-to-year changes in the trend of commercial production of these crops.

Grapes and wine production

Total grapes. Where the amount of grapes for wine was estimated on the basis of wine production (see below), the total production of grapes has been arrived at by adding the quantity of table grapes and, where appropriate, of grapes for drying to the estimate of grapes crushed for wine.

Grapes for wine and wine production. In most of the major wine-growing countries, wine production is estimated from the quantity of grapes crushed at harvest time; consequently, it corresponds to the amount of "grapes for wine" for the same crop year and represents total output at wine presses, irrespective of whether it is finally consumed as wine, vinegar, or distilling material.

Unfortunately, it has not yet been possible to obtain statistics on this basis from all countries, and gaps had to be filled by using tax returns or trade estimates. In such cases, and in cases where production statistics were available for wine and table grapes only, the amount of grapes crushed for wine was estimated on the basis of wine production.

The production statistics of grapes for wine and of wine are therefore not strictly comparable between countries.

Raisins

Figures refer generally to total production of dried grapes, including raisins, currants, and sultanas, whether used for direct consumption or as distilling material.

Citrus fruit

In many instances, the data represent only production entering commercial channels.

Clementines, which in this Yearbook are tabulated with oranges and tangerines, are a species of citrus commonly grown only in North Africa.

Citrus fruit production is reported in many different ways, by weight, volume, number of fruit, and kinds of packages. On this account, it has been necessary in many cases to make conversions to net weight for which official factors have often not been available.

Dates

As far as possible, this table gives total production of dates as harvested, whether for human consumption, fodder, or in-

dustrial uses. It should be borne in mind, however, that many of the figures are no more than estimates based on the amount entering commercial channels.

Figs

Data refer to total production of figs on a fresh and dried basis, whether for human consumption or industrial uses. In some cases, however, it has been impossible to obtain complete coverage, and figures represent only the commercial production of dried fruit converted to a fresh basis at a ratio of 1:3.

Bananas

Figures refer, as far as possible, to all edible fruit-bearing species of the genus *Musa*, except *Musa paradisiaca*, commonly known as plantain.

Unfortunately, several countries do not make any distinction in their statistics between bananas and plantains and publish only overall estimates including both. In such cases, when there is some indication or assumption that the data reported relate mainly to bananas, such data are included in the table. It is worthwhile to note that none of the countries excluded from the table are significant exporters.

Production data shown in the table do not have the same coverage in all countries. Most of the data cover only commercial production, and export figures are used in some cases in the absence of production data. Comparability of production data on bananas, as reported by the various countries, is also rendered difficult by the fact that a number of countries report in terms of bunches, which generally means that the stalk is included in the weight. Countries giving production of bananas in bunches, together with the conversion factors used by FAO in the last five years, are listed in this volume under the section Weights, Measures, and Conversion Factors.

Area statistics on bananas are often unavailable and the accuracy is generally far from satisfactory. In many countries the area with pure stands represents only a small proportion of the total area of bananas, which are mainly cultivated intercropped with tree crops and other crops.

For the above reasons the yields per hectare reported in the banana table must be used with caution.

Pineapples

Figures are not available for a number of countries, whose production, however, does not substantially influence international trade. Thus, the totals in this table reflect only the order of magnitude of production in various regions and total production trends to the extent to which they influence international trade.

Total vegetables, fruit, and nuts

Regional and world totals shown in the following table include data published in the individual tables presented in this Yearbook on onions, tomatoes, cabbages, cauliflowers, green beans, green peas, cucumbers, cantaloupes and other melons, watermelons, apples, pears, plums and prunes, cherries, peaches, apricots, strawberries, raspberries, and other berries, total grapes, citrus fruit, dates, figs, bananas, pineapples, and olives for table use, as well as official and unofficial estimates for other kinds of vegetables and fruit. Production data on plantains are also included in the total fruit figures. Total figures for nuts include the production of almonds, walnuts, hazelnuts, cashew nuts, betel nuts, chestnuts, pistachio nuts, and pili

[1] Excluding watermelons, melons, pumpkins, and squash. – [2] Excluding China, Mainland. – [3] Including China, Mainland. – [4] Including nuts.

nuts. Production of coconuts, tung nuts, and other palm nuts used primarily for oil production is not included.

For the majority of the countries, statistics on vegetables, fruit, and nuts are very scanty. Even for those countries where statistics are available, these refer to a portion of the production only; thus the figures might refer to plantation crops and market garden crops grown mainly for sale. Production from private or kitchen gardens used mainly for home consumption is usually excluded from the collection of data. The coverage of the figures in this table, particularly in respect of regions other than Europe and North America, should not be considered to be as complete as for other crops.

Oilseeds, oil nuts, and oil kernels

Palm kernels. Commercialized production has been generally considered as equal to total production. In cases where no information on either production or commercialization was available, production has been roughly estimated as equivalent to exports of both kernels and kernel oil, assuming that virtually the total production is exported.

Palm oil. Data shown for Latin American and Asian countries are considered as representing total production. For some African countries where there is important subsistence production, total production has been estimated, either taking into account the available information on local consumption, or on the basis of the known palm-kernel production, and the estimated proportion between palm-kernel content and palm-oil content in the fruit of these regions. This proportion varies generally according to the country between 5-7 : 10. Palm-oil production has been assumed to be based, in these countries, mostly on native processes, which permit the extraction of 45 to 55 percent of the total palm-oil content. However, for a few countries, such as Nigeria, the fact that a part of the oil is extracted by screw hand presses (extraction rate 65 percent) and a part by hydraulic presses (extraction rate 85-90 percent) has been taken into account.

Cottonseed. Direct production figures for cottonseed are reported by countries accounting for about 70 percent of world production. Data for the remainder are derived from ginned cotton production, according to ratios obtained from earlier years in these countries or from countries with similar conditions. These ratios vary from 1.6 to 2.2 tons of seed to 1 ton of lint. Where no seed/lint ratio was known, cottonseed was assumed to have twice the weight of lint.

Tung nuts and oil. Tung or Chinese wood oil is extracted from the nuts of two species of the tung tree, *Aleurites fordii* and *Aleurites montana*, and is obtained predominantly from China. For China, Mainland, only unofficial estimates of tung oil production are available.

Coconuts. Production statistics on coconuts are lacking in many countries. In a number of cases national figures are available only in terms of copra produced or exported. These have been adjusted so as to include estimates of the local consumption and converted to coconuts using appropriate conversion factors. All such figures have been marked with an asterisk. In arriving at the continental and world totals, allowances have also been made to include the production of other countries on the basis of rough indications of acreages, numbers of coconut trees, etc.

Copra. Production includes only quantities traded, no allowance being made for copra treated for oil by primitive methods. Where export data only were available, domestic utilization was, in some cases, estimated from oil production, consumption by soapmakers, etc.

Poppy seed. In the table below statistics are given on poppy seed (*Papaver somniferum*). These are available for most of the European producing countries and for Turkey. Data are missing for producing countries in the Near East and Far East, for the U.S.S.R., and for China, Mainland. The seeds are used as condiment or are processed into an oil used for food purposes. Both seeds and oil are also used in industry.

Coffee and cocoa

Production figures for coffee relate to green beans. Data for a few countries reporting in terms of cherries, or as parchment coffee, have been converted into clean coffee by using appropriate conversion factors.

For cocoa, production data relate to cocoa beans fermented and dried.

Area statistics for coffee and cocoa are available only for certain countries and are not always reliable. No estimates have been made for unreporting countries and yields per hectare have not been computed.

Tea

Unless otherwise specified, production figures relate to made tea. As area data are not always accurate and several countries report only planted area, yields per hectare have not been computed.

Tobacco

Production figures refer, as far as could be determined, to farm sales weight. Data available on dry weight basis have therefore been converted into farm sales weight at about 90 parts to 100.

Cotton (lint)

The table on cotton lint was prepared in co-operation with the International Cotton Advisory Committee. For most countries, the production figures are those officially reported

PRODUCTION OF POPPY SEED IN SPECIFIED COUNTRIES

as lint and do not include cotton linters. In cases where production was reported in terms of unginned cotton, and where no specific conversion factor for lint is known, the lint equivalent was taken to be one third. In the case of Brazil, India and Pakistan, the official series, as published in Brazilian, and in Indian and Pakistani crop statistics, are shown for the sake of consistency with series on other crops in these countries, but the data used by the International Cotton Advisory Committee, originating in trade sources, which are generally considered to approximate more accurately the actual facts, have been used for computation of continental, regional, and world totals.

Flax fibre and linseed

Flax is grown in most countries both for fibre and seed. Certain varieties produce chiefly fibre, while others produce mainly seed. Some types are grown exclusively for seed.

Most countries do not report the areas under different varieties, but give the total area under flax and the production of both fibre and seed from this area. The countries which report area statistics for fibre and seed separately are marked in the tables with a footnote.

For the countries where the areas for linseed and flax fibre are given separately, yields express actual changes in production conditions. Where only one figure is given for the total area under flax, yields tend to reflect also changes in the composition of production.

Natural rubber

The table on rubber was prepared in co-operation with the International Rubber Study Group, which defines natural rubber as including the dry content weight of latex, and excluding balata, gutta-percha, and all rubber-allied gums, as well as scrap rubber. The latter are regarded as different products which generally go into entirely different uses from those to which natural rubber is put.

LIVESTOCK NUMBERS AND PRODUCTS

Livestock numbers

Livestock numbers have been grouped for international tabulation into 12-month periods ending 30 September, in order to minimize the time difference between enumerations or estimates, which take place, in the majority of countries, in the second half or at the end of the year.

As part of the 1960 World Census of Agriculture many countries have undertaken a livestock census also and the preliminary results have been published recently by several countries. Certain discrepancies may be noticed between the figures for livestock numbers appearing in this Yearbook and those published in the census reports. This is due to the difference in coverage. In some countries, for the purpose of the agricultural census, livestock kept outside of agricultural holdings or on holdings below a certain size, as well as nomadic animals, are not included in the count.

In year-to-year comparisons, note should be taken of any qualifying footnotes on statistical coverage specifying livestock numbers "on farms," "in villages," "animals registered for taxation," etc. Statistical information on *poultry* is not yet considered sufficient to justify the inclusion of totals that would reflect the true year-to-year changes.

Horses, mules, and asses are grouped into one table. This grouping facilitates comparison and indicates the proportionate distribution of equines within each country.

Cattle: Cows. Two different series are given in this table, i.e.:

(*a*) cows and heifers 2 years of age and over;
(*b*) cows and heifers kept primarily for milk production.

The first series covers all cows and heifers of 2 years of age and over used for reproduction, as well as those kept for milk and meat production and as draft animals.

Within the scope of the above classification there may be wide variations among reporting countries; the dividing line between cows kept primarily for milk production and those kept for milk and draft purposes, for instance, is rather indefinite. For this reason, no attempt has been made to calculate continental, regional, and world totals.

Where required, the figures are footnoted to explain modifications.

Livestock units. Several countries have found it useful to place the numbers of their different kinds of livestock on the basis of a common denominator and have done so through the computation of livestock units.

The data on livestock units for individual countries are generally computed on the basis of conversion factors derived from an empirical knowledge of the average liveweight of animals and/or the quantity and quality of their average feed intake.

Conversion factors for whole regions and continents are based on even less reliable knowledge, however. They must, of necessity, be focused on a theoretical, uniform average assumed to be valid for the whole world without taking into account variations in weight and in feed consumption of the same species of livestock in different continents or regions. Computations so based are, consequently, more tentative than those for individual countries.

With that reservation, the following estimates of livestock units are given:

Livestock products

Meat: Beef and veal, pork, and mutton and lamb. Two tables are given, embodying two different concepts of production.

Table 115 relates to the production of meat from animals slaughtered within national boundaries, irrespective of their origin. In several cases, data for individual countries are identical with those in Table 116, because trade in live animals was not significant. The table also includes a few countries which do not appear in Table 116 because their production of meat from indigenous animals alone was not ascertainable or was below the minimum unit of 500 metric tons.

Table 116 relates to the production of meat from indigenous animals (i.e., including meat equivalent of exported live animals,

and excluding meat equivalent of imported live animals). The continental, regional, and world totals given in this table are estimates of total production thus defined. Estimates for nonreporting countries and for countries whose meat statistics are known to be incomplete in coverage have been based, wherever possible, on such related information as numbers of livestock, slaughterings, average live or carcass weights, and trade in live animals. In some cases, data for one year only were available and were used as the basis for estimating data for other years. In other cases, data relating to commercial or inspected production were inflated to total coverage on the basis of reported or assumed quantitative relation between reported and unreported production. Changes in the quantity of meat "on the hoof," represented by the difference between the total liveweight of young and fattened animals and by the changes in livestock numbers at the beginning and at the end of the year, were not taken into consideration.

Other meat. Data on meat obtained from horses, poultry and other animals such as rabbits, camels, reindeer, game, etc., are shown in this table.

Data on horse meat generally refer to carcass weight while data on poultry meat refer, in general, to dressed weight. For these items as well as for meat from other animals, coverage differs widely from country to country. The data therefore can serve only to show the changes within individual countries during the period covered.

Data on offal generally cover only the quantities of edible offal obtained from slaughterings.

Slaughterings and carcass weights. Average carcass weight is defined as the weight of carcass after the removal of offal and slaughter fats. For many countries, the data presented relate to less than total slaughterings, both as to number and average carcass weight, as stated below the country name or in footnotes. For such countries, the weights shown cannot be regarded as representative of all slaughterings within the country. Frequently, animals slaughtered on farms have carcass weights differing considerably from those of animals slaughtered commercially. In addition, it is not certain that all weights shown conform to the definition, although the data presented have been reconciled with the meat production given in Table 115. No attempt has been made to fill the existing gaps in this table with FAO estimates due to difficulties in accurately ascertaining the number of animals slaughtered and the corresponding average carcass weight.

Average liveweight of animals slaughtered. Ideally, average liveweight should refer to the entire livestock population in a given country. Since in most countries animals are weighed only when they are brought to slaughterhouses, the coverage of available liveweight data is bound to be limited to animals intended for slaughter. Furthermore, the data published in this table relate to animals slaughtered within national boundaries, irrespective of their origin. Therefore, the average liveweight data for countries where a large number of animals are imported for slaughter are not representative of the indigenous stock.

For most countries, the condition and stage of weighing the animals (e.g., immediately before slaughter, after being kept in the slaughterhouse without being fed and watered for a certain period, etc.) are not known.

Animal fats. These tables show production data at present available on edible pig fats and on tallow and inedible pig fats. Except as otherwise noted, the data refer to total production in slaughterhouses and on farms. These data refer generally to quantities entering commercial channels after having been separated from carcasses in slaughterhouses. Quantities separated from carcasses in butchers' shops are generally excluded. Methods of dressing carcasses vary from country to country and the possible influence of these differences on the fat extraction rate must be kept in mind when making comparisons among them.

Edible pig fat. Quantities are shown as reported. Unrendered fat is considered to contain 80 percent pure fat. Some quantities may not be included since a number of countries do not separately classify bacon and unrendered fat.

Tallow and inedible pig fat. The data include production of both edible and inedible tallow. The actual fat content in the quantities reported is not known.

Milk, butter, and cheese. Wherever possible, an attempt has been made to present the total production of each country for each product. For some countries, however, data were available only for a portion of total production, usually that portion or a part of that portion which entered commercial channels (milk), or was produced in factories (butter and cheese). The tables indicate the coverage applying to each series. For many countries no proper information was received.

For butter and cheese only intra-country comparisons are valid in most cases. Between-country comparisons should be made with caution and with reference to the definition. Because of these reservations and substantial gaps in information on these products, no estimate of continental, regional, or world totals is possible.

For milk the same reservation is advisable, but more statistical information is available which makes it possible to estimate production by countries where no official figures for a given year were available, and to estimate continental, regional, and world totals. These totals are tentative but it is believed that they give a valid indication of the relation between continents and regions and of the annual changes.

Milk yield. In the present table, milk yield is defined as the average total milk production per milking cow, excluding the milk sucked by, but including the milk fed to, young animals. Comparability of milk yield data between countries is subject to limitations which arise from the variation in the method of arriving at the quantity of milk production in cases where milk yield is determined indirectly, and from the variations in sampling procedures in cases where milk yields are established from actual milking tests.

In addition, the definition of a milking cow is far from uniform and milk production and yields sometimes exclude milk fed to young animals.

Eggs. The fact that few countries of the world have large-scale commercial poultry farms and the majority depend on widely scattered, individually owned small flocks for their egg supply is one of the chief difficulties encountered by governments in estimating total egg production. For the majority of countries, statistics on egg production are available for at least one of the years under review and have served as one of the bases for estimating production in other years. Some countries, however, have no statistics on egg production so that estimates had to be derived from such related data as chicken or total poultry numbers and reported or assumed rates of egg laying.

Most of the countries having statistics report either numbers of eggs or total weight of eggs produced. In all cases, FAO gives data on egg production in both millions of eggs and thousands of metric tons. Wherever possible, official conversion factors were used. For other countries, factors were either taken from unofficial sources or estimated on the basis of known factors in neighboring countries.

Data generally refer to total production, including eggs for hatching, in both agricultural and nonagricultural sectors.

Beehives and honey. The data presented in the table are still incomplete and it is hoped that the information in future issues will be fuller so as to make possible the compilation of estimated totals for continents, regions, and the world.

Cocoons (fresh) and raw silk. Although the information available on cocoons (fresh) and raw silk is very scanty, the data for the countries listed nevertheless represent virtually total world production.

Wool. Wool production statistics are generally given on a greasy basis. Such wool, however, contains from 40 to 65 percent of impurities. In order to make figures comparable, data are also given on a clean basis.

Wool produced largely in the spring of the year in the Northern Hemisphere has been combined with that produced in the autumn of the same year in the Southern Hemisphere.

Hides and skins. Data are given as reported by governments. Because of lack of sufficiently detailed information, no attempt has been made either to convert weight into number and *vice versa*, or to convert dry and salted skins into fresh equivalent. Such details as are available for a very small number of countries indicate that dry weight ranges from approximately one third to one half of fresh weight.

Comparability of weights of various hides and skins between countries is subject to limitations which arise from differences in species, breeding, age at slaughter, and way of stripping.

For the majority of reporting countries, no information on statistical coverage of the data presented is available, but it may be assumed that, for most of them, the figures relate to production from commercially slaughtered animals only.

Because of incomplete coverage, it has not been possible to estimate continental or world totals. In order to fill the gaps in the countries for which no official figures were available, FAO estimates, generally based on the number of slaughterings, are given.

FOOD SUPPLY

This section of the Yearbook (Tables 135-138) shows data on per caput consumption of major food groups expressed in terms of weight, calories, protein, and fat. The data have been obtained from national food balance sheets prepared by governments in collaboration with FAO and, in the case of European OECD member countries, with OECD. FAO publishes regularly complete three-year average food balance sheets. So far the periods 1954-56, 1957-59, and 1960-62 have been covered. Data for the period 1963-65 will be published in the near future. FAO has also published time series on food supplies summarizing the most important data derived from food balance sheets for prewar and for the periods 1948-50, 1951-53 and 1954-56. It is planned to prepare a new time series of available food balance sheet data during 1969/70, taking into account the revisions in the production, trade and utilization data recently made for many countries. In the course of this work, particular attention will be given to existing breaks in the series.

The food balance sheet presents a comprehensive picture of a country's food supply during a given period, usually a year. It shows the types and quantities of food produced, imported and exported. It allows for movements in stocks and makes appropriate deductions for the amounts used for animal feed, seed, manufacture, and for the amounts wasted during distribution up to the retail level. Taking into account the population figure, it arrives at the estimated quantity and nutritive value of per caput supplies of foodstuffs available at the retail level.

Limitations of the food balance sheet. In considering the reliability of food balance sheet data and their comparability between countries and over time, the following main limitations should be taken into account:

(*a*) The range, accuracy and classification of national statistics vary from country to country and over time. For a number of foodstuffs, official statistics of production and trade are frequently inadequate. Reliable information on the yearly changes in farm and commercial stocks is often nonexistent. The estimates made in such cases are of varying quality, based as they are on subjective knowledge.

(*b*) Quantities utilized for feed, seed, waste, industrial uses and related technical conversion factors are frequently roughly determined in the absence of proper statistics on the utilization of individual commodities.

(*c*) For a number of countries no proper statistical basis for population figures exists as yet. Even where population censuses and surveys have been taken, there may be appreciable errors in the estimates for post-census years.

(*d*) National figures on food composition are often not available and international data have to be used for the calculation of the nutritive value of food supplies.

MEANS OF PRODUCTION

Commercial fertilizers

These tables show the production and consumption of commercial fertilizers in terms of plant nutrient content. Data were supplied directly by governments. In the absence of official data, estimates have been made in cooperation with the fertilizer industry.

Where active ingredients were not reported by governments, they have been calculated from the percentage of plant nutrients (N, P_2O_5, and K_2O) in the many different fertilizers. These percentages may be found in FAO Agricultural Study No. 43, *Efficient use of fertilizers*, Table 8, page 63.

Data on rock phosphate production for the period 1964-1967 are shown in the following table:

ROCK PHOSPHATE PRODUCTION

Continent	1964	1965	1966	1967
	... 1 000 metric tons ...			
Europe	*140	*150	*130	*150
U.S.S.R.[1]	*6 200	*6 700	*8 300	*9 300

World total	*1 160	*1 260

Source: FAO, *Fertilizers: an annual review of world production, consumption, and trade - 1968.*

[1] Calendar year referring to the first part of the split year.

Agricultural machinery

Tractors. Wheel tractors in this table are generally limited to those having three or four wheels and engines of over 8 developed horsepower. They constitute the great majority of tractors used in agriculture in almost all countries. Crawler or tracklayer type tractors are also generally limited to those

over 8 horsepower. They are used largely for road construction, earth moving, land reclamation, and forestry purposes, but also in agriculture. "Tractors for all purposes" refers to the total number of both categories of tractors, as defined above, used in agriculture and for all other purposes.

When annual figures on tractors in use in countries not producing tractors were not available, it was possible to estimate the annual changes from the data on tractor exports, classified by destination, from the major producing countries, while the old stock was reduced by a suitable depreciation rate.

For a few countries, only data on the total number of tractors, including garden tractors and similar mechanical implements, are available. Certain other countries compile data in terms of 15-horsepower tractors. These data, provided with appropriate footnotes, are included in continental, regional, and world totals without making allowance for the difference in definition.

However, the number of tractors in itself is not sufficient to give a clear idea of the draft power they provide. The average horsepower of these tractors and the extent to which they are utilized are the most important features on which little information is at present available to us.

Data refer as far as possible to the position at the end of the year stated. Figures taken from a census carried out during the first quarter of a year have been included with those for the preceding year.

Garden tractors. This table shows small tractors and mechanical cultivators weighing less than 850 kilogrammes and/or developing less than 8 horsepower, used mainly for horticultural purposes. These tractors are limited to those having one axle. Figures taken from a census carried out during the first quarter of a year have been included with those for the preceding year.

Combined harvester-threshers. In this table, the data are generally limited to those machines which reap and thresh in one operation. It is hoped that the information, in future issues of the Yearbook, will be more complete, so as to make possible the compilation of estimated totals for continents, regions, and the world.

Milking machines. This table shows the number of milking machines or, for certain countries, the number of farms with milking machines. Because of incomplete coverage, it has not been possible to estimate regional, continental, or world totals.

Pesticides

Data refer to quantities of pesticides used in, or sold to, agriculture, and are shown in terms of active ingredients. Because of incomplete coverage, it has not been possible to estimate continental, regional, or world totals.

PRICES

The price series are obtained from many sources: special questionnaires, international commodity groups, official and nonofficial literature, and, in some cases, special correspondents. Individual series are selected so as to include, as far as possible, quotations for each commodity in the major producing and trading countries.

The series selected have been classified as prices to producers, wholesale prices, export prices, or import prices. When series have overlapped two or more classifications (e.g., an export price may obtain also in certain domestic wholesale transactions), the classification reflects the type of transaction in which the price occurs most frequently.

The prices are shown for a reference year corresponding to the calendar year adopted for production statistics, not necessarily representing actual calendar-year averages, but the averages of the periods corresponding to the crop year or to some months of marketing seasons as indicated in the column head giving the beginning and terminal months. A brief outline of the methods used for calculating the annual averages and the price index numbers shown in the price tables and the sources of the data are given in the 1960 Yearbook in the section "List of Sources for Price Tables." Subsequent revisions in the series are not, however, covered by the 1960 description.

In this issue a new table has been included on "Export Prices of Selected Agricultural Products" containing series additional to those export prices usually shown in the tables arranged by agricultural commodities. The latter are given as in previous issues because of the continuity of the data for a longer time series, and because of the international significance of these series. Data in the new table have been gathered by special questionnaires, sent to governments in 1967 and 1968. Consequently the coverage of commodities and countries included reflects country response to the questionnaires and also the importance countries attach to given commodities in their trade in agricultural products. It is hoped to expand and refine in coming years the contents of this table so that it may furnish more comprehensively the price information on transactions of agricultural commodities in international trade.

Local quantity units for which original prices were quoted have been expressed in terms of equivalent metric or British units.

The lower half of each table shows local prices converted to United States currency per metric quantity unit. For most countries, par rates published by the International Monetary Fund were used. Where multiple currency practices exist, the rate used was the one most pertinent to the commodity, the country, and to the time period covered by the average price shown.

In cases where exchange rates vary during the year, particularly where free market rates are used in foreign transactions, the averages of the rates weighted by the length of respective periods in which they are effective have been used. For some countries, no conversion to United States currency units has been made because it is not possible to choose a satisfactory exchange rate applicable to the commodity or country concerned.

COUNTRY NOTES

Burma

Statistics on crops and livestock in Burma cover only Divisional Burma, excluding Putao, Chin Hills, the Shan States, and Karenni. In the latter areas no statistical survey has ever been conducted.

Canada

All data for Canada, unless otherwise specified, are adjusted to include Newfoundland.

China, Mainland

Production estimates of cereals and potatoes

The crop production estimates for China (Mainland) represented one of the main difficulties in preparing the *Production Yearbook*. Official country figures are available only up to 1958. For later years, expert views and newspaper reports indicate that after the bumper crop of 1958, China (Mainland) had three bad harvests, the first in 1959 alleged to be caused mainly by the fact that too large a part of the agricultural labor force had been taken out of agriculture and shifted to the industrial sectors, while those of the years 1960 and 1961 were mainly caused by floods and drought. As a consequence, while the level of per caput calorie intake for the average period 1957-59 was estimated in FAO's *Third world food survey* at 2,100, during 1960 and 1961 experts are agreed that in spite of largely increased imports the per caput calorie supply level was around 1,850. Thereafter it increased again and is estimated to have regained in 1965 more or less the level prevailing during 1957-59.

Taking into account:

(*a*) the population estimates based on the 1953 census and a growth rate of 2.1 percent, implied in the official country estimates for the period 1953-57,

(*b*) the trade statistics derived from publications of trading partners of China (Mainland),

(*c*) the experts' opinion on per caput calorie supplies,

(*d*) the similarity in the behaviour of certain groups of crops under given climatic conditions,

and dividing the main crops into three groups — wheat, barley and oats; rice, maize, millet and sorghum; potatoes and sweet potatoes — it was possible to make estimates which are consistent with the available information. The data on production of wheat and rice are shown in the Yearbook while all the other estimates on area, yield and production of cereals and potatoes are not shown but have been included in the world totals.

The estimates for China (Mainland) will, of course, remain controversial until the country publishes its official figures.

India

Data for Goa, Daman and Diu (known as Portuguese India prior to being nationally united with India in December 1961) are included in the data for India for tables on land use, irrigation, population, rice (from 1963 onward), sugarcane (from 1963/64 onward), coconuts, and copra (from 1964 onward).

Southern Yemen

Previously known as the Federation of South Arabia. Data cover the former territories of Aden Colony and Aden Protectorate.

United States

In cases where figures for Alaska and Hawaii are not shown separately or mentioned in the footnotes, these are included in the estimates for the United States.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

A. GENERAL

Area

1 hectare	= 2.47109 acres	1 acre	= 0.40469 hectare
1 square kilometre	= 0.38610 square mile	1 square mile	= 2.5900 square kilometres
1 square kilometre	= 100 hectares	1 square mile	= 640 acres = 259 hectares

Yield

100 kilogrammes per hectare	= 1.4869 bushels (60 lb) per acre	1 bushel (60 lb) per acre	= 67.253 kilogrammes per hectare

Liquid measure

1 litre	= 0.26418 gallon = 0.21997 Imp. gallon	1 U.S. gallon 1 Imp. gallon	= 3.78533 litres = 4.54596 litres
1 hectolitre	= 100 litres	1 gallon	= 4 quarts

Weight

1 kilogramme	= 2.20462 pounds	1 pound	= 0.45359 kilogramme
1 metric ton	= 0.98421 long ton = 1.10231 short tons	1 long ton 1 short ton	= 1.01605 metric tons = 0.90718 metric ton
1 metric ton	= 1 000 kilogrammes	1 long ton	= 2 240 pounds
1 metric quintal	= 100 kilogrammes	1 short ton	= 2 000 pounds

1 m. t. = 19.684 cwt (112 lb)	1 cwt (112 lb)	= 0.050802 m. t.	United Kingdom and British territories
1 m. t. = 22.046 cwt (100 lb)	1 cwt (100 lb)	= 0.045359 m. t.	Canada, Honduras, United States
1 m. t. = 66.667 metric arrobas	1 metric arroba	= 0.015 m. t.	Brazil
1 m. t. = 21.739 Spanish quintals	1 Spanish quintal	= 0.046 m. t.	Chile, Costa Rica, El Salvador, Guatemala, Philippines, Spain, Venezuela
1 m. t. = 21.735 Spanish quintals	1 Spanish quintal (100 libras)	= 0.046009 m. t.	Cuba, Peru
1 m. t. = 20 metric kantars	1 metric kantar	= 0.050 m. t.	United Arab Republic
1 m. t. = 22.258 kantars	1 kantar	= 0.044928 m. t.	Sudan, United Arab Republic
1 m. t. = 26.792 maunds	1 maund (Standard) (82.286 lb)	= 0.037324 m. t.	India, Pakistan
1 m. t. = 266.67 kwan	1 kwan	= 0.00375 m. t.	Japan, Korea, Rep. of
1 m. t. = 16.667 piculs (pikuls)	1 picul (pikul)	= 0.060 m. t.	Cambodia, Laos, Thailand
1 m. t. = 16.534 piculs (pikuls)	1 picul (pikul)	= 0.06048 m. t.	Brunei, Hong Kong, Macau, Malaysia

B. FACTORS FOR DIRECT CONVERSION

The following factors are provided for the purpose of converting weights per unit of area and weights per unit of volume from the British to the metric system:

1 hundredweight per acre	=	125.54	kilogrammes per hectare
1 long ton per acre	=	2 510.175	kilogrammes per hectare
1 pound per quarter	=	0.1559	kilogramme per hectolitre
1 pound per gallon	=	0.0998	kilogramme per litre
1 pound per bushel	=	1.2472	kilogrammes per hectolitre

NOTE: The above units do not cover all farm products nor all the containers for any one product. It should be borne in mind when using them that for most products, particularly fruits, there may be a considerable variation in weight per unit of volume due to differences in variety or size of the commodity, condition and tightness of pack, degree to which the container is heaped, etc.

NOTES SUR LES TABLEAUX

NOTE GÉNÉRALE

Totaux régionaux

Tous les tableaux qui indiquent des totaux continentaux contiennent également des totaux régionaux qui figurent même s'ils sont identiques aux totaux continentaux ou s'il est facile de les en déduire.

Il arrive que les totaux continentaux ne soient pas la somme exacte des totaux régionaux, les chiffres ayant été arrondis. Au point de vue statistique, la FAO a considéré que le monde pouvait être divisé en sept régions, comprenant les pays suivants (dans l'ordre dans lequel ils figurent dans les tableaux):

Europe (non compris l'U.R.S.S.)

Albanie, Andorre, Autriche, Belgique, Bulgarie, Tchécoslovaquie, Danemark, îles Féroé, Finlande, France, Allemagne (orientale, République fédérale, Berlin), Gibraltar, Grèce (y compris les îles du Dodécanèse), Hongrie, Islande, Irlande, Italie, Liechtenstein, Luxembourg, Malte, Monaco, Pays-Bas, Norvège (y compris les îles Jan-Mayen et Svalbard), Pologne, Portugal (y compris les Açores et Madère), Roumanie, Saint-Marin, Espagne (y compris les îles Baléares et Canaries), Suède, Suisse, Royaume-Uni (y compris les îles Anglo-Normandes et l'île de Man), Cité du Vatican, Yougoslavie.

Amérique du Nord

Bermudes, Canada, Groenland, Saint-Pierre-et-Miquelon, Etats-Unis (y compris Alaska, Hawaii).

Amérique latine

Antigoa, Argentine, Bahama, Barbade, Bolivie, Brésil, Honduras britannique, îles Caïmanes, Chili, Colombie, Costa Rica, Cuba, Dominique, République Dominicaine, Equateur (y compris les îles Galapagos), El Salvador, îles Falkland (Malvinas), Guyane française, Grenade, Guadeloupe, Guatemala, Guyane, Haïti, Honduras, Jamaïque, Martinique, Mexique, Montserrat, Antilles néerlandaises, Nicaragua, Panama, Zone du Canal de Panama, Paraguay, Pérou, Porto Rico, Saint-Christophe-Nevis, Sainte-Lucie, Saint-Vincent, Surinam, Trinité et Tobago, îles Turques et Caïques, Uruguay, Venezuela, îles Vierges (R.-U.), îles Vierges (E.-U.).

Proche-Orient

Afrique

Libye (Cyrénaïque, Tripolitaine, Fezzan), Soudan, République arabe unie

Asie

Afghanistan, îles Bahrein, Chypre, Iran, Irak, Israël, Jordanie, Koweït, Liban, Mascate et Oman, Qatar, Arabie saoudite, Yémen du Sud (ancienne Fédération de l'Arabie du Sud), Syrie, Oman sous régime de traité, Turquie, Yémen.

Extrême-Orient (non compris la Chine continentale)

Boutan, îles Bonin, Brunéi, Birmanie, Cambodge, Ceylan, Chine (Taïwan), îles Christmas (sous administration australienne), Hong-kong, Inde (y compris Goa, Daman, Diu), Indonésie (y compris Irian occidental), Japon, Corée du Nord, République de Corée, Laos, Macao, Malaisie (Sabah, Sarawak, Malaisie occidentale), îles Maldives, Mongolie, Népal, Pakistan, Philippines, Timor portugais, îles Ryu-kyu, Singapour, Thaïlande, Viet-Nam du Nord, République du Viet-Nam.

Afrique

Algérie, Angola, Botswana, Burundi, Cameroun (Cameroun oriental, Cameroun occidental), îles du Cap-Vert, République Centrafricaine, Tchad, îles Comores, Congo (Brazzaville), République démocratique du Congo, Dahomey, Guinée équatoriale (Fernando Póo, Rio Muni), Ethiopie, Territoire français des Afars et des Issas, Gabon, Gambie, Ghana, Guinée, Ifni, Côte-d'Ivoire, Kenya, Lesotho, Libéria, Madagascar, Malawi, Mali, Mauritanie, Maurice, Maroc, Mozambique, Namibie (ancien Sud-Ouest africain), Niger, Nigeria (Région orientale, Lagos, Région septentrionale, Région occidentale), Guinée portugaise, Réunion, Rhodésie du Sud, Rwanda, Sainte-Hélène, Saint-Thomas et Prince, Sénégal, Seychelles, Sierra Leone, Somalie (ancienne Somalie britannique, ancienne Somalie italienne), Afrique du Sud, Afrique du Nord espagnole (Ceuta, Melilla, autres), Sahara espagnol (Rio de Oro, Saguia el Hamra), Swaziland, Tanzanie (Tanganyika, Zanzibar), Togo, Tunisie, Ouganda, Haute-Volta, Zambie.

Océanie

Samoa américain, Australie, îles Salomon britanniques, îles Canton et Enderbury, îles Cocos (Keeling), îles Cook, Fidji, Polynésie française, Gilbert et Ellice, Guam, île Johnston, îles Midway, Nauru, Nouvelle-Calédonie, Nouvelle-Guinée (adm. australienne), Nouvelles-Hébrides, Nouvelle-Zélande (y compris les îles Campbell et Kermadec), Niue, île Norfolk, îles du Pacifique (adm. E.-U.), Papouasie, île Pitcairn, îles Tokelau, Tonga, île de Wake, Samoa occidental.

TERRES

Utilisation des terres

On s'est efforcé de réunir dans ce tableau des données sur l'utilisation des terres dans le monde entier. On ne perdra pas de vue en l'étudiant que les définitions dont se servent les gouvernements varient beaucoup, et que, selon les pays, une même rubrique englobe des catégories de terres très différentes. En outre, il arrive que les statistiques relatives à certaines catégories de terres soient incomplètes ou manquent totalement.

Les définitions suivantes ont été utilisées pour préparer le tableau:

1. *Superficie totale:* celle du pays, y compris les eaux intérieures.

2. *Superficie des terres:* comme au paragraphe 1, moins la superficie des eaux intérieures. L'expression « eaux intérieures » s'entend en général des principaux cours d'eau et lacs, à l'exclusion de ceux de moindre importance.

3. *Terres arables et cultures permanentes:* Il s'agit des terres consacrées aux cultures (les superficies récoltées deux fois n'étant comptées qu'une), des terres en jachères temporaires, des prairies temporaires à faucher ou à pâturer, des jardins maraîchers et potagers (y compris les cultures sous verre) et des superficies plantées d'arbres fruitiers, de vignes, d'arbustes et d'espèces à caoutchouc. Même cette définition peut présenter des variations importantes d'un pays à l'autre; la distinction entre prairies temporaires et prairies permanentes par exemple manque parfois de netteté; la période pendant laquelle les terres non plantées sont considérées comme jachères varie énormément; de nombreux pays, notamment en Asie, en Afrique et en Amérique du Sud, ne fournissent des rensei-

gnements que sur les superficies consacrées aux cultures, en se limitant souvent aux cultures principales.

4. *Prairies et pâturages permanents:* terres consacrées à la culture des herbacées fourragères autres que les graminées entrant dans les assolements et les trèfles. Le contenu de cette rubrique est assez hétérogène, car elle n'est pas très nettement distinguée (*a*) des prairies temporaires généralement incluses dans la rubrique « terres arables », et (*b*) des pâturages parsemés d'arbres et d'arbustes qui donnent une certaine production de bois, souvent inclus dans la rubrique « forêts ».

5. *Terrains boisés:* toutes terres portant des peuplements naturels ou artificiels d'arbres et présentant une valeur immédiate ou potentielle. En ce qui concerne les savanes, les brousses désertiques, les forêts de deuxième pousse et les terres mixtes, on se heurte à la même difficulté qu'au paragraphe 4.

6. *Terres susceptibles d'utilisation:* la plupart du temps, cette catégorie, déterminée de façon subjective par chaque gouvernement, est extrêmement élastique; en effet, elle englobe aussi bien des terres actuellement en cours de remise en état que des terres susceptibles d'être ultérieurement mises en culture ou utilisées comme forêts.

7. *Terrains bâtis, terres inutilisables, etc.:* terres occupées par des bâtiments, parcs ou jardins d'ornement, routes ou chemins, terres improductives, friches, terrains recouverts d'eau, et généralement toutes terres que ne mentionnent pas expressément les paragraphes 3 à 6 inclus.

En raison de la rareté des renseignements, on n'a pas calculé de totaux continentaux, régionaux ou mondiaux à la colonne 6. Toutefois, les totaux de la catégorie « Toutes autres terres » — qui englobe toutes les terres ne servant pas à la production agricole ou forestière, qu'elles soient ou non considérées comme susceptibles d'utilisation — groupent les chiffres dont on disposait sur les terres susceptibles d'utilisation (colonne 6) et les chiffres de la colonne 7. Enfin, en calculant les totaux des diverses colonnes de 3 à 5, on a inclus des chiffres estimatifs qui n'apparaissent pas dans le tableau, en ce qui concerne certains pays sur lesquels on n'avait pas de renseignements, tout en disposant d'une base d'estimation. Il a été tenu compte de ces derniers chiffres en calculant les totaux pour la catégorie « Toutes autres superficies ».

Pour l'Europe, l'Amérique du Nord, l'Amérique centrale et l'Océanie, la partie de la superficie totale qui a été ainsi estimée est négligeable. Pour l'Amérique du Sud et l'Afrique, d'une part, et pour l'Asie, d'autre part, elle représente moins de 1 pour cent et de 4 pour cent respectivement de la superficie totale.

Les différences par rapport aux données de l'année précédente, en ce qui concerne l'Europe et l'Amérique du Nord, sont dues le plus souvent à des variations effectives des superficies. Pour les autres continents, elles résultent en majorité d'une amélioration générale des statistiques sur l'utilisation des terres et d'une meilleure interprétation de ces données aux fins de leur incorporation dans la classification utilisée ici. Lorsqu'on manquait de données sur l'utilisation des terres, ce qui est surtout le cas de pays d'Amérique centrale, d'Amérique du Sud, d'Asie et d'Afrique, on a estimé les superficies de chaque catégorie à partir d'autres renseignements statistiques pertinents et de renseignements géographiques de caractère général.

Irrigation

Dans ce tableau, on s'est efforcé de réunir tous les renseignements dont on pouvait disposer sur l'irrigation dans le monde. Sauf indication contraire, les données se réfèrent aux terres arables et aux terres consacrées aux cultures arbustives auxquelles l'eau est fournie en partie par les précipitations et en partie au moyen de réseaux d'irrigation; en d'autres termes, sont exclues les terres soumises à des inondations non contrôlées, ainsi que les prairies et pâturages permanents irrigués. Chaque fois qu'on l'a pu, on a indiqué les définitions dans une note au bas du tableau. De manière générale, les chiffres se rapportent aux terres irrigables plutôt qu'aux terres ayant effectivement porté des cultures irriguées au cours de telle ou telle année; ils concernent l'ensemble de la superficie irriguée par canaux, réservoirs, puits et puits artésiens, et par aspersion, que ce soit durant toute l'année ou seulement pendant la saison sèche.

Il convient de se rappeler que ces chiffres ne sont pas comparables de pays à pays, la définition de « terres irriguées » variant énormément d'un pays à l'autre. On n'a donc pas essayé de calculer des totaux continentaux, régionaux ou mondiaux.

Nombre et superficie des exploitations agricoles

Le tableau 3 présente des données sur le nombre et la superficie des exploitations, d'après les recensements effectués dans le cadre du Recensement mondial de l'agriculture de 1960.

D'une manière générale, les pays ont utilisé dans leurs recensements le concept FAO d'exploitation agricole, à savoir toute terre utilisée entièrement ou en partie pour la production agricole et exploitée par une personne — l'exploitant —, seule ou aidée d'autres personnes, indépendamment de l'étendue, de l'emplacement et du titre de possession (les animaux élevés à des fins agricoles en l'absence de terres agricoles sont également considérés comme constituant une exploitation). Toutefois, un certain nombre de pays se sont un peu écartés de cette définition, se contentant de dénombrer les exploitations qui répondaient à certains critères supplémentaires et qui satisfaisaient à certaines normes minimales d'étendue ou d'activité. Les divergences les plus importantes sont expliquées dans les notes de bas de page du tableau. Il convient de ne pas les perdre de vue lorsque l'on envisage d'effectuer des comparaisons d'un pays à l'autre.

Les chiffres relatifs aux exploitations sans terres, donnés à part, se rapportent principalement aux entreprises ne comprenant pas de terres agricoles mais se consacrant à l'élevage ou à la production de produits dérivés: porcheries, couveuses, poulaillers, laiteries urbaines possédant du bétail, animaux élevés par des tribus nomades, lapinières, élevages d'abeilles, etc.

POPULATION

Population totale

Le tableau 4 contient, pour la population totale de chaque pays ou territoire du monde, la moyenne des estimations se rapportant au milieu de chacune des années 1948-52 et 1952-56, ainsi que les estimations se rapportant au milieu de chacune des années 1963-67.

En principe, il s'agit de chiffres que les pays fournissent au Bureau de statistique des Nations Unies et que celui-ci inclut dans ses publications de statistiques démographiques. Les séries fournies par les pays contiennent toutefois de nombreuses lacunes. C'est pourquoi la FAO a entrepris en 1966 une évaluation approfondie des séries disponibles en vue d'établir les chiffres les plus plausibles pouvant être utilisés dans ses travaux. Les estimations de la FAO établies en conséquence ont été publiées pour la première fois dans l'édition de 1966 de l'*Annuaire de la production*. En 1967, l'Organisation des Nations Unies a effectué une analyse analogue et a commencé à inclure ses estimations dans ses publications statistiques. Ces estimations des Nations Unies (indiquées par le signe * figurent au tableau 4 lorsqu'elles sont comparables avec les estimations correspondantes de la FAO. Dans les cas où il y a des écarts importants ou lorsqu'on ne disposait pas d'estimations des Nations Unies, on a conservé les estimations de la FAO (indiquées par un F). Les Nations Unies et les institutions spécialisées intéressées examinent actuellement la question afin d'établir, dans un proche avenir, une série uniforme de statistiques démographiques à utiliser par toutes les institutions des Nations Unies.

Les pays dont la population dépasse 1 million et pour lesquels

l'écart entre les chiffres pour 1950 et 1965 publiés par les Nations Unies et les estimations de la FAO qui figurent dans le présent volume de l'Annuaire dépasse 2,5 pour cent sont les suivants:

Pays	Année	Chiffre publié par les Nations Unies	Estimation de la FAO[1]
		..... *Milliers*	
Afghanistan	1965	15 051	15 500
Chine continentale	1950	560 000	547 000
	1965	700 000	764 000
Pakistan	1965	102 876	113 000
Arabie saoudite	1965	6 750	4 300
Somalie	1950	1 886	1 650
Syrie	1965	5 200	5 600
Tunisie	1950	3 621	3 500
Venezuela	1950	4 962	5 230
	1965	8 722	9 240
Yémen	1965	5 000	5 200

[1] Indiquée par un F dans le tableau 4.

Dans certains pays ou territoires, aucun recensement complet et suffisamment digne de foi n'a eu lieu récemment. Pour plusieurs régions du monde, les estimations démographiques doivent donc être considérées comme approximatives.

Toutes les statistiques se rapportent en général à la population dénombrée dans le pays ou territoire à l'intérieur des limites géographiques actuelles (*de facto*). Chaque fois qu'on disposait de renseignements suffisants, on a inclus les personnes déplacées et groupes ethniques divers qui ne figurent pas d'ordinaire dans les statistiques démographiques nationales.

Population agricole et population agricole active

Le tableau 5 contient pour certains pays les données sur la population agricole et sur la population économiquement active (totale et agricole) pour 1965. Les chiffres se rapportent aux frontières nationales de 1965. Pour les besoins de la comparaison, les données correspondantes relatives à la population totale figurent également au tableau.

Par *population agricole*, on entend toutes les personnes dont l'agriculture constitue le moyen d'existence. Celle-ci comprend toutes les personnes qui se livrent effectivement à l'agriculture ainsi que les personnes à leur charge qui ne travaillent pas. Conformément à la Branche O de la Classification internationale type par industrie de toutes les branches d'activité économique, l'agriculture comprend la foresterie, la chasse et la pêche.

Par *population active*, on entend en général toutes les personnes qui se livrent à une activité économique quelconque: patrons, personnes travaillant pour leur propre compte, salariés ou aides familiaux non rémunérés. On a considéré de même comme population agricole active l'ensemble des personnes occupées économiquement et de manière principale dans l'agriculture, la foresterie, la chasse et la pêche. Cette définition générale varie légèrement selon les pays. Dans certains, les statistiques comprennent des personnes ayant déclaré exercer une profession, qu'elles aient été ou non effectivement occupées à la date de recensement ou de l'enquête; dans d'autres, elles visent les personnes effectivement occupées pendant une brève période déterminée, les individus qui cherchent du travail étant exclus. La comparabilité des données est également réduite du fait que toutes les statistiques nationales ne traitent pas de même manière la catégorie des aides familiaux non rémunérés. En outre, les statistiques de l'emploi se rapportent aux personnes de tous âges; d'autres fois, elles se limitent à un groupe d'âge déterminé, par exemple au-dessus de 14 ans.

Des renseignements relatifs à la population active de ces dernières années sont disponibles pour beaucoup de pays à partir des enquêtes et recensements effectués par eux et qui sont publiés par le Bureau international du travail. Pour les besoins du présent tableau, les chiffres de 1965 ont été ajustés proportionnellement par la FAO, le cas échéant.

Les statistiques sur la population agricole établies d'après les recensements et enquêtes des différents pays sont très peu nombreuses. Toutefois, il existe un lien étroit entre la population agricole et la population agricole active au sujet de laquelle, comme on l'a mentionné ci-dessus, des données sont disponibles pour de nombreux pays. De même, il existe un lien entre la population agricole et la population rurale, d'une part, au sujet de laquelle on dispose de données tirées des recensements démographiques et, d'autre part, la population des exploitations agricoles, pour laquelle on dispose de données tirées des recensements agricoles. La FAO a utilisé ces rapports pour estimer la population agricole. Ces estimations de la FAO relatives à l'année 1965 ont été publiées pour la première fois dans l'édition de 1966 de l'*Annuaire de la production*. On les a de nouveau incluses dans le présent volume mais, dans les cas où l'on disposait de renseignements plus récents sur la population active ou sur la population rurale, on a révisé les estimations antérieures.

Pour un certain nombre de pays, les données sur la population agricole active sont déjà disponibles pour 1966, 1967 et 1968. Ces chiffres figurent dans le tableau ci-dessous:

Pays	Année	Population totale	Population active		
			Total	Agriculture	Pourcentage de l'agriculture
		..... *Milliers*

Population agricole: estimations par continent et pour le monde

Le tableau 6 donne, par continent et pour le monde entier, le total de la population agricole, telle qu'elle est définie ci-dessus à propos du tableau 5 pour 1965, ainsi que les données correspondantes relatives à la population totale.

NOMBRES-INDICES FAO DE LA PRODUCTION AGRICOLE

Les données de production présentées par année civile plutôt que sur la base de la campagne, comme on le faisait précédemment, ont servi, à partir de l'édition de 1966 de l'Annuaire, au calcul des nombres-indices. En conséquence, les nouvelles séries de nombres-indices traduisent les modifications subies pendant l'année civile par la production agricole, ainsi que les révisions apportées aux données elles-mêmes. Les nombres-indices de la production alimentaire comprennent les groupes de produits suivants: céréales, racines et tubercules, sucre, légumineuses, oléagineux (huiles comestibles), noix, fruits,

NOTE: Les chiffres entre parenthèses ( ) représentent des coefficients régionaux ou mondiaux utilisés pour les pays où les coefficients de conversion ne peuvent être obtenus. Un tiret (—) indique soit que la production est négligeable, soit que les données y relatives ne sont pas disponibles.
[1] Pour la volaille et les autres viandes, on a utilisé comme facteur de conversion pour les différents pays d'une région le facteur de conversion moyen de la région.
[2] Moyenne pondérée des sept régions; utilisée également pour l'Europe orientale et l'U.R.S.S.

légumes, vin, cacao, bétail et produits de l'élevage. Pour obtenir les nombres-indices de la production agricole totale on ajoute à la production alimentaire le thé, le café, les oléagineux (huiles industrielles), le tabac, les fibres (végétales et animales) et le caoutchouc. Les nombres-indices indiquent le niveau relatif du volume global de la production agricole parvenant dans tous les secteurs autres que l'agriculture pour chaque année indiquée par rapport à la période de référence 1952-56 = 100. A cet effet, on déduit de la production totale les produits agricoles utilisés aux fins de la production agricole. Il s'agit des produits destinés à l'alimentation animale, c'est-à-dire les produits agricoles donnés tels quels pour l'alimentation, et les aliments du bétail semi-traités, comme les tourteaux d'oléagineux, le son, ainsi que les aliments du bétail importés, les quantités utilisées pour la semence et les déchets de la production, dans la mesure où il est possible d'effectuer des estimations.

On calcule les nombres-indices au moyen de la formule de Laspeyres en utilisant comme coefficient de pondération des prix moyens régionaux relatifs par rapport au blé. Les prix régionaux relatifs par rapport au blé sont la moyenne arithmétique des prix nationaux relatifs par rapport au blé pondérés par la production nationale des produits en question. Les prix nationaux par rapport au blé sont les prix nationaux à la production des produits en question, exprimés en pourcentage du prix national à la production d'un poids égal de blé. Dans la plupart des cas, les prix représentent la moyenne des prix à la production de la période 1952-56.

Le tableau A indique les prix régionaux relatifs par rapport au blé (exprimés en pourcentages) utilisés habituellement pour la pondération.

On utilise pour les nombres-indices de la production de viande le poids vif estimé par application de coefficients de conversion aux chiffres du poids carcasse figurant au tableau 116 (Production provenant des animaux indigènes) et au tableau 117 (Autres viandes), sauf pour les séries concernant respectivement les

tats-Unis et la région Amérique du Nord, qui ont été établies l'aide d'estimations directes en poids vif de la production imale des Etats-Unis, compte tenu de la variation en poids es animaux sur pied durant l'année. Il s'agit dans la plupart es cas de coefficients de conversion représentant la moyenne e la période 1961-65; on trouvera ces coefficients de conversion tableau 8.

Les indices de la population totale des régions et ensembles régions sont établis à partir des estimations ajustées de FAO concernant la population en milieu d'année. La moyenne 1948-52 se fonde sur l'estimation à la mi-1950.

Les nombres-indices calculés par la FAO pour la production agricole des pays membres de l'OCDE concordaient entièrement dans le passé avec ceux que calculait cette Organisation. L'OCDE ajustera ses séries sur la base de l'année civile lorsque la période de référence et la méthodologie seront révisées. Pour les besoins de la comparaison, on trouvera au tableau C les séries de nombres-indices calculés par l'OCDE sur la base de la campagne pour les pays européens membres de l'OCDE.

CULTURES

lé et épeautre

Les données disponibles sur l'épeautre sont comprises avec blé, sauf pour l'U.R.S.S. où elles sont incluses dans les céréales iverses. Certains pays communiquent des renseignements istincts concernant l'épeautre (voir tableau ci-après).

semble des quatre sortes de sorgho produites dans le pays: (*a*) *sorgo granífero* (kafir); (*b*) *sorgo del Suddn;* (*c*) *sorgho azucarado;* et (*d*) *sorgho garavi* (negro).

Chaque fois que possible, on a donné des chiffres distincts pour le millet et pour le sorgho, mais de nombreux pays (notamment en Afrique) groupent ces deux céréales dans leurs rapports,

PRODUCTION D'ÉPEAUTRE DANS CERTAINS PAYS

élanges de grains

Les statistiques s'entendent de tous les mélanges de grains ue les pays ont indiqués comme tels, c'est-à-dire les mélanges céréales panifiables, de céréales fourragères, de céréales stinées à l'un et l'autre usages, et parfois de légumineuses. La mposition de ces mélanges varie selon les régions et les années. Pratiquement, les pays scandinaves ne produisent que des élanges de céréales fourragères. Dans les autres pays d'Europe ccidentale, les mélanges de céréales panifiables conservent une rtaine importance. Depuis quelques années, on tend à cultiver us de mélanges de céréales fourragères et moins de mélanges céréales panifiables.

illet et sorgho

Le millet et le sorgho, qui sont surtout des aliments du bétil et de la volaille en Europe et en Amérique du Nord, s'emoient beaucoup dans l'alimentation humaine en Asie, en Afrie et en U.R.S.S.

Les données sur le millet s'appliquent aux cinq variétés imortantes du point de vue alimentaire: le millet à chandelles ennisetum glaucum) appelé également « pearl millet » ou, dans nde, « bajra »; l'éleusine (*Eleusine coracana*) appelée dans nde « ragi »; le millet commun (*Panicum miliaceum*) appelé alement « proso »; le millet d'Italie ou mil à oiseaux (*Setaria alica*) et le millet barnyard (*Echinochloa crusgalli*), souvent dit illet du Japon.

Le sorgho (*Sorghum vulgare*) comprend de nombreuses variés, telles que le sorgho à balais (kafir ou kafircorn), le milo, sorgho doura du Soudan, le sorgho à épis ou doura et le sorgho cré. Les données concernant la Chine continentale se rapportnt au groupe de sorgho appelé « kaoliang » et celles qui ncernent l'Inde au groupe dit « jowar ». Pour ce qui concerne rgentine, les chiffres publiés jusqu'à l'Annuaire de 1960 concernaient qu'une seule sorte de sorgho (sorgho du udan). La série que nous publions depuis concerne l'en-

auquel cas on a indiqué un chiffre global. Des totaux mondiaux et continentaux figurent pour le millet, pour le sorgho et pour une catégorie « non spécifiée », comprenant l'une et l'autre céréales.

Les statistiques de l'Europe et des Amériques sont représentatives de la récolte totale, mais celles de l'Afrique et de l'Asie sont incomplètes, car une grande partie de la production n'est pas relevée. On ne possède pas de renseignements pour certains pays et il n'a été établi aucune estimation pour combler ces lacunes. En conséquence, les totaux continentaux, régionaux et mondiaux ne représentent que les pays énumérés.

Canne à sucre et betteraves à sucre

Pour la canne à sucre et les betteraves à sucre, les statistiques des superficies et de la production se rapportent, en général, à toutes les cultures récoltées, sauf dans le cas où les cultures sont expressément destinées à l'alimentation animale. La plupart de la production sert à la fabrication de sucre centrifugé et non centrifugé; cependant, dans plusieurs pays, d'importantes quantités de canne à sucre servent également aux usages suivants: semences, aliments du bétail, consommation à l'état frais, fabrication d'alcool et autres utilisations; les betteraves à sucre sont utilisées comme aliment du bétail et pour la fabrication d'alcool.

Sucre centrifugé

Le sucre de betterave ou de canne centrifugé est indiqué autant que possible en équivalent de sucre brut. Les chiffres officiels du sucre raffiné fournis par les pays ont donc été convertis généralement en poids de sucre brut, sur la base d'un taux de raffinage de 92 pour cent. Lorsqu'on n'a pas spécifié, on a donné une valeur de sucre telle quelle, c'est-à-dire le poids effectif de tout le sucre centrifugé produit. Sauf indication contraire, les mélasses et sirops sont exclus. Les sucres de canne de qualité inférieure produits en Amérique centrale, en Amérique du Sud et en Extrême-Orient ont été inclus dans

le tableau, dans certains cas sous les noms locaux, par exemple « panela » et « gur ». Le total de cette production a été indiqué comme sucre non centrifugé.

Patates et ignames

Les patates et les ignames, importantes plantes-racines des régions tropicales et subtropicales, n'appartiennent pas à la même famille botanique, mais sont fréquemment classées ensemble dans les statistiques nationales. Pour un grand nombre de pays producteurs, on manque totalement de renseignements et, lorsqu'on en possède, ils ne sont pas satisfaisants: en effet, il est difficile d'évaluer statistiquement la récolte, qui occupe généralement de petites parcelles et qui est consommée sur place en très grande partie.

Manioc

Le manioc (manihot) offre deux variétés principales: l'une amère (*Manihot utilissima*), l'autre douce (*Manihot api*).

Sauf indication contraire, les données se rapportent au manioc frais; toutefois, l'ampleur des différences de rendement à l'hectare semble indiquer que certains chiffres de production s'appliquent peut-être au poids sec (40 pour cent environ du poids frais) ou au tapioca (20 pour cent environ du poids frais). De manière générale, les rendements en poids frais du manioc doux peuvent varier entre 7 et 10 tonnes à l'hectare, ceux du manioc amer entre 13 et 18 tonnes.

Pour certains pays où la production de manioc a une importance considérable sur le plan local, on n'a pu indiquer de données par suite du manque de statistiques. D'autre part, pour un certain nombre de pays figurant dans le tableau, les statistiques de la production paraissent se rapporter à la production possible plutôt qu'à la production récoltée. Bien que les données soient de portée incomplète et souffrent en outre d'un certain manque d'uniformité, on pense que les totaux continentaux, régionaux et mondiaux indiquent de manière valable les variations annuelles du volume de cette récolte.

Oignons et tomates

De manière générale, les statistiques des pays figurant dans ces deux tableaux s'appliquent uniquement à la production de plein champ ou maraîchère. La plupart des pays énumérés sont les principaux importateurs et exportateurs d'oignons et de tomates. Les totaux continentaux et régionaux, s'ils ne comprennent qu'un nombre limité de pays, donnent toutefois une indication valable de l'importance de ces produits dans le commerce international. Dans le tableau concernant les oignons, on a précisé chaque fois qu'on l'a pu s'il s'agissait d'oignons blancs ou d'oignons de couleur.

Choux, choux-fleurs, haricots et petits pois récoltés verts, concombres et cornichons, cantaloups et autres melons, pastèques

Choux. Sont incluses dans le tableau les principales variétés de choux ci-après: choux rouges, choux blancs, choux frisés de Milan; choux de Chine; choux de Bruxelles, choux frisés verts et brocolis branchus.

Choux-fleurs. Lorsque cela a été possible, on a également inclus dans les données des chiffres concernant les brocolis pommés.

Haricots et petits pois récoltés verts. Les données concernent les haricots (*Phaseolus* et *Dolichos* seulement) et les petits pois (*Pisum sativum* et *Pisum arvense*) récoltés verts. Chaque fois qu'on l'a pu, on a établi la distinction entre les haricots mange-tout et les haricots à écosser. Les haricots sont classés dans l'une ou l'autre catégorie selon leur variété ou leur degré de maturité au moment de la cueillette.

Pour tous les légumes ci-dessus, les statistiques manquent dans un grand nombre de pays; aussi n'a-t-on pas calculé de totaux continentaux ni mondiaux, sauf pour l'Europe. En outre, les statistiques ne couvrent pas le même champ dans tous les pays. Il semble que, d'une manière générale, les estimations se rapportent aux cultures pratiquées en plein champ et dans les jardins maraîchers principalement en vue de la vente; en sont donc exclues les cultures pratiquées dans les potagers ou les petits jardins familiaux et destinées principalement à la consommation familiale.

Légumineuses

Cinq tableaux sont consacrés aux légumineuses, à savoir:

Haricots secs (*Phaseolus vulgaris, P. lunatus, P. aureus, P. radiatus, P. mungo* et *P. angularis*);
Pois secs (*Pisum sativum* et *P. arvense*);
Fèves sèches (*Vicia faba*);
Pois chiches (*Cicer arietinum*);
Lentilles (*Lens esculenta* ou *Ervum lens*);
Pois cajans (*Cajanus* spp.);
Dolics (*Vigna sinensis*);
Vesces (*Vicia sativa*);
Lupins (*Lupinus* spp.);
Autres légumineuses (*Dolichos* spp., *Lathyrus* spp., *Voandzeia subterranea, Trigonella foenum graecum*, etc.).

On a indiqué la production totale des cultures récoltées en grain sec sans considérer si elle était utilisée pour l'alimentation humaine ou pour celle du bétail.

Quand on savait que tel était le cas, on a précisé si les données comprenaient une superficie de légumineuses en culture associée. Dans les totaux continentaux, régionaux et mondiaux, cette superficie a été comptée intégralement, d'où une légère surestimation de la superficie plantée en légumineuses et une sous-estimation des rendements, calculés d'après la superficie totale.

Pommes, poires, prunes et pruneaux, cerises, pêches, abricots

Les données concernent la production totale de fruits frais utilisés, soit pour la consommation directe, soit pour l'utilisation industrielle. Des chiffres distincts ont été donnés chaque fois que cela a été possible pour les fruits à couteau et les fruits destinés à être transformés. De même, des données distinctes ont été fournies autant que possible pour les cerises aigres ainsi que pour les pêches et les brugnons.

Fraises, framboises et autres baies

Les données se rapportent généralement à la production commerciale de baies cultivées pour la consommation directe, les utilisations industrielles ou pour d'autres fins. La production de baies sauvages, comprise dans les statistiques de certains pays, est principalement celle qui est destinée au commerce. Même si les données relatives à ces cultures sont incomplètes ou inexistantes pour certains pays, les totaux par continent, par région ou pour le monde entier se rapportant uniquement aux pays énumérés dans les tableaux donnent certainement une indication valable des fluctuations annuelles auxquelles est soumise la tendance de la production commerciale de ces cultures.

Raisin et vin

Production totale de raisin. Il arrive que la production de raisin à cuve soit estimée à partir de la production de vin (voir ci-dessous), auquel cas on a obtenu la production totale de raisin en ajoutant à cette estimation la production de raisin de table et, le cas échéant, celle de raisin destiné à être séché.

Raisin à cuve et vin. Dans la plupart des pays grands producteurs de vin, la production de vin est dérivée des quantités de raisin pressé à la vendange; elle correspond donc à la récolte de « raisin à cuve » de la même campagne et représente la production totale au pressoir, indépendamment de son usage ultérieur (consommation comme vin ou comme vinaigre ou distillation).

On n'a malheureusement pas pu obtenir de tous les pays des statistiques établies sur cette base et il a fallu combler les lacunes

en se servant des déclarations fiscales ou des estimations commerciales. En pareil cas, ou lorsqu'on ne disposait de statistiques que sur la production de vin et de raisin de table, les quantités de raisin à cuve envoyées au pressoir ont été estimées à partir de la production de vin.

Les chiffres nationaux relatifs au raisin à cuve et au vin ne sont donc pas strictement comparables.

Raisins secs

Il s'agit en général de la production totale de raisins secs (Corinthe, Smyrne, Sultanas), qu'ils aient été consommés tels quels ou distillés.

Agrumes

Souvent les renseignements ne portent que sur les quantités livrées au commerce par les producteurs.

Les clémentines, qui ont été groupées avec les oranges et les mandarines, sont une variété d'agrumes qui n'est communément cultivée qu'en Afrique du Nord.

La production d'agrumes est exprimée en termes très divers (poids, volume, nombre de fruits ou type d'emballage); aussi a-t-il souvent fallu procéder à des conversions en poids net, bien qu'on ne disposât d'aucun coefficient officiel.

Dattes

Autant que possible, le tableau concerne la production totale de dattes telles que récoltées, qu'elles soient destinées à l'alimentation humaine, à l'alimentation animale ou aux usages industriels. Souvent, les données ne sont que des estimations fondées sur les tonnages commercialisés.

Figues

Il s'agit de la production totale de figues fraîches et séchées, aussi bien pour la consommation humaine que pour les usages industriels. Parfois, on n'a pu obtenir des renseignements complets et il ne s'agit alors que de la production commerciale de fruits séchés, convertie en équivalent de fruits frais sur la base de 1 pour 3.

Bananes

Les données se rapportent autant que possible à toutes les variétés fructifères comestibles du genre *Musa*, à l'exception des fruits de *Musa paradisiaca*, communément dits bananes plantains. Le plus souvent il ne s'agit que de la production commerciale. Malheureusement, plusieurs pays ne distinguent pas dans leurs statistiques entre la banane proprement dite et la banane plantain, et publient seulement des estimations globales pour les deux espèces. Dans les cas de ce genre, lorsqu'il existe certaines indications ou que l'on suppose que les statistiques fournies se rapportent principalement aux bananes, celles-ci sont incluses dans le tableau. Il convient de noter qu'aucun pays exclu du tableau n'est un exportateur important.

Les statistiques de la production figurant dans le tableau ne couvrent pas le même champ dans tous les pays. La plupart des données ne concernent que la production commerciale et les chiffres des exportations sont utilisés dans certains cas faute de statistiques de la production. Il est également difficile de comparer, pour les bananes, les données de production fournies par divers pays car un certain nombre d'entre eux donnent le chiffre des régimes, ce qui signifie généralement que la tige est comprise dans le poids. Les pays indiquant pour la production de bananes le chiffre des régimes sont indiqués, ainsi que les coefficients de conversion employés par la FAO ces cinq dernières années, dans le présent volume à la section Poids, mesures et coefficients de conversion.

Souvent, les statistiques de superficie sur les bananes ne sont pas disponibles et leur degré d'exactitude est en général loin d'être satisfaisant. Dans beaucoup de pays, les superficies ne comprenant que des peuplements de bananiers représentent seulement une faible proportion de la superficie totale consacrée à la culture de la banane car il s'agit principalement de cultures intercalaires de bananiers associés à d'autres arbres fruitiers et à d'autres cultures.

Pour les raisons indiquées ci-dessus, les rendements à l'hectare indiqués dans le tableau relatif aux bananes doivent être utilisés avec prudence.

Ananas

Les statistiques manquent pour un certain nombre de pays, dont la production n'a toutefois pas une importance considérable pour le commerce international. En conséquence, les totaux n'indiquent que l'ordre de grandeur de la production des diverses régions et les tendances de la production totale, dans la mesure où elles influent sur le commerce international.

Légumes, fruits et fruits à coque (totaux)

Les totaux régionaux et mondiaux figurant dans le tableau suivant comprennent les données publiées dans les tableaux individuels présentés dans le présent volume, sur les oignons, les tomates, les choux, les choux-fleurs, les haricots verts, les petits pois, les concombres, les cantaloups et autres melons, les pastèques, les pommes, les poires, les prunes et pruneaux, les cerises, les pêches, les fraises, les framboises et autres baies, les abricots, la vigne (ensemble du vignoble), les agrumes, les dattes, les figues, les bananes, les ananas, les olives de table, ainsi que des estimations officielles et officieuses pour d'autres espèces de légumes et de fruits. Les statistiques de la production de bananes plantains figurent également dans le total pour les fruits. Le total pour les fruits à coque comprend la production d'amandes, de noix, de noisettes, de noix d'acajou, de noix d'arec, de marrons, de pistaches, de noix de pili. La production de noix de coco, de noix d'abrasin et de noix d'autres palmiers utilisées surtout pour la production d'huile n'est pas comprise.

Pour la majorité des pays, les statistiques sur les légumes, les fruits et les fruits à coque sont très peu nombreuses. Même dans les pays où les statistiques sont disponibles, elles concernent une partie de la production seulement; ainsi, les chiffres peuvent se rapporter aux produits des plantations et des jardins maraîchers cultivés surtout pour la vente. La production des jardins privés et des jardins potagers utilisée principalement pour l'auto-consommation est d'ordinaire exclue du rassemblement des données. Le champ couvert par les chiffres figurant dans le présent tableau, en particulier pour les régions autres que l'Europe et l'Amérique du Nord, ne doit pas être considéré comme aussi complet que pour d'autres cultures.

Graines, noix et amandes oléagineuses

Palmistes. On a considéré en général comme identiques la production commercialisée et la production totale. Lorsqu'on manquait de renseignements sur le tonnage produit ou commercialisé, on a estimé que la production était à peu près égale au volume des exportations de noix et d'huile en supposant que la production était presque entièrement exportée.

Huile de palme. Les données relatives aux pays d'Amérique latine ou d'Asie sont considérées comme représentant la production totale. Pour certains pays d'Afrique, où la production pour la consommation familiale est importante, la production totale a été estimée soit en tenant compte des renseignements disponibles sur la consommation locale, soit à l'aide des chiffres connus de la production de palmistes et du rapport estimé entre la teneur des fruits en amandes et en huile de palme. En général, cette teneur est de l'ordre de 5-7 : 10, selon les pays. On a supposé que l'huile de palme était obtenue dans ces pays principalement par des procédés indigènes, qui permettent d'extraire de 45 à 55 pour cent de la teneur totale d'huile. Toutefois, dans quelques pays comme le Nigeria, il a été tenu compte du fait que l'huile est obtenue en partie au moyen de presses à bras (taux d'extraction: 65 pour cent) et en partie

au moyen de presses hydrauliques (taux d'extraction: 85-90 pour cent).

Graines de coton. Un certain nombre de pays dont la production représente environ 70 pour cent de la production mondiale communiquent des statistiques directes de la production de graines de coton. Pour le reste, les chiffres ont été calculés à partir de la production de coton égrené, à laquelle on a appliqué des coefficients obtenus antérieurement, soit dans lesdits pays, soit dans des pays où les conditions étaient comparables. Le rapport varie entre 1,6 et 2,2 tonnes de graines par tonne de fibres. Lorsqu'on ne connaissait pas exactement le rapport graines/fibres, il a été fixé arbitrairement à 2/1.

Noix et huile d'abrasin. L'huile d'abrasin, qui est tirée des noix de deux espèces d'abrasin (*Aleurites fordii* et *Aleurites montana*) provient principalement de Chine. Pour la Chine continentale, on ne dispose que d'estimations non officielles de la production.

Noix de coco. Les statistiques de la production de noix de coco font défaut dans de nombreux pays. Dans plusieurs cas, il n'existe de statistiques nationales que pour le coprah produit ou exporté. On les a ajustées de manière à y inclure des estimations de la consommation locale et, en appliquant des facteurs de conversion appropriés, on a calculé les chiffres relatifs à la noix de coco. Tous ces chiffres sont marqués d'un astérisque. Pour le calcul des totaux continentaux et mondiaux, on a inclus la production des autres pays en se fondant sur des indications approximatives des superficies, du nombre de cocotiers, etc.

PRODUCTION DE GRAINES DE PAVOT DANS CERTAINS PAYS

Turquie	319	431	223	240	206	139	220	110	120	70

Coprah. Les statistiques de la production ne représentent que les quantités commercialisées; on n'a pas tenu compte des quantités transformées en huile par des méthodes primitives. Lorsqu'on ne connaissait que les exportations, on a estimé, dans certains cas, la consommation nationale à partir de la production d'huile, des tonnages utilisés en savonnerie, etc.

Graines de pavot. Le tableau ci-dessus contient les statistiques relatives aux graines de pavot (*Papaver somniferum*). Celles-ci ne sont disponibles que pour la plupart des pays européens producteurs et pour la Turquie. Les données manquent pour les pays producteurs du Proche-Orient et d'Extrême-Orient, pour l'U.R.S.S. et pour la Chine continentale. Les graines servent de condiment ou à la fabrication d'une huile utilisée pour les besoins alimentaires. L'industrie utilise également les graines et l'huile.

Café et cacao

Les chiffres de la production de café se rapportent aux grains verts. Pour quelques pays fournissant des données exprimées en cerises ou en café en parche, les chiffres ont été convertis en café nettoyé par l'emploi de coefficients de conversion appropriés.

Pour le cacao, les statistiques de la production concernent les fèves de cacao fermentées et séchées.

Pour le café et le cacao, les statistiques des superficies sont disponibles seulement pour certains pays et ne sont pas toujours dignes de foi. Aucune estimation n'a été faite pour les pays ne déclarant pas de données et les rendements à l'hectare n'ont pas été calculés.

Thé

Sauf indication contraire, les chiffres de production concernent le thé manufacturé. Comme les statistiques des superficies ne sont pas toujours précises et que plusieurs pays n'indiquent que les superficies plantées, on n'a pas calculé de rendement à l'hectare.

Tabac

Dans la mesure où on a pu le déterminer, les chiffres de la production concernent le poids des ventes à la ferme. Les chiffres disponibles sur la base du poids sec ont donc été convertis en poids des ventes à la ferme à raison de 90 pour cent environ.

Coton (égrené)

Le tableau consacré au coton égrené a été établi en coopération avec le Comité consultatif international du coton. Pour la plupart des pays, les chiffres sont ceux qui ont été communiqués officiellement comme représentant la production de coton égrené et ne comprennent pas les linters. Lorsque les renseignements reçus concernaient le coton non égrené, et qu'on ne disposait pas d'un coefficient spécifique du rendement en coton égrené, on a considéré que ce rendement était un tiers. Dans le cas du Brésil, de l'Inde et du Pakistan, on a fait figurer les séries officielles publiées dans les statistiques des cultures de ces trois pays, afin de maintenir l'uniformité avec les séries relatives à leurs autres cultures. Toutefois, les chiffres utilisés par le Comité consultatif international du coton, qui sont établis d'après des sources commerciales, sont considérés en général comme plus proches de la réalité, et ce sont eux qui ont servi à calculer les totaux continentaux, régionaux et mondiaux.

Filasse et graine de lin

Dans la plupart des pays, le lin est cultivé à la fois pour la filasse et pour la graine, certaines variétés donnant plus spécialement l'une ou l'autre. Quelques variétés ne sont cultivées que pour la graine.

Le plus souvent, les pays se bornent à indiquer la superficie totale plantée en lin (sans préciser la superficie occupée par les diverses variétés) et la production de filasse et de graines de cette superficie. Les pays qui donnent des chiffres de superficie distincts pour la fibre et pour la graine sont signalés par une note au bas du tableau.

Pour les pays où l'on a indiqué séparément les superficies plantées en lin pour la graine ou pour la filasse, les rendements reflètent des variations effectives des conditions de la production. Lorsqu'au contraire il n'est donné qu'un chiffre pour la superficie totale plantée en lin, les rendements sont affectés également par les variations intervenant dans la composition de la production.

Caoutchouc naturel

Le tableau sur le caoutchouc a été préparé en coopération avec le Groupe international d'études du caoutchouc, d'après lequel le caoutchouc naturel doit s'entendre du poids « séché » de latex, à l'exclusion du balata, de la gutta-percha et des diverses gommes analogues au caoutchouc, ainsi que du caoutchouc de récupération. Ces derniers produits servent en général à des usages complètement différents de ceux du caoutchouc naturel.

ÉLEVAGE ET PRODUITS DE L'ÉLEVAGE

Effectifs du cheptel

Les statistiques du cheptel ont été groupées en périodes de 12 mois (1er octobre au 30 septembre), afin de réduire l'intervalle entre les dates des dénombrements ou énumérations dans les divers pays, opérations qui ont lieu le plus souvent au cours du deuxième semestre ou à la fin de l'année.

De nombreux pays ont effectué un recensement du bétail dans le cadre du Recensement mondial de l'agriculture de 1960; plusieurs viennent d'en publier les résultats provisoires. On relèvera peut-être certaines différences entre les effectifs du cheptel figurant dans le présent Annuaire et ceux qui ont paru dans les résultats du recensement. Elles s'expliquent par le fait que le champ couvert était différent. Dans certains pays, ni les bestiaux élevés en dehors des exploitations ou dans celles dont les dimensions étaient inférieures à un chiffre donné, ni les animaux nomades n'ont été dénombrés aux fins du recensement agricole.

Pour les comparaisons d'une année à l'autre, il convient de tenir compte du champ couvert par les statistiques, en se référant aux notes de bas de page précisant « fermes », « villages », « animaux soumis à l'impôt », etc. Les renseignements sur la *volaille* apparaissent encore insuffisants pour que l'on puisse indiquer des totaux qui donnent une idée véritable des variations annuelles.

Les données sur les espèces *chevaline, asine* et *mulassière* sont réunies en un tableau, ce qui facilite les comparaisons et fait ressortir l'importance relative de ces espèces dans chaque pays.

Bovins: Vaches. Ce tableau comporte deux séries différentes:

a) Vaches et génisses de 2 ans au moins;

b) Vaches et génisses destinées essentiellement à la production laitière.

La première série concerne toutes les vaches et génisses de 2 ans au moins, utilisées pour la reproduction, ainsi que celles qui sont destinées à la production laitière et à la production de viande de boucherie et comme animaux de trait.

Il peut y avoir, dans le cadre du classement ci-dessus, des variations importantes d'un pays à l'autre; c'est ainsi que la

distinction entre vaches destinées essentiellement à la production laitière et vaches destinées à la production laitière et utilisées comme animaux de trait est assez floue. Aussi n'a-t-on pas essayé de calculer des totaux par continent, par région et pour le monde.

Des notes de bas de page expliquent le cas échéant les modifications.

Unités animales. Plusieurs pays, ayant jugé utile d'exprimer les effectifs des diverses espèces d'après un dénominateur commun, se servent de l'« unité animale ».

Les statistiques nationales exprimées en unités animales sont généralement établies au moyen de coefficients de conversion qui reposent sur une connaissance empirique du poids moyen des animaux vifs, ainsi que de la quantité et/ou de la qualité de leur ration alimentaire moyenne.

Pour le calcul de coefficients de conversion pour des régions ou des continents entiers, les renseignements de base sont moins certains encore. Inévitablement, donc, ces coefficients doivent reposer sur une moyenne théorique uniforme, dont on a supposé qu'elle est valable pour l'ensemble du monde, sans considérer les variations que présentent le poids et la consommation alimentaire des animaux d'une même espèce selon les divers continents ou régions. Il s'ensuit que les données obtenues à l'aide de ces coefficients sont plus approximatives que les chiffres nationaux.

Sous cette réserve, on a estimé dans le tableau suivant le nombre des unités animales:

UNITÉS ANIMALES [1]

Espèces bovine, bubaline, équine, camélienne, porcine, ovine et caprine

Continent et région	1947/48–1951/52	1951/52–1955/56	1963/64	1964/65	1965/66	1966/67

Produits de l'élevage

Viande: Viande de bœuf et de veau, de porc et de mouton et d'agneau. Elles font l'objet de deux tableaux reposant sur deux concepts différents de la production.

Le tableau 115 concerne la production de viande fournie par des animaux abattus dans le pays, sans considération d'origine. Dans plusieurs cas, les chiffres pour certains pays sont semblables à ceux du tableau 116, du fait que le commerce d'animaux sur pied n'a pas été important. On a fait figurer également quelques pays qui n'apparaissent pas au tableau 116 parce que la production fournie par les seuls animaux indigènes était soit inconnue, soit inférieure à l'unité minimum (500 tonnes).

Le tableau 116 concerne la production de viande provenant d'animaux indigènes (c'est-à-dire y compris l'équivalent en viande d'animaux exportés sur pied, mais non compris l'équivalent en viande d'animaux importés sur pied). Les totaux continentaux, régionaux et mondiaux du tableau représentent la production ainsi définie. En ce qui concerne les pays qui ne fournissent pas de renseignements et ceux dont on sait que les statistiques sur la viande sont incomplètes, on a établi, quand on le pouvait, des estimations fondées sur diverses données: effectifs du bétail, nombre d'animaux abattus, poids moyen des animaux vifs ou des carcasses et commerce des animaux sur pied. Dans certains cas, on ne disposait de renseignements que pour une année; ceux-ci ont alors servi à établir des estimations pour les autres années. Dans d'autres cas, les chiffres de la production commerciale ou de la production inspectée ont été transformés en chiffres de production totale, d'après le rapport (connu ou supposé) entre la production communiquée et la production non communiquée. On n'a pas tenu compte des variations du volume de viande « sur pied », représentées par la différence entre le poids total (sur pied) des animaux jeunes et des animaux engraissés et par les variations des effectifs du bétail au début et à la fin de l'année.

Autres viandes. Dans ce tableau figurent les statistiques sur la viande de cheval, de volaille et autres animaux (lapins, chameaux, rennes, gibier, etc.).

Pour la viande de cheval, il s'agit en général du poids carcasse; pour la viande de volaille, du poids paré. Pour ces rubriques, comme pour la viande fournie par d'autres animaux, la portée des statistiques varie énormément d'un pays à l'autre. Les chiffres ne peuvent donc servir qu'à montrer les modifications survenues dans chaque pays pendant la période envisagée.

Pour les abats, il ne s'agit en général que des abats comestibles provenant des abattoirs.

Abattages et poids carcasse. On entend par poids carcasse moyen celui de la carcasse, après enlèvement des abats et de la graisse d'abattage. Pour bien des pays, les chiffres indiqués ne se rapportent pas au total des abattages, qu'il s'agisse du nombre ou du poids carcasse moyen, comme il est noté au-dessous du nom du pays en question ou en bas de page. En pareil cas, les tonnages indiqués ne peuvent être considérés comme représentant la totalité des abattages dans le pays. Le poids carcasse des animaux sacrifiés à la ferme est souvent très différent de celui des animaux abattus commercialement. En outre, il n'est pas certain que les poids indiqués soient tous conformes à la définition, bien que les chiffres portés au tableau aient été ajustés avec ceux de la production de viande figurant au tableau 115. On n'a pas essayé de combler les lacunes de ce tableau à l'aide d'estimations de la FAO, car il est difficile de déterminer avec précision le nombre des animaux abattus et les poids carcasse moyens correspondants.

Poids vif moyen des animaux abattus. Théoriquement, le poids vif moyen devrait se rapporter à tout l'ensemble du cheptel d'un pays donné. Mais, étant donné que dans la plupart des pays les animaux ne sont pesés que lorsqu'ils sont amenés à l'abattoir, le poids vif se limite fatalement aux animaux destinés à être abattus. En outre, les chiffres de ce tableau concernent les animaux abattus à l'intérieur des frontières nationales, quelle que soit leur origine. Aussi, pour les pays où un grand nombre d'animaux sont importés pour être abattus, ne sont-ils pas représentatifs du cheptel indigène.

On ne connaît, pour la plupart des pays, ni les conditions dans lesquelles s'effectue la pesée des animaux, ni le stade auquel elle a lieu (immédiatement avant l'abattage, après qu'ils ont passé à l'abattoir un certain temps sans être nourris et abreuvés, etc.).

Graisses animales. Les tableaux donnent les chiffres actuellement disponibles sur la production (*a*) de graisse de porc comestible et (*b*) de suif et de graisse de porc non comestible. Sauf indication contraire, il s'agit de la production totale aux abattoirs et dans les exploitations. En général, ces données s'appliquent aux tonnages qui passent dans le commerce, après avoir été prélevés sur les carcasses dans les abattoirs. Les graisses prélevées dans les boucheries ne sont pas comprises en général. Les méthodes de préparation des carcasses diffèrent selon les pays et, pour toute comparaison internationale, il faut tenir

compte de l'influence possible de ces différences sur le taux de prélèvement des graisses.

Graisse de porc comestible. Les renseignements ont été reproduits tels que reçus. On a admis que la graisse non fondue contenait 80 pour cent de matière grasse pure. Il se peut que certaines quantités aient été omises, car le bacon et la graisse non fondue sont parfois groupés dans certaines statistiques nationales.

Suif et graisse de porc non comestible. Les données comprennent la production de suif comestible ou non. On ignore la teneur effective en graisse des quantités communiquées.

Lait, beurre et fromage. Chaque fois que possible, on s'est efforcé d'indiquer pour chaque pays la production totale de chaque produit, mais, dans le cas de certains pays, les renseignements dont on disposait ne portaient pas sur la totalité de la production: il s'agissait le plus souvent de tout ou partie du tonnage commercialisé (lait), ou produit en usine (beurre et fromage). Les tableaux indiquent le champ couvert par chaque série. Pour bien des pays, on n'a reçu aucun renseignement satisfaisant.

Pour le beurre et le fromage, seules sont valables en général les comparaisons sur le plan national. Il convient de ne procéder qu'avec prudence aux comparaisons de pays à pays et de se reporter aux définitions. Etant donné ces réserves et les lacunes importantes que présentent les renseignements, il était impossible de calculer des totaux continentaux, régionaux ou mondiaux.

Les mêmes réserves sont à formuler en ce qui concerne le lait; mais on dispose de renseignements statistiques plus nombreux qui permettent d'estimer la production par pays lorsqu'on ne dispose pas de chiffres officiels pour une année donnée, ainsi que les totaux continentaux, régionaux et mondiaux. Ces totaux sont approximatifs, mais ils donnent, croyons-nous, une indication valable de la production relative des divers continents et régions ainsi que de ses variations annuelles.

Rendement de lait. Par rendement laitier, on entend ici la production moyenne totale par vache laitière, y compris le lait donné aux jeunes animaux, mais non celui qu'ils ont tété. Le rendement laitier n'est pas entièrement comparable entre les pays, pour diverses raisons: dans le cas où il est calculé indirectement, la production laitière n'est pas évaluée par des méthodes identiques; de même, s'il est déterminé par des essais de traite, les méthodes d'échantillonnage ne sont pas toujours les mêmes. De plus, la définition d'une vache laitière varie selon les pays, et il arrive que la production et les rendements laitiers soient calculés compte non tenu du lait donné aux jeunes animaux.

Œufs. Peu de pays possèdent de grandes exploitations avicoles commerciales, la production d'œufs étant le plus souvent le fait de petites basses-cours individuelles dont la dispersion extrême constitue la principale difficulté que rencontrent les gouvernements pour estimer la production totale d'œufs. Pour la plupart des pays, on disposait de statistiques sur la production d'œufs pour au moins une des années considérées, et elles ont constitué un des éléments qui ont servi à estimer la production des autres années. Certains pays toutefois n'ont aucune statistique de cette production et il a fallu procéder à des estimations à partir de données telles que les effectifs des poules ou de la volaille en général, les taux de ponte connus ou supposés, etc.

La plupart des pays qui établissent des statistiques expriment la production soit en nombre d'œufs, soit en poids total. Dans tous les cas, le tableau indique cette production en millions d'œufs et en milliers de tonnes. Chaque fois que possible, on s'est servi de coefficients de conversion officiels. A défaut, les coefficients ont été soit tirés de sources non officielles, soit estimés d'après les données que l'on possédait sur les pays voisins.

Les chiffres s'entendent en général de la production totale, y compris les œufs à couver, tant dans le secteur agricole que dans le secteur non agricole.

Ruches et miel. Les chiffres disponibles sur le nombre de ruches et la production de miel sont encore incomplets, mais on espère que les statistiques s'amélioreront au point qu'il sera possible de faire figurer dans les éditions ultérieures des totaux mondiaux, continentaux et régionaux.

Cocons (frais) et soie grège. Malgré la rareté des statistiques, les pays énumérés représentent la quasi-totalité de la production mondiale.

Laine. En général, les statistiques de la production lainière sont exprimées en poids de laine en suint, qui contient de 40 à 65 pour cent d'impuretés. Afin de rendre les chiffres comparables, les données sont également fournies en poids de laine lavée.

On a groupé la production de la campagne commençant en automne dans l'hémisphère sud avec la tonte qui s'opère principalement au printemps de la même année dans l'hémisphère nord.

Cuirs et peaux. Dans le tableau sur les cuirs et peaux, les chiffres figurent tels qu'ils ont été indiqués par les gouvernements. En l'absence de renseignements suffisamment détaillés, on n'a pas essayé de convertir en poids frais les chiffres reçus en poids sec ou salé, ni de convertir en poids une production indiquée en nombre de peaux ou vice versa. Les très rares pays sur lesquels on dispose de précisions à ce sujet indiquent que le poids sec va du tiers à la moitié environ du poids frais.

Les possibilités de comparaison des poids des divers cuirs et peaux d'un pays à l'autre sont sujettes à des limitations, qui découlent du fait que les espèces, les races, l'âge au moment de l'abattage et le mode d'expédition ne sont pas toujours les mêmes.

Pour la plupart des pays qui fournissent des renseignements, on ignore la portée statistique de ces derniers, mais on peut penser que, le plus souvent, ils se limitent aux peaux des animaux abattus commercialement.

Les statistiques étant incomplètes, on n'a pu donner de totaux continentaux ni mondiaux. Afin de combler les lacunes au sujet des pays pour lesquels on ne dispose pas de chiffres officiels, on a indiqué les estimations de la FAO généralement fondées sur le nombre des animaux abattus.

DISPONIBILITÉS ALIMENTAIRES

Dans cette section de l'Annuaire (tableaux 135-138), figurent, pour les principaux groupes de denrées alimentaires, des données sur la consommation par habitant, exprimée en poids, les calories, les protéines et les matières grasses. Les données ont été tirées des bilans nationaux des disponibilités alimentaires préparés par les gouvernements en collaboration avec la FAO et, pour les pays européens membres de l'OCDE, avec cette organisation. La FAO publie régulièrement des bilans alimentaires moyens et complets pour une période triennale. Jusqu'à présent, ils concernent les périodes 1954-56, 1957-59 et 1960-62. Des données seront prochainement publiées pour la période 1963-65. La FAO a également publié des séries chronologiques sur les disponibilités alimentaires, où sont résumées les données les plus importantes tirées du bilan des disponibilités alimentaires pour l'avant-guerre et pour les périodes suivantes: 1948-50, 1951-53 et 1954-56. On envisage d'établir une nouvelle série chronologique des données des bilans alimentaires disponibles au cours de 1969-70, en tenant compte des révisions apportées récemment pour beaucoup de pays aux données relatives à la production, au commerce et à l'uti-

lisation. Au cours de ce travail, on fera particulièrement attention aux lacunes existant dans les séries.

Le bilan alimentaire présente, sous la forme d'un compte, un tableau des disponibilités alimentaires d'un pays au cours d'une période donnée, généralement un an. Il indique les types et quantités d'aliments produits, importés et exportés. Il tient compte des variations des stocks et des quantités ayant servi à l'alimentation animale, à la semence, aux utilisations industrielles; celles qui ont été perdues au cours de la distribution jusqu'au stade du détail sont déduites. Tenant compte des chiffres de la population, on obtient ainsi les disponibilités alimentaires par habitant, ainsi que leur valeur nutritive au niveau du détail.

Valeur des bilans des disponibilités alimentaires. En examinant si les données des bilans des disponibilités alimentaires sont sujettes à caution et si elles sont comparables entre les pays et chronologiquement, il convient de tenir compte des principales limitations suivantes de ces données:

a) Le champ, l'exactitude et le classement des statistiques nationales varient d'un pays à l'autre et chronologiquement. Il arrive fréquemment que, pour un certain nombre de produits, les statistiques officielles de la production et du commerce laissent à désirer. Souvent il n'existe aucune information digne de foi sur les variations annuelles des stocks des producteurs et des commerçants. La qualité des estimations faites dans ces cas est très variable puisque celles-ci se fondent sur des connaissances subjectives.

b) En l'absence de statistiques sur l'utilisation des divers produits, il faut souvent estimer grossièrement les quantités données aux animaux, employées comme semence, perdues, ou ayant servi à des usages industriels, ainsi que les coefficients de conversion techniques connexes.

c) Pour un certain nombre de pays, il n'existe pas encore de statistiques appropriées qui se fondent sur les chiffres de la population. Même dans les cas où des recensements ou des enquêtes démographiques ont eu lieu, il peut y avoir des erreurs appréciables dans les estimations relatives aux années postérieures au recensement.

d) Il arrive souvent que les chiffres nationaux de la composition des aliments manquent; aussi doit-on, pour calculer la valeur nutritive des disponibilités alimentaires, avoir recours à des données internationales.

MOYENS DE PRODUCTION

Engrais commerciaux

Ces tableaux indiquent la production et la consommation d'engrais commerciaux, en équivalent de principes fertilisants. Les données ont été communiquées directement par les gouvernements. En l'absence de données officielles, des estimations ont été faites en coopération avec l'industrie des engrais.

Lorsque la teneur en éléments fertilisants n'était pas indiquée dans les statistiques nationales, on l'a calculée en se servant du pourcentage de ces éléments contenu dans les multiples types d'engrais commerciaux. On trouvera ces pourcentages dans l'Etude agricole de la FAO N° 43, *L'utilisation rationnelle des engrais*, tableau 8, page 74.

Le tableau ci-dessous donne les chiffres relatifs à la production de phosphate naturel pour la période 1964-67:

PRODUCTION DE PHOSPHATE NATUREL

Continent	1964	1965	1966	1967
	Milliers de tonnes			
Europe	*140	*150	*130	*150
U.R.S.S.[1]	*6 200	*6 700	*8 300	*9 300
Amérique du Nord et centrale	23 480	26 890	35 600	*36 220
Amérique du Sud	*480	*480	*450	F 470
Asie	850	*1 260	*1 650	*1 530
Afrique	*15 720	*15 430	*15 860	*15 900
Océanie	3 340	3 360	3 700	*3 640
Monde	*50 200	*54 300	*65 700	*67 200

[1] Non compris les quantités utilisées pour la fabrication des engrais phosphatés du commerce.

Les chiffres du tableau consacré aux engrais phosphatés excluent le phosphate naturel. Des renseignements sur ce dernier engrais utilisé en applications directes en 1966/67-1967/68 figurent dans le tableau suivant:

PHOSPHATE NATUREL BROYÉ UTILISÉ EN APPLICATIONS DIRECTES

Continent	1966/67	1967/68
	Milliers de tonnes de P_2O_5	
Europe	*91	*106

[1] Année civile (1er millésime indiqué).

Machines agricoles

Tracteurs. Par tracteurs à roues, on n'entend en général dans le tableau que les tracteurs à trois ou quatre roues et d'une puissance supérieure à 8 ch, qui constituent la grande majorité des tracteurs agricoles dans la quasi-totalité des pays. De même, par tracteurs à chenilles, on n'entend en général que ceux dont la puissance dépasse 8 ch et qui sont utilisés surtout pour les travaux de voirie et de terrassement, la remise en valeur des terres et la sylviculture, mais qui servent également en agriculture. Par tracteurs «à toutes fins», on entend le nombre total de tracteurs, quelle que soit leur utilisation.

Lorsqu'on ne disposait pas de chiffres annuels sur les tracteurs utilisés dans les pays qui ne produisent pas ces machines, on a pu estimer les variations annuelles du parc d'après les exportations des principaux pays producteurs de tracteurs, classées par destination; en même temps, on a réduit le parc existant en appliquant au nombre de machines un taux de réforme convenable.

Pour quelques pays, on ne connaît que le nombre total de tracteurs, y compris les motoculteurs et autres machines analogues. D'autres pays classent les tracteurs en équivalent de 15 ch. Ces données, accompagnées des notes pertinentes, sont englobées dans les totaux continentaux, régionaux et mondiaux, sans qu'il soit tenu compte des différences de définition.

Toutefois, l'effectif du parc n'indique pas la puissance totale des tracteurs et il serait plus intéressant de connaître leur puissance moyenne et leur durée de travail: malheureusement, les données disponibles à cet égard sont rares.

Autant que possible, les renseignements s'entendent du parc à la fin de l'année indiquée. Les chiffres basés sur les recensements effectués au cours du premier trimestre d'une année donnée ont été inclus dans ceux de l'année précédente.

Motoculteurs. Ce tableau est consacré aux petits tracteurs et cultivateurs mécaniques pesant moins de 850 kg et/ou développant moins de 8 ch, utilisés principalement en horticulture. Il s'agit uniquement de machines à un essieu. Les chiffres provenant des recensements exécutés durant le premier trimestre d'une année donnée sont compris dans ceux de l'année précédente.

Moissonneuses-batteuses. Ce tableau se limite en général aux machines qui coupent et battent en une seule opération. On espère qu'il sera possible de réunir des renseignements plus complets, de manière que les volumes ultérieurs puissent présenter des totaux continentaux, régionaux et mondiaux.

Trayeuses. Ce tableau indique soit le nombre de trayeuses, soit le nombre d'exploitations possédant de telles machines.

Les chiffres étant incomplets, il n'a pas été possible de calculer des totaux continentaux, régionaux ni mondiaux.

Produits antiparasitaires

Les données se rapportent aux quantités de produits antiparasitaires utilisés ou achetés par les agriculteurs. Ces quantités sont exprimées en équivalent de composants actifs. Le champ géographique couvert étant incomplet, il n'a pas été possible de calculer des estimations pour les totaux continentaux, régionaux ou mondiaux.

PRIX

Les séries de prix sont de provenances diverses: questionnaires spéciaux, groupes internationaux s'occupant de produits, publications officielles et non officielles et, dans certains cas, correspondants spéciaux. Chacune d'elles a été établie de manière à comprendre, dans toute la mesure du possible, des renseignements sur chacun des produits considérés dans les principaux pays producteurs ou commerçants.

Les séries choisies ont été classées de la manière suivante: prix à la production, prix de gros, prix d'exportation, prix d'importation. En cas de chevauchement (par exemple un prix à l'exportation peut également être pratiqué dans certaines transactions de gros intérieures), la classification exprime le type de transaction dans laquelle le prix est le plus fréquent.

Les prix se rapportent à l'année civile adoptée pour les statistiques de production, qui ne représentent pas nécessairement les moyennes effectives pour l'année civile, mais les moyennes relatives à la campagne agricole ou à certains mois de la campagne de commercialisation précisés dans les colonnes où figurent le mois de début et de fin de campagne. Les méthodes utilisées pour calculer la moyenne annuelle et les indices de prix figurant dans les tableaux des prix, ainsi que la provenance des données, sont brièvement exposées dans l'Annuaire de 1960, section « Liste des sources pour les tableaux de prix ». Cependant la description de 1960 ne s'applique pas aux révisions ultérieures de la série.

Le présent volume compte un nouveau tableau, « Prix à l'exportation de certains produits agricoles », qui contient des séries s'ajoutant à celles des prix à l'exportation généralement indiqués dans les tableaux établis pour les divers produits agricoles. Pour assurer la continuité des données dans une série chronologique plus longue et en raison aussi de l'intérêt qu'elles offrent sur le plan international, ces dernières séries sont maintenues dans le présent volume. Les données qui figurent dans le nouveau tableau ont été réunies par voie de questionnaires spéciaux adressés aux gouvernements en 1967 et 1968. En conséquence, le nombre de produits et de pays qui y figurent traduit la réaction des divers pays aux questionnaires, ainsi que l'importance qu'ils attachent à tel ou tel produit dans leur commerce agricole. On espère, dans les années à venir, accroître la portée et la précision des données qui figurent dans ce tableau, afin qu'il donne des indications plus complètes sur les prix relatifs aux transactions des produits agricoles entrant dans le commerce international.

Les unités locales de quantité dans lesquelles les prix étaient originellement exprimés ont été ramenées aux unités métriques ou britanniques.

On trouvera dans la partie inférieure de chaque tableau les prix locaux exprimés en monnaie des Etats-Unis par unité métrique de quantité. Pour la plupart des pays, on a utilisé les taux de parité publiés par le Fonds monétaire international. Lorsqu'il existait un système de taux de changes multiples, on a choisi le cours qui s'appliquait le mieux aux produits considérés ainsi qu'à la période et au pays auxquels s'applique le prix moyen indiqué.

Dans les cas où les taux de change ont varié pendant l'année, en particulier lorsque les taux du marché libre servent dans les transactions avec l'étranger, on a utilisé les moyennes des taux de change, pondérées par la durée des différentes périodes pendant lesquelles ils ont été en vigueur. Pour certains pays, on n'a pas effectué de conversions en unités monétaires des Etats-Unis parce qu'il n'était pas possible de choisir un taux de change satisfaisant applicable au produit on au pays en question.

NOTES SUR LES PAYS

Birmanie

Les statistiques des cultures et du cheptel ne concernent que la Birmanie sous administration directe, à l'exclusion de Putao, des monts Chin, des Etats Chan et de Karenni, régions dans lesquelles il n'a jamais été effectué d'enquête statistique.

Canada

Sauf indication contraire, tous les chiffres pour le Canada sont ajustés de manière à comprendre Terre-Neuve.

Chine continentale

Estimations de la production de céréales et de pommes de terre

Une des principales difficultés à laquelle s'est heurtée l'élaboration de l'*Annuaire de la production* a été d'estimer la production des cultures de la Chine continentale. On ne dispose de chiffres officiels que jusqu'en 1958. Au cours des années suivantes, de l'opinion des experts et d'après les informations de presse, trois mauvaises récoltes auraient succédé en Chine continentale à la récolte excellente de 1958; la première s'est produite en 1959 et aurait été causée par un transfert trop important de main-d'œuvre agricole aux secteurs industriels, tandis que les mauvaises récoltes de 1960 et 1961 seraient surtout dues aux inondations et à la sécheresse. En conséquence, alors que la troisième *Enquête mondiale de la FAO sur l'alimentation* avait estimé à 2 100 calories pour 1957-59 la ration énergétique par habitant, les experts sont convenus qu'en 1960 et 1961, malgré une forte augmentation des importations, la ration énergétique par habitant se situait aux environs de 1 850 calories. Par la suite elle recommençait à croître et, d'après les estimations, serait revenue en 1965 plus ou moins au niveau de 1957-59.

En tenant compte:

a) des estimations démographiques fondées sur le recensement de 1953 et d'un taux d'accroissement de 2,1 pour cent ressortant des estimations nationales officielles pour 1953-57;

b) des statistiques commerciales tirées des publications des partenaires commerciaux de la Chine continentale;

c) de l'avis des experts sur les disponibilités énergétiques par habitant;

d) du comportement analogue de certains groupes de cultures dans des conditions climatiques données;

et en classant les principales cultures en trois groupes (blé, orge et avoine; riz, maïs, millet et sorgho; pommes de terre et patates), on a pu établir des estimations qui concordent avec les renseignements disponibles. Les statistiques de la production de blé et de riz figurent dans l'Annuaire, tandis que toutes les autres estimations sur les superficies, les rendements et la production de céréales et de pommes de terre n'y figurent pas mais ont été incluses dans les totaux mondiaux.

Les estimations faites pour la Chine continentale resteront évidemment sujettes à caution tant que ce pays ne publiera pas de chiffres officiels.

Etats-Unis

Lorsque des chiffres distincts pour l'Alaska et Hawaii ne figurent ni dans les tableaux ni dans les notes de bas de page, ces deux Etats sont compris dans les estimations relatives aux Etats-Unis.

Inde

Des donnée relatives à Goa, Daman et Diu (qui faisaient partie des anciennes possessions portugaises de l'Inde avant d'être rattachées en décembre 1961 au territoire national Indien) figurent dans les chiffres de l'Inde contenus dans les tableaux sur l'utilisation des terres, l'irrigation, la population, le riz (depuis 1963), la canne à sucre (depuis 1963/64), la noix de coco et le coprah (depuis 1964).

Yémen du Sud

Naguère Fédération de l'Arabie du Sud. Les chiffres ont trait aux anciens territoires de la Colonie d'Aden et du Protectorat d'Aden.

POIDS, MESURES ET COEFFICIENTS DE CONVERSION

A. GÉNÉRAUX

Superficie

1 hectare	= 2,47109 acres	1 acre	= 0,40469 hectare
1 kilomètre carré	= 0,38610 mille carré	1 mille carré	= 2,5900 kilomètres carrés
1 kilomètre carré	= 100 hectares	1 mille carré	= 640 acres = 259 hectares

Rendement

100 kilogrammes par hectare	= 1,4869 bushel (60 lb) par acre	1 bushel (60 lb) par acre	= 67,253 kilogrammes par hectare

Capacité

1 litre	= 0,26418 gallon = 0,21997 gallon impérial	1 U.S. gallon	= 3,78533 litres
		1 gallon impérial	= 4,54596 litres
1 hectolitre	= 100 litres	1 gallon	= 4 quarts

Masse

1 kilogramme	= 2,20462 pounds	1 pound	= 0,45359 kilogramme
1 tonne métrique	= 0,98421 tonne longue = 1,10231 tonne courte	1 tonne longue	= 1,01605 tonne métrique
		1 tonne courte	= 0,90718 tonne métrique
1 tonne métrique	= 1 000 kilogrammes	1 tonne longue	= 2 240 pounds
1 quintal	= 100 kilogrammes	1 tonne courte	= 2 000 pounds

1 t. m. = 19,684 cwt (112 lb)	1 cwt (112 lb)	= 0,050802 t. m.	Royaume-Uni et territoires britanniques
1 t. m. = 22,046 cwt (100 lb)	1 cwt (100 lb)	= 0,045359 t. m.	Canada, Honduras, Etats-Unis
1 t. m. = 66,667 arrobas métriques	1 arroba métrique	= 0,015 t. m.	Brésil
1 t. m. = 21,739 quintaux espagnols	1 quintal espagnol	= 0,046 t. m.	Chili, Costa Rica, El Salvador, Guatemala, Philippines, Espagne, Venezuela
1 t. m. = 21,735 quintaux espagnols	1 quintal espagnol (100 libras)	= 0,046009 t. m.	Cuba, Pérou
1 t. m. = 20 kantars métriques	1 kantar métrique	= 0,050 t. m.	République arabe unie
1 t. m. = 22,258 kantars	1 kantar	= 0,044928 t. m.	Soudan, République arabe unie
1 t. m. = 26,792 maunds	1 maund (Standard) (82,286 lb)	= 0,037324 t. m.	Inde, Pakistan
1 t. m. = 266,67 kwan	1 kwan	= 0,00375 t. m.	Japon, Corée, Rép. de
1 t. m. = 16,667 piculs (pikuls)	1 picul (pikul)	= 0,060 t. m.	Cambodge, Laos, Thaïlande
1 t. m. = 16,534 piculs (pikuls)	1 picul (pikul)	= 0,06048 t. m.	Brunéi, Hong-kong, Macao, Malaisie

B. COEFFICIENTS POUR LA CONVERSION DIRECTE

Pour convertir les poids par unité de superficie et les poids par unité de volume du système britannique au système métrique, on utilisera les coefficients suivants:

1 hundredweight (cwt) à l'acre	=	125,54	kilogrammes à l'hectare
1 longue tonne par acre	=	2 510,175	kilogrammes à l'hectare
1 pound par quarter	=	0,1559	kilogramme par hectolitre
1 pound par gallon	=	0,0998	kilogramme par litre
1 pound par bushel	=	1,2472	kilogramme par hectolitre

NOTE: Les unités ci-dessus ne couvrent ni tous les produits agricoles ni tous les récipients destinés à un produit donné. Il convient de se rappeler en les utilisant que, pour la plupart des produits et en particulier les fruits, des différences de variété ou de taille, un emballage plus ou moins compact, le conditionnement, un récipient plus ou moins rempli, etc., peuvent faire varier de manière assez sensible le poids par unité de volume.

NOTAS SOBRE LOS CUADROS

NOTA GENERAL

Totales regionales

En todos los cuadros en que figuran totales continentales aparecen también los regionales, incluso cuando éstos coinciden exactamente con aquéllos o cuando, a base de los primeros, se han podido calcular fácilmente para evitar toda posible ambigüedad.

Debido al redondeo, los totales regionales no siempre coinciden con los totales geográficos. Las siete regiones en las cuales se ha dividido el mundo, para los estudios analíticos de la FAO, son las siguientes:

Europa (excluida la U.R.S.S.)

Albania, Alemania (Oriental, República Federal, Berlín), Andorra, Austria, Bélgica, Bulgaria, Ciudad del Vaticano, Checoslovaquia, Dinamarca (Islas Feroé), España (inclusive Islas Baleares y Canarias), Finlandia, Francia, Gibraltar, Grecia (inclusive el Dodecaneso), Hungría, Irlanda, Islandia, Italia, Liechtenstein, Luxemburgo, Malta, Mónaco, Noruega (inclusive Jan Mayen y Svalbard), Países Bajos, Polonia, Portugal (inclusive Azores y Madera), Reino Unido (inclusive Islas Normandas, Isla de Man), Rumania, San Marino, Suecia, Suiza, Yugoslavia.

Norteamérica

Bermudas, Canadá, Estados Unidos (inclusive Alaska, Hawaii), Groenlandia, San Pedro y Miquelón.

América Latina

Antillas Neerlandesas, Antigua, Argentina, Bahamas, Barbados, Bolivia, Brasil, Colombia, Costa Rica, Cuba, Chile, Dominica, Ecuador (inclusive Archipiélago de Colón), El Salvador, Granada, Guadalupe, Guatemala, Guyana, Guayana Francesa, Haití, Honduras, Honduras Británico, Jamaica, Islas Vírgenes (EE. UU.), Islas Caimán, Islas Malvinas, Islas del Turco y Caicos, Islas Vírgenes (Reino Unido), Martinica, México, Montserrat, Nicaragua, Panamá, Panamá (Zona del Canal), Paraguay, Perú, Puerto Rico, República Dominicana, San Cristóbal y Nieves, Santa Lucía, San Vicente, Surinam, Trinidad y Tabago, Uruguay, Venezuela.

Cercano Oriente

Africa

Libia (Cirenaica, Tripolitania, Fezzan), República Arabe Unida, Sudán.

Asia

Afganistán, Arabia Saudita, Bahréin, Chipre, Estados árabes bajo tregua, Irán, Irak, Israel, Jordania, Katar, Kuwait, Líbano, Mascate y Omán, Omán bajo tregua, Siria, Turquía, Yemen, Yemen Meridional (ex Federación de Arabia del Sur).

Lejano Oriente (excluida China continental)

Birmania, Brunei, Bután, Camboya, Ceilán, Corea (República de), Corea del Norte, China (Taiwán), Filipinas, Hong Kong, India (Incl. Goa, Damán, Diu) Indonesia (incl. Irián Occidental) Islas Bonin, Isla Christmas (admón. australiana), Islas Maldivas, Islas Riukiu, Japón, Laos, Macao, Malasia (Malasia Occidental, Sabah, Sarawak), Nepal, Pakistán, República Popular de Mongolia, Singapur, Tailandia, Timor Portugués, Viet-Nam del Norte, Viet-Nam (República de)

Africa

Alto Volta, Angola, Argelia, Botswana, Burundi, Camerún (Camerún oriental, Camerún occidental), Congo (Brazzaville), Congo (República Democrática del), Costa de Marfil, Chad, Dahomey, Etiopía, Gabón, Gambia, Ghana, Guinea, Guinea Ecuatorial (Fernando Poo, Río Muni), Guinea portuguesa, Ifni, Islas de Cabo Verde, Islas Comoras, Isla Mauricio, Islas Seychelles, Kenia, Lesotho, Liberia, Madagascar, Malawi, Malí, Marruecos, Mauritania, Mozambique, Namibia (ex Africa Sudoccidental), Níger, Nigeria (Región Oriental, Lagos, Región Septentrional, Región Occidental), Norte de Africa, española (Ceuta, Melilla, otras), República Centroafricana, República Unida de Tanzania (Tanganyika, Zanzíbar), Reunión, Rhodesia del Sur, Rwanda, Sáhara español (Río de Oro, Saguia el Hamra), Santa Elena, Santo Tomé y Príncipe, Senegal, Sierra Leona, Somalia (ex-Somalia británica, ex-Somalia italiana), Sudáfrica, Swazilandia, Territorio Francés de los Afares y los Isas, Togo, Túnez, Uganda, Zambia.

Oceanía

Australia, Guam, Islas Cocos (Keeling), Islas Cook, Islas Gilbert y Ellice, Isla de Johnston, Islas Midway, Isla Norfolk, Islas del Pacífico (admón. de los EE. UU.), Islas Salomón británicas, Islas de Tokelau, Isla de Wake, Islas Viti, Nauru, Niue, Nueva Caledonia, Nueva Guinea (admón. australiana), Nuevas Hébridas, Nueva Zelandia (inclusive Islas Campbell y Kermadec), Polinesia francesa, Papua, Pitcairn, Samoa americana, Samoa Occidental, Tonga.

TIERRAS

Aprovechamiento de tierras

En este cuadro se intenta reunir los datos sobre aprovechamiento de tierras en todo el mundo. Deberá tenerse presente cuando se examine este cuadro que las definiciones que emplean los gobiernos al comunicar la información estadística varían considerablemente y que a veces dentro de una misma categoría se incluyen muchas tierras destinadas a diferentes usos. Además, por lo que se refiere a ciertas clases de terrenos, los datos de varios países faltan por completo o son insuficientes en su amplitud.

En la elaboración del cuadro se han empleado las siguientes definiciones:

1. *Superficie total:* Se refiere a la extensión del país en su totalidad, incluyendo la superficie comprendida por las masas de agua interiores.

2. *Superficie terrestre:* Se refiere a la extensión total de las tierras, sin incluir las aguas interiores. La definición de las aguas interiores comprende en general los ríos y lagos principales pero excluye las pequeñas masas de agua.

3. *Tierras arables o de labranza y tierras destinadas a cultivos permanentes:* Comprenden las tierras bajo cultivo (las que dan dos cosechas se toman en cuenta sólo una vez), las tierras en descanso temporal, las praderas temporales para corte o pastoreo, las tierras dedicadas a huertas comerciales o huertos (incluidos los cultivos de invernadero), las tierras con árboles frutales, vides, y otros arbustos productores de fruta y las plantaciones de caucho. Dentro del conjunto de esta definición pueden existir grandes variaciones entre los países que comunican los datos: los criterios que se siguen para distinguir las praderas temporales de las permanentes, por ejemplo, son bastante indefinidos; el lapso durante el cual las tierras sin sembrar se consideran en barbecho varía grandemente; muchos países, especialmente de Asia, Africa y América del Sur, comunican tan solo los datos sobre superficies bajo cultivo y, con frecuencia, nada más que los correspondientes a las cosechas más importantes.

4. *Praderas y pastos permanentes:* Comprenden las tierras cubiertas de forraje herbáceo distinto de los pastos y tréboles

de rotación. En razón de los datos que se incluyen en esta categoría, el concepto de « praderas y pastos permanentes » resulta vagamente delimitado, por no haber ninguna línea divisoria precisa entre esta categoría y (*a*) las praderas temporales consideradas generalmente como tierras arables, y (*b*) las tierras de pastoreo que producen alguna madera de los árboles y arbustos por ellas dispersos y que, a menudo, se anotan como bosques.

5. *Terrenos forestales:* Comprenden todas las tierras con masas de árboles naturales o plantadas, de valor actual o potencial. Las definiciones de sabanas, montes bajos de las zonas desérticas, bosques replantados y tierras de vegetación mixta, presentan el mismo problema indicado en la nota 4.

6. *Tierras no aprovechadas pero potencialmente productivas:* En la mayoría de los casos los gobiernos informantes determinan en forma subjetiva esta categoría, que incluye a diversas clases de tierras, desde las que se están incorporando a las actividades agrícolas hasta las que en el futuro pueden destinarse a la agricultura o a plantaciones forestales.

7. *Superficie edificada, terrenos baldíos y otros:* Comprenden las tierras ocupadas por edificios, parques y jardines ornamentales, caminos o sendas, las tierras estériles, las tierras incultas, y las superficies ocupadas por masas de agua, y cualesquiera otras tierras que no se hayan incluido en las notas 3 a 6.

Debido a la escasa información no se calcularon totales continentales, regionales ni mundiales para los datos comprendidos en la columna 6. No obstante, al computar todos estos totales, los datos disponibles sobre tierras potencialmente productivas se agregaron a la suma de los de la columna 7, en la categoría de « Otras superficies », grupo que abarca todos los terrenos no utilizados para la explotación agrícola o forestal, prescindiendo de que se les considere como potencialmente productivos. En el cálculo de los totales continentales, regionales y mundiales para las columnas 3 a 5 se incluyeron estimaciones que no se especifican en el cuadro y que corresponden a ciertos países respecto a los cuales no se disponía de cifras oficiales pero se podía contar con alguna base de referencia para hacer tales evaluaciones. Estas fueron tenidas en cuenta al calcular los totales correspondientes a la categoría de « Otras superficies ».

Las estimaciones empleadas en los cuadros correspondientes a Europa, América Central y Septentrional, y Oceanía, constituyen una fracción insignificante del total. Las correspondientes a Sudamérica y Africa son inferiores al 1 por ciento, y las de Asia al 4 por ciento, de la superficie total de los continentes respectivos.

Entre las diferencias que se notan con respecto a los datos, que aparecen en ediciones previas de este Anuario, las correspondientes a Europa y Norteamérica se deben, en lo principal, a cambios ocurridos realmente dentro de las diversas categorías de aprovechamiento de tierras. En lo tocante a los demás continentes, casi todos los cambios representan una mejora general de la información estadística sobre aprovechamiento de tierras, y de la interpretación de los mismos, según la clasificación empleada en este cuadro. En los casos en que no se dispone de información estadística respecto al aprovechamiento de tierras (sobre todo en lo referente a países de América Central, América del Sur, Asia y Africa), se ha tratado de estimar la magnitud de las diversas clases de aprovechamiento de tierras a base de otros datos estadísticos pertinentes y de la información geográfica general.

Riego

En este cuadro se ha tratado de recoger todos los datos disponibles sobre las tierras de regadío en todo el mundo. Salvo indicación en contrario, los datos se refieren a las tierras de labranza y tierras destinadas a cultivos arbóreos que reciben el necesario suministro de agua, de la precipitación pluvial y de obras de riego, quedando excluidos, por tanto, los terrenos que reciben el agua de inundaciones no reguladas y las praderas y pastos permanentes irrigados. Las definiciones correspondientes, cuando ha sido posible formularlas, se dan en las notas de pie de página. En general, las cifras se refieren a las tierras regables, más bien que a las cultivadas efectivamente bajo un régimen de riego en un año determinado, y comprenden las tierras regadas por canales, depósitos, pozos corrientes, pozos artesianos y aparatos para riego por aspersión, independientemente de que lo sean durante todo el año o solamente durante la estación seca.

Debe tenerse presente que estas cifras no son comparables internacionalmente, ya que el concepto de « tierras de regadío » varía mucho de un país a otro. Por consiguiente, no se ha intentado computar los totales continentales, regionales o mundiales.

Número y superficie de las explotaciones agrícolas

En el Cuadro 3 se consignan datos sobre el número y superficie de las explotaciones tomados de los censos levantados ajustándose al Censo agropecuario mundial de 1960.

En general, los países han empleado en sus censos el concepto de explotación agrícola recomendado por la FAO (es decir, toda tierra que se aproveche total o parcialmente para la producción agropecuaria y que explote una persona (el tenedor) sola o con la ayuda de otras, sin consideración de título, tamaño o situación. El ganado mantenido para fines agrícolas sin tierras agrícolas se considerará también como explotación). Sin embargo, varios países se apartaron algo de esta definición, limitando la enumeración a las explotaciones que se ajustaban a determinados criterios adicionales y que rebasaban determinados límites en cuanto a tamaño de la finca o proporciones de la explotación o ambas. Las modificaciones más importantes se explican en notas al pie del cuadro, debiendo tenerse en cuenta cuando se trata de la comparabilidad entre los países.

Las cifras relativas a explotaciones sin tierras, consignadas por separado, se refieren principalmente a los establecimientos y unidades que no poseen tierra agrícola alguna, pero que obtienen ganado o productos pecuarios, esto es, porquerizas, incubadoras, baterías de cría de aves, lecherías urbanas con establo, ganado mantenido por tribus nómadas, conejeras, colmenares, etc.

POBLACION

Población total

Para cada país y territorio del mundo, el Cuadro 4 presenta, estimaciones medias de mediados de año de la población total para los períodos 1948-52 y 1952-56, y estimaciones anuales de mediados de año correspondientes al período 1963-67.

Por lo general, son éstas las cifras que los países facilitan a la Oficina de Estadística de las Naciones Unidas para incluirlas en sus publicaciones de estadísticas demográficas. Sin embargo, las series facilitadas por los países presentan varias interrupciones. Por esta razón, la FAO emprendió en 1966 un extenso análisis de las series disponibles a fin de establecer las cifras más plausibles que había de utilizar en su labor. Las estimaciones de la FAO preparadas con arreglo a este criterio fueron publicadas por primera vez en la edición de 1966 del *Anuario de Producción*. En 1967, las Naciones Unidas efectuaron un análisis similar y empezaron a incluir sus estimaciones en sus publicaciones estadísticas. Estas estimaciones de las Naciones Unidas (indicadas por el símbolo « * ») han sido incluidas en el Cuadro 4 cuando resultaban comparables con las correspondientes estimaciones de la FAO. En los casos que presentaban discrepancias considerables o en que no se disponía todavía de estimaciones de las Naciones Unidas, se han conservado las estimaciones de la FAO (indicadas por una F). Esta cuestión la tienen actualmente en estudio las Naciones Unidas y los organismos espe-

cializados interesados a fin de establecer en el próximo futuro un conjunto uniforme de cifras de población que deban emplearse en todo el sistema de las Naciones Unidas.

Los países de una población mínima de 1 millón de habitantes en que las discrepancias entre las cifras correspondientes a 1950 y a 1965 publicadas por las Naciones Unidas y las estimaciones de la FAO consignadas en este *Anuario* rebasan el 2,5 por ciento son los siguientes:

País	Año	Cifra publicada por las Naciones Unidas	Estimación de la FAO [1]
		..... *Millares*	
Afganistán	1965	15 051	15 500
China continental	1950	560 000	547 000
	1965	700 000	764 000
Paquistán	1965	102 876	113 000
Arabia Saudita	1965	6 750	4 300
Somalia	1950	1 886	1 650
Siria	1965	5 200	5 600
Túnez	1950	3 621	3 500
Venezuela	1950	4 962	5 230
	1965	8 722	9 240
Yemen	1965	5 000	5 200

[1] Señalada con una F en el Cuadro 4.

En algunas zonas no se ha efectuado en fecha reciente ningún recuento demográfico completo y que resulte suficientemente fidedigno. Teniendo en cuenta esta circunstancia, las estimaciones de las proporciones de la población en varias zonas del mundo pueden considerarse hipotéticas.

Todos los datos se refieren, en general, a la población presente (*de facto*) en las zonas respectivas, dentro de las actuales fronteras geográficas. Cuando se ha dispuesto de datos suficientes sobre personas desplazadas, colectividades indígenas u otros grupos que normalmente se excluyen de los datos oficiales de un país, se ha procedido a ajustar las estimaciones para incluirlos.

Población agrícola y población económicamente activa en la agricultura

En el Cuadro 5 se consignan, para determinados países, datos sobre población agrícola y población económicamente activa (total y población dedicada a la agricultura) para 1965. Los datos se refieren a las fronteras nacionales de 1965. A efectos de comparación se consignan también en dicho cuadro los datos correspondientes a población total.

La *población agrícola* se define como todas las personas que dependen de la agricultura para su subsistencia. Comprende todas las personas activamente ocupadas en la agricultura y sus familiares a cargo que no trabajan. De conformidad con la sección O de la Clasificación Industrial Internacional Uniforme de Todas las Actividades Económicas, se entiende que la agricultura comprende los montes, la caza y la pesca.

En general, la *población económicamente activa* se define diciendo que comprende todas las personas dedicadas a una actividad económica, sea en calidad de patronos, trabajadores por cuenta propia, empleados asalariados o trabajadores no remunerados que colaboran en la explotación de una finca o empresa familiar. Análogamente, en la población económicamente activa en la agricultura van incluidas todas las personas económicamente activas que se dedican principalmente a la agricultura, los montes, la caza y la pesca. En general, esta definición, varía algo de un país a otro. Por ejemplo, en algunos, las estimaciones se basan en datos relativos a todas las personas que han declarado una ocupación, sin tener en cuenta si realmente se hallaban o no trabajando en el momento en que se realizó el censo o la encuesta; en otros se basan en datos relativos a personas realmente empleadas durante un breve espacio de tiempo determinado, exceptuándose los parados que buscaban trabajo. La comparabilidad de los datos también está limitada por el distinto tratamiento estadístico de los trabajadores familiares del productor no remunerados, sobre todo amas de casa, de un país a otro; además, algunos países informan sobre la actividad económica desplegada por personas de todas las edades; otros se limitan únicamente a las de una determinada edad, como, por ejemplo, de 14 años o más.

Los censos o encuestas nacionales contienen información sobre población económicamente activa referente a muchos países, y que publica la Oficina Internacional de Trabajo. A los efectos del presente cuadro, estos datos han sido prorrateados por la FAO con relación a 1965, siempre que ha sido necesario.

La información sobre población agrícola que contienen los censos y encuestas nacionales es escasísima. Existe, sin embargo, una estrecha relación entre la población agrícola y la económicamente activa en la agricultura, sobre la cual, como antes se indica, se dispone de datos relativos a muchos países. Análogamente, la población agrícola está relacionada con la población rural, sobre la cual se dispone de datos tomados de censos de población, y con la población de las explotaciones agrícolas, sobre la cual se posee información procedente de los censos agropecuarios. De estas relaciones se sirvió la FAO para estimar la población agrícola. Estas estimaciones de la FAO relativas al año 1965 fueron publicadas por primera vez en la edición de 1966 del *Anuario de Producción*. En la presente edición se han repetido salvo cuando se ha dispuesto de información más reciente sobre población económicamente activa o sobre población rural, caso en que se ha procedido a revisar las anteriores estimaciones.

En lo que respecta a varios países se cuenta ya con datos correspondientes a 1966, 1967 y 1968 sobre población económicamente activa en la agricultura. Figuran en el cuadro siguiente:

País	Año	Población total	Población económicamente activa		
			Total	En la agricultura	Porcentaje ocupado en la agricultura
		..... *Millares*			
Australia	1966	11 541	4 856	457	9

Población agrícola: estimaciones continentales y mundiales

En el Cuadro 6 figuran los totales continentales y mundiales de la población agrícola, según se define antes al hacer referencia al Cuadro 5, referentes a 1965, en unión de los correspondientes datos sobre población total.

NUMEROS INDICES DE LA FAO DE LA PRODUCCION AGRICOLA

A partir de la edición de 1966 del *Anuario*, para calcular los números índices se han empleado datos de producción consignados con arreglo al período de referencia basado en el año civil. Por tanto, la nueva serie de números índices refleja cambios registrados en la producción agrícola durante el año civil y no en el año emergente, como antes, así como revisiones hechas en los datos mismos. Los números índices de la producción de alimentos comprenden los siguientes grupos de productos:

CUADRO A. - LISTA DE COEFICIENTES REGIONALES Y MUNDIALES DE PONDERACION DE LOS PRODUCTOS INCLUIDOS EN LOS NUMEROS INDICES (FAO) DE LA PRODUCCION AGRICOLA

TODO EL MUNDO [2] (Europa Oriental y U.R.S.S.)	1,82	1,52	1,97	1,95	1,22	1,41

NOTA: Las cifras entre paréntesis ( ) representan coeficientes de ponderación regionales o mundiales que se emplean para los países en que no se dispone de datos sobre coeficientes de conversión. Un guión (—), indica que la producción es insignificante o que no se dispone de datos sobre producción.
[1] Tratándose de aves de corral y otras clases de carne, los coeficientes de conversión para los distintos países de una región son los mismos que el promedio de dicha región. – [2] Promedio ponderado correspondiente a las siete regiones. Se emplea también para Europa Oriental y la U.R.S.S.

cereales, raíces amiláceas, azúcar, legumbres, plantas oleaginosas comestibles, nueces, frutas, hortalizas, vino, cacao, ganados y productos pecuarios. Los números índices de la producción agrícola total comprenden todos los conceptos incluidos en la producción de alimentos y, además, té, café, semillas oleaginosas industriales, tabaco, fibras (vegetales y animales) y caucho. Los números índices ponen de manifiesto la cuantía relativa del volumen global de la producción agrícola que pasa a todos los sectores distintos de la agricultura para cada uno de los años de que se trata en comparación con el período base 1952-56 = 100. Con este fin se han deducido de la producción total los productos agrícolas que se emplean en el proceso de producción agrícola. Entre los conceptos deducidos figuran los alimentos para el ganado, es decir, los productos agrícolas suministrados a los animales en su forma original y los piensos semielaborados, como tortas oleaginosas y salvado. Además, hasta el punto en que se han podido establecer estimaciones adecuadas, se han deducido también los piensos importados, así como los productos destinados a simiente y a los desperdicios de producción.

Los números índices se calculan mediante una fórmula del tipo de la de Laspeyres aplicando como coeficientes de ponderación los precios medios regionales referidos al trigo. Los precios medios regionales de los distintos productos expresados en porcentajes del precio del trigo son la media aritmética de los precios nacionales referidos al trigo ponderados con arreglo a la producción nacional de los productos de que se trate. Los precios nacionales de los productos expresados en porcentaje del precio del trigo equivalen al precio que recibe el productor nacional de un determinado producto expresado también como porcentaje del precio correspondiente a una cantidad de trigo de igual peso. En la mayoría de los casos, los precios representan los promedios de los precios al productor del período 1952-56.

Los precios regionales, expresados en relación porcentual con el precio del trigo, que se utilizan como coeficientes de ponderación se consignan en el Cuadro A.

La producción de carne a efectos de números índices se refiere al peso en vivo, estimado aplicando coeficientes de conversión a las cifras sobre peso en canal que se consignan en el Cuadro 116 (Producción de los animales indígenas) y en el Cuadro 117 (Otras carnes) excepto en las series sobre países de los Estados Unidos y las series regionales correspondientes a América del Norte, en las que se emplea la estimación directa del peso en vivo de la producción pecuaria estadounidense, incluyendo los cambios ocurridos en las existencias. En la mayoría de los casos, estos coeficientes de conversión se obtienen a título de promedio

CUADRO C. - NUMEROS INDICES DE LA PRODUCCION AGRICOLA TOTAL CORRESPONDIENTES A PAISES EUROPEOS MIEMBROS DE LA OCDE CON PERIODO DE REFERENCIA BASADO EN EL AÑO EMERGENTE

le tales coeficientes para el período 1961-65, figurando en el Cuadro B.

Los números índices de la población por regiones y agrupaciones regionales se han calculado basándose en las estimaciones ajustadas de la FAO a mediados de año. Para el promedio 1948-52, se emplea la estimación correspondiente a mediados de 1950.

Hasta ahora, el cálculo de la FAO de los números índices de la producción agrícola correspondientes a países miembros de la OCDE estaba plenamente coordinada con el cálculo hecho por dicha organización. La OCDE ajustará su serie al período de referencia basado en el año civil cuando se revise el período base y la metodología seguida. Con fines de comparación se consigna en el Cuadro C la serie de números índices de la OCDE de países miembros europeos de dicha organización ajustados al período de referencia basado en el año emergente.

COSECHAS

Trigo y escanda

Los datos disponibles sobre la escanda se han incluido con los del trigo, excepto en el caso de la U.R.S.S., en que se incluyen en cereales diversos. Varios países han comunicado datos por separado sobre la escanda, en la forma siguiente:

PRODUCCION DE ESCANDA EN LOS PAISES QUE SE INDICAN

País	Superficie					Producción				
	1948/52	1952/56	1965	1966	1967	1948/52	1952/56	1965	1966	1967

U.R.S.S.	...	...	52	54	34	...	...	41	63	46

Granos mezclados

Las cifras se refieren a todas las mezclas de cereales que hayan sido comunicadas como « granos mezclados », inclusive las de cereales panificables, las de forrajeros panificables y forrajeros a la vez y, en algunas ocasiones, las de cereales y legumbres. La composición de estas mezclas varía de región a región y de un año a otro.

Prácticamente, los países escandinavos sólo producen mezclas de cereales forrajeros, mientras que en otros países del occidente de Europa las mezclas de cereales panificables tienen todavía cierta importancia. En años recientes se ha notado la tendencia a producir mezclas de cereales forrajeros, en vez de las de cereales panificables.

Mijo y sorgo

El mijo y el sorgo se cultivan en Europa y en América del Norte, principalmente para alimentación del ganado y las aves de corral, pero en Asia, Africa y la U.R.S.S. se emplean mucho como alimento humano.

Los datos sobre el mijo comprenden las cinco variedades de mayor interés alimentario: mijo espadiforme (*Pennisetum glaucum*) o mijo perla, que en la India se conoce con el nombre de « bajra »; mijo dactiliforme (*Eleusine coracana*) o « ragi » de la India; mijo panificable, o mijo poroso (*Panicum miliaceum*); mijo menor (*Setaria italica*), conocido también por mijo carricero o mijo italiano; y el mijo « barnyard » (*Echinochloa crusgalli*), llamado también mijo japonés.

El sorgo (*Sorghum vulgare*) abarca muchas variedades como, por ejemplo, las de kaffir o kaffircorn, milo, feterita, durra y sorgo dulce. Los datos correspondientes a China se refieren al grupo de sorgos llamados « kaoliang » y los de la India, al grupo denominado « jowar ». Por lo que se refiere a la Argentina, las cifras publicadas hasta la edición de 1960 de este Anuario se referían a una sola clase de sorgo, el del Sudán. Desde entonces las series publicadas comprenden las cuatro clases de sorgos que se producen en el país: (*a*) sorgo granífero (Kafir); (*b*) sorgo del Sudán; (*c*) sorgo azucarado; y (*d*) sorgo garaví (negro) (maíz de Guinea).

Siempre que ha sido posible se dan por separado las estadísticas del mijo y del sorgo, pero como muchos países, en particular los de Africa, no hacen distinciones sobre estos dos granos en sus informes, se ofrecen, en tales casos, las cifras conjuntas. Los totales continentales y mundiales para el mijo, el sorgo y la producción no especificada de ambos, se dan por separado.

Las estadísticas correspondientes a Europa y América representan la cosecha total. Las de los países de Africa y Asia, en cambio, son incompletas, ya que gran parte de la producción no llega a conocimiento de los servicios de información estadística. Se carece en absoluto de datos sobre algunos países y no se han hecho estimaciones acerca de ellos.

Caña de azúcar y remolacha azucarera

Los datos sobre superficie y producción de caña de azúcar y remolacha azucarera comprenden en general todas las cosechas recolectadas, excepto las levantadas expresamente para piensos. La mayor parte de la producción se destina a la fabricación de azúcar centrifugada y no centrifugada; sin embargo, en varios países se emplean importantes cantidades de caña de azúcar para semilla, piensos, consumo en fresco, fabricación de alcohol y otros usos y, en el caso de la remolacha azucarera, para piensos y fabricación de alcohol.

Azúcar centrifugada

El azúcar de remolacha y de caña obtenido por centrifugación se ha expresado, en lo posible, en su equivalente en azúcar sin refinar. Tratándose de cifras comunicadas por los países en términos de azúcar refinada, la conversión a azúcar sin refinar se ha hecho generalmente a razón de 92 partes refinadas por 100 sin refinar. Cuando no se ha especificado la clase de azúcar, se anotan las cifras en términos de *tel quel*, o sea, el peso real de todo el azúcar centrífuga fabricada. Salvo indicación en contrario, se han excluido melazas y jarabes. Los azúcares de baja calidad producidos en la América Central y del Sur y en el Lejano Oriente se incluyen en el cuadro en algunos casos bajo la denominación local de « panela » o « gur », por ejemplo. El total de toda esta producción se anota como azúcar no centrifugada.

Batatas (camotes) y ñame

Aunque la batata y el ñame, raíces cuyo cultivo es importante en los países tropicales y subtropicales, no pertenecen a la misma familia botánica, los datos recibidos se refieren con frecuencia a las dos especies juntas. No se tienen datos sobre la producción de muchos países y aunque de otros se han recibido informes, la presentación de éstos adolece de imperfecciones por la dificultad de recoger datos estadísticos de las cosechas levantadas en muchas pequeñas parcelas para el consumo local.

Yuca (mandioca)

La yuca, planta del género manihot, es de dos tipos principales, el amargo (*Manihot utilissima*) y el dulce (*Manihot apí*).

Salvo que se especifique lo contrario, se trató de que los datos correspondieran al producto fresco, pero las grandes variaciones de los rendimientos por hectárea parecen indicar que, posiblemente, algunas de las cifras de producción se refieren al peso del producto seco (un 40 por ciento del peso en fresco) o al de la tapioca (un 20 por ciento). Por lo general, se cree que, al tratarse del producto fresco, los rendimientos de la yuca dulce oscilan entre 7 y 10 toneladas métricas por hectárea y los de la yuca amarga entre 13 y 18.

Los datos de varios países cuya producción de yuca reviste gran importancia local no han podido insertarse en el cuadro respectivo por falta de estadísticas sobre este producto. En cambio, tratándose de varios países que figuran en el cuadro, los datos de producción parecen referirse a la producción potencial más que a la cosechada. A pesar de que los datos adolecen de insuficiente alcance y de cierta falta de uniformidad, se cree que los totales continentales, regionales y mundiales dan una indicación válida de los cambios que ocurren de un año a otro en la magnitud de la cosecha.

Cebollas y tomates

Por lo general, los datos de los países enumerados no se refieren más que a la producción de campo y huertas comerciales. La mayoría de los países que figuran en los cuadros son los grandes importadores, o exportadores, de cebollas y tomates. Los totales continentales y regionales, a pesar de circunscribirse al limitado número de los países enumerados, se cree que ofrecen, sin embargo, una indicación fidedigna de ambas cosechas, en la medida en que éstas dejan sentir su influjo en la situación del comercio internacional.

En el cuadro correspondiente a las cebollas, se han atribuido los datos a las cebollas frescas o a las secas o a ambas conjuntamente, siempre que tal pormenor o clasificación era conocido.

Coles, coliflores, fríjoles y guisantes recolectados en verde, pepinos y pepinillos, cantalupos y otros melones y sandías

Coles. Las principales variedades de coles comprendidas en el cuadro son: rojas (lombarda), blancas y berzas de Saboya; col de la China; coles de Bruselas, col rizada y brécol romano o de brotes.

Coliflores. Siempre que es posible se incluye también en las cifras el brécol de cogollo.

Fríjoles y guisantes recolectados en verde. Los datos se refieren a los fríjoles (solamente especies de *Phaseolus* y *Dolichos*) y guisantes (*Pisum sativum* y *P. arvense*), ambos recolectados en verde. Siempre que ha sido posible se ha hecho la distinción entre los fríjoles para comer en verde es decir los fríjoles con vainas comestibles y los fríjoles para desgranar, es decir, los fríjoles con vainas no comestibles. Los fríjoles se clasifican en una u otra categoría según su variedad o el grado de madurez a que se recogen.

No se dispone de estadísticas para un gran número de países correspondientes a las hortalizas anteriores; en consecuencia, no se calculan los totales continentales y mundiales, salvo para Europa. Asimismo, los datos comunicados no tienen el mismo alcance estadístico en todos los países. En general parece ser que las estimaciones se refieren a los cultivos obtenidos en campos y huertas principalmente para la venta, excluyéndose por tanto los cultivados en pequeños huertos familiares principalmente para el consumo doméstico.

Legumbres

Estos cuadros se elaboraron agrupando las variedades del siguiente modo:

Fríjoles secos (*Phaseolus vulgaris, P. lunatus, P. aureus, P. radiatus, P. mungo* y *P. angularis*)
Guisantes secos (*Pisum sativum* y *P. arvense*)
Habas secas (*Vicia faba*)
Garbanzos (*Cicer arietinum*)
Lentejas (*Lens esculenta* o *Ervum lens*)
Guandúes (*Cajanus* spp.)
Caupíes (*Vigna sinensis*)
Vezas (*Vicia sativa*)
Altramuces (*Lupinus* spp.)
Otras legumbres (*Dolichos* spp., *Lathyrus* spp., *Voandzeia subterranea, Trigonella fœnum græcum*, etc.)

Las cifras se refieren a la producción total de los cultivos cosechados para grano seco, bien se destine a alimentación humana o a forrajes.

Cuando se sabe que en una superficie destinada a leguminosas se cultivan también otros productos, se ha indicado así en el cuadro. Los totales continentales, regionales y mundiales, comprenden esas superficies en toda su extensión, con lo cual las cifras dadas para la superficie cultivada de legumbres son algo exageradas, y resultan subestimados los rendimientos calculados a base del área total.

Manzanas, peras, ciruelas, cerezas, melocotones y albaricoques

Los datos se refieren a la producción total en fresco de las frutas destinadas tanto al consumo directo como a la elaboración industrial. Siempre que ha sido posible se consignan datos separados sobre fruta de mesa y fruta para elaboración. Análogamente se consignan datos por separado, en la medida de lo posible, sobre cerezas y cerezas amargas, así como sobre melocotones y nectarinas.

Fresas, frambuesas y otras bayas

En general, los datos se refieren a la producción comercial de bayas cultivadas para el consumo directo, usos industriales u otros fines. Cuando se incluye en las estadísticas de algunos países, la producción de bayas silvestres se refiere a la destinada principalmente a fines comerciales. Aunque los datos sobre estos cultivos pueden ser incompletos o no se dispone de ellos en el caso de algunos países, se cree que los totales continentales, regionales y mundiales que sólo comprendan los países relacionados, constituyen un indicio bastante aproximado de los cambios experimentados de un año a otro por la tendencia de la producción comercial de tales cultivos.

Uva y producción vinícola

Producción total de uvas: En los casos en que la cantidad de uvas para la vinicultura fue estimada a base del vino obtenido (véase a continuación), se calculó la producción total de uvas tomando la cantidad de uvas de mesa y, cuando correspondía, la de uvas para pasas, y sumándolas a la estimación de uvas prensadas para hacer vino.

Uva mosto y producción vinícola: Casi todos los grandes países vinícolas calculan la producción de vino a base de la cantidad de uvas prensadas durante la vendimia; por tanto, sus datos corresponden a la cantidad de « uva mosto » del mismo año agrícola y representan la producción total de las prensas

ndependientemente de que el producto se haya consumido como ino o vinagre, o bien, de que se haya dedicado a la destilación.

Desgraciadamente, no ha sido posible obtener estadísticas obre esa base para todos los países y se han llenado los vacíos mpleando datos sobre recaudaciones tributarias o estimaciones omerciales. En esos casos y en aquellos otros en que sólo se lisponía de estadísticas de producción para uvas fruta y mosto a cantidad de las prensadas para la vinicultura se estimó a base le la producción de este artículo.

Por tanto, las estadísticas de producción de vino y de uvas nosto no son del todo comparables entre los distintos países.

Pasas

Las cifras se refieren, por lo común, a la producción total de uvas secas, incluidas las pasas corrientes, pasas de Corinto y ultanas, ya se hayan utilizado para el consumo directo o dedi-ado a la destilación.

Frutos cítricos

En muchos casos los datos expresan tan sólo la producción endida al comercio.

Las clementinas, que en este Anuario aparecen junto con las aranjas y las mandarinas, son una especie de fruta cítrica que, or lo general, sólo se cultiva en el norte de Africa.

La producción de frutas cítricas se da a conocer de muchas maneras: por peso, volumen, número de unidades y clases de mbalajes. Por esta razón ha sido necesario en muchos casos acer conversiones a peso neto, sin contar a menudo para ello on coeficientes oficiales.

Dátiles

En la medida de lo posible, este cuadro comprende la produc-ión total de dátiles en la forma en que se cosechan, ya se hayan estinado al consumo humano, a forrajes o a usos industriales. Debe tenerse en cuenta, sin embargo, que muchas de las cifras o son sino estimaciones basadas en las cantidades que fueron bjeto de transacciones comerciales.

Higos

Los datos se refieren a la producción total de higos frescos secos, lo mismo para el consumo humano que para usos indus-riales. En algunos casos, sin embargo, no fue posible obtener latos completos; las cifras representan únicamente la producción omercial de frutas secas convertida a su equivalente en fruta resca utilizando la relación 1 : 3.

Bananos

Las cifras se refieren, en lo posible, a las especies de frutas omestibles del género *Musa*, exceptuando la especie *Musa paradisiaca*, comúnmente conocida con el nombre de plátano.

Por desgracia hay varios países que no establecen distinción lguna en sus estadísticas entre los bananos y los plátanos y ólo publican estimaciones globales que comprenden ambos ultivos. En tales casos, cuando existe algún indicio o razón ara suponer que los datos consignados se refieren principal-nente a bananos, tales datos se incluyen en el cuadro. Debe otarse que ninguno de los países excluidos del cuadro son expor-adores de consideración.

Los datos de producción que aparecen en el cuadro no abarcan l mismo campo en todos los países. La mayoría de los datos ólo comprenden la producción comercial, y en algunos casos e han utilizado las cifras de exportación por carecerse de datos obre producción. La comparabilidad de los datos de producción e bananos que indican los distintos países resulta también ifícil por el hecho de que algunos países refieran los datos racimos, lo que generalmente suele significar que el tallo va ncluido en el peso. Los países que indican la producción de ananos en racimos, lo mismo los coeficientes de conversión empleados por la FAO en los últimos cinco años, se relacionan en este volumen en la sección titulada Pesos, medidas y coeficientes de conversión.

Con gran frecuencia no se dispone de estadísticas sobre superficie de cultivo de bananos y la exactitud de éstas suele distar mucho de ser satisfactoria. En muchos países, la superficie de rodales puros sólo representa una pequeña parte de la superficie total de bananos que se cultivan principalmente intercalados con cultivos arbóreos y otros.

Por las anteriores razones, los rendimientos por hectárea que se indican en el cuadro sobre bananos deben utilizarse con cautela.

Piñas

No se dispone de las cifras de varios países, cuya producción, sin embargo, no influye de ninguna manera perceptible en el comercio internacional. Por consiguiente, los totales que figuran en este cuadro sólo reflejan la importancia del volumen de la producción de las diversas regiones y las tendencias de la producción total, en la medida en que éstas influyen en el comercio internacional.

Total de hortalizas, frutas y nueces

Los totales regionales y mundiales que figuran en el cuadro siguiente comprenden datos que aparecen en los distintos cuadros del presente Anuario sobre cebollas, tomates, coles, coliflores, fríjoles verdes, guisantes verdes, pepinos, cantalupos y otros melones, sandías, manzanas, peras, ciruelas, cerezas, melocotones, albaricoques, fresas, frambuesas y otras bayas, total de uvas, frutos cítricos, dátiles, higos, bananos, piñas y aceitunas de mesa, así como estimaciones oficiales y extraoficiales sobre otras clases de hortalizas y frutas. Los datos de producción sobre plátanos se incluyen también en el total de frutas. El total de nueces comprende la producción de almendras, nueces, avellanas, nueces de acajú, nueces de betel, castañas, nueces de pistacho y nueces de pili. No se incluye la producción de cocos, nueces de tung y otras nueces de palma destinadas principalmente a la producción de aceite.

En la mayoría de los países, las estadísticas sobre hortalizas, frutas y nueces son muy escasas. Incluso en aquéllos en que se dispone de estadísticas, éstas sólo se refieren a una parte de la producción; por tanto, las cifras pueden referirse a los cultivos de plantación y a los de huertas comerciales destinados principalmente a la venta. Por lo general, no suelen acopiarse datos sobre la producción de huertas privadas o caseras destinadas principalmente al consumo doméstico. Las cifras de este cuadro, sobre todo en lo que respecta a regiones distintas de Europa y América del Norte, no deben considerarse tan completas como en el caso de otros cultivos.

Semillas, almendras y nueces oleaginosas

Almendras de palma. Se ha considerado en general que la producción comercializada de este artículo es igual a la producción total. Siempre que faltaron datos de producción o de comercialización, se calculó la primera mediante aproximaciones, haciéndola equivalente a las exportaciones de almendras y su aceite, en la inteligencia de que, prácticamente, toda la producción se destinaba a la exportación.

Aceite de palma. Los datos correspondientes a la América Latina y a los países asiáticos se consideran representativos de la producción total. En lo referente a algunos países africanos, donde existe una importante producción de subsistencia, los datos totales fueron estimados sea teniendo en cuenta los datos disponibles sobre el consumo local, sea a base de la producción conocida de almendras de palma y de una estimación respecto a la proporción entre el contenido de almendras y el de aceite en la fruta de estas regiones. Tal proporción varía generalmente, según los países, entre 5-7 :10. También se ha supuesto que la extracción del aceite de palma en estos países se realiza en su mayor parte según los métodos indígenas, lo que sólo permite

[1] Excepto sandías, melones, calabazas comunes y amarillas. – [2] Excepto China continental. – [3] Incluso China continental. – [4] Comprende nueces.

obtener del 45 al 55 por ciento del contenido total de aceite. Sin embargo, tratándose de un reducido número de países, como Nigeria, se ha tenido en cuenta el hecho de que una parte del aceite se obtiene mediante prensas de husillo manuales (cuyo coeficiente de extracción es del 65 por ciento) y otra parte por medio de prensas hidráulicas (coeficiente de extracción 85-90 por ciento).

Semillas de algodón. Comunican cifras directas de producción países a los que corresponde alrededor del 70 por ciento de la cosecha mundial de semillas de algodón. Las cifras correspondientes al resto de los países cultivadores se han calculado a base de la producción de algodón desmotado, usando coeficientes que varían entre 1,6 y 2,2 toneladas de semilla por tonelada de fibras, los cuales se han determinado en años anteriores en el mismo país o en otros de condiciones similares. Cuando no se conocía la relación entre semilla y fibra, se tomó el peso de aquélla como el doble del de ésta.

Nueces y aceite de tung. El aceite de tung se extrae de las nueces de dos especies del tung o árbol del aceite, *Aleurites fordii* y *Aleurites montana* y proviene principalmente de China. Sólo se dispone de estimaciones extraoficiales sobre la producción de China continental.

Cocos. En muchos países, se carece de estadísticas de producción del coco. En varios casos, sólo se dispone de cifras nacionales expresadas en copra producida o exportada. Tales datos se han reajustado a fin de comprender las estimaciones del consumo local y se han convertido a cocos utilizando los oportunos coeficientes de conversión. Todas estas cifras van marcadas con un asterisco. Para obtener los totales continentales y mundiales, se ha dejado también margen para comprender la producción

PRODUCCION DE SEMILLA DE ADORMIDERA EN LOS PAISES QUE SE INDICAN

Turquía	319	431	223	240	206	159	220	110	120	70

de otros países basada en indicaciones aproximadas de superficie de cultivo, número de cocoteros, etc.

Copra. Los datos sobre producción incluyen solamente las cantidades comercializadas sin tener en cuenta las destinadas a la elaboración de aceite por métodos primitivos. Cuando sólo se disponía de datos sobre exportaciones, el consumo interno se estimó a base de la producción de aceite y del consumo de los fabricantes de jabón, etc.

Semilla de adormidera. En el cuadro que figura a continuación se dan datos estadísticos sobre semilla de adormidera (*Papaver somniferum*), de las que sólo se dispone para la mayoría de los países productores europeos y Turquía. Faltan datos sobre los países productores del Cercano y el Lejano Oriente, la U.R.S.S. y China continental. Las semillas se emplean como condimento o se transforman en aceite que se utiliza para usos culinarios. Tanto las semillas como el aceite se aprovechan también en la industria.

Café y cacao

Las cifras de producción relativas al cacao se refieren al cacao en grano verde. Los datos que se refieren a unos cuantos países que informan respecto a las almendras o al café en pergamino han sido convertidos a café limpio aplicando los oportunos coeficientes de conversión.

Para el cacao, los datos de producción se refieren al cacao en grano fermentado y seco.

Sólo en el caso de ciertos países se dispone de estadísticas de superficie de café y cacao, y no siempre son fidedignas. No se han establecido estimaciones sobre países que no informan y no se han calculado los rendimientos por hectárea.

Té

Salvo indicación en contrario, las cifras de producción se refieren a té elaborado. Como los datos sobre superficie no siempre son exactos, y varios países sólo informan acerca de la superficie plantada, no se han calculado los rendimientos por hectárea.

Tabaco

Las cifras de producción se refieren, hasta donde ha sido posible determinarlo, al peso de venta en granja. Los datos disponibles calculados en peso en seco se han convertido, por tanto, en peso de venta en granja, a razón de unas 90 partes por 100.

Algodón (fibra)

El cuadro sobre fibra de algodón se ha preparado en cooperación con el Comité Consultivo Internacional del Algodón. Las cifras dadas para la producción de la mayoría de los países son las que éstos han comunicado oficialmente como correspondientes a la fibra y no incluyen la borra. En los casos en que las cifras comunicadas se referían al algodón sin desmotar, y cuando se ignoraba el factor específico de conversión correspondiente al algodón desmotado, el equivalente en fibra se calculó en un tercio. En el caso del Brasil, la India y el Paquistán, se indican los datos sobre cosechas publicados en las estadísticas oficiales brasileñas, indias y paquistaníes a fin de que concuerden con las series correspondientes a los otros cultivos de esos países; pero para computar los totales continentales, regionales y mundiales se ha recurrido a los datos del Comité Consultivo Internacional del Algodón que proceden de fuentes comerciales y que, en general, se consideran más aproximados a la realidad.

Lino y linaza

El lino se cosecha en muchos países para aprovechar la fibra y la semilla. La producción de ciertas variedades está constituida principalmente por fibras, y la de otras, por semillas. Algunos tipos se cultivan exclusivamente para la obtención de semillas.

La mayor parte de los países no dan a conocer la superficie sembrada con cada variedad, sino que comunican la extensión total bajo cultivo y la respectiva producción de fibras y de semillas. Los países que comunican por separado las estadísticas de la superficie destinada respectivamente a fibras y semillas, van indicados en los cuadros con una nota al pie.

En los países que comunican por separado las superficies destinadas a la producción de semillas y a la de fibras, los rendimientos expresan los cambios reales en el movimiento de la producción. Cuando no se da más que una sola cifra para la superficie total cultivada de lino, los rendimientos sirven también para indicar las modificaciones que ocurren en la composición de la producción.

Caucho natural

El Grupo Internacional de Estudios sobre el Caucho, entidad que suministró la mayor parte de la información presentada en este cuadro, indica que las cifras dadas para el caucho natural se refieren al peso en seco del contenido de látex, pero no incluyen el de la balata, gutapercha y demás gomas análogas, ni tampoco el de los desperdicios. Estos últimos se consideran como productos diferentes y, por lo general, se utilizan en forma distinta que el caucho natural.

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS

Número de cabezas

Para facilitar la tabulación internacional, el número de cabezas de ganado se ha agrupado en períodos de 12 meses que terminan el 30 de septiembre del año indicado, con objeto de reducir al mínimo las diferencias que al efectuar los recuentos o cálculos pudieran atribuirse al tiempo que transcurre entre ellos, y a que tales recuentos se realizan en el segundo semestre o a finales del año civil, en la mayoría de los países.

Como parte del Censo Agropecuario Mundial de 1960 muchos países han llevado a cabo también un censo de la población ganadera, y de varios de aquéllos están llegando recientemente los resultados preliminares. Entre las cifras correspondientes a la población pecuaria que figuran en este Anuario y las publicadas en los informes sobre el Censo, quizás se observen ciertas discrepancias. Ello se debe a diferencias en la cobertura estadística. En algunos países, a los fines del censo agropecuario, no se incluye en el cómputo el ganado mantenido fuera de las explotaciones agrícolas o en explotaciones de un tamaño inferior a un cierto límite, así como tampoco los animales nómadas.

En las comparaciones entre un año y otro deben tenerse en cuenta las reservas expresadas en notas al pie sobre el alcance estadístico en las que se especifica el número de cabezas de ganado « en las granjas », « en las aldeas », « animales registrados con fines fiscales », etc. La información estadística sobre *aves de corral* no se considera todavía suficiente para justificar la inserción de totales que reflejen los verdaderos cambios que ocurren de un año para otro.

Los *caballos*, *mulas* y *asnos* se han reunido en un solo cuadro. Este agrupamiento facilita la comparación e indica la distribución proporcional de los équidos dentro de cada país.

Bovinos: Vacas. En este cuadro se dan las dos series siguientes:

a) Vacas y novillas de 2 años o más.

b) Vacas y novillas utilizadas primordialmente para la producción de leche.

La primera serie abarca todas las vacas y novillas de 2 años o más utilizadas para la reproducción, así como las

destinadas a la producción de leche y de carne y los animales de tiro.

Dentro del alcance de la clasificación anterior pueden existir grandes variaciones entre los distintos países que comunican los datos; la línea divisoria entre las vacas criadas primordialmente para la producción de leche y las destinadas a la producción de leche y al trabajo, por ejemplo, es bastante indefinida. Por tal razón no se ha intentado calcular los totales continentales, regionales y mundiales.

Cuando es necesario, se insertan notas al pie para explicar las variaciones registradas.

Unidades ganaderas. Varios países han estimado conveniente expresar el número de cabezas que corresponde a los diversos tipos de ganado por medio de un denominador común, y para ello han recurrido al cálculo de unidades ganaderas.

Los datos sobre las unidades ganaderas que corresponden a cada país se calcularon, por lo general, a base de factores de conversión derivados del conocimiento empírico sobre el peso medio de los animales vivos y o la cantidad o calidad del consumo medio de forrajes.

Los factores de conversión aplicables a regiones y continentes enteros, sin embargo, se basan incluso en conocimientos menos fidedignos; por lo que tienen necesariamente que referirse a un promedio uniforme teórico, al que se supone válido para el mundo entero, pero sin tener en cuenta las variaciones de peso y de consumo forrajero de una misma especie ganadera en los diversos continentes o regiones. Con tales fundamentos, estas computaciones son, por tanto, de carácter más provisional que las relativas a los distintos países.

Con esta reserva, se dan a continuación las estimaciones sobre unidades ganaderas:

UNIDADES GANADERAS [1]

Ganado vacuno, búfalos, equinos, camellos, cerdos, ovejas y cabras

Productos de origen animal

Carne: De vaca, ternera, cerdo, carnero y cordero. Esta sección contiene dos cuadros, los cuales expresan dos conceptos distintos de la producción.

El Cuadro 115 se refiere a la producción de carne procedente de animales sacrificados dentro del país, independientemente de su origen. En varios casos, los datos de los distintos países son idénticos a los del Cuadro 116 debido a que el comercio de animales vivos no tuvo importancia. El cuadro comprende también unos cuantos países que no figuran en el Cuadro 116 porque no se pudo comprobar la producción de carne de los animales indígenas de otros países o porque su volumen era inferior a la unidad mínima de 500 toneladas métricas.

El Cuadro 116 se refiere a la producción de carne proveniente de animales indígenas (es decir, incluido el equivalente en carne de los animales exportados en pie, y excluido el equivalente en carne de los animales vivos importados). Los totales continentales, regionales y mundiales que figuran en este cuadro son estimaciones de la producción total así definida. Los cálculos correspondientes a los países que no comunican datos y los de aquellos otros cuyas estadísticas de carne son, según se sabe, de alcance incompleto, se fundaron, en lo posible, en ciertos datos correlativos como, por ejemplo, número de cabezas de ganado, matanzas, peso medio en pie o en canal y comercio de animales vivos. En algunos casos, se pudieron obtener datos de un año determinado solamente y se los utilizó como base para estimar los de otros años. En otros casos, los datos referentes a la producción comercial o la sujeta a inspección se ampliaron para que abarcasen la totalidad de la producción, tomando como referencia la relación cuantitativa, comunicada o supuesta, entre la producción declarada y la no declarada. No se tomaron en consideración aquellos cambios cuantitativos de la carne « en pie » que correspondían a la diferencia entre el peso total en vivo de los animales jóvenes y los engordados y a las variaciones entre el número de cabezas de ganado al principio y a fin del año.

Otras carnes. En este cuadro se indican los datos relativos a las carnes de caballo, aves de corral y otros animales, tales como conejos, camellos, renos, caza, etc., etc.

Las cifras de la carne de caballo se refieren al peso en canal mientras que las correspondientes a la carne de aves de corral corresponden al peso limpio, por lo general. Tanto para los conceptos anteriores como para la carne de otros animales, la amplitud de los datos varía grandemente de un país a otro; por consiguiente, estos datos sólo pueden servir para poner de manifiesto los cambios registrados dentro de cada país durante el período respectivo.

Los datos referentes a los despojos sólo abarcan, por lo general, las cantidades de despojos comestibles obtenidas de las matanzas.

Matanzas y peso en canal. El peso medio en canal equivale al peso de la canal después de retirar las entrañas comestibles y las grasas de matadero. Para muchos países, los datos insertados corresponden a cifras inferiores al total de sacrificios, tanto en lo referente a número de cabezas como a peso medio en canal, según se hace constar debajo del nombre del país o en las notas de los cuadros. En tales casos, las cifras que se dan para el peso no deberán considerarse como representativas de todas las matanzas efectuadas dentro del país en cuestión. Con frecuencia, el peso en canal de los animales sacrificados en las granjas es muy diferente del que rinden los de abasto comercial. Además, no es seguro que todos los países indicados se atengan a la definición correspondiente, a pesar de que los datos ofrecidos se han ajustado con los de producción de carne que aparecen en el Cuadro 115. No se ha hecho intento alguno de colmar las lagunas que presenta este cuadro con estimaciones de la FAO a causa de dificultades para determinar con precisión el número de animales sacrificados y el correspondiente peso medio en canal.

Peso medio en vivo de los animales sacrificados. Idealmente, el peso medio en vivo debe referirse a toda la población pecuaria de un determinado país. Como en la mayoría de los países los animales sólo se pesan cuando se llevan al matadero, los datos sobre peso vivo de que se dispone no pueden por menos de limitarse a las reses destinadas al sacrificio. Además, los datos que se publican en este cuadro se refieren a los animales sacrificados dentro de las fronteras nacionales, independientemente de su origen. Por lo tanto, los datos sobre peso medio en vivo relativos a países en que se importa gran número de animales destinados al sacrificio no son representativos de la población ganadera indígena.

El estado y fase del pesado de los animales (v. gr., inmediatamente antes de ser sacrificados, después de permanecer en el matadero sin ser alimentados ni abrevados durante un cierto período, etc.) se desconocen por lo que respecta a la mayoría de los países.

Grasas animales. Estos cuadros contienen los datos disponibles sobre la producción de grasas de cerdo comestibles y la de sebo y grasas de cerdo no comestibles. Salvo que se indique lo contrario, los datos se refieren a la producción total de grasa en mataderos y granjas. Por lo común, tales datos se refieren a las partidas que entran en el comercio, después de que se han destazado las reses en el matadero. En general se excluyen, pues, las cantidades que corresponden a las reses descuartizadas en las carnicerías. Los métodos del destazado varían de unos países a otros, por lo que al hacer comparaciones entre ellos, ha de tenerse presente la posible influencia de esas variaciones en el coeficiente de extracción de grasa.

Grasas de cerdo comestibles. Las cantidades figuran tal como fueron comunicadas. Se considera que la grasa sin derretir contiene un 80 por ciento de grasa pura. Es posible que no se incluyan algunas cantidades, puesto que varios países no clasifican separadamente el tocino y la grasa sin derretir.

Sebo y grasas de cerdo no comestibles. Los datos incluyen la producción del sebo comestible y del no comestible. Se desconoce el contenido real de grasa de estos productos en las cantidades comunicadas.

Leche, mantequilla y queso. Siempre que fue posible se trató de presentar la producción total de cada país para cada producto. Sin embargo, en el caso de algunos países sólo se pudieron obtener datos para una parte de la producción total, generalmente la porción o parte de la porción que entró en el comercio (leche) o que fue elaborada en fábricas (mantequilla y queso). Los cuadros indican el alcance que se ha aplicado a cada serie. De muchos países no se recibió información adecuada.

Para la mantequilla y el queso, en la mayoría de los casos sólo pueden hacerse comparaciones entre los datos de un mismo país. Los cotejos entre países deben formularse con cautela y teniendo siempre en cuenta las definiciones que se han usado en cada ocasión. Por esta causa y por las considerables lagunas que existen en los datos, no se han podido estimar los totales continentales, regionales ni los mundiales.

Es aconsejable formular las mismas reservas en el caso de la leche; sin embargo, el disponer de más información estadística ha permitido estimar la producción por países cuando no se disponía de datos oficiales para un determinado año y estimar los totales continentales regionales y mundiales. Estos totales son solamente aproximativos pero se cree que dan una indicación válida de las relaciones entre los varios continentes y regiones, así como de los cambios anuales.

Producción de leche. En este cuadro se considera como rendimiento en leche el promedio de la producción total de este artículo por vaca lechera, omitiendo la cantidad mamada por el ternero, pero incluyendo la que se usó para alimentar a animales jóvenes. La comparabilidad de los datos sobre producción de leche en los diferentes países está sujeta a limitaciones que, en los casos en que tal producción se determina indirectamente, dimanan de la diversidad de los métodos empleados para calcular la cantidad de leche producida, y en los que aquélla se establece por medio de pruebas de rendimiento real, provienen de la variedad de los procedimientos de muestreo. Además, la definición de « vaca lechera » está muy lejos de ser uniforme, y los datos sobre producción y rendimiento omiten algunas veces la leche empleada en la alimentación de los animales jóvenes.

Huevos. El hecho de que pocos países del mundo poseen granjas avícolas comerciales en gran número y que la mayoría de ellos dependen, para su abastecimiento de huevos, de pequeños y muy dispersos corrales de propiedad individual, constituye una de las principales dificultades con que han tropezado los gobiernos para calcular la producción total de huevos. Para casi todos los países se dispone de estadísticas de la producción huevera referente, por lo menos, a uno de los años estudiados, lo cual ha servido de base para estimar la producción de los demás años. No obstante, algunos no cuentan con ninguna clase de estadísticas sobre tal producción, de manera que los cálculos han tenido que fundarse en ciertos datos indirectos como, por ejemplo, número de pollos o número total de aves de corral y cuantía declarada o hipotética de la puesta de huevos.

La mayoría de los países que poseen una estadística organizada suministran datos sobre el número o sobre el peso total de los huevos producidos. La FAO da, en todo caso, los datos de producción huevera en millones de huevos y en millones de toneladas métricas. Siempre que ha sido posible se utilizaron para ello los factores oficiales de conversión. Para otros países, tales coeficientes se tomaron de fuentes extraoficiales o se calcularon a base de los factores conocidos de los países vecinos.

Los datos se refieren generalmente a la producción total, incluidos los huevos destinados a la incubación, tanto en los sectores agrícolas como no agrícolas.

Colmenas y miel. Los datos que figuran en el cuadro son todavía incompletos, esperándose que la información sea más completa en futuras ediciones a fin de que sea posible proceder a la compilación de totales estimados por continentes, regiones y totales mundiales.

Capullos (frescos) y seda en bruto. Aunque la información de que se dispone sobre capullos (frescos) y seda en bruto es muy escasa, los datos sobre los países relacionados representan, no obstante, casi toda la producción mundial

Lana. En las estadísticas de producción las cifras representan, por lo general, el equivalente en lana grasienta. Esta, sin embargo, contiene de un 40 a un 65 por ciento de impurezas. Con el fin de lograr la comparabilidad de los datos se incluyen también las cifras del equivalente en lana limpia.

Se han refundido las cantidades de la lana producida en el hemisferio septentrional, principalmente, en la primavera del año indicado, con las producidas en el hemisferio meridional durante el otoño.

Cueros y pieles. Los datos figuran tal como los comunicaron los gobiernos. Por carecerse de pormenores suficientes no se ha intentado ni convertir el peso en número, o viceversa, ni convertir las cifras correspondientes a pieles secas y saladas al equivalente en fresco. Los detalles respectivos, tal como se conocen, parecen indicar que el peso en seco oscila entre un tercio y la mitad, aproximadamente, del peso en fresco.

La comparabilidad de los pesos de los distintos cueros y pieles entre los varios países está sujeta a ciertas limitaciones, que dimanan de las diferencias entre las especies, razas, edad en el momento del sacrificio y forma de desuello.

Para la mayoría de los países informantes se carece de datos sobre el alcance estadístico de las cifras comunicadas, pero puede darse por supuesto que, en casi todos ellos, éstas se refieren únicamente a la producción de los animales sacrificados para el comercio.

Dado lo incompleto de la estadística, no hubo posibilidad de calcular totales continentales o mundiales. A fin de colmar las lagunas por lo que respecta a los países sobre los cuales no se dispone de datos oficiales, se consignan estimaciones de la FAO basadas, en general, en el número de animales sacrificados.

PROVISION DE COMESTIBLES

Los Cuadros 135-138 de esta sección del Anuario presentan datos sobre el consumo por persona de los principales grupos de productos alimenticios expresados en peso, calorías, proteínas y contenido de grasa. Los datos se han obtenido de las hojas nacionales de balance de alimentos preparadas por los gobiernos en colaboración con la FAO y, en el caso de los países europeos miembros de la OCDE, colaborando con dicho organismo. La FAO publica regularmente hojas completas de balance de alimentos de un promedio trienal. Hasta ahora lo ha hecho para los períodos 1954-56, 1957-59, y 1960-62. Los datos correspondientes al período de 1963-65 se publicarán en el próximo futuro. Igualmente ha publicado series cronológicas sobre provisión de comestibles en las que se resumen los datos más importantes deducidos de las hojas de balance de alimentos para el período anterior a la guerra y para los de 1948-50, 1951-53 y 1954-56. Se tiene en proyecto preparar una nueva serie cronológica de los datos disponibles de hojas de balance de alimentos durante 1969-70 teniendo en cuenta las revisiones en los datos sobre producción, comercio y utilización recientemente introducidas en el caso de muchos países. En el curso de estos trabajos se atenderá especialmente a las interrupciones que la serie presenta.

La hoja de balance de alimentos permite formarse una idea amplia de los suministros alimentarios de un país durante un determinado período, por lo general un año. En ella pueden apreciarse los tipos y cantidades de alimentos producidos, importados y exportados. Tiene en cuenta los cambios en las existencias y se hacen las apropiadas deducciones por las cantidades empleadas para piensos, semillas, usos industriales y las desperdiciadas durante la distribución hasta los establecimientos de venta al por menor. Teniendo en cuenta los datos sobre población establece la cantidad y valor nutritivo estimados de los suministros por persona de productos alimenticios disponibles en el comercio al por menor.

Limitaciones de la hoja de balance de alimentos. Al considerar la índole fidedigna de los datos de las hojas de balance de alimentos y su comparabilidad entre países y en el aspecto cronológico, deben tenerse en cuenta las siguientes limitaciones principales de tales datos:

a) La amplitud, exactitud y clasificación de las estadísticas nacionales varía de un país a otro. En lo que respecta a varios productos alimenticios, las estadísticas oficiales de la producción y el comercio son frecuentemente insuficientes. En muchos casos no existe información digna de fe sobre los cambios anuales de las existencias y las que se retienen en las explotaciones comerciales. Las estimaciones establecidas en tales casos son de exactitud variable por basarse en apreciaciones subjetivas.

b) Con frecuencia, las cantidades correspondientes a piensos, semillas, desperdicios, usos industriales y los correspondientes coeficientes de conversión técnica se determinan de un modo aproximado por faltar estadísticas propiamente dichas sobre el aprovechamiento de los distintos productos.

c) En el caso de varios países no existe todavía la conveniente base estadística para establecer cifras de población. Incluso cuando se han levantado censos de población y se han efectuado encuestas puede haber errores sensibles en las estimaciones correspondientes a años posteriores al censo.

d) En muchos casos no se dispone de cifras nacionales sobre composición de los alimentos, debiendo recurrirse a datos internacionales para calcular el valor nutritivo de los suministros alimentarios.

MEDIOS DE PRODUCCION

Abonos comerciales

Estos cuadros comprenden los datos sobre producción y consumo de los fertilizantes comerciales expresados en su equivalencia de vegetales nutrientes. Los datos fueron suministrados directamente por los gobiernos. A falta de datos oficiales, se han establecido estimaciones en cooperación con la industria de los fertilizantes.

Cuando los datos enviados por los gobiernos no indicaban las cantidades de elementos activos, éstos se han calculado tomando como base los porcentajes de nutrientes de plantas (N, P_2O_5, y K_2O) contenidos en los distintos fertilizantes comerciales. Estos porcentajes aparecen en el Cuadro 8 de las páginas 74 y siguientes de *El uso eficaz de los fertilizantes*, Nº 43 de la serie de Estudios Agropecuarios de la FAO, publicado en 1959.

En el cuadro que sigue se dan cifras relativas a la producción de fosforita para el período 1964-67:

PRODUCCION DE FOSFORITA

Continente	1964	1965	1966	1967
	..... *Miles de toneladas métricas*			
Europa	*140	*150	*130	*150
U.R.S.S.[1]	*6 200	*6 700	*8 300	*9 300
América del Norte y Central	23 480	26 890	35 600	*36 220
América del Sur	*480	*480	*450	*660
Asia	850	*1 260	*1 650	*1 530
Africa	*15 720	*15 430	*15 860	*15 900
Oceanía	3 340	3 360	3 700	*3 640
Total mundial	*50 200	*54 300	*65 700	*67 400

[1] No comprende la cantidad empleada para la fabricación de fertilizantes fosfatados elaborados.

En los datos sobre abonos fosfatados se excluye la fosforita molida. Los datos sobre la fosforita molida utilizada para aplicación directa en el período 1966/67-1967/68 se indican en el cuadro siguiente:

FOSFORITA MOLIDA UTILIZADA PARA APLICACION DIRECTA

Continente	1966/67	1967/68
	Miles de toneladas métricas de P_2O_5	
Europa		
U.R.S.S.[1]	*91	*106
América del Norte y Central	761	814
América del Sur	94	*83

[1] Año civil, el primero de los del año emergente.

Maquinaria agrícola

Tractores. En este cuadro, los datos sobre tractores de ruedas se refieren solamente, por lo general, a los que tienen 3 ó 4 ruedas y cuyos motores desarrollan más de 8 caballos de fuerza. Estos tipos de tractores constituyen la gran mayoría de los que se utilizan en la agricultura de casi todos los países. Los datos sobre tractores de oruga comprenden sólo, de ordinario, a los que desarrollan una fuerza motriz superior a 8 caballos. Este tipo se utiliza principalmente en la construcción de caminos, remoción de la tierra, habilitación de nuevas zonas y operaciones forestales, pero también se emplea en labores

agrícolas. Bajo el epígrafe « Tractores para toda clase de trabajo » se da el número total de ambas clases de tractores, según la definición dada anteriormente para las mismas, tanto los usados en la agricultura como los destinados a cualquiera otra actividad.

Cuando no se disponía de cifras anuales respecto a tractores en funcionamiento en los países que no los fabrican, fue posible estimar las variaciones anuales tomando como referencia los datos sobre exportaciones de tractores efectuadas por los principales países productores, clasificadas por lugares de destino, y reduciendo al mismo tiempo la maquinaria antigua mediante una tasa de depreciación adecuada.

Sólo se dispone de datos sobre el número total de tractores, incluidos motocultores y otros instrumentos mecánicos similares, para unos cuantos países. Algunos otros países compilan datos en función de tractores de 15 caballos de fuerza. Todos ellos, junto con las consiguientes notas al pie del cuadro, van incluidos en los totales continentales, regionales y mundiales, sin que se hayan tenido en cuenta las diferencias de definición.

Sin embargo, en sí mismo el número de tractores no basta para dar idea clara de la potencia de tracción a que equivale. El promedio del número de caballos de estos tractores y la medida en que se utilizan constituyen las características más importantes, sobre las cuales sólo se dispone actualmente de escasos datos en esta Organización.

Los datos se refieren, en lo posible, a la situación reinante al finalizar el año expresado. Las cifras basadas en los censos realizados durante el primer trimestre de un determinado año van refundidas con las del anterior.

Tractores hortícolas. En este cuadro figuran los tractores pequeños y los cultivadores mecánicos de un peso inferior a 850 kilogramos o que desarrollan menos de 8 caballos, y que se emplean principalmente en horticultura. Tales tractores se limitan a los que tienen un solo eje. Las cifras basadas en un censo levantado durante el primer trimestre de un determinado año van refundidas con las del anterior.

Segadoras-trilladoras. En este cuadro los datos suelen limitarse a las máquinas que siegan y trillan en una sola operación. Se espera ofrecer una información más completa en futuras ediciones de este Anuario, para que sea posible proceder a la estimación de los totales continentales, regionales y mundiales.

Ordeñadoras mecánicas. En este cuadro figura el número de ordeñadoras mecánicas o, tratándose de determinados países, el de granjas dotadas de esta clase de material. Por ser incompletos los datos, no ha sido posible estimar los totales regionales, continentales o mundiales.

Plaguicidas

Los datos se refieren a cantidades de plaguicidas empleados en la agricultura o vendidos a los agricultores y se consignan expresados en ingredientes activos. Por ser incompleto el campo abarcado, no ha resultado posible estimar los totales continentales, regionales o mundiales.

PRECIOS

Las series de precios se han obtenido de muchas fuentes: cuestionarios especiales, grupos internacionales competentes en productos básicos, publicaciones oficiales y no oficiales y, en algunos casos, corresponsales especiales. Cada serie se ha seleccionado de modo que en lo posible incluya las cotizaciones que rigen para cada producto en cada uno de los principales países productores y en los que comercian en tales productos.

Las series seleccionadas se han clasificado por precios al productor, precios al por mayor, precios de exportación o precios de importación. Cuando las series entraban en parte en dos o más clasificaciones (por ejemplo, un precio de exportación puede regir también en determinadas transacciones internas al por mayor), la clasificación refleja el tipo de transacción en que el precio aparece más frecuentemente.

Los precios indicados son, en general, los de un año de referencia correspondiente al año civil adoptado para las estadísticas de producción, que no representa forzosamente promedios reales de año civil, sino los promedios de los períodos correspondientes al año agrícola o a algunos meses de temporadas de mercadeo, según se indica en el encabezamiento de la columna en que se consignan los meses iniciales y finales. En la sección titulada « Lista de las fuentes de los cuadros de precios » del *Anuario* de 1960 figura una breve exposición de los métodos empleados para calcular los promedios anuales y los índices de precios que aparecen en los cuadros de precios, así como de las fuentes de que proceden los datos. Sin embargo, la exposición de 1960 no abarca las subsiguientes revisiones de las series.

En esta edición se ha incluido un nuevo cuadro sobre « Precios de exportación de distintos productos agrícolas », que contiene series además de los precios de exportación que normalmente se consignan en los cuadros dispuestos por productos agrícolas. Estos últimos se consignan como en ediciones anteriores, debido a la continuidad de los datos para una serie cronológica más larga, y teniendo asimismo en cuenta la importancia internacional de estas series. Los datos del nuevo cuadro han sido acopiados mediante cuestionarios especiales cursados a los gobiernos en 1967 y 1968. Por consiguiente, el número de productos y países consignados no sólo refleja la respuesta de los países a los cuestionarios, sino también la importancia que conceden a determinados productos en su comercio de productos agrícolas. Se espera ampliar y afinar el contenido de este cuadro en años próximos a fin de que pueda informar más ampliamente sobre precios en transacciones de productos agrícolas en el comercio internacional.

Las unidades cuantitativas locales a las que corresponden los precios originales indicados se han expresado en su equivalente en unidades métricas o británicas.

En la mitad inferior de cada cuadro se anotan los precios nacionales convertidos en moneda estadounidense por unidad métrica de cantidad. Los tipos de cambio que se utilizaron para la mayoría de los países son los publicados por el Fondo Monetario Internacional. En los casos de tipos de cambio múltiples se utilizó el tipo de cambio más indicado para el producto, el país y el período de referencia correspondiente al precio medio indicado.

Cuando los tipos de cambio varían durante el año, sobre todo si se hace uso de tipos de mercado libre en las operaciones con el extranjero, se han empleado los promedios de los tipos ponderados teniendo en cuenta la duración de los respectivos períodos en que están en vigor. En el caso de algunos países no se ha hecho ninguna conversión a la unidad monetaria de los Estados Unidos por resultar imposible determinar un tipo satisfactorio de cambio aplicable al producto o país de que se trate.

NOTAS SOBRE PAISES

Birmania

Las estadísticas de cultivos y ganados correspondientes a este país incluyen solamente a Birmania propiamente dicha, con exclusión de Putao, los montes Chin, los Estados Shan y Karenni. En estas zonas jamás se han hecho investigaciones estadísticas.

Canadá

Salvo indicación en contrario, todos los datos referentes al Canadá se han ajustado para incluir en ellos a Terranova.

China continental

Estimaciones de producción de cereales y patatas

Las estadísticas de producción de cultivos de la China continental constituyeron una de las principales dificultades al preparar el *Anuario de producción*. Sólo se dispone de cifras oficiales del país hasta 1958. En lo que respecta a años posteriores, las opiniones de los expertos y los informes publicados en diarios indican que, después de la cosecha extraordinaria de 1958, la China continental ha tenido tres malas cosechas, afirmándose que la primera (1959) se debió principalmente al hecho de que se retirara de la agricultura una proporción excesiva de la mano de obra agrícola para pasarla a los sectores industriales; las de los años 1960 y 1961 las provocaron principalmente inundaciones y sequías. Por consiguiente, mientras el nivel de ingestión de calorías por persona para el promedio 1957-59 se estimó en 2 100, en la *Tercera Encuesta Alimentaria Mundial*, de la FAO, los expertos coinciden en estimar que, en 1960 y 1961, a pesar del gran aumento de las importaciones, el nivel de suministro de calorías por persona osciló alrededor de 1 850. Posteriormente volvió a aumentar, estimándose que en 1965 recuperó más o menos el nivel predominante en 1957-59.

Teniendo en cuenta:

a) las estimaciones de población basadas en el censo de 1953 y un índice de aumento del 2,1 por ciento, implícito en las estimaciones oficiales del país sobre el período 1953-57;

b) las estadísticas de comercio basadas en publicaciones de países que han comerciado con la China continental;

c) el parecer de los expertos sobre el suministro de calorías por persona;

d) la analogía en el comportamiento de algunos grupos de cultivos en determinadas condiciones climáticas;

y dividiendo los principales cultivos en tres grupos: trigo, cebada y avena; arroz, maíz, mijo y sorgo; patatas y batatas, fue posible establecer estimaciones que armonizan con la información disponible. Los datos sobre producción de trigo y arroz se consignan en el Anuario; no se consignan, en cambio, todas las demás estimaciones sobre superficie, rendimiento y producción de cereales y patatas, pero se han incluido en los totales mundiales.

Huelga advertir que las estimaciones relativas a la China continental seguirán siendo discutibles hasta que el país publique sus datos oficiales.

Estados Unidos

En los casos en que no se dan cifras separadas para Alaska y Hawaii o no se mencionan en las notas insertadas al pie de los cuadros, dichas cifras se han incluido en las estimaciones correspondientes a los Estados Unidos.

India

Los datos relativos a Goa, Daman y Din (que llevaban el nombre de India portuguesa antes de unirse a la India en diciembre de 1961) se incluyen en los datos correspondientes a la India que se consignan en los cuadros sobre aprovechamiento de tierras, riego, población, arroz (de 1963 en adelante), caña de azúcar (de 1963/64 en adelante), coco y copra (de 1964 en adelante).

Yemen Meridional

Antes Federación de Arabia del Sur. Los datos comprenden los antiguos territorios de la Colonia y el Protectorado de Adén.

PESOS, MEDIDAS Y COEFICIENTES DE CONVERSION

A. GENERAL

Superficie

1 hectárea	= 2,47109 acres	1 acre	= 0,40469 de hectárea
1 kilómetro cuadrado	= 0,38610 de milla cuadrada	1 milla cuadrada	= 2,5900 kilómetros cuadrados
1 kilómetro cuadrado	= 100 hectáreas	1 milla cuadrada	= 640 acres = 259 hectáreas

Rendimiento

100 kilogramos por hectárea	= 1,4869 búshels (60 libras) por acre	1 búshel (60 libras) por acre	= 67,253 kilogramos por hectárea

Capacidad

1 litro	= 0,26418 de galón	1 galón EE. UU.	= 3,78533 litros
	= 0,21997 de galón imperial	1 galón imperial	= 4,54596 litros
1 hectolitro	= 100 litros	1 galón	= 4 cuartos

Peso

1 kilogramo	= 2,20462 libras	1 libra	= 0,45359 de kilogramo
1 tonelada métrica	= 0,98421 de tonelada larga	1 tonelada larga	= 1,01605 toneladas métricas
	= 1,10231 toneladas cortas	1 tonelada corta	= 0,90718 de tonelada métrica
1 tonelada métrica	= 1 000 kilogramos	1 tonelada larga	= 2 240 libras
1 quintal métrico	= 100 kilogramos	1 tonelada corta	= 2 000 libras

1 t = 19,684 cwt (112 lb)	1 cwt (112 lb)	= 0,050802 t	Reino Unido y territorios británicos
1 t = 22,046 cwt (100 lb)	1 cwt (100 lb)	= 0,045359 t	Canadá, EE. UU., Honduras
1 t = 66,667 arrobas métricas	1 arroba métrica	= 0,015 t	Brasil
1 t = 21,739 quintales españoles	1 quintal español	= 0,046 t	Chile, Costa Rica, El Salvador, España, Filipinas, Guatemala, Venezuela
1 t = 21,735 quintales españoles	1 quintal español (100 libras)	= 0,046009 t	Cuba, Perú
1 t = 20 kantars métricos	1 kantar métrico	= 0,050 t	República Arabe Unida
1 t = 22,258 kantars	1 kantar	= 0,044928 t	República Arabe Unida, Sudán
1 t = 26,792 maunds	1 maund (standard) (82,286 lb)	= 0,037324 t	India, Paquistán
1 t = 266,67 kwan	1 kwan	= 0,00375 t	Japón, República de Corea
1 t = 16,667 piculs (pikuls)	1 picul (pikul)	= 0,060 t	Camboya, Laos, Tailandia
1 t = 16,534 piculs (pikuls)	1 picul (pikul)	= 0,06048 t	Brunei, Hong Kong, Macao, Malasia

B. COEFICIENTES DE CONVERSION DIRECTA

Los coeficientes que figuran a continuación se indican con el fin de convertir del sistema británico al sistema métrico los pesos por unidad de superficie y los pesos por unidad de volumen:

1 hundredweight por acre	=	125,54 kilogramos por hectárea
1 tonelada larga por acre	=	2 510,175 kilogramos por hectárea
1 libra por cuarto (quarter)	=	0,1559 de kilogramo por hectolitro
1 libra por galón	=	0,0998 de kilogramo por litro
1 libra por búshel	=	1,2472 kilogramos por hectolitro

NOTA: Las anteriores unidades no comprenden todos los productos agrícolas ni todos los envases de éstos. Al servirse de ellas debe tenerse presente que, en la mayoría de los productos, sobre todo las frutas, puede haber considerables variaciones en el peso por unidad de volumen debido a diferencias en la variedad o en el tamaño del producto, estado del paquete y grado en que se aprieta, proporción en que se llena el envase, etc.

GLOSARIO EN ESPAÑOL

Traducción de los títulos y notas explicativas de los cuadros

CUADRO

TIERRAS

1. APROVECHAMIENTO DE TIERRAS

Encabezamientos: Continente y país. Años. Superficie total. Superficie terrestre. Superficie de las tierras agrícolas. Tierras arables o de labranza y tierras destinadas a cultivos permanentes. Praderas y pastos permanentes. Terrenos forestales. Otras superficies. Tierras no aprovechadas, pero potencialmente productivas. Superficie edificada, terrenos baldíos y otros.

NOTA: Véase la explicación de los encabezamientos 1-7 en las Notas sobre los Cuadros al final del volumen.

Notas explicativas:

[1] Censo agrícola de 1959.
[2] Inventario forestal nacional de 1951-53.
[3] Datos procedentes del Inventario Forestal Mundial levantado por la FAO en 1963.
[4] Incluye pastos bastos.
[5] Incluidas las Islas Baleares y las Canarias.
[6] Incluidas 12 216 000 hectáreas de pastos bastos.
[7] De las cuales se utilizan para el pastoreo 7 000 000 de hectáreas.
[8] No incluida la superficie dedicada a cultivos arbóreos, pero incluidos los viñedos.
[9] Los datos se refieren a las tierras de los predios agrícolas de más de 1 acre (0,405 hectáreas).
[10] Incluidas 7 138 000 hectáreas de pastos bastos.
[11] Principalmente pastos resistentes para ovinos.
[12] Incluidos el mar Blanco (9 000 000 de hectáreas) y el mar de Azov (3 730 000 hectáreas).
[13] No incluidos los pastos para renos.
[14] De las cuales se utilizan también para el pastoreo 2 023 hectáreas.
[15] Datos procedentes del Inventario Forestal Mundial levantado por la FAO en 1958.
[16] Incluidos los matorrales.
[17] Zonas de pastos naturales o henares que no se han cultivado, prados o matorrales, tierras de pastoreo o eriales, marismas, cenegales o terrenos rocosos en las granjas en explotación en el momento de levantar el Censo agropecuario de 1966.
[18] Censo agropecuario de 1963.
[19] En explotaciones agrícolas.
[20] Censo agropecuario de 1960.
[21] En explotaciones agrícolas, según el Censo agropecuario de 1961.
[22] Superficie no cubierta de hielo.
[23] Censo agropecuario de 1950.
[24] 1967.
[25] Excluidas 12 182 000 hectáreas de reservas forestales en parques y destinadas a otros usos especiales.
[26] Excluidas 762 000 hectáreas de reservas forestales en parques o destinadas a otros usos especiales.
[27] Potencialmente productiva para el pastoreo.
[28] Excluidas 40 000 hectáreas de reservas forestales en parques o destinadas a otros usos especiales.
[29] Sólo el territorio continental.
[30] Según datos del Censo agropecuario de 1950, que abarcó una superficie de 32 750 000 hectáreas.
[31] Según datos del Censo agropecuario de 1965.
[32] De las cuales aproximadamente dos tercios corresponden a pastos bastos.
[33] Excluidas las praderas y los pastos temporales.
[34] Sabana.
[35] 1961.
[36] Sabana.
[37] En su mayor parte pastos bastos.
[38] De esta cifra, 210 000 hectáreas son pastos cultivados; las restantes son pastos bastos.
[39] Incluidas las tierras sin repoblar.
[40] De las cuales, 2 747 850 son pastos cultivados.
[41] Se han contado dos veces las tierras agrícolas en que se recoge más de una cosecha al año.
[42] Solamente los pastos cultivados.
[43] Incluidos pastos y matorrales.
[44] Incluida Cachemira-Jammu, cuya condición jurídica definitiva no ha sido determinada aún.
[45] Los datos se refieren a la superficie de 305 947 000 hectáreas sobre la cual se comunican datos.
[46] Prados permanentes no cultivados.
[47] Excluida Irián Occidental que figura por separado.
[48] Superficie agrícola total.
[49] Tierras de cultivo que requieren mejoras secundarias.

CUADRO

[50] Tierras adecuadas para pastos naturales.
[51] Incluso tierras de repoblación potencial.
[52] 1960.
[53] 1965.
[54] Excluidos los prados temporales y los pastos.
[55] Superficie de agricultura sedentaria.
[56] Superficie de agricultura migratoria (de barbecho con matorral).
[57] Excluida Cachemira-Jammu, cuya condición jurídica no ha sido determinada todavía.
[58] Los datos se refieren a la superficie de 67 139 000 hectáreas sobre la cual se comunican datos.
[59] En explotaciones agrícolas según datos del Censo agropecuario de 1964.
[60] De las cuales, 2 780 000 hectáreas corresponden a bosque.
[61] Pastos bastos solamente.
[62] Principalmente de matorral.
[63] 1962.
[64] De las cuales, 5 410 000 hectáreas son tierras en barbecho.
[65] De las cuales, 3 000 000 de hectáreas son tierras en barbecho.
[66] De las cuales, 950 000 hectáreas son tierras en barbecho.
[67] 1953.
[68] Superficie estimada de agricultura migratoria y barbecho con matorrales.
[69] Sólo las reservas forestales.
[70] Excluidas las tierras de barbecho y los prados temporales.
[71] En predios agrícolas, según datos del Censo agropecuario de 1960.
[72] Excluida la superficie bajo cultivo permanente.
[73] Incluidas las sabanas.
[74] Incluidos los arbustos achaparrados y los pastos.
[75] Incluido el territorio de la Bahía de las Ballenas (96 900 hectáreas).
[76] De las cuales, 8 500 000 hectáreas son tierras de barbecho.
[77] De las cuales, 15 000 000 de hectáreas se utilizan también para pastoreo.
[78] Incluidas 6 815 000 hectáreas de tierras de barbecho.
[79] Sin incluir los barbechos de las tierras correspondientes a las aldeas.
[80] Sólo en granjas y grandes haciendas.
[81] De las cuales 3 300 000 hectáreas son tierras de barbecho.
[82] De las cuales son de barbecho con matorral 3 612 000 hectáreas.
[83] Excluido el territorio de la Bahía de las Ballenas.
[84] Matorrales de acacias con hierbas.
[85] De las cuales, 1 290 000 hectáreas son tierras en barbecho.
[86] De las cuales comprende 3 558 000 hectáreas la superficie habitada y cultivada.
[87] Excluidas las tierras en barbecho.
[88] Excluidas las tierras forestales de las que no se comunican datos, estimadas en unos 100 000 000 de hectáreas.
[89] Incluidas 20 829 000 hectáreas de praderas cultivadas.
[90] Resto de las explotaciones empleadas para el pastoreo, ociosas, etc.
[91] De las cuales corresponden 65 000 hectáreas a pastos y el resto a matorral y pastos bastos.
[92] Incluidos los territorios dependientes.
[93] Sólo montes del Estado.
[94] Sólo las tierras con cultivos arbóreos.
[95] Prescindiendo del monte bajo de helechos y el monte secundario, así como de las tierras baldías.

2. EL RIEGO EN LOS PAISES QUE SE INDICAN

Encabezamientos: Continente y país. Tierras de labranza y tierras destinadas a cultivos permanentes en régimen de riego. Miles de hectáreas.

Notas explicativas:

[1] 1961.
[2] Censo agropecuario de 1959.
[3] Superficie de arrozales bajo riego.
[4] Incluidos las praderas y los prados de regadío.
[5] Sin incluir Escocia y el Norte de Irlanda.
[6] Censo agropecuario de 1960.
[7] 1962.
[8] Incluidas extensiones insignificantes de praderas y prados permanentes regados y mejorados.
[9] 1960.
[10] 1957.
[11] Censo agropecuario de 1950.
[12] Censo agropecuario de 1964/65.
[13] Superficie realmente regada.
[14] Censo agropecuario de 1961.
[15] Superficie total de palay (maja y yala) regada mediante obras hidráulicas grandes y pequeñas.
[17] Superficie neta regada durante la campaña agrícola que termina en el año indicado.

CUADRO

TIERRAS (Conclusión)

[18] Superficie regada durante la campaña agrícola que comienza en el año indicado.
[19] Superficie de arroz de regadío principalmente.
[20] Censo agropecuario de 1963.
[21] Según el Censo agropecuario de 1960, que excluye las provincias de Binh-Long, Binh-Tuy, Phuoc-Thanh y Phuoc-Long.
[22] Eritrea solamente.
[23] En granjas y grandes haciendas.
[24] Incluidas las superficies inundadas por los ríos.
[25] Total de la superficie regada, incluidos los pastos cultivados, durante la campaña agrícola que termina en el año indicado.
[26] Incluidos los pastos cultivados.
[27] Superficie regada en explotaciones de 4 ha o más situadas fuera de los distritos urbanos.

3. NUMERO Y SUPERFICIE DE LAS EXPLOTACIONES AGRICOLAS, según el Censo agropecuario mundial de 1960

Encabezamientos: Continente y país. Año. Explotaciones agrícolas. Total. Explotaciones sin tierras. Superficie de las explotaciones. Número. Hectáreas.

Notas explicativas:

[1] Excepto 733.122 explotaciones, de una superficie de 56 394 hectáreas, beneficiadas por cultivadores ocasionales que no venden su producción, huertas caseras y huertos de frutales cuyos productos son destinados al consumo doméstico exclusivamente.
[2] Superficie arable, incluso la dedicada a la producción de fresas para la venta y a prados y praderas permanentes.
[3] No comprende el sector occidental de Berlín.
[4] Superficie agrícola.
[5] Resultados provisionales.
[6] Excepto 539 explotaciones sobre las que no se dispone de datos.
[7] Explotaciones individuales solamente, o sea sin incluir las explotaciones del Estado ni las colectivas.
[8] Excepto 17 750 explotaciones « insignificantes en el aspecto estadístico » con una superficie de 26 709 ha.
[9] Excepto las explotaciones dedicadas al consumo propio.
[10] Excepto explotaciones estatales.

Pág. 12:

Encabezamientos: Continente y país. Año. Explotaciones agrícolas. Total. Explotaciones sin tierras. Superficie de las explotaciones. Número. Hectáreas.

Notas explicativas:

[11] Explotaciones familiares exclusivamente.
[12] Excepto los montes o bosques no utilizados para la siega o el pastoreo.
[13] Explotaciones de cultivo estable solamente.
[14] Excepto Jammu y Cachemira, cuya condición jurídica no ha sido determinada todavía, y Junagadh, Manavadar, Gilgit y Baltistán.
[15] Tierras arables.
[16] Tierras cultivadas.
[17] Agricultura africana exclusivamente.
[18] Agricultura europea y asiática exclusivamente.
[19] Explotaciones europeas exclusivamente, exceptuadas las fincas de extensión inferior a 10,12 hectáreas.
[20] Sólo las grandes explotaciones comerciales.
[21] Excepto los montes o bosques.
[22] Incluidos los datos sobre Papuasia.

POBLACION

4. POBLACION TOTAL - ESTIMACION A MEDIADOS DE AÑO

Encabezamientos: Notas. Continente y país. En millares.

Notas explicativas:

[1] Población de derecho.
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 3 años (primer promedio).
[4] Excluidas las fuerzas armadas extranjeras acantonadas en la zona.
[5] Promedio de 3 años (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Incluidas las fuerzas armadas extranjeras acantonadas en la zona. Población de derecho.
[8] Excluidos los ciudadanos que sean civiles y hayan estado ausentes del país mucho tiempo, cifra que se estimó en 765 000 en 1960. Población de derecho.
[9] Excluida la población india de la selva.
[10] Promedio de 2 años (primer promedio).
[11] 1950 (primer promedio).
[12] 1955 (segundo promedio).
[13] Excluida la población de Quemoy y Matsu, las fuerzas armadas y los extranjeros.
[14] Excluidas las personas que viven en zonas conservadas por el Reino Unido y cuya cifra se calculó en 3 600 personas en 1960.
[15] Promedio de 2 años (segundo promedio).
[16] Incluidos los emigrados de Palestina.

CUADRO

[17] Excluidos los emigrados de Palestina.
[18] 1956 (segundo promedio).
[19] 1952 (primer promedio).
[20] 1952 (segundo promedio).
[21] 1951 (primer promedio).
[22] Excluidos los viajeros en tránsito marítimo, los militares, y el personal de los servicios civiles y personas a su cargo no domiciliados en el país.
[23] 1953 (segundo promedio).
[24] Sin incluir los aborígenes, estimados en 40 000 en 1961.
[25] Incluidas las islas de Cantón y Enderbury.

5. POBLACION AGRICOLA Y POBLACION ECONOMICAMENTE ACTIVA EN LA AGRICULTURA estimada para 1965, en los países que se indican

Encabezamientos: Continente y país. Población total. Población agrícola. Porcentaje en la agricultura. Población económicamente activa. Total. En la agricultura. Porcentaje en la agricultura. Millares. Porcentaje.

Notas explicativas:

[1] Estimaciones basadas en datos procedentes de un censo agropecuario o de una encuesta agrícola.

6. POBLACION AGRICOLA: Estimaciones por continentes y mundiales

Encabezamientos: Continente. 1950. Población total. Población agrícola. 1965. Población total. Población agrícola. Porcentaje de la población agrícola. 1950, 1965. En millones. Porcentaje.

Notas explicativas:

[1] Los datos deben considerarse solamente como estimaciones aproximadas.

NUMEROS INDICES DE LA PRODUCCION AGRICOLA (FAO)

7. NUMEROS INDICES FAO POR REGIONES DE LA PRODUCCION AGRICOLA

A. Producción de alimentos.

Encabezamientos: Región. Producción de alimentos.

B. Producción agrícola total.

Encabezamientos: Región. Producción agrícola total.

Notas explicativas:

[1] Cifras preliminares.

NOTA: *a*) Números índices calculados por la FAO. Siempre que se comunican datos básicos revisados se procede a la consiguiente revisión de los números índices anteriormente publicados. En las Notas sobre los Cuadros se encontrarán más detalles sobre el cálculo de los números índices de la FAO.
b) A partir de la presente edición del Anuario, los números índices se han calculado sobre la base de un año civil como período de referencia y por consiguiente no son comparables a las series publicadas en ediciones anteriores del Anuario.

8. NUMEROS INDICES FAO POR REGIONES DE LA PRODUCCION AGRICOLA POR PERSONA

A. Producción de alimentos por persona.

Encabezamientos: Región. Producción de alimentos por persona.

B. Producción agrícola total por persona.

Encabezamientos: Región. Producción agrícola total por persona.

Notas explicativas:

[1] Cifras preliminares.

NOTA: *a*) Estos números índices, calculados por la FAO, representan la relación entre los números índices FAO de la producción agrícola total y los correspondientes números índices de la población.
b) Véase la nota *b*) del Cuadro 7.

9. NUMEROS INDICES FAO POR PAISES DE LA PRODUCCION DE ALIMENTOS

Encabezamientos: Región y país. Producción de alimentos.

Notas explicativas:

[1] Datos provisionales.
[2] Antigua Zona francesa solamente.

NOTA: *a*) Estos índices los calcula la FAO sobre una base uniforme, sirviéndose de coeficientes de ponderación constantes por regiones. No coinciden con los índices nacionales establecidos por los países mismos

CUADRO

POBLACION (Conclusión)

debido a diferencias en los conceptos de producción, alcance, coeficiente de ponderación y métodos de cálculo utilizados. No sustituyen a los índices nacionales. Siempre que se reciban datos básicos revisados, se revisan los índices ya publicados teniendo en cuenta tales modificaciones. Para más detalles sobre el cálculo de los índices de la FAO, consúltense las Notas sobre los Cuadros.
b) Véase la nota *b*) del Cuadro 7.

10. NUMEROS INDICES FAO POR PAISES DE LA PRODUCCION AGRICOLA TOTAL

Encabezamientos: Región y país. Producción agrícola total.
Notas explicativas:
[1] Datos provisionales.

NOTA: *a*) Estos índices los calcula la FAO sobre una base uniforme, sirviéndose de coeficientes de ponderación constantes por regiones. No coinciden con los índices nacionales establecidos por los países mismos, debido a diferencias en los conceptos de producción, alcance, coeficientes de ponderación y métodos de cálculo utilizados. No sustituyen a los índices nacionales. Siempre que se reciben datos básicos revisados, se revisan los índices ya publicados teniendo en cuenta tales modificaciones. Para más detalles sobre el cálculo de los índices de la FAO, consúltense las Notas sobre los Cuadros.
b) Véase la nota *b*) del Cuadro 7.

11. NUMEROS INDICES FAO POR PAISES DE LA PRODUCCION ALIMENTARIA POR PERSONA

Encabezamientos: Región y país. Producción alimentaria por persona.
Notas explicativas:
[1] Datos provisionales.

NOTA: *a*) Estos índices, calculados por la FAO, representan la relación entre los índices FAO de la producción alimentaria y los correspondientes índices de población.
b) Véase la nota *b*) del Cuadro 7.

12. NUMEROS INDICES FAO POR PAISES DE LA PRODUCCION AGRICOLA TOTAL POR PERSONA

Encabezamientos: Región y país. Producción agrícola total por persona.
Notas explicativas:
[1] Datos provisionales.

NOTA: *a*) Estos índices, calculados por la FAO, representan la relación entre los índices FAO de la producción agrícola total y los correspondientes índices de población.
b) Véase la nota *b*) del Cuadro 7.

COSECHAS

13A. RESUMEN DE LOS CULTIVOS PRINCIPALES, por continentes

Encabezamientos:

SUPERFICIE
Cultivos:

Trigo
Centeno
Cebada
Avena
Maíz
Mijo y sorgo
Arroz, cáscara
Total, cereales[1]
Patatas (papas)
Batatas y ñames
Algodón (fibra)
Total, legumbres[2]
Total semillas oleaginosas[3]

RENDIMIENTO
Cultivos:

Trigo
Centeno
Cebada
Avena
Maíz
Mijo y sorgo
Arroz, cáscara
Patatas (papas)
Batatas y ñames
Algodón (fibra)

CUADRO

PRODUCCION
Cultivos:

Trigo
Centeno
Cebada
Avena
Maíz
Mijo y sorgo
Arroz, cáscara
Total, cereales[1]
Patatas (papas)
Batatas y ñames
Algodón (fibra)
Total, legumbres[2]
Total, semillas oleaginosas[3]
Azúcar:
Centrifugada, sin refinar
No centrifugada, caña

Notas explicativas:

[1] Trigo, centeno, cebada, avena, maíz, mijo y sorgo, arroz, granos mezclados, alforfón y cereales diversos.
[2] Frijoles secos, guisantes secos, habas secas, garbanzos, lentejas, guandúes, caupíes, vezas, altramuces y otras legumbres.
[3] Soja, maní, semilla de algodón, linaza, colza, sésamo, girasol y ricino.

NOTA: En los totales mundiales se han incluido las cifras correspondientes a la U.R.S.S. y China continental cuando tales datos figuran incluidos también en los totales mundiales de los cuadros referentes a cada uno de los productos.

13B. RESUMEN DE LOS CULTIVOS PRINCIPALES, por regiones

Encabezamientos:

SUPERFICIE
Cultivos:

Trigo
Centeno

[2] Frijoles secos, guisantes secos, habas secas, garbanzos, lentejas, guandúes, caupíes, vezas, altramuces y otras legumbres.
[3] Soja, maní, semilla de algodón, linaza, colza, sésamo, girasol y ricino.

NOTA: En los totales mundiales se han incluido las cifras correspondientes a la U.R.S.S. y China continental cuando tales datos figuran incluidos también en los totales mundiales de los cuadros referentes a cada uno de los productos.

CUADRO

COSECHAS (Continuación)

14. TRIGO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Incluida la escanda.
[2] Promedio de 3 años (primer promedio).
[3] Superficie sembrada.
[4] Promedio de 4 años (primer promedio).
[5] 1952 (primer promedio).
[6] Promedio de 2 años (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Promedio de 2 años (segundo promedio).
[9] 1948 (primer promedio).
[10] 1956 (segundo promedio).
[11] 1950 (primer promedio).
[12] Ventas solamente.
[13] Promedio de 3 años (segundo promedio).

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.
FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

15. CENTENO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas.

[1] Promedio de 3 años (primer promedio)
[2] Superficie sembrada.
[3] Comprendidas mezclas de centeno y trigo.
[4] 1949 (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] 1950 (primer promedio).
[8] Promedio de 4 años (segundo promedio).

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.

16. CEBADA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio)
[2] Superficie sembrada.
[3] Incluidos los granos mezclados.
[4] Promedio de 4 años (primer promedio).
[5] 1952 (primer promedio).
[6] 1950 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Promedio de 2 años (segundo promedio).
[9] Promedio de 2 años (primer promedio).
[10] 1955 (segundo promedio).

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.

17. AVENA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Superficie sembrada.
[3] Comprendidas las mezclas de avena y cebada.
[4] Promedio de 4 años (primer promedio).
[5] 1952 (primer promedio).
[6] 1950 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Promedio de 3 años (segundo promedio).

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.

18. GRANOS MEZCLADOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1948 (primer promedio).
[2] Promedio de 4 años (primer promedio).

CUADRO

[3] Superficie sembrada.
[4] 1956 (segundo promedio).
[5] 1952 (primer promedio).

19. MAIZ

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Superficie sembrada.
[3] Cultivos principales, asociados e intermedios.
[4] 1950 (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] Los datos de superficie se refieren sólo al cultivo principal; los de producción comprenden también los cultivos mezclados.
[8] Cosechas destinadas solamente a grano en seco.
[9] Promedio de 3 años (segundo promedio).
[10] Promedio de 4 años (segundo promedio).
[11] 1954 (segundo promedio).
[12] Promedio de 2 años (primer promedio).
[13] 1956 (segundo promedio).
[14] 1949 (primer promedio).
[15] 1955 (segundo promedio).
[16] 1952 (primer promedio).
[17] 1948 (primer promedio).
[18] Ventas solamente.

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.
FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

20. MIJO Y SORGO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Superficie sembrada.
[2] 1948 (primer promedio).
[3] Promedio de 2 años (segundo promedio)
[4] 1956 (segundo promedio).
[5] Promedio de 3 años (segundo promedio).
[6] Promedio de 3 años (primer promedio).
[7] Los datos sobre rendimiento y producción se refieren a tallos.
[8] 1950 (primer promedio).
[9] Promedio de 4 años (segundo promedio).
[10] Promedio de 4 años (primer promedio).
[11] Promedio de 2 años (primer promedio).
[12] 1949 (primer promedio).
[13] Incluido el maíz. Superficie sembrada.
[14] Incluido el folio.
[15] 1952 (primer promedio).
[16] Incluido el « teff ».
[17] Incluido el maíz.

M = Mijo.
S = Sorgo.
U = Mijo y sorgo sin especificar.
TOT = M + S + U.
F = En granjas y grandes haciendas.
V = Pueblos o aldeas.

21. ARROZ (CASCARA)

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Superficie sembrada.
[3] Promedio de 4 años (primer promedio).
[4] 1950 (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] 1952 (primer promedio).
[7] Promedio de 2 años (primer promedio).
[8] 1956 (segundo promedio).
[9] 1949 (primer promedio)
[10] Promedio de 2 años (segundo promedio).
[11] Promedio de 3 años (segundo promedio).

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

22. ALFORFON

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

CUADRO

COSECHAS (Continuación)

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).
[2] Promedio de 2 años (primer promedio).
[3] 1950 (primer promedio).
[4] Promedio de 4 años (segundo promedio).

23. CEREALES DIVERSOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] 1950 (primer promedio).
[3] Promedio de 4 años (segundo promedio).
[4] Incluida la « cañahua ».
[5] Incluidas las legumbres secas.
[6] 1955 (segundo promedio).

Q = Quinoa (*Quenopodium quinoa*)
C = Alpiste (*Phalaris canariensis*).
P = Maíz reventón.
O = Otros cereales y cereales no especificados.

24. RESUMEN DE TODOS LOS CEREALES - Superficie

Encabezamientos: Notas. Continente y país.

NOTA: Están incluidos en este cuadro todos los cereales que se indican en la presente edición del Anuario (Cuadros 14-23).

Notas explicativas:

[1] Superficie sembrada
[2] Desde 1963 en adelante, estimaciones de la FAO.
[3] Estimaciones de la FAO.
[4] Información incompleta.
[5] Arroz solamente.

25. RESUMEN DE TODOS LOS CEREALES - Producción

Encabezamientos: Notas. Continente y país.

NOTA: Están incluidos en este cuadro todos los cereales que se indican en la presente edición del Anuario (Cuadros 14-23).

Notas explicativas:

[1] Desde 1963 en adelante, estimaciones de la FAO.
[2] Datos no oficiales.
[3] Información incompleta.
[4] Arroz solamente

26. CAÑA DE AZUCAR

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Superficie sembrada.
[4] Promedio de 4 años (segundo promedio).
[5] 1952/53 (primer promedio).
[6] Promedio de 3 años (segundo promedio).
[7] Caña molida para la obtención de azúcar.
[8] Promedio de 2 años (segundo promedio).
[9] Excluida la caña destinada a semilla.
[10] Promedio de 2 años (primer promedio).
[11] 1952/53 (segundo promedio).
[12] 1953/54 (segundo promedio).
[13] Desde 1948/49 hasta 1958/59 inclusive, para el azúcar centrifugada solamente.
[14] Para el azúcar centrifugada solamente.

27. REMOLACHA AZUCARERA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1950/51 (primer promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 4 años (primer promedio).

28. AZUCAR CENTRIFUGADA (Equivalente en azúcar sin refinar) - Producción

Encabezamientos: Continente y país.

CUADRO

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] Años julio-junio.
[3] Promedio de 4 años (primer promedio).
[4] Incluido el equivalente en azúcar de las melazas concentradas.
[5] Año civil que se refiere a la segunda parte del año emergente.
[6] *Tel quel.*
[7] Años junio-mayo.
[8] Incluye el azúcar (equivalente en azúcar sin refinar) procedente de la refinación del gur.
[9] Título neto 94 grados.

CANE = Azúcar de caña.
BEET = Azúcar de remolacha.
TOT = Azúcar de caña y de remolacha.

29. AZUCAR NO CENTRIFUGADA - Producción

Encabezamientos: Continente y país.

Notas explicativas:

[1] Promedio de 3 años (segundo promedio).
[2] Promedio de 4 años (segundo promedio).

30. PAPAS (PATATAS)

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] 1954 (segundo promedio).
[6] Promedio de 3 años (segundo promedio).
[7] Promedio de 4 años (segundo promedio).
[8] 1950 (primer promedio).
[9] 1952 (segundo promedio).
[10] 1952 (primer promedio).
[11] 1956 (segundo promedio).
[12] Ventas solamente.

MAIN = Cultivos principales en tierras de labranza.
OTHER = Otros cultivos.
FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.
ALONE = Cultivados separadamente.
MIXED = Cosechados con otros cultivos.

31. BATATAS (CAMOTES) Y ÑAME

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] 1952 (segundo promedio).
[3] 1950 (primer promedio).
[4] 1954 (segundo promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Incluidas otras raíces.
[7] Promedio de 3 años (primer promedio).
[8] Promedio de 2 años (segundo promedio).
[9] Promedio de 3 años (segundo promedio).
[10] Promedio de 4 años (primer promedio).
[11] 1955 (segundo promedio).
[12] 1952 (primer promedio).
[13] 1951 (primer promedio).
[14] 1956 (segundo promedio).

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

32. YUCA O MANDIOCA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] 1956 (segundo promedio).
[3] 1949 (primer promedio).
[4] 1954 (segundo promedio).
[5] 1951 (primer promedio).
[6] 1950 (primer promedio).
[7] 1948 (primer promedio).
[8] Promedio de 4 años (segundo promedio).
[9] Promedio de 3 años (primer promedio).
[10] 1952 (segundo promedio).
[11] Promedio de 2 años (primer promedio).

CUADRO

COSECHAS (Continuación)

[12] Promedio de 2 años (segundo promedio).
[13] Raíces secas.
[14] Promedio de 3 años (segundo promedio).
[15] 1955 (segundo promedio).
[16] 1952 (primer promedio).
[17] Ventas solamente. Raíces secas.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

33. CEBOLLAS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Cultivos extensivos solamente.
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Cultivadas principalmente para la venta.
[5] Promedio de 4 años (segundo promedio).
[6] La producción se refiere a las ventas efectivas.
[7] Promedio de 3 años (primer promedio).
[8] Promedio de 4 años (primer promedio).
[9] Explotaciones del Estado y colectivas solamente.
[10] Incluidos los ajos.
[11] 1950 (primer promedio).
[12] 1956 (segundo promedio).
[13] 1952 (primer promedio).
[14] Promedio de 3 años (segundo promedio).

G = Cebollas verdes.
D = Cebollas secas.
U = Sin especificar.
F = Cultivos extensivos.
O = Otros cultivos.

34. TOMATES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Cultivos extensivos solamente.
[2] Principalmente en invernadero.
[3] Promedio de 2 años (primer promedio).
[4] Promedio de 3 años (segundo promedio).
[5] Promedio de 2 años (segundo promedio).
[6] En invernadero.
[7] Promedio de 3 años (primer promedio).
[8] Se refiere a cultivos destinados principalmente para la venta.
[9] Promedio de 4 años (segundo promedio).
[10] La producción se refiere a las ventas efectivas.
[11] Promedio de 4 años (primer promedio).
[12] En invernadero: exportaciones.
[13] Explotaciones del Estado y colectivas solamente.
[14] 1951 (primer promedio).
[15] 1956 (segundo promedio).
[16] 1952 (primer promedio).
[17] 1955 (segundo promedio).
[18] Incluidos los cultivos cosechados en invernadero.

F = Cultivos extensivos.
O = Otros cultivos.

35. COLES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Cultivos extensivos solamente.
[2] Promedio de 3 años (primer promedio).
[3] 1955 (segundo promedio).
[4] Cultivados principalmente para la venta.
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] Promedio de 2 años (primer promedio).
[8] La producción se refiere a las ventas efectivas.
[9] 1950 (primer promedio).
[10] Promedio de 3 años (segundo promedio).
[11] Desde 1948 hasta 1958 inclusive, incluidas las coliflores.
[12] Promedio de 2 años (segundo promedio).
[13] La superficie se refiere solamente a los principales cultivos. En la producción se incluyen las cosechas sucesivas.
[14] Explotaciones del Estado y colectivas solamente.
[15] 1951 (primer promedio).
[16] 1956 (segundo promedio).

F = Cultivos extensivos.
O = Otros cultivos.

CUADRO

36. COLIFLORES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Cultivadas principalmente para la venta.
[4] Promedio de 4 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 2 años (primer promedio).
[7] La producción se refiere a las ventas efectivas.
[8] Promedio de 3 años (segundo promedio).
[9] 1952 (primer promedio).

F = Cultivos extensivos.
O = Otros cultivos.

37. FRIJOLES EN VERDE

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (segundo promedio).
[2] Promedio de 3 años (primer promedio).
[3] Cultivados principalmente para la venta.
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 4 años (primer promedio).
[6] Los datos de la producción se refieren a las ventas efectivas.
[7] 1950 (primer promedio).
[8] Promedio de 2 años (segundo promedio).
[9] Cultivados principalmente para la venta. Los frijoles destinados a l elaboración, que originalmente se indicaron en términos de su pes sin vaina, han sido convertidos a frijoles con vaina a razón de 200 po ciento.
[10] 1956 (segundo promedio).
[11] Incluidos los guisantes en verde.

S = Frijoles verdes.
G = Frijoles verdes para desgranar.
U = Frijoles cosechados en verde sin especificar.
F = Cultivos extensivos.
O = Otros cultivos.

38. GUISANTES EN VERDE

Encabezamientos: Notas. Continente y país. Superficie. Producción. Re dimiento.

Notas explicativas:

[1] Cultivos extensivos solamente.
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Cultivados principalmente para la venta.
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] Los datos sobre la producción se refieren a las ventas efectivas.
[8] Cultivados principalmente para la venta. Los guisantes en verde dest nados a la elaboración, y que originalmente se indicaron mediante peso sin vaina, han sido convertidos a guisantes con vaina a razón 250 por ciento.
[9] Explotaciones del Estado y colectivas solamente (1966).
[10] 1950 (primer promedio).
[11] 1956 (segundo promedio).

F = Cultivos extensivos.
O = Otros cultivos.

39. PEPINOS Y PEPINILLOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Re dimiento.

Notas explicativas:

[1] Cultivos extensivos solamente.
[2] Promedio de 3 años (primer promedio).
[3] Incluidos los cultivos cosechados en invernadero.
[4] 1955 (segundo promedio).
[5] Principalmente en invernadero.
[6] Promedio de 4 años (segundo promedio).
[7] Desde 1952 en adelante incluidos los cultivos cosechados en inv nadero.
[8] Promedio de 4 años (primer promedio).
[9] Promedio de 2 años (primer promedio).
[10] Promedio de 2 años (segundo promedio).
[11] En invernadero.

F = Cultivos extensivos.
O = Otros cultivos.

CUADRO

COSECHAS (Continuación)

40. CANTALUPOS Y OTROS MELONES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).
[2] En invernadero.
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] 1952 (primer promedio).
[6] 1956 (segundo promedio).
[7] Promedio de 4 años (primer promedio).
[8] Promedio de 3 años (segundo promedio).
[9] Promedio de 2 años (primer promedio).
[10] Incluidas las sandías.

F = Cultivos extensivos.
O = Otros cultivos.

41. SANDIAS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Incluidos los melones.
[2] Desde 1948 hasta 1951 inclusive, incluidos los melones.
[3] Desde 1948 hasta 1955 inclusive, incluidos los melones.
[4] Promedio de 4 años (segundo promedio).
[5] Incluidos también los melones (alrededor del 18 por ciento), y las calabazas de todas las variedades (alrededor del 30 por ciento).
[6] 1952 (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] Promedio de 3 años (primer promedio).
[9] Promedio de 2 años (primer promedio).
[10] 1956 (segundo promedio).

F = Cultivos extensivos.
O = Otros cultivos.

42. FRIJOLES SECOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1950 (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] 1948 (primer promedio).
[4] Promedio de 3 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] Promedio de 3 años (segundo promedio).
[8] 1952 (primer promedio).
[9] 1955 (segundo promedio).
[10] 1952 (segundo promedio).
[11] 1956 (segundo promedio).
[12] Promedio de 2 años (primer promedio).
[13] Ventas solamente.

ALONE = Cultivados separadamente.
MIXED = Cosechados con otros cultivos.
FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

43. GUISANTES SECOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] Incluidas otras legumbres secas.
[5] Promedio de 3 años (primer promedio).
[6] 1950 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Promedio de 3 años (segundo promedio).
[9] 1952 (segundo promedio).
[10] 1956 (segundo promedio).

ALONE = Cultivados separadamente.
MIXED = Cosechados con otros cultivos.

44. HABAS SECAS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

CUADRO

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 3 años (segundo promedio).
[5] 1950 (primer promedio).
[6] 1952 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] 1956 (segundo promedio).

45. GARBANZOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1952 (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (primer promedio).
[4] Promedio de 3 años (primer promedio).
[5] Incluidos los guisantes secos.

46. LENTEJAS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1956 (segundo promedio).
[2] Promedio de 4 años (primer promedio).
[3] 1949 (primer promedio).
[4] 1954 (segundo promedio).
[5] 1948 (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 3 años (primer promedio).

47. GUANDUES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 4 años (segundo promedio).

48. CAUPIES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 3 años (primer promedio).
[3] 1952 (segundo promedio).
[4] Promedio de 4 años (segundo promedio).
[5] 1956 (segundo promedio).
[6] 1948 (primer promedio).
[7] Incluidas otras legumbres secas.
[8] 1950 (primer promedio).
[9] Promedio de 3 años (segundo promedio).

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

49. VEZAS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1950 (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] 1948 (primer promedio).
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] 1951 (primer promedio).
[8] Promedio de 4 años (primer promedio).

50. ALTRAMUCES

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).

51. OTRAS LEGUMBRES Y LEGUMBRES SIN ESPECIFICAR

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

[4] Promedio de 2 años (primer promedio).
[5] 1952 (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Producción de vino natural calculada a razón del 70 % del peso de las uvas estrujadas.
[8] Promedio de 3 años (primer promedio).
[9] Promedio de 2 años (segundo promedio).

64. PASAS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Comprendidas las cantidades utilizadas para la destilación.

65. NARANJAS Y TANGERINAS, MANDARINAS Y CLEMENTINAS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Frutas cítricas de todas clases.
[2] 1950 (primer promedio).
[3] 1955 (segundo promedio).
[4] 1953 (segundo promedio).
[5] 1949 (primer promedio).
[6] 1954 (segundo promedio).
[7] Promedio de 4 años (primer promedio).
[8] 1952 (segundo promedio).
[9] Promedio de 4 años (segundo promedio).
[10] Promedio de 2 años (segundo promedio).
[11] Promedio de 2 años (primer promedio).
[12] 1952 (primer promedio).
[13] Promedio de 3 años (primer promedio).
[14] Promedio de 3 años (segundo promedio).
[15] En granjas y grandes haciendas.

66. TORONJAS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 3 años (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] 1952 (primer promedio).
[8] En granjas y grandes haciendas.
[9] Frutas cítricas de todas clases.

CUADRO

67. LIMONES, LIMAS Y OTRAS FRUTAS CITRICAS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1956 (segundo promedio).
[2] 1952 (segundo promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (segundo promedio).
[5] 1950 (primer promedio).
[6] 1955 (segundo promedio).
[7] Promedio de 3 años (segundo promedio).
[8] Promedio de 2 años (primer promedio).
[9] 1952 (primer promedio).
[10] Promedio de 4 años (primer promedio).
[11] Incluidas las toronjas.
[12] En granjas y grandes haciendas.
[13] Promedio de 3 años (primer promedio).

68. DATILES - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 3 años (segundo promedio).
[3] 1950 (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 4 años (primer promedio).

69. HIGOS, Producción total (equivalente en higos frescos)

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1950 (primer promedio).
[2] 1955 (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] 1952 (primer promedio).
[5] 1952 (segundo promedio).
[6] 1948 (primer promedio).
[7] Promedio de 2 años (segundo promedio).

70. HIGOS SECOS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] 1952 (segundo promedio).
[3] Promedio de 2 años (primer promedio).

71. BANANOS

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (primer promedio).
[4] Promedio de 3 años (segundo promedio).
[5] Exportaciones.
[6] 1949 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Incluidos los plátanos.
[9] 1948 (primer promedio).
[10] Promedio de 2 años (segundo promedio).
[11] 1951 (primer promedio).
[12] 1952 (segundo promedio).
[13] 1950 (primer promedio).
[14] 1953 (segundo promedio).
[15] 1952 (primer promedio).

72. PIÑAS - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).
[2] Promedio de 3 años (segundo promedio).
[3] 1952 (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 3 años (primer promedio).
[7] 1950 (primer promedio).
[8] 1956 (segundo promedio).
[9] 1951 (primer promedio).
[10] 1955 (segundo promedio).

CUADRO

COSECHAS (Continuación)

73. ACEITUNAS, Total - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio)
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 3 años (segundo promedio).
[6] Promedio de 3 años (primer promedio).

74. ACEITUNAS PARA LA PRODUCCION DE ACEITE DE OLIVA - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] 1952 (primer promedio).
[5] Promedio de 2 años (segundo promedio).

75. ACEITE DE OLIVA - Producción

Encabezamientos: Notas. Continente y país.

NOTA: La información de que se dispone respecto a la mayoría de los países no es suficiente para determinar si las cifras representan la producción total de aceite (incluso el extraído de los residuos de aceituna) o tan sólo la de aceites vírgenes obtenidos mecánicamente. En algunos casos, es posible que los datos se refieran únicamente a la producción de aceite comestible, en la que quizás vayan comprendidas algunas cantidades de aceite extraído del orujo.

Notas explicativas:

[1] 1950 (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 4 años (primer promedio).
[6] 1952 (primer promedio).
[7] Promedio de 3 años (segundo promedio).

76. ALMENDRAS DE PALMA - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).
[3] Almendras de babasú.
[4] 1952 (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Grandes haciendas solamente.
[7] Exportaciones.
[8] 1956 (segundo promedio).
[9] Promedio de 2 años (primer promedio).
[10] Promedio de 3 años (segundo promedio).
[11] Promedio de 3 años (primer promedio).
[12] Compras para la exportación.

77. ACEITE DE PALMA - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (segundo promedio)
[2] Promedio de 3 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (primer promedio).
[5] 1951 (primer promedio).
[6] Promedio de 3 años (segundo promedio).
[7] En las grandes haciendas solamente.
[8] 1952 (primer promedio).
[9] Promedio de 2 años (primer promedio).
[10] 1955 (segundo promedio).

78. SOJA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] 1950 (primer promedio).
[3] Promedio de 4 años (segundo promedio).

CUADRO

[4] En grano.
[5] 1952 (primer promedio).
[6] Promedio de 2 años (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] Promedio de 4 años (primer promedio).
[9] Compras para la exportación.
[10] Ventas solamente.

79. MANI O CACAHUETE (con cáscara)

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 2 años (primer promedio).
[7] 1956 (segundo promedio).
[8] 1952 (segundo promedio).
[9] Ventas solamente.
[10] Superficie sembrada.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

80. SEMILLA DE ALGODON

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] 1954 (segundo promedio).
[4] Años agosto-julio que terminan en el año indicado.
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio)
[7] 1948 (primer promedio).
[8] 1952 (primer promedio).
[9] Promedio de 2 años (segundo promedio).
[10] 1951 (primer promedio).
[11] Promedio de 3 años (segundo promedio).
[12] 1955 (segundo promedio).
[13] Cultivo mixto.

OFF = Datos oficiales.
ICAC = Las estimaciones basadas en los datos relativos al algodón en fibra han sido publicadas por el Comité Consultivo Internacional del Algodón. Dichas cifras se incluyen en los totales.

81. LINAZA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

NOTA: Los datos relativos a la superficie, salvo en caso que se especifique lo contrario, se refieren a la superficie total en la que se ha cosechado para fibra y para semilla. Los rendimientos se han calculado sobre la base de dicha superficie.

Notas explicativas:

[1] Lino cultivado para la obtención de semilla únicamente.
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 3 años (primer promedio).
[6] Promedio de 4 años (primer promedio).
[7] 1950 (primer promedio).
[8] 1948 (primer promedio).
[9] Promedio de 3 años (segundo promedio).

82. SEMILLA DE CAÑAMO - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (segundo promedio).
[5] 1950 (primer promedio).
[6] 1952 (primer promedio).
[7] Cáñamo de Bengala.

83. SEMILLA DE COLZA

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

CUADRO

COSECHAS (Continuación)

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Con el 18 por ciento de contenido de agua.
[4] Promedio de 3 años (segundo promedio).
[5] Incluida la semilla de mostaza.
[6] 1956 (segundo promedio).

84. SEMILLA DE SESAMO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1949 (primer promedio).
[2] 1954 (segundo promedio).
[3] Promedio de 4 años (segundo promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] 1956 (segundo promedio).
[8] Promedio de 3 años (primer promedio).
[9] Promedio de 3 años (segundo promedio).
[10] Ventas solamente.
[11] Producción comercial.

85. SEMILLA DE GIRASOL

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Superficie sembrada.
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 4 años (segundo promedio).
[6] 1954 (segundo promedio).
[7] 1952 (segundo promedio).
[8] 1956 (segundo promedio).
[9] 1952 (primer promedio).

ALONE = Cultivada sola.
MIXED = Cosechada con otros cultivos

86. RICINO

Encabezamientos: Nota. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] 1950 (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] 1952 (primer promedio).
[6] 1949 (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] 1956 (segundo promedio).
[9] 1952 (segundo promedio).
[10] Promedio de 2 años (primer promedio).
[11] 1951 (primer promedio).
[12] 1954 (segundo promedio).
[13] Exportaciones.
[14] 1948 (primer promedio).

87. NUECES DE TUNG - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1956 (segundo promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).

88. ACEITE DE TUNG - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1952 (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 4 años (segundo promedio).

89. COCO - Producción

Encabezamientos: Notas. Continente y país. Millones de cocos.

Notas explicativas:

[1] 1953 (segundo promedio).
[2] 1949 (primer promedio).

CUADRO

[3] 1954 (segundo promedio).
[4] Promedio de 3 años (segundo promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 3 años (primer promedio).
[7] Promedio de 2 años (primer promedio).
[8] 1952 (primer promedio).
[9] Promedio de 4 años (primer promedio).
[10] Promedio de 4 años (segundo promedio).
[11] 1950 (primer promedio).
[12] 1956 (segundo promedio).
[13] 1952 (segundo promedio).
[14] Incluidas Niue y Tokelao.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

90. COPRA - Producción

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1952 (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 3 años (segundo promedio).
[4] Promedio de 3 años (primer promedio).
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 2 años (segundo promedio).
[8] 1952 (segundo promedio).
[9] Exportaciones de coco y aceite de coco, en su equivalente en copra.
[10] Exportaciones de coco y aceite de coco, en su equivalente en copra; incluidas Niue y Tokelao.

91. CAFE

Encabezamientos: Notas. Continente y país. Superficie. Producción.

Notas explicativas:

[1] Exportaciones.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.
OFF = Datos oficiales relativos a los años civiles. Dichos datos están incluidos en los totales. Desde 1959 los datos expresados oficialmente en cerezas secas se han convertido a su equivalente en café limpio a razón del 50%.
BCI = Datos publicados por el Instituto Brasileño del Café sobre la campaña que comienza en julio del año indicado.

92. CACAO EN GRANO

Encabezamientos: Notas. Continente y país. Superficie. Producción.

Notas explicativas:

[1] Compras para la exportación.
[2] Incluida Papua.

OFF = Cifras oficiales correspondientes al año civil relativas a la primera parte del año emergente que se indica.
CSG = Los datos referentes al año agrícola de octubre a septiembre, se basan en estimaciones del Grupo de Estudio de la FAO sobre el Cacao. Dichos datos están incluidos en los totales.

93. TE

Encabezamientos: Notas. Continente y país. Superficie. Producción.

Notas explicativas:

[1] Superficie plantada.
[2] Té verde.
[3] De hoja verde. Incluidas las ventas a las granjas. Superficie plantada.
[4] Superficie plantada. Té verde.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

94. LUPULO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 4 años (primer promedio).

95. TABACO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

CUADRO

COSECHAS (Conclusión)

Notas explicativas:

[1] 1950 (primer promedio).
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 4 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 2 años (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] 1956 (segundo promedio).
[9] 1954 (segundo promedio).

96. ALGODON (Fibra)

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

NOTA: Este cuadro ha sido preparado con la colaboración del Comité Consultivo Internacional del Algodón.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] 1954 (segundo promedio).
[4] Años agosto-julio que terminan en el año indicado.
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] 1948 (primer promedio).
[8] 1952 (primer promedio).
[9] Promedio de 2 años (segundo promedio).
[10] 1951 (primer promedio).
[11] Promedio de 3 años (segundo promedio).
[12] 1955 (segundo promedio).
[13] Cultivo mixto.

OFF = Datos oficiales.
ICAC = Datos publicados por el Comité Consultivo Internacional del Algodón. Estas cifras están incluidas en los totales.

97. LINO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

NOTA: Salvo indicación en contrario, las cifras relativas a superficie se refieren al área total en cultivo para la obtención de fibra y semilla. Los rendimientos se han calculado a base de dicha superficie. La producción se refiere al lino agramado, incluyendo la estopa.

Notas explicativas:

[1] Unicamente la superficie cultivada para la obtención de fibra.
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Promedio de 4 años (primer promedio).
[7] Promedio de 3 años (segundo promedio).

98. CAÑAMO

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

NOTA: Salvo indicación en contrario, las cifras relativas a superficie se refieren al área total de cultivo para la obtención de fibra y semilla. Los rendimientos se han computado a base de dicha superficie. La producción se refiere a la fibra agramada, incluyendo la estopa.

Notas explicativas:

[1] 1948 (primer promedio).
[2] 1956 (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 4 años (primer promedio).
[6] 1950 (primer promedio).
[7] Promedio de 4 años (segundo promedio).
[8] Cáñamo de Bengala. Superficie cultivada para la producción de fibra únicamente.
[9] Cáñamo de Bengala.

99. YUTE

Encabezamientos: Notas. Continente y país. Superficie. Producción. Rendimiento.

Notas explicativas:

[1] 1956 (segundo promedio).
[2] 1952 (primer promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 3 años (segundo promedio).
[6] Promedio de 4 años (segundo promedio).

CUADRO

[7] Promedio de 4 años (primer promedio).
[8] Yute y kenaf.
[9] 1952 (segundo promedio).

JUTE = Yute verdadero (*Chorchorus* spp.).
KENAF = Kenaf, mesta y otros sucedáneos del yute (*Hibiscus* spp., *Urena lobata*, etc.).
OFF = Datos oficiales.
PJA = Datos facilitados por la Asociación del Yute del Paquistán. Estos datos se han incluido en los totales.

100. ABACA

Encabezamientos: Notas. Continente y país. Superficie. Producción.

Notas explicativas:

[1] Desde 1960 en adelante, incluida la cabuya.
[2] Los datos de producción representan las cantidades embaladas, según las comunicaciones del Servicio de Inspección de Fibras, aumentados en un 10% para abarcar también las fibras sin embalar.

101. AGAVES

Encabezamientos: Notas. Continente y país. Superficie. Producción.

Notas explicativas:

[1] Sisal y maguey.

SIS = Sisal (*Agave sisalana*).
HEN = Henequén (*Agave furcroydes* y *Agave lurida*).
LET = Sisal de El Salvador (*Agave letona*).
CAN = Maguey (*Agave cantala*).
F = En granjas y grandes haciendas.
V = Pueblos o aldeas.
A = Datos oficiales.
B = Estimaciones de la FAO basadas en fuentes comerciales y otras informaciones. Estas estimaciones se incluyen en los totales.

102. OTRAS FIBRAS DURAS

Encabezamientos: Notas. Continente y país. Superficie. Producción.

IXTLE = Palma istlé (*Samuela carnerosana*).
CAROA = Caroá (*Neoglazovia variegata*).
FIQUE = Fiqué (*Furcraea macrophylla*).
MAURT = Cáñamo de Mauricio (*Furcraea gigantea*).
FORM = Formio o lino de Nueva Zelandia, formio chileno y maolán (*Phormium tenax*).

103. CAUCHO NATURAL - Producción

Encabezamientos: Notas. Continente y país.

NOTA: Datos compilados en cooperación con el Grupo Internacional de Estudios sobre el Caucho.

Notas explicativas:

[1] Exportaciones.
[2] Promedio de 3 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 3 años (segundo promedio).

EST = Plantaciones.
SH = Pequeñas explotaciones.

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS

104A. RESUMEN DE LA POBLACION PECUARIA, PRINCIPALES ESPECIES, por continentes

Encabezamientos: Año y continente. Caballos. Mulas. Asnos. Ganado vacuno. Cerdos. Ovejas. Cabras. Búfalos. Camellos. En millones.

104B. RESUMEN DE LA POBLACION PECUARIA, PRINCIPALES ESPECIES por regiones

Encabezamientos: Año y continente. Caballos. Mulas. Asnos. Ganado vacuno. Cerdos. Ovejas. Cabras. Búfalos. Camellos. En millones.

105. RESUMEN DE LOS PRINCIPALES PRODUCTOS PECUARIOS, por regiones

Encabezamientos: Año y región. Carne (peso en canal). De vaca, ternera y búfalo. De cerdo. De carnero, cordero y cabra. Total. Leche. Huevos de gallina. Lana (grasienta).

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

NOTA: Los datos correspondientes a la U.R.S.S. y la China continental están incluidos en los totales mundiales, cuando lo están también en los que figuran en los cuadros de cada producto.

Notas explicativas:

[1] Los datos se refieren a la producción de carne de los animales del país, es decir, que comprenden el equivalente en carne de los animales exportados en pie, pero no el de los importados en pie.
[2] Total de las cantidades consignadas en las columnas anteriores, por lo que quedan excluidas la carne de aves y otras clases de carne (de caballo, liebre y caza).
[3] Leche de vaca, búfala, cabra y oveja.

106. CABALLOS, MULAS Y ASNOS, Número de cabezas
Encabezamientos: Continente y país.

NOTA: Año emergente de octubre a septiembre. La fecha de enumeración (mes) está indicada bajo el encabezamiento de los distintos países.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Utilizados en la agricultura.
[4] Promedio de 3 años (segundo promedio).
[5] 1947/48 (primer promedio).
[6] Promedio de 2 años (segundo promedio).
[7] En las explotaciones agrícolas.
[8] 1955/56 (segundo promedio).
[9] Incluida Madera.
[10] Incluida Madera.
[11] En las explotaciones agrícolas. A partir de 1952/53, Gran Bretaña solamente.
[12] Promedio de 4 años (segundo promedio).
[13] 1952/53 (segundo promedio).
[14] Promedio de 3 años (primer promedio).
[15] 1951/52 (segundo promedio).
[16] 1950/51 (primer promedio).
[17] 1949/50 (primer promedio).
[18] 1951/52 (primer promedio).
[19] 1953/54 (segundo promedio).
[20] 1948/49 (primer promedio).
[21] Animales registrados a efectos de tributación.
[22] Desde 1947/48 a 1952/53 la fecha de enumeración es a mediados de año; desde 1953/54 en adelante, diciembre.
[23] 1954/55 (segundo promedio).
[24] En granjas y grandes haciendas.
[25] Los datos se refieren a la región septentrional.
[26] En todas las explotaciones de 4 o más hectáreas.

107. GANADO VACUNO, Número de reses

Encabezamientos: Continente y país.

NOTA: Años emergentes: de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Incluido Berlín oriental.
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 3 años (segundo promedio).
[6] En las explotaciones agrícolas.
[7] 1955/56 (segundo promedio).
[8] Incluida Madera.
[9] Incluidos los búfalos.
[10] Promedio de 3 años (primer promedio).
[11] Promedio de 4 años (segundo promedio).
[12] 1950/51 (primer promedio).
[13] 1951/52 (segundo promedio).
[14] 1951/52 (primer promedio).
[15] 1952/53 (segundo promedio).
[16] En las explotaciones agrícolas. A partir de 1960/61, incluidos Alaska y Hawaii.
[17] 1949/50 (primer promedio).
[18] 1954/55 (segundo promedio).
[19] 1948/49 (primer promedio).
[20] 1953/54 (segundo promedio).
[21] Desde 1947/48 a 1952/53 la fecha de enumeración es a mediados de año; desde 1953/54 en adelante, diciembre.
[22] En granjas y grandes haciendas.
[23] Animales registrados a efectos de tributación.
[24] En todas las explotaciones de 4 o más hectáreas.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

108. VACAS: Número

Encabezamientos: Continente y país.

NOTA: Años emergentes de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

CUADRO

Notas explicativas:

[1] Vacas lecheras.
[2] 1950/51 (primer promedio).
[3] 1955/56 (segundo promedio).
[4] Incluidas las vacas de leche y de tiro.
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 2 años (segundo promedio).
[8] Vacas y vaquillas en período de gestación.
[9] No incluidas las reses de las explotaciones agrícolas de menos de 1 hectárea.
[10] Incluidas las búfalas.
[11] Promedio de 3 años (primer promedio).
[12] Vacas y vaquillas de un año o más.
[13] Toda clase de vacas, incluidas las vaquillas en período de lactación o de gestación.
[14] Promedio de 4 años (primer promedio).
[15] Promedio de 3 años (segundo promedio).
[16] 1951/52 (primer promedio).
[17] 1951/52 (segundo promedio).
[18] Desde 1960/61 incluidos Alaska y Hawaii.
[19] Todas las hembra de más de 3 años.
[20] Cifras basadas en el Censo de 1960.
[21] Reses destinadas principalmente a la producción de carne.
[22] En granjas y grandes haciendas.
[23] 1949/50 (primer promedio).
[24] 1954/55 (segundo promedio).
[25] Vacas y vaquillas de 1 año o más destinadas a la producción de leche
[26] Sin incluir las estimaciones relativas a la zonas urbanas.

A = Vacas y vaquillas de 2 años o más.
B = Vacas y vaquillas preñadas destinadas principalmente a la producción de leche.

109. CERDOS: Número

Encabezamientos: Continente y país.

NOTA: Años emergentes de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Incluido Berlín Oriental.
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 3 años (segundo promedio).
[6] En las explotaciones agrícolas.
[7] Incluida Madera.
[8] 1955/56 (segundo promedio).
[9] Promedio de 3 años (primer promedio).
[10] Promedio de 4 años (segundo promedio).
[11] 1950/51 (primer promedio).
[12] 1951/52 (segundo promedio).
[13] 1954/55 (segundo promedio).
[14] 1951/52 (primer promedio).
[15] 1952/53 (segundo promedio).
[16] En las explotaciones agrícolas. A partir de 1960/61, incluidos Alaska y Hawaii.
[17] 1949/50 (primer promedio).
[18] En las granjas únicamente.
[19] 1948/49 (primer promedio).
[20] Desde 1947/48 a 1952/53 la fecha de enumeración es a mediados de año; desde 1953/54 en adelante, diciembre.
[21] En granjas y grandes haciendas.
[22] Registrados a efectos de tributación.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

110. OVINOS: Número

Encabezamientos: Continente y país.

NOTA: Años emergentes de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] 1951/52 (segundo promedio).
[5] Incluido Berlín Oriental.
[6] Promedio de 3 años (primer promedio).
[7] Promedio de 3 años (segundo promedio).
[8] En las explotaciones agrícolas.
[9] Incluida Madera.
[10] 1955/56 (segundo promedio).
[11] 1952/53 (segundo promedio).
[12] 1951/52 (primer promedio).
[13] Promedio de 4 años (segundo promedio).
[14] 1950/51 (primer promedio).
[15] En las explotaciones agrícolas. A partir de 1961/62, incluidos Alaska y Hawaii.

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

[16] 1949/50 (primer promedio).
[17] 1954/55 (segundo promedio).
[18] 1948/49 (primer promedio).
[19] 1953/54 (segundo promedio).
[20] Datos proporcionados por el Ministerio de Hacienda. Animales de más de 1 año.
[22] Animales registrados a efectos de tributación.
[23] Desde 1947/48 a 1952/53 la fecha de enumeración es a mediados de año; desde 1953/54 en adelante, diciembre.
[24] Animales de más de 1 año registrados a efectos de tributación.
[34] Censo continuo.

FARM = En granjas y grandes haciendas.
VILL = Pueblos o aldeas.

111. CABRAS: Número

Encabezamientos: Continente y país.

NOTA: Años emergentes de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] 1948/49 (primer promedio).
[5] Animales de más de 6 meses.
[6] 1947/48 (primer promedio).
[7] Promedio de 3 años (primer promedio).
[8] Promedio de 3 años (segundo promedio).
[9] En las explotaciones agrícolas.
[10] Incluida Madera.
[11] 1955/56 (segundo promedio).
[12] Promedio de 4 años (segundo promedio).

[9] 1949/50 (primer promedio).
[10] Promedio de 4 años (segundo promedio).
[11] 1951/52 (primer promedio).
[12] 1954/55 (segundo promedio).

CUADRO

[13] Registrados a efectos de tributación.
[14] Promedio de 3 años (segundo promedio).
[15] Promedio de 4 años (primer promedio).
[16] Excluido el Estado de Victoria.

114. AVES DE CORRAL: POLLOS, PATOS, GANSOS Y PAVOS: Número

Encabezamientos: Continente y país.

NOTA: Años emergentes de octubre a septiembre. La fecha de enumeración (mes) se indica bajo el epígrafe del país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] Desde 1947/48 a 1958/59 solamente las gallinas ponedoras.
[3] 1949/50 (primer promedio).
[4] Promedio de 4 años (primer promedio).
[5] Aves adultas.
[6] Promedio de 2 años (segundo promedio).
[7] Aves adultas (incluidas las gallinas de Guinea).
[8] Promedio de 3 años (primer promedio).
[9] Incluidos los gansos y los pavos.
[10] Incluidas las gallinas de Guinea.
[11] 1953/54 (segundo promedio).
[12] 1951/52 (segundo promedio).
[13] Promedio de 3 años (segundo promedio).
[14] Promedio de 4 años (segundo promedio).
[15] Incluidos los gansos.
[16] En las explotaciones agrícolas solamente.
[17] 1948/49 (primer promedio).
[18] Incluida Madera.
[19] 1954/55 (segundo promedio).
[20] Desde 1947/48 a 1952/53 la fecha de enumeración es a mediados de año; desde 1953/54 en adelante, diciembre.
[21] 1951/52 (primer promedio).
[22] Solamente las gallinas ponedoras.
[23] Desde 1947/48 1 1956/57 la fecha de enumeración es octubre.
[24] 1952/53 (segundo promedio).
[25] 1950/51 (primer promedio).
[26] En las explotaciones agrícolas. A partir de 1962/63, incluidos Alaska y Hawaii.
[27] 1955/56 (segundo promedio).
[28] Los mayores productores solamente.
[29] 1947/48 (primer promedio).
[30] En granjas y grandes haciendas.
[31] Incluida Papua.

115. CARNE, de vaca y ternera, carnero y cordero y cerdo: Producción de los animales sacrificados

Encabezamientos: Continente y país.

Notas explicativas:

[1] Incluidas las grasas de matadero.
[2] Incluidas las grasas de matadero y los despojos comestibles.
[3] 1950 (primer promedio).
[4] Peso en canal calculado a partir del peso en vivo.
[5] Promedio de 3 años (primer promedio).
[6] Desde 1948 hasta 1956, producción comercial.
[7] 1956 (segundo promedio).
[8] Años que terminan el 30 de septiembre.
[9] Incluidas las grasas.
[10] Incluida la manteca de cerdo.
[11] Excluida la producción proveniente da matanzas hechas en casas y que que no han sido registradas.
[12] Peso total de los animales sacrificados.
[13] Promedio de 4 años (segundo promedio).
[14] 1952 (primer promedio)
[15] Excluidas Alaska y Hawaii.
[16] Promedio de 3 años (segundo promedio).
[17] Promedio de 2 años (segundo promedio).
[18] Promedio de 2 años (primer promedio).
[19] 1951 (primer promedio).
[20] Incluidos los despojos comestibles.
[21] 1949 (primer promedio).
[22] Promedio de 4 años (primer promedio).
[23] Producción total (1965, 1966 y 1967).
[24] Desde 1948 a 1957 en granjas y grandes haciendas solamente.
[25] Años que terminan el 30 de septiembre. En granjas y grandes haciendas.
[26] Años que empiezan el 1 de julio.

B = Carne de vaca, ternera y búfalo.
M = Carne de carnero y cordero, incluida la de cabra.
P = Carne de cerdo, incluido el tocino y el jamón, en su equivalente en carne fresca.
T = Total (B + M + P).
COM = Producción comercial, con exclusión de los animales sacrificados en la granja.
INS = Producción sometida a inspección, o sea las carnes de animales sacrificados bajo inspección oficial.
NS = Producción no especificada. Se cree que en la mayoría de los casos las cifras se refieren tan sólo a la producción sometida a inspección o a la comercial.

UADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

TOT = Producción total que comprende la carne procedente de los sacrificios comerciales y los efectuados en las granjas.

Los datos se refieren al peso en canal, excluyéndose la manteca de cerdo, el sebo y los despojos. Indican las cantidades de carne obtenidas de los animales sacrificados dentro de las fronteras de los países enumerados, cualquiera que fuese su procedencia. En varios casos, los datos relativos a ciertos años o a ciertas clases de carne, son idénticos a los del Cuadro 116, debido a que el comercio de animales en pie no fue lo bastante importante para modificar las cifras correspondientes a la producción total. Se han insertado estos datos, en la medida en que se disponía de los respectivos detalles, con el objeto de que cada serie quedase completa.

16. CARNE, de vaca y ternera, cerdo, carnero y cordero: Producción de los animales indígenas

Encabezamientos: Continente y país.

Notas explicativas:

[1] Incluidas las grasas de matadero.
[2] Incluidos los despojos comestibles y las grasas de matadero.
[3] Incluida la manteca de cerdo.
[4] Peso en canal calculado a partir del peso en vivo.
[5] Promedio de 3 años (primer promedio).
[6] 1950 (primer promedio).
[7] Años que terminan el 30 de septiembre.
[8] Promedio de 4 años (primer promedio).
[9] Incluidas las grasas.
[10] Incluido el equivalente en carne de las reses vacunas importadas para engorde.
[11] Excluida la producción proveniente da matanzas hechas en casas y que no han sido registradas.
[12] Peso en canal calculado a partir del peso total de los animales sacrificados.
[13] Promedio de cuatro años (segundo promedio).
[14] 1955 (segundo promedio).
[15] 1952 (primer promedio).
[16] Años que terminan el 30 de junio.
[17] Promedio de 2 años (segundo promedio).
[18] Excluidas Alaska y Hawaii.
[19] Promedio de 2 años (primer promedio).
[20] 1951 (primer promedio).
[21] Los datos se refieren a 70 ciudades solamente con poco más de 2 millones de habitantes.
[22] 1956 (segundo promedio).
[23] Incluidos los despojos comestibles.
[24] 1949 (primer promedio).
[25] Promedio de 3 años (segundo promedio).
[26] Años que comienzan el 1 de marzo. Excluida la producción comercial.
[27] Años que comienzan el 1 de marzo.
[28] En granjas y grandes haciendas.
[29] Años que terminan el 30 de septiembre. En granjas y grandes haciendas.
[30] 1952 (segundo promedio).
[31] Desde 1948 a 1957, en granjas y grandes hacendas solamente.
[32] Años que comienzan el 1 de julio.

B = Carne de vaca, ternera y búfalo.
M = Carne de carnero y cordero e incluida la carne de cabra.
P = Carne de cerdo, incluido el tocino y el jamón en su equivalente en carne fresca.
T = Total (T + M + P).
COM = Producción comercial, con exclusión de los animales sacrificados en la granja.
INS = Producción sometida a inspección, o sea las carnes de animales sacrificados bajo inspección oficial.
NS = Producción no especificada. Se cree que en la mayoría de los casos las cifras se refieren tan sólo a la producción sometida a inspección o a la comercial.
TOT = Producción total que comprende la carne procedente de los sacrificios comerciales y los efectuados en las granjas.

Los datos se refieren al peso en canal, excluyéndose la manteca de cerdo, el sebo y los despojos. Excepto en los casos en que se especifique lo contrario, los datos se refieren a la producción de carne obtenida de animales indígenas solamente, incluyéndose cuando sea pertinente el equivalente en carne de animales exportados en pie.
Los totales incluyen también estimaciones de la producción total relativa a la mayor parte de los países que han comunicado solamente producción comercial o sometida a inspección oficial.

17. OTRAS CARNES: despojos comestibles, aves de corral, caballo y diversas

Encabezamientos: Continente y país.

Notas explicativas:

[1] Incluidas las grasas de matadero.
[2] Promedio de 3 años (primer promedio).
[3] Promedio de 2 años (primer promedio).

CUADRO

[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 2 años (segundo promedio).
[6] 1956 (segundo promedio).
[7] Incluidos los despojos comestibles y las grasas de matadero.
[8] 1950 (primer promedio).
[9] Promedio de 3 años (segundo promedio).
[10] Peso en pie.
[11] Incluida la carne proveniente de otros animales pequeños.
[13] 1952 (segundo promedio).
[14] Año que termina el 30 de septiembre.
[14] Promedio de 4 años (primer promedio).
[15] 1952 (primer promedio).
[16] Año que termina el 30 de junio.
[17] Peso total de los animales sacrificados.
[18] Peso total de los animales sacrificados. Incluida la carne de caballo.
[19] 1949 (primer promedio).
[20] Producción sujeta a inspección.
[21] Peso en vivo. Años que terminan el 30 de septiembre.
[22] 1948 (primer promedio).
[23] Año que termina en septiembre, en las granjas y grandes haciendas.
[24] 1953 (segundo promedio).
[25] Desde 1948 a 1957 en las granjas y grandes haciendas.
[26] Años que empiezan el 1 de julio.

NOTA: Los datos relativos a la carne de caballo se facilitan en términos de peso en canal (excluyéndose así el sebo y los despojos); los datos relativos a la carne de aves de corral se indican generalmente en términos de carne destazada. Los relativos a los despojos se refieren únicamente a despojos comestibles y por carnes diversas se entiende la de otros animales tales como conejos, salvajina, renos o camellos, según el caso. Los despojos comestibles se refieren a la carne de animales sacrificados dentro de las fronteras nacionales. Por lo que importa a los despojos (comerciales, sujetos a inspección, etc.) véase la anotación correspondiente al nombre de cada país en el Cuadro 115.

118. ANIMALES SACRIFICADOS: Número

Encabezamientos: Continente y país.

Notas explicativas:

[1] Se refiere a 1961 (1963).
[2] Promedio de 4 años (primer promedio)
[3] Promedio de 3 años (segundo promedio).
[4] Promedio de 3 años (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 2 años (primer promedio).
[7] 1956 (segundo promedio).
[8] 1952 (primer promedio).
[9] Hasta 1956 incluidos los corderos.
[10] Año que termina el 30 de septiembre. Incluidos los terneros.
[11] Año que termina el 30 de septiembre. Incluidos los terneros.
[12] Año que termina el 30 de septiembre. Hasta 1958 incluidos los corderos.
[13] Año que termina el 30 de septiembre.
[14] Incluidos los corderos.
[15] Incluidos los terneros.
[16] Promedio de 4 años (segundo promedio).
[17] Incluidas las cabras.
[18] 1952 (segundo promedio).
[19] Se refiere a 1962 (1963).
[20] Se refiere a 1960 (1963).
[21] Año que termina el 30 de junio.
[22] 1950 (primer promedio).
[23] Excluidas Alaska y Hawaii.
[24] Los datos se refieren a 70 ciudades solamente con poco más de 2 millones de habitantes.
[25] 1951 (primer promedio).
[26] Incluidas las ovejas.
[27] Se refiere a 1958 (1963).
[28] 1949 (primer promedio).
[29] Desde 1948 a 1957 producción comercial solamente.
[30] Años que comienzan el 1 de marzo. Excluida la producción comercial.
[31] Años que comienzan el 1 de marzo.
[32] Se refiere a 1959 (1963).
[33] En las granjas y grandes haciendas.
[34] En las granjas y grandes haciendas. Incluidas las cabras.
[35] Año que termina el 30 de septiembre. En las granjas y grandes haciendas.
[36] 1948 (primer promedio).
[37] Según las listas de contribuciones. Años que terminan el 30 de junio.
[38] Año que empieza el 1 de julio.

A = Ganado vacuno.
B = Terneros.
C = Búfalos.
D = Ovejas.
E = Corderos.
F = Cabras.
G = Cabritos
H = Cerdos.
I = Caballos.
TOT = Total.
COM = Comercial.
INS = Bajo inspección oficial.
NS = No especificado (véase la nota al final del Cuadro 115).

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

119. PROMEDIOS DE PESO EN CANAL

Encabezamientos: Continente y país.

Notas explicativas:

[1] Incluidas las grasas de matadero.
[2] Promedio de 3 años (primer promedio).
[3] 1952 (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 3 años (segundo promedio).
[6] 1956 (segundo promedio).
[7] Hasta 1956, incluidos los corderos.
[8] Promedio de 4 años (primer promedio).
[9] Promedio de 2 años (segundo promedio).
[10] Incluida la manteca de cerdo.
[11] 1952 (segundo promedio).
[12] Promedio de 4 años (segundo promedio).
[13] Incluidos los corderos.
[14] Los pesos se refieren únicamente a las reses sacrificadas en mataderos públicos.
[15] Se refiere a 1959 (1963).
[16] Se refiere a 1962 (1963).
[17] 1955 (segundo promedio).
[18] Se refiere a 1961 (1963).
[19] Excluidas Alaska y Hawaii.
[20] 1953 (segundo promedio).
[21] Los datos se refieren a 70 ciudades solamente con poco más de 2 millones de habitantes.
[22] Se refiere a 1958 (1963).
[23] 1949 (primer promedio).
[24] 1948 (primer promedio).
[25] Años que comienzan el 1 de marzo.
[26] 1951 (primer promedio)
[27] En granjas y grandes haciendas. Incluidas las cabras.
[28] Años que terminan el 30 de septiembre. En las granjas y grandes haciendas.
[29] En granjas y grandes haciendas.
[30] Años que comienzan el 1 de julio.
[31] Años que terminan el 30 de septiembre.

A = Ganado vacuno.
B = Terneros.
C = Búfalos.
D = Ovejas.
E = Corderos.
F = Cabras.
G = Cabritos.
H = Cerdos.
I = Caballos.
TOT = Producción total.
COM = Producción comercial.
INS = Sometida a inspección.
NS = Sin especificar (véase la nota al final del Cuadro 115).

En general, se han excluido de los pesos en canal los despojos comestibles, la manteca de cerdo y el sebo.

120. PESO MEDIO EN VIVO DE LOS ANIMALES SACRIFICADOS

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Terneras de engorde.

A = Ganado vacuno.
B = Terneras.
C = Búfalos.
D = Ovejas.
E = Corderos.
F = Cabras.
G = Cabritos.
H = Cerdos.
I = Caballos.
TOT = Producción total.
COM = Producción comercial.
INS = Sometida a inspección.
NS = Sin especificar (véase la nota al final del Cuadro 115).

Los pesos en vivo se refieren a los animales sacrificados dentro de las fronteras nacionales.

121. PRODUCCION DE GRASAS DE CERDO COMESTIBLES

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Producción comercial.
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 3 años (segundo promedio).
[4] Promedio de 4 años (primer promedio).

CUADRO

[5] 1955 (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Año que termina el 30 de junio.
[8] Promedio de 3 años (primer promedio).
[9] Promedio de 2 años (segundo promedio).
[10] 1952 (primer promedio).
[11] 1948 (primer promedio).
[12] 1952 (segundo promedio).
[13] En granjas y grandes haciendas.
[14] Años que terminan el 30 de septiembre.

A = Cantidades declaradas como manteca corriente o grasa de cerdo.
B = Cantidades declaradas como grasa de cerdo no derretida.
T = Total (A + B).

122. PRODUCCION DE SEBO Y GRASAS DE CERDO NO COMESTIBLES

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 2 años (primer promedio).
[2] 1948 (primer promedio).
[3] Promedio de 3 años (segundo promedio).
[4] Promedio de 3 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] Excluidas las grasas de cerdo no comestibles.
[7] Excluido el sebo.
[8] 1956 (segundo promedio).
[9] Año que termina el 30 de junio.
[10] 1952 (segundo promedio).
[11] 1952 (primer promedio).
[12] Promedio de 2 años (segundo promedio).
[13] Producción comercial.
[14] Promedio de 4 años (primer promedio).
[15] Años que terminan el 30 de septiembre.

123. PRODUCCION DE LECHE: De vaca, búfala, oveja y cabra

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Incluye la leche mamada por los animales jóvenes.
[2] Promedio de 4 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Promedio de 3 años (primer promedio).
[5] Promedio de 3 años (segundo promedio).
[6] 1952 (segundo promedio).
[7] Promedio de 2 años (primer promedio).
[8] 1952 (primer promedio).
[9] 1956 (segundo promedio).
[10] Incluida la leche de búfala.
[11] Incluida la leche de cabra.
[12] Leche entregada a las lecherías.
[13] Promedio de 4 años (segundo promedio).
[14] 1948 (primer promedio).
[15] 1950 (primer promedio).
[16] 1954 (segundo promedio).
[17] Año que termina el 30 de junio.
[18] A partir de 1961, incluidas Alaska y Hawaii.
[19] Año que empieza el 1 de abril.
[20] Años que terminan el 31 de julio.
[21] 1951 (primer promedio).
[22] 1949 (primer promedio).
[23] Año que termina el 30 de septiembre.
[24] Años que terminan el 30 de junio. Sin incluir la leche empleada para alimentar al ganado. Producción en granjas y grandes haciendas solamente.
[25] 1953 (segundo promedio).
[26] Año que empieza el 1 de julio.
[27] Incluida Papua. Incluida la leche de cabra.
[28] De 1948 a 1960, años que terminan el 30 de junio; desde 1961, años que terminan el 31 de mayo.

F = En granjas y grandes haciendas.
V = Pueblos o aldeas.

NOTA: En general, en la producción no se incluye la leche mamada por los animales jóvenes, pero sí la que se les ha dado a beber.

124. RENDIMIENTO DE LECHE POR VACA LECHERA: Rendimiento anual

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Incluye la leche mamada por los animales jóvenes.
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 4 años (segundo promedio).
[4] Promedio de 4 años (primer promedio).
[5] Promedio de 3 años (primer promedio).
[6] Sin incluir la leche que se ha dado a beber a los animales jóvenes.
[7] Promedio de 2 años (segundo promedio).
[8] 1952 (primer promedio).

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

[9] Rendimiento medio de las vacas en período de lactación y en estado de gestación.
[10] 1952 (segundo promedio).
[11] 1953 (segundo promedio).
[12] 1949 (primer promedio).
[13] Años que terminan el 30 de junio.
[14] Años que empiezan el 1 de abril.
[15] 1950 (primer promedio).
[16] Promedio de 3 años (segundo promedio).
[17] 1954 (segundo promedio).
[18] 1951 (primer promedio).
[19] 1956 (segundo promedio).
[20] Años que terminan el 30 de septiembre. Leche de vacas de raza pura y raza cruzada solamente.
[21] Años que terminan el 30 de septiembre. Leche de vacas de raza pura y raza cruzada solamente.
[22] 1948 (primer promedio).
[23] En granjas y grandes haciendas.
[24] Años que empiezan el 1 de julio.
[25] De 1948 a 1960, años que terminan el 30 de junio; desde 1961, años que terminan el 31 de mayo.

A = Reses de raza común.
B = Reses de razas mejoradas.

NOTA: En general, en el rendimiento de leche no se incluye la mamada por los animales jóvenes, pero sí la que se les ha dado a beber.

125. PRODUCCION DE MANTEQUILLA

Encabezamientos: Notas Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio)
[2] Promedio de 4 años (segundo promedio).
[3] Producción en las granjas, insignificante.
[4] Promedio de 3 años (segundo promedio).
[5] Promedio de 3 años (primer promedio).
[6] Elaborada con leche de vaca, de búfala y de oveja
[7] Promedio de 2 años (segundo promedio).
[8] Promedio de 2 años (primer promedio).
[9] Desde 1961, incluidas Alaska y Hawaii.
[10] Solamente la producida bajo inspección oficial.
[11] Años que empiezan el 1 de abril.
[12] 1951 (primer promedio)
[13] Incluida la mantequilla clarificada (ghee).
[14] Años que terminan el 30 de septiembre.
[15] Consiste principalmente en mantequilla clarificada (ghee).
[16] 1952 (segundo promedio).
[17] Elaborada con leche de vaca y de búfala.
[18] Años que terminan el 30 de junio. En granjas y grandes haciendas.
[19] En granjas y grandes haciendas.
[20] 1956 (segundo promedio).
[21] Años que empiezan el 1 de julio.
[22] Años que terminan el 31 de mayo.

FARM = Producción en las granjas.
IND = Producción en las lecherías.
TOTAL = Producción total.

126. PRODUCCION DE QUESO

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1950 (primer promedio).
[2] 1955 (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 2 años (segundo promedio).
[5] 1948 (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 3 años (primer promedio).
[8] 1956 (segundo promedio).
[9] Promedio de 2 años (primer promedio).
[10] 1952 (primer promedio).
[11] 1953 (segundo promedio).
[12] Desde 1961, incluidas Alaska y Hawaii.
[13] Producción sometida a inspección oficial solamente.
[14] Años que empiezan el 1 de abril.
[15] Promedio de 3 años (segundo promedio).
[16] Años que terminan el 30 de septiembre.
[17] Años que terminan en junio. En granjas y grandes haciendas.
[18] Años que empiezan el 1 de julio.
[19] Años que terminan el 31 de mayo.

A = Queso de leche de vaca o de búfala, entera o parcialmente desnatada.
B = Queso de leche desnatada.
C = Queso de leche de oveja.
D = Queso de leche de cabra.

CUADRO

E = A + B + C + D.
F = A + B.
G = C + D.
H = A + B + C.
I = A + B.
J = A + C + D.

TOT = Queso elaborado en las granjas y en las lecherías.
IND = Queso producido en las lecherías solamente.

127. PRODUCCION DE LECHE CONDENSADA Y EVAPORADA

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1952 (primer promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Incluida la leche en polvo.
[5] Promedio de 2 años (segundo promedio).
[6] Promedio de 3 años (primer promedio).
[7] Promedio de 2 años (primer promedio).
[8] Promedio de 3 años (segundo promedio).
[9] Años que empiezan en abril. Leche condensada solamente.
[10] Años que terminan el 30 de septiembre.
[11] Años que empiezan el 1 de julio.
[12] Años que terminan el 31 de mayo. Incluida la leche condensada y la leche entera en polvo.

WHL = De leche entera y en parte desnatada.
SKM = De leche desnatada.
BUT = De leche procedente de los sueros de mantequilla.
WHE = De leche procedente de los sueros de queso.

128. PRODUCCION DE LECHE EN POLVO

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (segundo promedio).
[2] 1952 (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Incluida la leche evaporada procedente del suero de mantequilla y de suero de queso.
[5] 1956 (segundo promedio).
[6] Promedio de 3 años (primer promedio).
[7] Incluida la leche desnatada.
[8] Promedio de 3 años (segundo promedio).
[9] Promedio de 4 años (primer promedio).
[10] Leche entera y desnatada.
[11] Años que empiezan el 1 de abril.
[12] Años que terminan el 30 de septiembre.
[13] Incluida la leche procedente del suero de mantequilla. Años que terminan el 30 de septiembre.
[14] Años que empiezan el 1 de julio.
[15] Años que terminan el 31 de mayo.

WHL = Leche entera y en parte desnatada.
SKM = Leche desnatada.
BUT = Leche procedente de los sueros de mantequilla.
WHE = Leche procedente de los sueros de queso.

129. PRODUCCION DE HUEVOS DE GALLINA

Encabezamientos: Notas Continente y país. NO = Millones de huevos. WT = Centenares de toneladas métricas.

Notas explicativas:

[1] 1950 (primer promedio).
[2] 1955 (segundo promedio).
[3] Promedio de 4 años (segundo promedio).
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 2 años (primer promedio).
[6] Años que terminan el 30 de septiembre.
[7] Promedio de 3 años (primer promedio).
[8] Promedio de 4 años (primer promedio).
[9] Sin incluir los huevos destinados a la incubación ni las pérdidas.
[10] 1952 (primer promedio).
[11] 1948 (primer promedio).
[12] 1949 (primer promedio).
[13] Promedio de 3 años (segundo promedio).
[14] Años que terminan el 30 de junio.
[15] 1952 (segundo promedio).
[16] Desde 1961, comprendidas Alaska y Hawaii.
[17] 1953 (segundo promedio).
[18] 1951 (primer promedio).
[19] 1956 (segundo promedio).
[20] En granjas y grandes haciendas.
[21] Años que terminan el 30 de septiembre. En granjas y grandes haciendas.
[22] Años que terminan el 30 de septiembre. En granjas y grandes haciendas. Ventas declaradas.

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Continuación)

[23] Años que empiezan el 1 de julio.
[24] Incluida Papua.

NOTA: Salvo indicación en contrario, las cifras se refieren a la producción total, incluyendo los huevos destinados a incubación y las pérdidas.

130. NUMERO DE COLMENAS

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] 1950/51 (primer promedio).
[2] 1955/56 (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 4 años (segundo promedio).
[5] Promedio de 2 años (primer promedio).
[6] 1951/52 (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] Promedio de 3 años (segundo promedio).
[9] 1948/49 (primer promedio).
[10] 1949/50 (primer promedio).
[11] Promedio de 3 años (primer promedio).
[12] 1954/55 (segundo promedio).
[13] Colonias de abejas. Inglaterra y Gales solamente.
[14] Colonias de abejas.
[15] 1951/52 (segundo promedio).
[16] Incluida Hawaii (desde 1960/61 en adelante).
[17] 1952/53 (segundo promedio).
[18] 1953/54 (segundo promedio).

NOTA: Años emergentes: octubre/septiembre. La fecha de la enumeración (mes) se indica bajo el nombre de los países.

131. PRODUCCION DE MIEL

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (segundo promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 3 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 2 años (segundo promedio).
[6] 1950 (primer promedio).
[7] 1952 (primer promedio).
[8] 1956 (segundo promedio).
[9] 1955 (segundo promedio).
[10] Comprendida Hawaii, desde 1961.
[11] Años que terminan el 30 de septiembre.
[12] Promedio de 4 años (primer promedio).
[13] Años que empiezan el 1 de julio.
[14] Año que termina el 31 de marzo.

132. PRODUCCION DE CAPULLOS (FRESCOS) Y SEDA EN BRUTO

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).
[2] Promedio de 2 años (primer promedio).
[3] 1952 (segundo promedio).
[4] Promedio de 4 años (segundo promedio)
[5] Entregas al Estado.
[6] 1950 (primer promedio).
[7] Promedio de 4 años (primer promedio).
[8] 1956 (segundo promedio).
[9] Promedio de 3 años (segundo promedio).
[10] Se refiere a 1962 (63).
[11] 1953 (segundo promedio).
[12] Promedio de 3 años (primer promedio).

133. PRODUCCION DE LANA

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (segundo promedio).
[2] Promedio de 3 años (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] Entregas al Estado.
[5] Promedio de 2 años (primer promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Prescindiendo de la lana exportada en las pieles.
[8] Lana de esquila solamente.
[9] Promedio de 4 años (primer promedio).
[10] Lana de esquila solamente (1964, 1965, 1966).
[11] Incluido el pelo de otros animales (1963 a 1967).
[12] Excepto Terranova.

CUADRO

[13] Equivalente en lana grasienta de la lana de depilación, a razón de 170 por ciento del peso real.
[14] Comprendida Alaska.
[15] 1950 (primer promedio).
[16] 1956 (segundo promedio).
[17] 1952 (primer promedio).
[18] 1951 (primer promedio).

A = Lana grasienta.
B = Lana limpia.

134A. PRODUCCION DE CUEROS Y PIELES

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (primer promedio).
[2] Promedio de 3 años (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] Incluidas las pieles de ternera.
[5] 1956 (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Incluidas las pieles de cordero.
[8] 1952 (primer promedio).
[9] Compras efectuadas por las organizaciones comerciales socializadas.
[10] Compras efectuadas por las organizaciones comerciales socializadas.
[11] Promedio de 2 años (segundo promedio).
[12] Cueros y pieles de producción nacional utilizados por las tenerías.
[13] Comprendidos los « kips ».
[14] Promedio de 4 años (primer promedio).
[15] 1948 (primer promedio).
[16] 1954 (segundo promedio).
[17] Se refiere a 1958 (63).
[18] Se refiere a 1961 (63).
[19] Exportaciones.
[20] Se refiere a 1962 (63).

A = Pieles de caballo.
B = Pieles de ganado vacuno y búfalo.
C = Pieles de ternera.
D = Pieles de cordero.
E = Pieles de cabra.
F = Pieles de cerdo.
G = Piel de camello.
FRS = En fresco.
SAL = Pieles saladas.
DRY = Pieles secas.
NS = Sin especificar.

Tratándose de ciertos países, no está claro si las cifras referentes a las pieles de bovino incluyen las de ternera, ni tampoco si las pieles de cordero están o no comprendidas en las de ovinos y caprinos.

134B. PRODUCCION DE CUEROS Y PIELES (NUMERO)

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 3 años (segundo promedio).
[2] Promedio de 2 años (primer promedio).
[3] Promedio de 4 años (segundo promedio).
[4] Promedio de 2 años (segundo promedio).
[5] Promedio de 3 años (primer promedio).
[6] Incluidas las pieles de ternera.
[7] Incluidas las pieles de cordero.
[8] 1952 (primer promedio).
[9] Incluidas las pieles de cabra.
[10] Compras efectuadas por las organizaciones comerciales socializadas.
[11] Cueros y pieles de producción nacional utilizados por las tenerías.
[12] Comprendidos los « kips ».
[13] 1952 (segundo promedio).
[14] Ventas registradas.
[15] Ventas registradas. Incluidas las pieles de cordero.
[16] 1956 (segundo promedio).
[17] Se refiere a 1961 (63).
[18] Promedio de 4 años (primer promedio).
[19] Incluidas las pieles de cabrito.
[20] Se refiere a 1962 (63).
[21] Exportaciones.
[22] Exportaciones. Incluidas las pieles de cabra.
[23] 1950 (primer promedio).
[24] 1955 (segundo promedio).
[25] Años que empiezan el 1 de julio.
[26] Años que empiezan el 1 de julio. Incluidas las pieles de cordero.

A = Pieles de caballo.
B = Pieles de ganado vacuno y de búfalo.
C = Pieles de ternera.
D = Pieles de cordero.
E = Pieles de cabra.
F = Pieles de cerdo.
G = Piel de camello.
FRS = En fresco.

CUADRO

GANADOS, AVES DE CORRAL Y SUS PRODUCTOS (Conclusión)

SAL = Pieles saladas.
DRY = Pieles secas.
NS = Sin especificar.

Tratándose de ciertos países, no está claro si las cifras referentes a las pieles de bovinos incluyen las de ternera, ni tampoco si las pieles de cordero están o no comprendidas en las de ovinos y caprinos.

PROVISION DE COMESTIBLES

135. SUMINISTRO NETO DE ALIMENTOS POR PERSONA (en cantidad)

Encabezamientos: Región y país. Período. Cereales. Patatas y otras raíces amiláceas. Azúcares y dulces. Legumbres, nueces y semillas. Hortalizas. Frutas. Carne. Huevos. Pescado. Leche. Grasas y aceites (contenido graso). Gramos por día.

Notas explicativas:

T = Cifras provisionales.

[1] Los años emergentes vienen indicados por una barra de fracción. Así, 1951/-53/ corresponde a 1951/52-1953/54.
[2] En su equivalente de harina y arroz elaborado.
[3] En Bolivia se incluyen los bananos y los plátanos en el concepto de raíces amiláceas. Costa Rica, la República Dominicana, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, México, Nicaragua, Panamá, Surinam, Venezuela, el Camerún, Gabón, Ghana, la Costa de Marfil, Kenia, Madagascar, Tanganyika y Uganda incluyen los plátanos en el concepto de raíces amiláceas. Desde 1960-62, el Perú incluye los plátanos y los bananos desde 1966. Malaya y Singapur incluyen los bananos en el concepto de raíces amiláceas.
[4] En su equivalente de azúcar refinado; están incluidos el azúcar sin refinar, los jarabes, la miel y otros productos derivados del azúcar.
[5] Nueces en equivalente del producto descascarado; incluido el cacao en grano. China (Taiwán) incluye la cuajada de soja en su equivalente en soja. El Japón incluye el « miso » y el «shoyu» (preparaciones a base de soja) en su equivalente de soja, hasta 1953 peso de la porción comestible.
[6] En su equivalente de hortalizas frescas, pero incluyendo también las hortalizas elaboradas.
[7] En su equivalente de fruta fresca, pero incluyendo también la fruta elaborada.
[8] Incluso aves de corral y caza, expresados en peso en canal e incluyendo los despojos comestibles.
[9] En su equivalente en fresco.
[10] Estimación del peso de la parte comestible.
[11] Leche y productos lácteos, excepto mantequilla, expresados en su equivalente en leche fresca. Sin embargo, la República Arabe Unida, India y Paquistán incluyen la leche destinada a la elaboración de mantequilla.
[12] La República Arabe Unida, India y Paquistán no incluyen la mantequilla. Irlanda no incluye el aceite y la grasa de animales marinos en los años 1963/65 y 1967.
[13] Hasta 1958/59 no está incluido El Sarre.
[14] Se refiere al ejercicio económico abril-marzo.
[15] Años emergentes a partir de 1959/60.
[16] Los datos sobre el consumo de cocos, bananos y plátanos incluyen la población india que vive en la selva.
[17] Los datos se refieren a una superficie en que vive el 87 por ciento de la población.

136. SUMINISTRO NETO DE ALIMENTOS POR PERSONA
En calorías por día.

Encabezamientos: Región y país. Período. Cereales. Patatas y otras raíces amiláceas. Azúcares y dulces. Legumbres, nueces y semillas, Hortalizas. Frutas. Carne. Huevos. Pescado. Leche. Grasas y aceites (contenido graso). Gramos por día.

Notas explicativas:

T = Cifras provisionales.

[2] En su equivalente de harina y arroz elaborado.
[3] En Bolivia se incluyen los bananos y los plátanos bajo el concepto de raíces amiláceas. Costa Rica, la República Dominicana, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, México, Nicaragua, Panamá, Surinam, Venezuela, el Camerún, Gabón, Ghana, Costa de Marfil, Kenia, Madagascar, Tanganyika y Uganda incluyen los plátanos en el

CUADRO

PROVISION DE COMESTIBLES (Conclusión)

concepto de raíces amiláceas. Desde 1960-62, el Perú incluye los plátanos y los bananos desde 1966. Malaya y Singapur incluyen los bananos en el concepto de raíces amiláceas.
[4] En su equivalente de azúcar refinado: están incluidos el azúcar sin refinar, los jarabes, la miel y otros productos derivados del azúcar.
[5] Nueces en equivalente del producto descascarado, incluido el cacao en grano. China (Taiwán) incluye la cuajada de soja en su equivalente en soja. Japón incluye el « miso » y el « shoyu » (preparaciones a base de soja) en su equivalente de soja, hasta 1953 peso de la porción comestible.
[6] En su equivalente de hortalizas frescas, pero incluyendo también las hortalizas elaboradas.
[7] En su equivalente de fruta fresca, pero incluyendo también la fruta elaborada.
[8] Incluso aves de corral y caza, expresados en peso en canal e incluyendo los despojos comestibles.
[9] En su equivalente en fresco.
[10] Estimación del peso de la parte comestible.
[11] Leche y productos lácteos excepto mantequilla, expresados en su equivalente en leche fresca. Sin embargo, la República Arabe Unida, India y Paquistán incluyen la leche destinada a la elaboración de mantequilla.
[12] La República Arabe Unida, India y Paquistán no incluyen la mantequilla. Irlanda no incluye el aceite y la grasa de animales marinos en los años 1963-65 y 1967.
[13] Hasta 1958/59 no está incluido El Sarre.
[14] Se refiere al ejercicio económico abril-marzo.
[15] Años emergentes a partir de 1959/60.
[16] Los datos sobre el consumo de cocos, bananos y plátanos incluyen la población india que vive en la selva.
[17] Los datos se refieren a una superficie en que vive el 87 por ciento de la población.

MEDIOS DE PRODUCCION

139. ABONOS COMERCIALES NITROGENADOS: Producción

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio.

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] De 1948/49 a 1958/59, producción total de amoníaco.
[3] Campaña: agosto-julio (1964/65 a 1967/68).
[4] Campaña: mayo-abril. Incluye la producción utilizada para fines técnicos (1948/49 a 1963/64).
[5] Promedio de 3 años (primer promedio).
[6] Promedio de 4 años (primer promedio).
[7] 1950/51 (primer promedio).
[8] 1955/56 (segundo promedio).
[9] Promedio de 4 años (segundo promedio).
[10] Campaña: junio-mayo.
[11] Campaña: junio-mayo (1964/65 a 1967/68).
[12] Promedio de 3 años (segundo promedio).
[13] Año civil que se refiere a la primera parte del año emergente.
[14] La producción oficial de 3 753 000 toneladas de nitrógeno dada para 1967 parece que incluya ciertas cantidades utilizadas para fines técnicos.
[15] Producción destinada a abonos.
[16] No comprende el nitrato sódico.
[17] 1952/53 (primer promedio).
[18] 1956/57 (segundo promedio).
[19] Guano.
[20] Año civil que se refiere a la primera parte del año emergente (1964/65 y 1965/66).
[21] Promedio de 2 años (primer promedio).

140. ABONOS COMERCIALES NITROGENADOS: Consumo

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio.

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] 1952/53 (primer promedio).
[3] Promedio de 3 años (segundo promedio).
[4] Campaña: agosto-julio.
[5] Campaña: mayo-abril (1948/49 a 1963/64).
[6] Promedio de 4 años (primer promedio).
[7] Promedio de 2 años (segundo promedio).
[8] Promedio de 3 años (primer promedio).
[9] 1950/51 (primer promedio).
[10] 1955/56 (segundo promedio).
[11] Campaña: junio-mayo.
[12] Entregas de los fabricantes a los primeros compradores y entregas de abonos importados destinados a la aplicación directa o a su transformación en abonos compuestos por parte de otros fabricantes.

CUADRO

[13] Campaña: junio-mayo (1964/65, 65/66, 66/67, 67/68).
[14] Promedio de 4 años (segundo promedio).
[15] Campaña: abril-marzo.
[16] Promedio de 2 años (primer promedio).
[17] Año civil que se refiere a la primera parte del año emergente (1966/67, 1967/68).
[18] 1952/53 (segundo promedio).
[19] Incluidos Hawaii y Puerto Rico.
[20] 1949/50 (primer promedio).
[21] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1965/66, 1966/67).
[22] Enero-octubre solamente (1967/68).
[23] Año civil que se refiere a la primera parte del año emergente (1964/65, 1965/66, 1966/67, 1967/68).
[24] Año civil que se refiere a la primera parte del año emergente (1967/68).
[25] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1967/68).
[26] Año civil que se refiere a la primera parte del año emergente (1965/66).
[27] Año civil que se refiere a la primera parte del año emergente (1964/65).
[28] Año civil que se refiere a la primera parte del año emergente (1965/66, 66/67, 67/68).
[29] Desde 1948/49 hasta 1966/67 incluidos Malawi y Zambia. En 1967/68 se incluye sólo Malawi.
[30] Campaña: noviembre-octubre (1963/64, 1966/67).

141. ABONOS FOSFATADOS COMERCIALES: Producción

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio. En los datos no se incluye la fosforita molida.

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] Excepto otros fosfatos solubles en citratos.
[3] Promedio de 4 años (primer promedio).
[4] 1948/49 (primer promedio).
[5] Promedio de tres años (segundo promedio).
[6] Campaña: agosto-julio.
[7] Campaña: mayo-abril. Se incluye la producción para fines técnicos (1948/49 a 1963/64).
[8] Campaña: mayo-abril (1964/65, 1965/66, 1966/67, 1967/68).
[9] 1950/51 (primer promedio).
[10] Promedio de 4 años (segundo promedio).
[11] Promedio de 2 años (primer promedio).
[12] 1949/50 (primer promedio).
[13] Campaña: junio-mayo.
[14] Campaña: junio-mayo (1964/65, 1965/66, 1966/67, 1967/68).
[15] Promedio de tres años (primer promedio).
[16] 1951/52 (primer promedio).
[17] 1952/53 (primer promedio).
[18] 1956/57 (segundo promedio).
[19] Año civil que se refiere a la primera parte del año emergente (1966/67).
[20] Promedio de 2 años (segundo promedio).
[21] Guano.
[22] Año civil que se refiere a la primera parte del año emergente (1964/65, 1965/66).
[23] El año civil se refiere a la primera parte del año emergente (1965/66).
[24] Incluidos Malawi y Zambia.

142. ABONOS FOSFATADOS COMERCIALES: Consumo

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio. En los datos no se incluye la fosforita molida.

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] Promedio de 2 años (segundo promedio).
[3] Excepto otros fosfatos solubles en citratos.
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 3 años (segundo promedio).
[6] Incluida la fosforita molida.
[7] Campaña: agosto-julio.
[8] Campaña: mayo-abril.
[9] Promedio de 4 años (primer promedio).
[10] Promedio de 3 años (primer promedio).
[11] Promedio de 4 años (segundo promedio).
[12] 1950/51 (primer promedio).
[13] Campaña: junio-mayo.
[14] Los datos comprenden entregas de los fabricantes a los comerciantes o a los agricultores, en forma de abonos compuestos o de producto simple, además de los abonos importados destinados a la aplicación directa.
[15] Campaña: junio-mayo (1964/65, 1965/66, 1966/67, 1967/68).
[16] Campaña: abril-marzo.
[17] Año civil que se refiere a la primera parte del año emergente (1964/65 1965/66, 1966/67, 1967/68).
[18] Año civil que se refiere a la primera parte del año emergente (1966/67, 1967/68).
[19] 1952/53 (primer promedio).
[20] 1952/53 (segundo promedio).

UADRO

MEDIOS DE PRODUCCION (Continuación)

[91] 1949/50 (primer promedio).
[92] Incluidos Hawaii y Puerto Rico. A partir de 1964/65, total de P_2O_5 disponible.
[93] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1965/66, 1966/67).
[94] Enero-octubre solamente (1967/68).
[95] 1953/54 (segundo promedio).
[96] Año civil que se refiere a la primera parte del año emergente (1967/68).
[97] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1967/68).
[98] Año civil que se refiere a la primera parte del año emergente (1965/66).
[99] Año civil que se refiere a la primera parte del año emergente (1964/65).
[100] 1956/57 (segundo promedio).
[101] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1966/67, 1967/68).
[102] 1951/52 (primer promedio).
[103] Desde 1948/49 hasta 1966/67 incluidos Malawi y Zambia. En 1967/68 se incluye sólo Malawi.
[104] 1954/55 (segundo promedio).
[105] Campaña: noviembre-octubre (1963/64, 1966/67).

143. ABONOS POTASICOS COMERCIALES: Producción

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio

La producción de abonos potásicos sobrepasa la producción efectiva, debido a que, en casos no identificados, algunos productos utilizados para fines técnicos se han contado dos veces. (Se estima que dichos productos representan el 4 ó 5 por ciento de la cifra total.)

Notas explicativas:

[1] Polvo de cemento.
[2] Campaña: mayo-abril. Se incluye la producción para fines técnicos.
[3] Año civil que se refiere a la primera parte del año emergente.
[4] Promedio de 3 años (primer promedio).
[5] Polvo de cemento. Campaña: junio-mayo.
[6] Promedio de 2 años (primer promedio).
[7] Guano.
[8] Año civil que se refiere a la primera parte del año emergente (1964/65, 1965/66).

144. ABONOS POTASICOS COMERCIALES: Consumo

Encabezamientos: Notas. Continente y país.

NOTA: Años emergentes: julio-junio.

Notas explicativas:

[1] Año civil que se refiere a la primera parte del año emergente.
[2] 1952/53 (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] Promedio de 3 años (segundo promedio).
[5] Campaña: agosto-julio.
[6] Campaña: mayo-abril.
[7] Promedio de 3 años (primer promedio).
[8] Promedio de 4 años (segundo promedio).
[9] 1950/51 (primer promedio).
[10] 1955/56 (segundo promedio).
[11] Campaña: junio-mayo.
[12] Entregas de los fabricantes a los primeros compradores y entregas de abonos importados destinados a la aplicación directa o a su transformación en abonos compuestos por parte de otros fabricantes.
[13] Campaña: junio-mayo (1964/65, 1965/66, 1966/67, 1967/68).
[14] Campaña: abril-marzo.
[15] Promedio de 4 años (primer promedio).
[16] Año civil que se refiere a la primera parte del año emergente (1964/65, 1965/66, 1966/67, 1967/68).
[17] Año civil que se refiere a la primera parte del año emergente (1966/67, 1967/68).
[18] 1952/53 (primer promedio)
[19] Promedio de 2 años (segundo promedio).
[20] Incluidos Hawaii y Puerto Rico.
[21] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1965/66, 1966/67).
[22] Enero-octubre solamente (1967/68).
[23] 1953/54 (segundo promedio).
[24] Año civil que se refiere a la primera parte del año emergente (1967/68)
[25] Año civil que se refiere a la primera parte del año emergente (1963/64, 1964/65, 1967/68).
[26] Año civil que se refiere a la primera parte del año emergente (1967/68).
[27] Año civil que se refiere a la primera parte del año emergente (1964/65).
[28] 1956/57 (segundo promedio).
[29] Año civil que se refiere a la primera parte del año emergente (1965/66).
[30] 1951/52 (primer promedio).
[31] Desde 1948/49 hasta 1966/67 incluidos Malawi y Zambia. En 1967/68 se incluye sólo Malawi.
[32] Campaña: noviembre-octubre (1963/64, 1966/67).

CUADRO

145. TRACTORES EN SERVICIO EN LOS PAISES QUE SE INDICAN

Encabezamientos: Notas. Continente y país. Número.

Notas explicativas:

[1] Se refiere a 1961 (1963).
[2] 1950 (primer promedio).
[3] Promedio de 2 años (segundo promedio).
[4] 1951 (primer promedio).
[5] 1953 (segundo promedio).
[6] Promedio de 4 años (segundo promedio).
[7] Promedio de 2 años (primer promedio).
[8] En equivalente de tractores de 15 cv.
[9] Promedio de 3 años (segundo promedio).
[10] 1956 (segundo promedio).
[11] Desde 1948 hasta 1951 inclusive, se incluyen los motocultores.
[12] Promedio de 4 años (primer promedio).
[13] Excluidos los pertenecientes a los parques de tractores.
[14] En los parques de tractores de las explotaciones del Estado solamente (1948 a 1956).
[15] Promedio de 3 años (primer promedio).
[16] 1952 (primer promedio).
[17] Excluidos los tractores « inmóviles ».
[18] 1955 (segundo promedio).
[19] 1952 (segundo promedio).
[20] Incluidos los motocultores.
[21] Incluidos los tractores utilizados en los montes.
[22] Excepto Escocia e Irlanda del Norte (1963, 1964, 1966, 1967).
[23] Excepto Irlanda del Norte (1965).
[24] Incluidos los motocultores (1963).
[25] Se refiere a 1960 (1963).
[26] Incluidos los motocultores (1964, 1965, 1966).
[27] Se refiere a 1959 (1963).
[28] Incluidos los motocultores (1966).
[29] 1948 (primer promedio).
[30] Se refiere a 1961. Incluidos los motocultores (1963).
[31] Incluidos los tractores inservibles.
[32] 1949 (primer promedio).
[33] Se refiere a 1961. Tractores pertenecientes al Estado solamente (1963).
[34] 1954 (segundo promedio).
[35] En equivalente de tractores de 15 cv. Se refiere a 1962 (1963).
[36] Se refiere a 1962 (1963).
[37] En equivalente de tractores de 15 cv.
[38] Solamente Eritrea.
[39] Se refiere a 1962 (1963). Solamente Eritrea.
[40] Solamente Eritrea.
[41] Antigua Zona francesa solamente, para el período 1949-1952.
[42] Se refiere a 1959. Comprendidos los motocultores (1963).
[43] Se refiere a 1960. Incluidos los motocultores (1963).
[44] Se refiere a 1959. Tractores pertenecientes al Estado solamente (1963).
[45] Se refiere a 1960. Tractores pertenecientes al Estado solamente (1963).
[46] En granjas y grandes haciendas. Se refiere a 1962 (1963).
[47] En granjas y grandes haciendas. Incluidos los motocultores.
[48] Incluidos los motocultores (1967).
[49] En granjas y grandes haciendas.
[50] Incluidos los motocultores (1963, 1964).
[51] Incluidos los motocultores. Incluida Papua (1965, 1966).

WHEEL = Tractores de ruedas empleados en la agricultura.
CRAWL = Tractores de oruga empleados en la agricultura.
TOTAL = Tractores de rueda y de oruga empleados en la agricultura.
ALL = Tractores empleados en la agricultura y en otras actividades.

146. TRACTORES HORTICOLAS EN SERVICIO EN LOS PAISES QUE SE INDICAN

Encabezamientos: Notas. Continente y país. Número.

Notas explicativas:

[1] 1950 (primer promedio).
[2] Promedio de 4 años (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] 1952 (segundo promedio).
[5] Promedio de 3 años (primer promedio).
[6] 1956 (segundo promedio).
[7] Promedio de 3 años (segundo promedio).
[8] Promedio de 2 años (segundo promedio).
[9] Se refiere a 1960 (1963).
[10] Promedio de 4 años (primer promedio).
[11] 1949 (primer promedio).
[12] Se refiere a 1958 (1963).
[13] Excepto Escocia e Irlanda del Norte (1963, 1964).
[14] Excepto Irlanda del Norte (1965).
[15] Excepto Escocia e Irlanda del Norte. Incluido un cierto número de fresadoras agrícolas (1966, 1967).
[16] Se refiere a 1959 (1963).
[17] 1952 (primer promedio).
[18] Incluidos los motocultores pequeños (de peso inferior de 68 kg y de 3 a 3,5 cv de potencia).
[19] Se refiere a 1957 (1963).
[20] Se refiere a 1961. Sólo los de propiedad del Estado (1963).
[21] 1954 (segundo promedio).

CUADRO

MEDIOS DE PRODUCCION (Continuación)

[28] 1951 (primer promedio).
[29] Eritrea solamente. Se refiere a 1962 (1963).
[30] 1948 (primer promedio).
[31] Se refiere a 1962 (1963).
[32] Región occidental solamente (1964, 1965, 1966).
[33] No incluidos los utilizados en las grandes haciendas. Se refiere a 1962 (1963).
[34] Incluidas las azadas rotatorias.
[35] Se refiere a 1961 (1963).
[36] 1955 (segundo promedio).

147. COSECHADORAS-TRILLADORAS EN SERVICIO EN LOS PAISES QUE SE INDICAN

Encabezamientos: Notas. Continente y país. Número.

Notas explicativas:

[1] Se refiere a 1961 (1963).
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 4 años (primer promedio).
[4] Promedio de 2 años (primer promedio).
[5] Promedio de 4 años (segundo promedio).
[6] No incluye las cosechadoras-trilladoras que se encuentran en los parques de maquinaria.
[7] Promedio de 3 años (primer promedio).
[8] 1956 (segundo promedio).
[9] 1955 (segundo promedio).
[10] 1950 (primer promedio).
[11] Promedio de 3 años (segundo promedio).
[12] Se refiere a 1960 (1963).
[13] 1951 (primer promedio).
[14] Excepto Irlanda del Norte (1965).
[15] Se refiere a 1957 (1963).
[16] Se refiere a 1959 (1963).
[17] Excluidas las pequeñas cosechadoras desechadas (1965, 1966, 1967).
[18] Se refiere a 1961. Sólo las de propiedad del Estado (1963).
[19] 1954 (segundo promedio).
[20] Se refiere a 1962 (1963).
[21] 1952 (primer promedio).
[22] En granjas y grandes haciendas. Se refiere a 1962 (1963).
[23] Se refiere a 1960. En granjas y grandes haciendas (1963).
[24] 1949 (primer promedio).
[25] 1952 (segundo promedio).

148. ORDEÑADORAS MECANICAS EN SERVICIO EN LOS PAISES QUE SE INDICAN

Encabezamientos: Notas. Continente y país. Número.

Notas explicativas:

[1] Se refiere a 1961 (1963).
[2] 1953 (segundo promedio).
[3] Promedio de 2 años (primer promedio).
[4] Número de explotaciones que poseen ordeñadoras.
[5] Promedio de 3 años (primer promedio).
[6] Promedio de 4 años (primer promedio).
[7] 1956 (segundo promedio).
[8] Promedio de 2 años (segundo promedio).
[9] Promedio de 3 años (segundo promedio)
[10] 1950 (primer promedio).
[11] 1955 (segundo promedio).
[12] Se refiere a 1959 (1963).
[13] 1951 (primer promedio).
[14] Excluida Escocia e Irlanda del Norte. Número de explotaciones que poseen ordeñadoras. Se refiere a 1962 (1963).
[15] Se refiere a 1960. Número de máquinas (1963).
[16] Explotaciones del Estado y colectivas solamente. Número de máquinas.
[17] Se refiere a 1960 (1963).
[18] Se refiere a 1961. Número de explotaciones que poseen ordeñadoras (1963).
[19] Número de máquinas.
[20] Se refiere a 1960. Número de explotaciones que poseen ordeñadoras (1963).
[21] Se refiere a 1959. Número de explotaciones que poseen ordeñadoras (1963).
[22] 1952 (primer promedio).
[23] 1952 (segundo promedio).
[24] Se refiere a 1958 (1963).
[25] Número de explotaciones que poseen ordeñadoras (1967).
[26] Se refiere a 1962 (1963).
[27] Se refiere a 1958. Número de máquinas (1963).
[28] Se refiere a 1960. Eritrea solamente (1963).
[29] Promedio de 4 años (segundo promedio).

149. INSECTICIDAS: DDT (diclorodifeniltricloroetano) Y COMPUESTOS AFINES: Cantidades utilizadas o compradas por los agricultores. Componentes activos, salvo indicación en contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (primer promedio).
[2] Promedio de 2 años (segundo promedio).

CUADRO

[3] 1956 (segundo promedio).

[11] No se especifican los componentes activos. No comprende productos en polvo (1966, 1967).
[12] Importaciones.
[13] Promedio de 3 años (segundo promedio).
[14] Cantidades vendidas para toda clase de aplicaciones.
[15] 1952 (segundo promedio).
[16] Se refiere a 1962 (1963).
[17] Cantidades utilizadas únicamente por el Ministerio de Agricultura.
[18] 1955 (segundo promedio).

151. INSECTICIDAS: ALDRIN: Cantidades utlizadas o compradas por los agricultores. Componentes activos, salvo en los casos en que se especifique lo contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] No se especifican los componentes activos.
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (segundo promedio).
[4] No se especifican los componentes activos. El dato de 1963 se refiere al 1962.
[5] 1955 (segundo promedio).
[6] 1950 (primer promedio).
[7] Importaciones.
[8] 1952 (primer promedio).
[9] Promedio de 4 años (segundo promedio).
[10] 1954 (segundo promedio).
[11] 1956 (segundo promedio).
[12] Promedio de 2 años (primer promedio).
[13] Cantidades utilizadas únicamente por el Ministerio de Agricultura.
[14] Se refiere a 1962 (1963).
[15] Se refiere a 1961. No se especifican los componentes activos (1963).
[16] Se refiere a 1961 (1963).

152. INSECTICIDAS: DIELDRIN: Cantidades utilizadas o compradas por los agricultores. Componentes activos, salvo en los casos en que se especifique lo contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] No se especifican los componentes activos.
[2] Promedio de 2 años (segundo promedio).
[3] Promedio de 3 años (segundo promedio).
[4] Se refiere a 1960 (1963).
[5] Excluidos los polvos humectables (1966).
[6] Excluidos los productos granulosos (1967).
[7] Promedio de 4 años (segundo promedio).
[8] Importaciones.
[9] Promedio de 2 años (primer promedio).
[10] 1955 (segundo promedio).
[11] Cantidades utilizadas únicamente por el Ministerio de Agricultura.
[12] 1952 (primer promedio).
[13] Se refiere a 1962 (1963).
[14] 1956 (segundo promedio).
[15] No se especifican los componentes activos (1964).
[16] 1952 (segundo promedio).
[17] Se refiere a 1961 (1963).

CUADRO

MEDIOS DE PRODUCCION (Continuación)

153. INSECTICIDAS: CLORDANO: Cantidades utilizadas o compradas por los agricultores. Componentes activos, salvo en los casos en que se especifique lo contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 2 años (segundo promedio).

[7] No se especifican los componentes activos (1963).
[8] Producción industrial.
[9] Importaciones. No se especifican los componentes activos.
[10] Se refiere a 1962 (1963).
[11] 1951 (primer promedio).
[12] Importaciones (1967).
[13] 1952 (primer promedio).
[14] Promedio de 4 años (primer promedio).
[15] No se especifican los componentes activos (1964, 1965, 1966).
[16] 1956 (segundo promedio).
[17] No se especifican los componentes activos. Excluido el arsenito sódico.
[18] Promedio de 3 años (primer promedio).
[19] No se especifican los componentes activos (1967).

A = Cantidades vendidas para toda clase de aplicaciones.
B = Producción total.
C = Cantidades empleadas en la agricultura.

67. RODENTICIDAS: Cantidades utilizadas o compradas por los agricultores. Componentes activos, salvo en los casos en que se especifique lo contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] No se especifican los componentes activos (1963, 1964, 1966, 1967).
[2] Promedio de 4 años (segundo promedio).
[3] Se refiere a 1960 (1963).
[4] No se especifican los componentes activos.
[5] Promedio de 2 años (segundo promedio).
[6] Se refiere a 1962 (1963).
[7] Producción industrial.
[8] No se espcifican los componentes activos (1963, 1965, 1966, 1967).
[9] No se especifican los componentes activos. Se refiere a 1962 (1963).
[10] Se refiere a 1961. No se especifican los componentes activos (1963).

68. OTROS INSECTICIDAS Y PRODUCTOS PARA BALNEACION DEL GANADO: Cantidades utilizadas o compradas por los agricultores. Componentes activos, salvo en los casos en que se especifique lo contrario

Encabezamientos: Notas. Continente y país.

Notas explicativas:

[1] Promedio de 4 años (segundo promedio).
[2] 1952 (primer promedio).
[3] No se especifican los componentes activos.
[4] Promedio de 3 años (segundo promedio).
[5] Producción industrial. Los datos para 1966 y 1967 comprenden todos los pesticidas.
[6] Importaciones. No se especifican los componentes activos.
[7] Comprende todos los pesticidas. No se especifican los componentes activos.
[8] Insecticidas y fungicidas. No se especifican los componentes activos.
[9] Se refiere a 1962 (1963).
[10] Importaciones de insecticidas y fungicidas. No se especifican los componentes activos.
[11] Importaciones de todos los pesticidas. No se especifican los componentes activos.
[12] Importaciones de todos los pesticidas, excepto herbicidas. No se especifican los componentes activos.
[13] Comprende todos los pesticidas. No se especifican los componentes activos.

CUADRO

PRECIOS

169. TRIGO

Encabezamientos: Campaña. Año. Precios en monedas nacionales. Precios en centavos de dólar estadounidense por kilogramo.

[1] Sólo pago inicial.

Precios al productor

Argentina: Sobre vagón, en la dársena de Buenos Aires, precio para los productores fijado por el gobierno; de 1955 a 1960, de 1962 a 1963 y desde 1965, semiduro; 1961 y 1964, duro; de 1955 a 1959, Clase 2; 1960, de 1962 a 1963 y a partir de 1965, Clase 1; de 1955 a 1959, en sacos; desde 1960, a granel.

Bélgica: Precio medio al productor, excluyendo primas e impuestos, en los mercados principales.

Canadá: N° 1 Northern, en almacén Fort William-Port Arthur; precio total percibido por los productores en sus ventas a la Junta Canadiense del Trigo.

Francia: Precio interior del trigo del país de calidad media comercial, incluso impuestos y primas aplicables; desde julio de 1961, precio base oficial fijado a los productores; de agosto de 1961 a julio de 1962, precio base mínimo oficial a los productores; a partir de agosto de 1962, precio oficial garantizado de recompra.

Alemania, Rep. Fed. de: Precio medio ponderado a los productores; trigo y ventas de toda clase.

Irlanda: Precio al productor fijado por el gobierno por el trigo entregado en el punto de embarque más próximo a la granja o al almacén del comprador, por búshel de 60-63 libras, hasta junio de 1957, y de 61-62 libras a partir de julio de 1957, con un contenido de humedad de 22-25 por ciento.

Italia: Trigo blando, precio pagado a los productores en Padua.

Japón: Precio oficial a los productores, incluido embalaje.

Países Bajos: Precio medio al productor, 17 por ciento de humedad.

Sudáfrica: Precio oficial a los productores por el trigo de Clase B, Calidad I, en sacos, franco estación.

Suecia: Trigo de invierno, calidad media, promedio ponderado del precio oficial pagado a los productores, después de deducir la cuota de los agricultores para el seguro contra las malas cosechas.

República Arabe Unida: Calidad «Middling Hindi»; precio pagado a los productores fijado por el gobierno para el trigo con una pureza del 94 por ciento.

Reino Unido: Precio medio ponderado al productor incluidas las indemnizaciones abonadas con arreglo al *Home Grown Cereals Deficiency Payments Scheme.*

Estados Unidos: Precio medio al productor, incluso prima por préstamos no amortizados; sin incluir, a partir de 1964, los certificados para ventas internas y de exportación de 70 y 25 centavos, respectivamente.

Pág. 532:

Encabezamientos: Campaña. Año. Precios en monedas nacionales. Precios en centavos de dólar estadounidense por kilogramo.

Precios al por mayor

Australia: Calidad media comercial para el consumo interno; precio de venta de la Junta Australiana del Trigo a los molineros, franco estación.

Austria: Precio básico oficial al por mayor, incluso subsidios, Lonja de Viena.

Chile: Precio al por mayor del trigo blanco de la zona central, a granel, franco estación Santiago.

India: Precio al por mayor en Moga (Punjab).

México: Trigo del país, precio al por mayor en México, D.F.

Paquistán: Clase ordinaria, precio al por mayor en Lyallpur.

España: Precio medio al por mayor.

Turquía: Trigo blando, precio para entrega inmediata, Lonja de Estambul.

Precios de exportación

Australia: Calidad media comercial, a granel, precio de venta de la Junta Australiana del Trigo, f.o.b. puertos.

Canadá: N° 1 Northern, en almacén Fort William-Port Arthur; precio de venta (Clase II) de la Junta Canadiense del Trigo.

Estados Unidos: Trigo duro de invierno, N° 1, contenido ordinario de proteínas, f.o.b. puertos del Golfo.

Precios de importación

Reino Unido: I - Argentina, embarcado río arriba, fecha más próxima, c.i.f.
II - Australiano, embarque más próximo, c.i.f.

CUADRO

PRECIOS (Continuación)

170. CENTENO

Encabezamientos: Campaña. Año. Precios en monedas nacionales. Precios en centavos de dólar estadounidense por kilogramo.

Precios al productor

Argentina: N° 2, en sacos, sobre vagón, en la dársena de Buenos Aires; precio mínimo fijado por el gobierno.

Dinamarca: Hasta fines de agosto de 1958, promedio de las cotizaciones en la Lonja de Copenhague; a partir de septiembre de 1958, precio fijo según el Plan de Cereales.

Finlandia: Precio medio al productor, incluidos los subsidios.

219. FLETES MARITIMOS: A. - FLETES EN BARCOS VOLANDEROS, para los productos y las rutas que se indican

Encabezamientos: **Año. Cereales. Azúcar. Copra. Soja. Tarifas en la moneda del país de origen. Tarifas en dólares estadounidenses por 1 000 kilogramos.**

Notas explicativas:

[1] Adriático, incluida la descarga en Trieste; excluidos los servicios de navegación estadounidenses, cuyas tarifas son un 50-60 por ciento superiores a las indicadas en el Cuadro.
[2] A partir de 1961, la nueva serie no es comparable con la antigua y se expresa en dólares EE.UU. por 2 240 libras.

Pág. 612:

Notas explicativas

[1] **Incluye otros granos pesados.**
[2] **A granel o en sacos, excluidos impuestos.**
[3] **Carga bruta, excluidos impuestos.**
[4] **De 1950 a 1956 inclusive, a granel en sacos; a partir de 1957, carga mecanizada a granel.**
[5] **Por la ruta de El Cabo.**

219. FLETES MARITIMOS: B. - INDICES DE LOS FLETES PARA NAVEGACION DE GRAN ALTURA

Encabezamientos: **Año. Dinamarca. Alemania, República Federal de. Países Bajos. Noruega. Suecia. Reino Unido. Carga seca. General. Cereales Azúcar. Fertilizantes, Fletamentos, por viaje. Servicios regulares. Fletamentos, por tiempo determinado.**

NOTA: A fin de facilitar la comparabilidad internacional se volvieron a calcular los índices nacionales tomando como base 1963 = 100. Todos los índices se refieren al transporte de carga en barcos volanderos, salvo cuando se trata de Alemania, cuyos índices comprenden también las tarifas de las líneas regulares de navegación.

Dinamarca: Promedio ponderado de las tarifas para mercancías transportadas por barcos daneses procedentes de, o con destino a, puertos daneses. A las rutas elegidas se les ha atribuido un coeficiente uniforme para cada uno de los productos.

Alemania, Rep. Fed. de: Fletamentos por viaje: promedio ponderado de las tarifas para navíos de todos los pabellones con destino a, o procedentes de, Amberes, Hamburgo o un puerto intermedio. Servicios regulares: promedio ponderado de los fletes aplicados en rutas importantes con destino a, o procedentes de, puertos situados entre Amberes y Hamburgo y Bremen y Hamburgo.

Países Bajos: Promedio ponderado de las cotizaciones correspondientes a los productos descargados en los Países Bajos y transportados en buques de más de 500 toneladas de registro bruto.

Noruega: Fletamentos por viaje: promedio ponderado de las tarifas para determinadas mercancías transportadas por barcos de cualquier bandera sobre ciertas rutas del mundo. Hasta 1959 inclusive, a estas rutas se les han atribuido coeficientes iguales para cada producto. Desde 1960, coeficientes de ponderación obtenidos a partir de 4 500 condiciones de flete conocidas durante el período base julio 1965-junio 1966. Fletamentos por tiempo determinado: promedio para los contratos de fletamento inferiores a un año en los barcos que utilizan aceite (incluido el diesel) como combustible. Hasta 1959 inclusive, barcos que desplazan de 9 000 a 11 000 toneladas de peso muerto. A partir de 1960, barcos que desplazan de 10 000 a 25 000 toneladas de peso muerto con velocidad comprendida entre 10 y 16,5 nudos. Coeficientes de ponderación obtenidos durante el período base julio 1965-junio 1966

CUADRO

PRECIOS (Continuación)

Reino Unido: Fletamentos por viaje general: promedio ponderado de las tarifas para barcos de cualquier bandera en todas las rutas importantes del mundo por las que navegaba en 1960 la flota británica de barcos volanderos. Los coeficientes correspondientes a las rutas y a los productos se basan en la proporción relativa de los ingresos que por concepto de flete obtuvo la flota británica de barcos volanderos en 1960. Fletamentos por tiempo determinado: incluye sólo las tarifas para barcos de 9 000 toneladas de peso muerto o más que realizan viajes de ida y vuelta o por períodos no superiores a 9 meses.

220. FERTILIZANTES: A. - **Precios al por mayor**

Reino Unido: Partidas no inferiores a 2 toneladas, promedio de las cotizaciones en 4 mercados. Sin deducir los subsidios al productor. Hasta 1958 inclusive, 20,6 % de N; 1959, 20,8-21,0 % de N.; a partir de 1960, 21,0 % de N; de 1950 a 1962, con entrega en la estación ferroviaria más cercana al comprador; a partir de 1963, entregado en la granja.

Estados Unidos: Promedio de precios a granel, f.o.b., en fábricas del interior del país.

NITRATO AMONICO

Francia: 34,5 % de N, incluidos impuestos, f.o.b., fábrica.

Alemania, Rep. Fed. de: « Kalkammonsalpeter », a granel, precio al por mayor; hasta 1963, entregado en la estación ferroviaria del comprador; desde julio de 1964, en almacén y en lotes de 10-200 quintales; hasta junio de 1962 inclusive, 20,5 % de N; a partir de julio de 1962 hasta junio de 1967, 22 % de N; desde julio de 1967, 23 %. Sin deducir los subsidios al productor.

Reino Unido: Hasta 1959 inclusive, « Nitro-Chalk » para el consumo nacional, en partidas de 6 toneladas a granel; a partir de 1960, de cal; hasta 1962, inclusive, con entrega en la estación más cercana a la granja; a partir de 1963, entregada en granja; hasta 1961 inclusive, 15,5 % de N; a partir de 1962, 21 % de N. Sin deducir los subsidios al productor.

Estados Unidos: De producción nacional, 33,5 % de N, en sacos, f.o.b.

NITRATO SODICO

Estados Unidos: 16,0-16,3 % de N, importado en bruto, en sacos, f.o.b. sobre vagones, en almacenes portuarios, Nueva York.

UREA

Estados Unidos: 45 % de N, para la agricultura, en sacos, del productor al primer comprador, por vagón de 30 toneladas, entregado en localidades del este de los Estados Unidos, precio de cotización del viernes.

ESCORIAS DE DESFOSFORACION

Francia: 18 % de P_2O_5, a granel, por vagones, precio al por mayor inclusive impuestos, franco estación.

Alemania, Rep. Fed. de: 16 % de P_2O_5, a granel, precio al por mayor, en Aquisgrán-Rothe Erde, excluidos los sacos. Sin deducir los subsidios al productor.

Reino Unido: Hasta 1962 inclusive, 14 % de P_2O_5 para partidas no inferiores a 2 toneladas, promedio de las cotizaciones en cuatro mercados; de 1950 a 1962, entregadas en la estación ferroviaria más próxima al comprador; a partir de 1963, 12 % P_2O_5, entregadas en granja. Sin deducir los subsidios al productor.

SUPERFOSFATO CONCENTRADO

Pág. 615:

Encabezamientos: Campaña. Año. Fosfatados. Potásicos. Superfosfato, Muriato de potasa. Sulfato de potasa. Precios en monedas nacionales. Precios en centavos de dólar estadounidense por kilogramo.

Notas explicativas:

[1] Julio-junio.
[2] Julio-mayo.

Estados Unidos: Triple, pulverizado, 48 % o más de P_2O_5, precio al por mayor, con cláusula de avería parcial, a granel, f.o.b. East Tampa (Florida).

CUADRO

SUPERFOSFATO

Francia: 16 % de P_2O_5, a granel, en partidas de 20 toneladas, sobre vagón franco estación.

Alemania, Rep. Fed. de: 18 % de P_2O_5, soluble, a granel, partidas de 15 toneladas como mínimo, precio al por mayor, en Hildesheim-Mannheim/Ludwigshafen. A partir de noviembre de 1956, franco estación del destinatario. Sin deducir los subsidios al productor.

Italia: Del 16 al 18 % de P_2O_5, precio al por mayor en almacén, Milán.

Reino Unido: 18 % de P_2O_5, para partidas no inferiores a 2 toneladas, promedio de las cotizaciones en cuatro mercados; hasta 1962, entregado en la estación ferroviaria más próxima al comprador; a partir de 1963, entregado en granja. Sin deducir los subsidios al productor.

Estados Unidos: Menos del 22 % de P_2O_5, sin escoger, a granel, promedio de precios al por mayor f.o.b. Baltimore.

MURIATO DE POTASA

Francia: A granel, para usos agrícolas, precio al por mayor franco estación excluidos sacos e impuestos; hasta abril de 1959 inclusive, 58 % de K_2O; a partir de mayo de 1959, 60 % de K_2O.

Alemania, Rep. Fed. de: 40 % de K_2O, a granel, precio al por mayor, entregado en la estación ferroviaria del comprador. Sin deducir los subsidios al productor.

Estados Unidos: 60 % de K_2O, de producción nacional, a granel, promedio de precios al por mayor, f.o.b. en minas.

SULFATO DE POTASA

Francia: 48 % de K_2O, a granel, partidas de 20 toneladas, precio al por mayor en vagón, inclusive impuestos si ha lugar, franco estación.

Alemania, Rep. Fed. de: 48 % de K_2O, a granel, precio al por mayor entregado en la estación ferroviaria del comprador. Sin deducir los subsidios al productor.

220. FERTILIZANTES: B. - Precios que pagan los agricultores por 100 kilogramos de elementos nutrientes, 1961/62 a 1966/67 inclusive

Encabezamientos: Clase de fertilizante. Precios en monedas nacionales. Precios en dólares estadounidenses.

Fertilizantes nitrogenados:

Sulfato amónico
Nitrato amónico
Nitrato sódico
Nitrato de calcio
Cianamida cálcica
Urea

Fertilizantes fosfatados:

Superfosfato simple
Escorias de desfosforación

Fertilizantes potásicos:

Sulfato de potasio
Muriato
a) con más de 45 % de K_2O
b) de 20-45 % de K_2O
Sales crudas de potasio con un máximo de 20 % de K_2O

NOTA: Los precios son los pagados por el agricultor en la explotación y corresponden a los doce meses que empiezan el 1 de julio, habiéndose deducido los subsidios siempre que ha sido posible. Las excepciones de esta norma general se indican en las notas por países que figuran al pie.

Austria: Precios pagados en la estación ferroviaria más próxima por partidas de 20 toneladas. A los fabricantes y transportistas se les pagan subsidios sobre los fertilizantes fosfatados y potásicos. Los fertilizantes nitrogenados no gozan de subsidio alguno. Superfosfato simple: subsidio de 125 chelines (4,81 dólares) en 1962/63 y 1963/64 y de 95 chelines (3,65 dólares) en 1964/65 y 1965/66, 160 chelines (6,15 dólares) en 1966/67, y 80 chelines (3,08 dólares) en 1967/68. Superfosfato concentrado: subsidio de 95 chelines (3,65 dólares) en 1965/66, de 165 chelines (6,35 dólares) en 1966/67, y 80 chelines (3,08 dólares) en 1967/68. Escorias de desfosforación: subsidio de 228 chelines (8,79 dólares) en 1962/63, 219 chelines (8,43 dólares) en 1963/64, 174 chelines (6,70 dólares) en 1964/65, 187 chelines (7,19 dólares) en 1965/66, 194 chelines (7,47 dólares) en 1966/67, y 97 chelines (3,72 dólares) en 1967/68. Sulfato de potasio: subsidio de 95,7 chelines (3,68 dólares) en 1962/63, de 928, chelines (3,57 dólares) en 1963/64, de 71,4 chelines (2,75 dólares) en 1964/65, de 89,3 chelines (3,43 dólares) en 1965/66 y 1966/67, y de 41,1 chelines (1,58 dólares) en 1967/68. Muriato (*a*): 60 % K_2O: subsidio de 35 chelines (1,35 dólares) en 1962/63, de 39 chelines (1,51 dólares) en 1963/64, de 32 chelines (1,22 dólares) en 1964/65, de 35 chelines (1,35 dólares) en 1965/66 y 1966/67, y de 25 chelines (0,96 dólares) en 1967/68. Muriato (*b*): 40 % K_2O: subsidio de 47,5 chelines (1,83 dólares) en 1962/63, de 55 chelines (2,12 dólares) en 1963/64, de 37,5 chelines (1,44 dólares) en 1964/65, de 46 chelines (1,76 dólares) en 1965/66 y 1966/67, y de 35 chelines (1,35 dólares) en 1967/68.

CUADRO

PRECIOS (Continuación)

Bélgica: No se pagan subsidios. Nitrato sódico: de Chile. Muriato (*a*): 60 % de K_2O. Muriato (*b*): 40 % de K_2O. Superfosfato simple: de 1965/66 hasta 1967/68, y fertilizantes potásicos a granel.

Bulgaria: Año civil. Nitrato sódico: de Chile. Superfosfato: granulado.

Checoslovaquia: Precios al por mayor en el almacén más próximo o en la estación ferroviaria más cercana al agricultor. Año civil.

Pág. 618:

Dinamarca: Precios pagados por la urea en el puerto más próximo y por los demás fertilizantes en la estación ferroviaria más próxima. Sulfato amónico: subsidio de 18,1 coronas (2,62 dólares) en 1962/63 y 1963/64, de 16,7 coronas (2,42 dólares) en 1964.65, de 17,1 coronas (2,48 dólares) en 1965/66 de 15,7 coronas (2,27 dólares) en 1966/67 y de 16,2 coronas (2,23 dólares) en 1967.68. Nitratos amónicos: nitrato de amonio y calcio: subsidios de 17,3 coronas (2,50 dólares) en 1962/63 y 1963/64, de 16,2 coronas (2,35 dólares) en 1964/65, de 16,5 coronas (2,39 dólares) en 1965/66, de 15,0 coronas (2,17 dólares) en 1966/67 y de 15,8 coronas (2,18 dólares) en 1967.68. Nitrato sódico, de Chile: subsidio de 21,9 coronas (3,17 dólares) en 1962/63, de 22,5 coronas (3,26 dólares) en 1963/64, de 21,9 coronas (3,17 dólares) en 1964/65, de 23,1 coronas (3,34 dólares) en 1965/66, de 20,0 coronas (2,90 dólares) en 1966/67 y de 24,4 coronas (3,36 dólares) en 1967/68. Nitrato de calcio: subsidio de 18,7 coronas (2,71 dólares) en 1962/63 y 1963/64, de 17,4 coronas (2,52 dólares) en 1964.65, de 18,1 coronas (2,62 dólares) en 1965/66 y de 16,1 coronas (2,33 dólares) en 1966/67 y de 16,1 coronas (2,22 dólares) en 1967.68. Urea: subsidio de 21,5 coronas (3,11 dólares) en 1961/62, de 14,3 coronas (2,07 dólares) en 1962/63 y 1963/64, de 13,0 coronas (1,88 dólares) en 1964/65, de 13,3 coronas (1,93 dólares) en 1965/66 y de 11,7 coronas (1,69 dólares) en 1966/67 y de 12,2 coronas (1,68 dólares) en 1967/68. Superfosfato simple: subsidio de 11,7 coronas (1,69 dólares) en 1962/63 y 1963/64, de 11,1 coronas (1,61 dólares) en 1964/65, de 11,7 coronas (1,69 dólares) en 1965/66 y de 11,1 coronas (1,61 dólares) en 1966/67 y de 11,6 coronas (1,60 dólares) en 1967/68. Escorias de desfosforación: franco frontera germano-danesa: subsidios de 9,3 coronas (1,35 dólares) en 1962/63, de 10,0 coronas (1,45 dólares) en 1963/64 y 1964/65, de 10,6 coronas (1,53 dólares) en 1965/66 y de 10,0 coronas (1,45 dólares) en 1966/67 y de 11,0 coronas (1,52 dólares) en 1967/68. Sulfato de potasio: subsidio de 8,8 coronas (1,27 dólares) en 1962/63, de 9,0 coronas (1,30 dólares) en 1963/64, de 8,4 coronas (1,22 dólares) en 1964/65, de 8,6 coronas (1,24 dólares) en 1965/66 y de 7,8 coronas (1,13 dólares) en 1966/67 y de 8,2 coronas (1,13 dólares) en 1967/68. Muriato (*a*): 59 % de K_2O: subsidio de 5,8 coronas (0,84 dólares) en 1962/63, de 5,6 coronas (0,81 dólares) en 1963/64, de 5,4 coronas (0,78 dólares) en 1964/65, de 5,6 coronas (0,81 dólares) en 1965/66 y de 4,9 coronas (0,71 dólares) en 1966/67 y de 4,7 coronas (0,65 dólares) en 1967/68.

Finlandia: Precios en estación ferroviaria más próxima por partidas mínimas de 13 toneladas. Se pagan subsidios a los fabricantes de fertilizantes. Sulfato amónico: subsidio de 11,1 marcos (3,47 dólares) en 1962/63. Nitrato de calcio: subsidio de 61,3 marcos (19,6 dólares) en 1962/63 y de 0,22 marcos (0,06 dólares) en 1963/64. Superfosfato simple: subsidio de 11,5 marcos (3,59 dólares) en 1962/63, de 15,5 marcos (4,84 dólares) en 1963/64 y de 7,0 marcos (2,19 dólares) en 1964/65.

Francia: Hasta 1963/64 inclusive, precios pagados en la estación ferroviaria más próxima. A partir de 1964/65, precios pagados en almacén de venta al por menor, excepto en el caso de las escorias de desfosforación, que durante todo el período son a granel en partidas de 20 toneladas en una estación ferroviaria a más de 400 kilómetros de Thionville. Temporada: mayo/abril. No se pagan subsidios. Nitrato sódico: de Chile. Muriato (*a*): 60 % de K_2O.

Pág. 620:

Alemania, Rep. Fed. de: Precios pagados en la estación ferroviaria más próxima por partidas mínimas de 20 toneladas. En 1962/63 se pagaron a los agricultores subsidios de aproximadamente el 10 por ciento. Nitrato amónico: nitrato de amonio y calcio. Cianamida cálcica: oleosa. Muriato (*a*): 50 % de K_2O; (*b*) 40 % de K_2O.

Grecia: Sulfato amónico: subsidio de 9 dracmas (0,29 dólares) en 1964/65, de 76 dracmas (2,53 dólares) en 1965/66 y de 190 dracmas (6,33 dólares) en 1966/67, y de 214 dracmas (2,53 dólares) en 1967/68; en 1962/63 y 1963/64 no se pagaron subsidios. Nitrato amónico: subsidio de 38 dracmas (1,27 dólares) en 1964/65, de 179 dracmas (5,97 dólares) en 1965/66 y de 142 dracmas (4,73 dólares) en 1966/67, y de 125 dracmas (4,18 dólares) en 1967/68. Nitrato sódico de Chile; subsidio de 59 dracmas (1,97 dólares) en 1966/67. Nitrato de calcio: subsidio de 74 dracmas (2,47 dólares) en 1965/66, y de 107 dracmas (3,57 dólares) en 1966/67 y de 139 dracmas (4,65 dólares) en 1967/68; no se pagaron subsidios en 1962/63, 1963/64 y 1964/65. Superfosfato simple: subsidio de 114 dracmas (3,80 dólares) en 1962/63, de 100 dracmas (3,33 dólares) en 1963/64, de 143 dracmas (4,76 dólares) en 1964/65, de 140 dracmas (4,67 dólares) en 1965/66 y de 186 dracmas (6,20 dólares) en 1966/67 y 1967/68. Superfosfato concentrado: subsidio de 62 dracmas (2,07 dólares) en 1964/65, de 61 dracmas (2,03 dólares) en 1965/66 y de 87 dracmas (2,90 dólares) en 1966/67 y 1967/68. Sulfato de potasio: subsidio de 61 dracmas (2,03 dólares) en 1961/62, de 64 dracmas (2,13 dólares) en 1962/63, de 66 dracmas (2,20 dólares) en 1963/64, de 67 dracmas (2,25 dólares) en 1964/65, de 83 dracmas (2,76 dólares) en 1965/66 y de 110 dracmas (3,67 dólares) en 1966/67 y 1967/68

CUADRO

Hungría: Año civil. Precios en la estación de ferrocarril más próxima. Los fabricantes de fertilizantes perciben subsidios en forma de primas. Sulfato amónico: subsidio de 193 florint (8,21 dólares) en 1965 y 1966, y de 50 florint (2,11 dólares) en 1967. Nitrato amónico: subsidio de 193 florint (8,21 dólares) en 1965 y 1966, y de 47 florint (2,02 dólares) en 1967. Urea: subsidio de 197 florint en 1965 y 1966, y de 43 florint (1,83 dólares) en 1967. Superfosfato simple: subsidio de 294 florint (12,52 dólares) en 1965 y 1966, y de 314 florint (13,37 dólares) en 1967. Sulfato de potasio: subsidio de 223 florint (9,48 dólares) en 1967. Muriato (*a*): 60 por ciento de K_2O: subsidio de 133 florint (5,66 dólares) en 1967. No se mencionan los subsidios correspondientes a los otros años.

Islandia: Precios en almacén. Superfosfato concentrado: subsidio de 102 coronas (2,37 dólares) en 1962/63 inclusive. Muriato (*a*): 50 por ciento de K_2O, subsidio de 50 coronas (1,17 dólares) en 1962/63 inclusive.

Pág. 622:

Irlanda: Precios al por menor en almacén. Temporada abril/marzo. No se pagan subsidios por fertilizantes nitrogenados. Perciben subsidios el fabricante y el importador de abonos. Superfosfato simple: granulado; comprende precios de los sacos de yute no susceptibles de devolución; subsidio de 2,84 libras (7,95 dólares) en 1962/63, 1963/64, 1964/65 y 1965/66, de 3,06 libras (8,57 dólares) en 1966/67, y de 3,06 libras (8,12 dólares) en 1967/68. Escorias de desfosforación: subsidio de 1,63 libras (4,57 dólares) en 1962/63, 1963/64, 1964/65, y 1965/66 y de 1,89 libras (5,08 dólares) en 1966/67 y de 1,81 libras (4,81 dólares) en 1967/68. Sulfato de potasio: subsidio de 0,83 libras (2,31 dólares) en 1962/63, 1963/64, 1964/65, 1965/66 y 1966/67, y de 0,83 libras (2,19 dólares) en 1967/68. Muriato (*a*): 60 por ciento de K_2O: subsidio de 0,83 libras (2,30 dólares) en 1962/63, 1963/64, 1964/65, 1965/66 y 1966/67, y de 0,82 libras (2,17 dólares) en 1967/68.

Italia: No se pagan subsidios. Nitrato sódico: de Chile. Muriato (*a*): 50/52 por ciento de K_2O; (*b*): 40/42 por ciento de K_2O.

Luxemburgo: Precios en la estación ferroviaria más próxima. No se pagan subsidios. Nitrato sódico: de Chile. Muriato (*a*): 60 por ciento de K_2O; (*b*): 40 por ciento de K_2O. Sales crudas de potasio: 20 por ciento de K_2O.

Malta: Precios medios al por mayor en sacos de 50 ó 100 kilogramos.

Pág. 624:

Países Bajos: Fertilizantes fosfatados y potásicos: abril-mayo. No se pagan subsidios. Nitrato sódico: de Chile. Muriato (*a*): 60 por ciento de K_2O; (*b*): 40 por ciento de K_2O.

I - Precios al por menor en almacén. El precio del muriato con 20 por ciento de K_2O era de 41,0 florines (11,3 dólares) en 1962/63 y de 42,0 florines (11,6 dólares) en 1963/64.

II - Precios en explotación. El precio del muriato con 20 % de K_2O era de 42,5 florines (11,7 dólares) en 1962/63, de 43,5 florines (12,0 dólares) en 1963/64, de 45,0 florines (12,4 dólares) en 1964/65, de 46,0 florines (12,7 dólares) en 1965/66 y de 45,5 florines (12,6 dólares en 1966/67, y de 45,0 florines (12,4 dólares) en 1967/68.

Noruega: Promedio ponderado de los precios en varios distritos (una tercera parte de las ventas al por menor en almacén). Se pagan subsidios a las agencias de transporte, a los pequeños cultivadores y a los fabricantes e importadores de fertilizantes. Nitrato amónico: nitrato de amonio y calcio. Superfosfato simple: subsidio de 45,6 coronas (6,38 dólares) en 1962/63 hasta 1967/68 inclusive. Escorias de desfosforación: subsidio de 42,9 coronas (6,01 dólares) en 1962/63 hasta 1967/68 inclusive. Cantidades en concepto de subsidio no indicadas para sulfato de potasio y muriato (*a*): 50 por ciento de K_2O. Muriato (*b*): 40 por ciento de K_2O: subsidio de 8 coronas (1,12 dólares) en 1962/63 hasta 1967/68 inclusive.

Polonia: Año civil. Muriato (*a*): 48/52 por ciento de K_2O. Muriato (*b*): 38/42 por ciento de K_2O.

Pág. 626:

Polonia: Año civil. Urea: hasta 1963 inclusive: 42 por ciento de N. Superfosfato simple: granulado.

Portugal: Precios pagados en la estación ferroviaria más próxima. Temporada: 1962/63, agosto-julio; a partir de 1963/64, julio-junio. Se pagan subsidios a fabricantes de fertilizantes. Cianamida cálcica: subsidio de 473 escudos (16,5 dólares) en 1962/63. Sulfato potásico: subsidio de 70 escudos (2,4 dólares) en 1962/63. Muriato (*a*): 50 por ciento de K_2O; subsidio de 62 escudos (2,2 dólares) en 1962/63.

España: Precios pagados en la estación ferroviaria más próxima. Un subsidio por gastos de transporte uniforma en todo el país los precios de los abonos nitrogenados y de las escorias de desfosforación vendidos a los agricultores. Además, los cultivadores de trigo reciben un subsidio por los abonos nitrogenados, el superfosfato cálcico y las escorias de desfosforación. Nitrato amónico: nitrato de amonio y calcio. Superfosfato simple: hasta 1963/64 inclusive, precios f.o.b. fábrica a granel. Nitrato sódico, de Chile. Cianamida cálcica: oleosa. Muriato (*a*): 50 por ciento de K_2O.

Suecia: Precios pagados en la estación ferroviaria más próxima. Temporada: junio-mayo. No se pagan subsidios. Nitrato amónico: nitrato de amonio y calcio. Nitrato sódico: de Chile. Superfosfato, a partir de 1964/65, granulado. Muriato (*a*): 1961/62 a 1963/64 inclusive: 50 por ciento de K_2O; a partir de 1964/65, 60 por ciento de K_2O.

CUADRO

PRECIOS (Continuación)

Pág. 628:

Suiza: Precios en la estación ferroviaria más próxima por partidas de 10 toneladas. No se pagan subsidios. Muriato (*b*): 40 por ciento de K_2O.

Reino Unido: Temporada: 1963/64, julio-junio; desde 1964/65, junio-mayo. Precios por partidas de 6 toneladas. Sulfato amónico y nitrato sódico: subsidio de 3,77 libras (10,6 dólares) en 1962/63, de 3,53 libras (9,9 dólares) en 1963/64, de 3,32 libras (9,3 dólares) en 1964/65 y de 3,12 libras (8,7 dólares) en 1965/66 y 1966/67, y de 2,91 libras (7,52 dólares) en 1967/68. Nitrato amónico: nitrato de amonio y calcio: subsidio de 3,75 libras (10,5 dólares) en 1962/63, de 3,50 libras (9,8 dólares) en 1963/64, de 3,25 libras (9,1 dólares) en 1964/65 y de 3,5 libras (6,7 dólares) en 1965/66 y 1966/67, y de 2,85 libras (7,37 dólares) en 1967/68. Cianamida cálcica: subsidio de 3,86 libras (10,8 dólares) en 1962/63, de 3,61 libras (10,1 dólares) en 1963/64, de 3,40 libras (9,5 dólares) en 1964/65 y de 3,12 libras (8,7 dólares) en 1965/66 y 1966/67, y de 2,91 libras (7,52 dólares) en 1967/68. Superfosfato simple:: subsidio de 2,99 libras (8,4 dólares) en 1962/63, de 2,79 libras (7,8 dólares) en 1963/64, de 2,63 libras (7,4 dólares) en 1964/65 y de 2,46 libras (6,9 dólares) en 1965/66 y 1966/67, y de 2,34 libras (6,05 dólares) en 1967/68. Escorias de desfosforación: subsidio de 2,02 libras (5,7 dólares) en 1962/63, de 2,05 libras (5,7 dólares) en 1963/64, de 1,84 libras (5,2 dólares) en 1964/65 y de 1,64 libras (4,3 dólares) en 1965/66 y 1966/67, y de 1,60 libras (4,14 dólares) en 1967/68. Fertilizantes potásicos: en 1967/68, franco en vagón o en camión, en puesto o instalaciones portuarias.

Isla de Man: Campaña junio-mayo. Precios pagados en la estación ferroviaria más próxima. Se conceden subsidios a los agricultores por cantidades totales no inferiores a 200 kilogramos de fertilizantes pagándose a los fabricantes y comerciantes locales solamente. Superfosfato simple y superfosfato concentrado (47 por ciento de P_2O_5): subsidio de 3,49 libras (9,8 dólares) en 1962/63, de 2,79 libras (7,8 dólares) en 1963/64, de 2,63 libras (7,4 dólares) en 1964/65 y de 2,46 libras (6,8 dólares) en 1965/66 y 1966/67, y de 2,34 libras (6,04 dólares) en 1967/68. Escorias de desfosforación: subsidio de 1,72 libras (4,8 dólares) en 1962/63, de 193 libras (5,4 dólares) en 1963/64, de 1,80 libras (5,0 dólares) en 1964/65 y de 1,68 libras (4,7 dólares) en 1965/66 y 1966/67, y de 1,49 libras (3,86 dólares) en 1967/68. Sulfato potásico y muriato (60 por ciento de K_2O: subsidio de 1,32 libras (3,7 dólares) en 1962/63, de 1,23 libras (3,4 dólares) en 1963/64, de 1,16 libras (3,2 dólares) en 1964/65 y de 1,09 libras (3,1 dólares) en 1965/66 y 1966/67, y de 1,02 libras (2,63 dólares) en 1967/68.

Yugoslavia: Año civil. Precios pagados por los agricultores, deducidos los subsidios. Nitrato amónico: nitrato de amonio y calcio.

Pág. 630:

Barbada: Precios en almacén al por menor. No se pagan subsidios. Nitrato amónico. Nitrato de amonio y sulfato.

Honduras británico: Precios en almacén al por menor. No se pagan subsidios. Muriato: 61/62 por ciento de K_2O.

Canadá: Precios durante los meses de primavera: precios de los fabricantes f.o.b. fábrica. No se pagan subsidios. Nitrato sódico de Chile.

Costa Rica: Precios en almacén. No se pagan subsidios. Nitrato sódico: de Chile.

República Dominicana: Precios en almacén. No se pagan subsidios.

El Salvador: 1962/63, precios en almacén; 1966, año civil, c.i.f. valor de importación. No se pagan subsidios. Nitrato sódico: de Chile.

Guatemala: Año civil. Precios c.i.f. puerto de entrega. No se pagan subsidios.

Honduras: No se pagan subsidios.

Jamaica: Año civil 1965 y 1966, c.i.f., precios de importación; 1967, precios pagados por los agricultores, más gastos de transporte.

Pág. 632:

Martinica: No se pagan subsidios.

México: Precios f.o.b. ex fábrica. No se pagan subsidios. Nitrato amónico, urea y superfosfato concentrado, en sacos.

Nicaragua: Precios al por menor en almacén. Año civil. No se pagan subsidios. Nitrato sódico: de Chile.

Panamá: Año civil. No se pagan subsidios.

Puerto Rico: Se pagan subsidios sin deducir de los precios a los agricultores de las plantaciones de café, a razón de 15 dólares por cuerda, por renovación de cultivos de tres a cuatro años de edad y a razón de 7,50 dólares por cuerda por otros cultivos. Se pagan 30 dólares por tonelada de fertilizantes para la plantación de pasto « kudzu ». Nitrato sódico: de Chile y sintético.

Estados Unidos: Precios pagados por los agricultores en distintos puntos de entrega. El Programa de Conservación Agrícola prevé una participación en los gastos de fertilizantes hechos por los agricultores, así como en los de otros materiales indispensables, pero no se la considera como subsidio. Nitrato sódico: de Chile y sintético.

Argentina: No se pagan subsidios.

Chile: Año civil. Los precios que se indican para el nitrato sódico de Chile se cotizan en la estación ferroviaria más próxima del agricultor con un 30 por ciento de subsidio deducido en 1962. Los precios que se consignan para fertilizantes fosfatados y potásicos se cotizan en almacenes del Banco de la Nación, con un subsidio del 50 por ciento deducido en 1962.

CUADRO

Pág. 634:

Colombia: Precios cotizados durante la temporada de plantación, en fábrica, salvo los de urea y muriato, que son los percibidos en almacén al por menor. Año civil. No se pagan subsidios.

Ecuador: Precios de venta de los importadores en Quito. Se han descontado los subsidios pagaderos a las agencias de transporte. Nitrato sódico: de Chile.

Guyana: Precios en los almacenes de venta al por menor. Año civil. No se pagan subsidios.

Paraguay: Precios en los almacenes de venta al por menor. No se pagan subsidios.

Perú: 1962/63, precios en fábrica. 1964 y 1965, año civil, precios c.i.f. Callao. No se pagan subsidios. Nitrato sódico: de Chile.

Pág. 636:

Surinam: Precios al por menor de los fertilizantes comprados al kilogramo. En el caso de las compras por toneladas, los precios son aproximadamente 30 por ciento más bajos. Año civil. No se pagan subsidios.

Uruguay: Precios f.o.b. en fábrica. Nitrato amónico y urea: subsidio de 150 pesos en 1964/65 y de 800 en 1966/67. Superfosfato simple: subsidio de 181 pesos en 1964/65, de 505 en 1965/66 y de 705 en 1966/67. Superfosfato concentrado: subsidio de 90 pesos en 1964/65. Escorias de desfosforación: subsidio de 184 pesos en 1964/65, de 517 en 1965/66 y de 719 en 1966/67. El pago de los subsidios se distribuye en las siguientes proporciones: 66 por ciento a los agricultores, 33 por ciento a los fabricantes y 1 por ciento a las agencias de transporte.

Venezuela: Precios f.o.b. en fábrica de fertilizantes en sacos de 50 kilogramos.

Birmania: Precios en el lugar más próximo de ventas organizadas por el gobierno y efectuadas sin fines de lucro.

Camboya: Temporada: mayo-abril. Los subsidios de la temporada 1966/67 que sumaron aproximadamente una tercera parte del precio se distribuyeron en las siguientes proporciones: 20 por ciento a los agricultores, 2 por ciento a los fabricantes, 5 por ciento a las agencias de transporte y 7 por ciento a las cooperativas. Sulfato amónico: subsidio de 711 riels. Urea: subsidio de 500 riels. Muriato: subsidio de 197 riels.

Ceilán: Precios en almacenes del gobierno para ventas al por menor. De 1962/63 a 1964/65 inclusive, temporada: abril-marzo. A partir de 1966, año civil. Hasta 1964/65 inclusive, los precios reflejan un subsidio del 50 por ciento en los pagos hechos al contado. Hasta 1966 inclusive estuvieron vigentes este subsidio y otro de 33 *1/3* por ciento para las compras a crédito. En 1967, los agricultores percibieron un reembolso equivalente a la diferencia entre el subsidio de 50 por ciento y el de 33 *1/3* por ciento si el préstamo se saldaba dentro de un plazo de 270 días. A partir de 1968, subsidios uniformes para las ventas al contado y a crédito.

China (Taiwán): Precios en la estación ferroviaria más próxima al agricultor. No se pagan subsidios. Nitrato amónico: nitrato de amonio y calcio.

Pág. 638:

Chipre: 1967, año civil. Precios en el almacén de venta al por menor. No se pagan subsidios.

India: En los precios no se incluyen los impuestos sobre las ventas ni otras tasas locales. Los precios del sulfato de potasio a partir de 1964/65 y del muriato a partir de 1962/63 son franco sobre vagón en puerto. La cuantía del subsidio no es uniforme en todo el país; en algunos estados se pagan subsidios del 25 por ciento por fertilizantes fosfatados. Otro subsidio comprende el costo del transporte de los fertilizantes en zonas montañosas y de difícil acceso. En otras zonas se conceden subsidios del 25 por ciento sobre fertilizantes nitrogenados y del 50 por ciento por fertilizantes fosfatados. Nitrato sódico: de Chile. Nitrato amónico: nitrato de amonio y calcio.

Indonesia: Temporada: abril-marzo. Precios en los almacenes de distribuidores en las aldeas. No se pagan subsidios. Muriato: 50/60 por ciento de K_2O.

Irak: Temporada: abril-marzo. Precios en los almacenes de venta al por menor. Nitrato amónico: nitrato de amonio y sulfato.

Israel: Precios a la salida de fábrica, excepto el del muriato y sulfato potásico, que está en almacén en Tel Aviv y la urea, en puerto. Se pagan subsidios a los fabricantes por fertilizantes nitrogenados y fosfatados. Se excluye el precio de los sacos. Nitrato amónico: nitrato de amonio y calcio. Superfosfato simple: espolvoreado.

Pág. 640:

Japón: No se pagan subsidios.

Jordania: Precios de venta al por menor en almacén, excepto el nitrato sódico, que es f.o.b. en puerto. Año civil. No se pagan subsidios.

Corea, Rep. de: Año civil. En 1962 se distribuyeron gratuitamente a cada agricultor 25 kilogramos de urea y 22,5 de superfosfato triple y como en 1963 con un subsidio del 55 por ciento entre 103 500 familias agricultoras cuyas tierras de labores estaban gravadas con impuestos inferiores a 300 won.

CUADRO

PRECIOS (Continuación)

Líbano: 1965 y 1966, año civil. No se pagan subsidios. Nitrato sódico: de Chile.

Pág. 642:

Nepal: Precios en los depósitos de venta. No se pagan subsidios.

Paquistán Oriental: De los precios indicados se ha deducido un subsidio (aproximadamente del 53 por ciento) para mantener los precios al nivel fijado en agosto de 1961. No disfrutan de subsidios la *Pakistan Tea Association*, la *Pakistan Tobacco Company* y las grandes explotaciones de azúcar. Urea: hasta 1963/64 inclusive, 46 por ciento de N; a partir de 1964/65, 40 por ciento de N.

Paquistán Occidental: De los precios indicados se ha deducido un subsidio del 50 por ciento.

Filipinas: Precios en almacén al por menor. Hasta diciembre de 1963, con arreglo a los programas relativos al arroz y al maíz, se calcularon los precios pagados por los agricultores en la mitad del precio oficial de compra aumentado en gastos incidentales. Desde enero de 1964 no se pagan subsidios.

Arabia Saudita: Los precios correspondientes a 1963/64 son en puerto.

Pág. 644:

Singapur: No se pagan subsidios. De 1961 a 1964 inclusive, año civil. Precios en almacén; desde 1965/66, precios franco sobre vagón almacén, Singapur.

Siria: A partir de 1962/63, temporada: septiembre-agosto. Los precios son los cargados por los agentes locales. Las cooperativas gozan de un descuento del 5 por ciento sobre el precio de los fertilizantes si los compran al Banco Agrícola. Nitrato sódico: de Chile. Superfosfato: hasta 1964/65 inclusive, granulado; a partir de 1965/66, en polvo.

Tailandia: Precios c.i.f. Bangkok. No se pagan subsidios.

Turquía: Año civil. Precios en almacén al por menor. El subsidio por fertilizantes nitrogenados lo perciben únicamente los fabricantes para compensar sus pérdidas. Nitrato amónico: nitrato de amonio y calcio.

Argelia: Precios en almacén, excepto para el superfosfato (46 por ciento), c.i.f. Argel. Fertilizantes fosfatados, a granel.

Botswana: Precios franco sobre vagón fábrica, Durban. No se pagan subsidios.

Pág. 646:

Chad: En 1962/63, el gobierno distribuyó gratuitamente fertilizantes entre los agricultores; en 1963/64, los agricultores pagaron aproximadamente una tercera parte del costo y en 1964/65, las dos terceras partes aproximadamente. Los precios pagados por el Estado por estos fertilizantes, entregados en el punto más próximo al agricultor, fueron de 15 238 francos CAF (61,7 dólares) en 1962/63 y de 14 762 francos CAF (59,8 dólares) en 1963/64 y 1964/65 por el sulfato amónico y de 9 333 francos CAF (37,8 dólares) en 1962/63 y de 10 000 francos CAF (40,5 dólares) en 1963/64 y 1964/65 por el superfosfato concentrado.

Dahomey: Precios en los almacenes de la Société nationale pour le développement rural que percibe subsidios del gobierno. Hasta 1962 inclusive, el subsidio fue equivalente a la mitad del valor real. En 1963 se fijó en 10 000 francos CAF por tonelada de fertilizante, o sea 4 761 francos CAF (19,3 dólares) por 100 kilogramos de material fertilizante en el caso del sulfato amónico y 1 667 francos CAF (6,8 dólares) por 100 kilogramos de material, si se trata de muriato de potasio.

Gambia: Los subsidios deducidos de los precios que se indican, se pagan a los fabricantes de fertilizantes y a las agencias de transporte. Sulfato amónico: subsidio de 4,9 libras (13,7 dólares) en 1963/64 y de 8 libras (22,4 dólares) en 1964/65. Superfosfato simple: subsidio de 3,3 libras (9,2 dólares) en 1963/64, de 2,3 libras (6,4 dólares) en 1964/65, y de 2,8 libras en 1965/66. Muriato: subsidio de 4,9 libras (13,7 dólares) en 1963/64, y de 8 libras (22,4 dólares) en 1964/65.

Ghana: Los subsidios deducidos de los precios que se indican, se pagan a los fabricantes de fertilizantes. Sulfato amónico: subsidio de 2,4 cedis (2,8 dólares) en 1965/66, de 2,4 cedis (3 dólares) en 1966/67, y de 9,4 cedis (9,3 dólares) en 1967/68. Superfosfato simple: subsidio de 1,64. cedis (2 dólares) en 1965/66, de 1,64 cedis (2,1 dólares) en 1966/67, y de 10,9 cedis (10,8 dólares) en 1967/68. Sulfato de potasio: subsidio de 1,4 cedis (1,6 dólares) en 1965/66, de 1,4 cedis (1,7 dólares) en 1966/67, y de 3,7 cedis (3,8 dólares) en 1967/68. Cloruro de potasio: subsidio de 0,5 cedis (0,6 dólares) en 1965/66 y 1966/67, y de 2,2 cedis (2,2 dólares) en 1967/68.

Costa de Marfil: Precios en almacén, Abidján. Se conceden subsidios a los agricultores que producen cacao y café en razón de un tercio del precio de compra, y a los cultivadores de arroz en las proporciones siguientes: 50 por ciento del precio de compra en 1963, 40 por ciento en 1964, 30 por ciento en 1965 y 20 por ciento en 1966.

Kenia: Franco en vagón, Mombasa. Temporada: noviembre-octubre. Nitrato amónico: nitrato de amonio y sulfato. Superfosfato simple: subsidio de 36 chelines (5 dólares) en 1963/64, de 39 chelines (5,4 dólares) en 1964/65, y de 42 chelines (5,9 dólares) en 1965/66. Superfosfato concentrado: subsidio de 37 chelines (5,2 dólares) en 1963/64, de 36 chelines (5,1 dólares) en 1964/65, y de 40 chelines (5,5 dólares) en 1965/66.

Lesotho: Precios en almacén al por menor. Los fertilizantes nitrogenados y fosfatados se vendieron a los agricultores a precio de fábrica, pero los almacenes de ventas al por menor recibieron un subsidio. Nitrato amónico: nitrato de amonio y calcio: subsidio de 2,9 rands (4,1 dólares) en 1965/66, de 2,4 rands (3,4 dólares) en 1966/67 y 1967/68. Superfosfato simple: subsidio de 3,8 rands (5,3 dólares) en 1965/66, y de 5 rands (7 dólares) en 1966/67 y 1967/68.

CUADRO

Pág. 648:

Libia: Año civil. Precios en almacén al por menor. Los subsidios pagados a los vendedores fueron de 20 por ciento en 1963 y 1964; en 1965, de 34 por ciento para el sulfato amónico y el superfosfato simple, y de 26 por ciento para otros fertilizantes, y en 1966 y 1967 fue de 34 por ciento para todos los fertilizantes.

Madagascar: Temporada: marzo-febrero. Precios en almacén al por menor. En 1964/65, los subsidios que únicamente se concedieron a los productores de arroz en la región de la Meseta, no se dedujeron de los precios que se indican. Sulfato amónico: de 1965/66 a 1967/68 inclusive, subsidio de 4 762 francos (19,3 dólares). Urea: de 1965/66 a 1967/68 inclusive, subsidio de 2 174 francos (8,8 dólares). Muriato: de 1965/66 a 1967/68 inclusive, subsidio de 1 167 francos (6,8 dólares).

Malawi: Precios franco en vagón de ferrocarril, Limbe, para fertilizantes en sacos de 100 libras. Los agricultores que cultivan tierras de propiedad comunal y que adquieren fertilizantes de la Junta de Mercadeo organizada por los agricultores perciben un subsidio de 50 por ciento.

Malí: Los subsidios se deducen de los precios indicados, como sigue: Sulfato amónico: de 6 667 francos CAF (27 dólares) en 1964/65, de 6 286 francos CAF (25,5 dólares) en 1965/66, y de 4 000 francos CAF (16,2 dólares) en 1966/67. Urea: 5 652 francos CAF (22,9 dólares) en 1964/65, y de 4 565 francos CAF (18,5 dólares) en 1966/67. Superfosfato: de 3 684 francos CAF (14,9 dólares) de 1964/65 a 1966/67 inclusive. Escorias de desfosforación: subsidios de 2 889 francos CAF (11,7 dólares) en 1964/65, de 2 667 francos CAF (10,8 dólares) en 1965/66, y de 2 444 francos CAF (9,9 dólares) en 1966/67. Muriato: de 1 200 francos CAF (4,9 dólares) en 1964/65 hasta 1966/67 inclusive.

Mauritania: Precios cobrados a los agricultores por el Departamento de Agricultura. No se pagan subsidios.

Mauricio: A partir de 1965, año civil. Precios en los almacenes al por menor. No se pagan subsidios. Nitrato sódico: hasta 1964/65 inclusive, sintético; a partir de 1965, de Chile.

Pág. 650:

Marruecos: Precios en fábrica, Casablanca. Los agricultores con fincas de pequeña extensión reciben un reembolso de 5 dirhams (0,99 dólares) por cada 100 kilogramos de fertilizantes. Para demostraciones de su buen uso se concede un reembolso del 25 por ciento del precio de los fertilizantes nitrogenados y complejos. Los pagos se hacen efectivos a los agricultores por medio de cooperativas. Nitrato sódico: sintético.

Nigeria: Precios en puerto y al ingreso de la explotación agrícola. Temporada: abril-marzo. Los precios se mantienen uniformes en todo el país mediante subsidios del gobierno en forma de servicios de transporte y distribución.

Nigeria: Región Occidental: Precios al ingreso de la explotación. Temporada: abril-marzo. Sulfato amónico: subsidio de 3,8 libras (10,6 dólares) en 1964/65 y de 4,8 libras (13,4 dólares) en 1965/66, 1966/67 y 1967/68. Superfosfato simple: subsidio de 2,2 libras (6,2 dólares) en 1964/65 y 1965/66, de 3,3 libras (9,2 dólares) en 1966/67, y de 2,8 libras (7,8 dólares) en 1967/68. Muriato: subsidio de 1 libra (2,8 dólares) en 1964/65, 1965/66 y 1966/67.

Reunión: Año civil. No se pagan subsidios.

Rhodesia del Sur: Precios franco en vagón de ferrocarril, Salisbury. Temporada: abril-marzo. No se pagan subsidios. Nitrato sódico: sintético.

Sierra Leona: Precios en la estación agrícola más próxima a la explotación. Sulfato amónico: subsidio de 8,9 leones (12,5 dólares) en 1965/66 y 1966/67, y de 8,9 leones (11,4 dólares) en 1967/68. Superfosfato simple: subsidio de 7,6 leones (10,6 dólares) en 1965/66 y 1966/67 y de 7,6 leones (9,7 dólares) en 1967/68. Sulfato potásico: subsidio de 3,7 leones (5,2 dólares) en 1965/66 y 1966/67 y de 3,7 leones (4,7 dólares) en 1967/68.

Sudáfrica: Año civil. Precios, franco en vagón de ferrocarril en fábrica. En el caso de entregas procedentes de almacenes situados en pleno campo, se añade 1,5 rands (2,10 dólares) por tonelada, en concepto de pago de gastos de transporte por ferrocarril y de servicio de distribución. Se ha deducido el subsidio de 2 rands (2,80 dólares) por tonelada de fertilizante.

Sudán: No se pagan subsidios, pero los organismos oficiales y semigubernamentales venden fertilizantes a los agricultores al precio de coste más gastos de transporte, almacenamiento, etc.

Swazilandia: En 1963/64 y 1964/65, precios en almacén al por menor. En 1966/67, precios en la estación ferroviaria más próxima al fabricante. Los precios en la estación ferroviaria más próxima a la explotación agrícola son, como promedio, de 7 rands más por tonelada corta.

Pág. 652:

Togo: Precios en muelle.

Túnez: Precios en almacén al por menor. Sulfato amónico: subsidio de 3,3 dinars (6,3 dólares) en 1964/65 y 1965/66. Nitrato amónico: subsidio de 3 dinars (5,7 dólares) en 1964/65 y 1965/66. Nitrato de calcio: subsidio de 3,9 dinars (7,4 dólares) en 1964/65 y 1965/66. Urea: subsidio de 3 dinars (5,8 dólares) en 1964/65 y 1965/66.

CUADRO

PRECIOS (Continuación)

Uganda: En 1962/63 y 1963/64, precios franco vagón de ferrocarril en Kampala, excepto para el superfosfato que es franco en vagón, Tororo. En 1967/68, precios en almacén al por menor. Nitrato amónico: Nitrato de amonio y sulfato.

República Arabe Unida: Temporada: noviembre-octubre. Precios oficiales al por menor en los centros de entrega más próximos. No se pagan subsidios. Nitrato amónico: nitrato de amonio y calcio. Nitrato sódico: de Chile.

Alto Volta: Precios en almacén al por menor.

Zambia: Temporada: abril-marzo. En 1963/64, precios f.o.b. en fábrica. Desde 1964/65 hasta 1966/67 inclusive, precios en la estación ferroviaria más próxima a la explotación. Nitrato amónico: nitrato de amonio y calcio.

Samoa americana: Precios en puerto.

Pág. 654:

Australia: Precios franco en vagón de ferrocarril Yarraville, excepto para el nitrato de amonio y calcio y de la urea cuyos precios son ex fábrica. Se pagan subsidios a los fabricantes de fertilizantes. Sulfato amónico: subsidio de 1,91 dólares (2,14 dólares) en 1962/63, de 2,07 dólares (2,32 dólares) en 1963/64, de 3,81 dólares (4,27 dólares) en 1964/65 y 1965/66, y de 11,69 dólares (13,09 dólares) en 1966/67 y 1967/68. Nitrato amónico: nitrato de amonio y calcio: subsidio de 7,87 dólares (8,81 dólares) en 1966/67 y 1967/68. Nitrato sódico (de Chile) y urea: subsidio de 7,87 dólares (8,81 dólares) en 1966/67 y 1967/68. Superfosfato simple: subsidio de 2,68 dólares (3 dólares) a partir de 1963/64 hasta 1967/68 inclusive.

Viti: Precios en almacén al por menor. En 1966 y 1967, año civil. Se pagan subsidios a los agricultores en virtud de un plan iniciado el 21 de febrero de 1962. Sulfato amónico: subsidio de 4,4 libras (11,2 dólares) en 1962/63, 1963/64 y 1964/65, de 3,4 libras (8,7 dólares) en 1966, y de 4 libras (9,9 dólares) en 1967. Urea: subsidio de 3,3 libras (8,3 dólares) en 1962/63, 1963/64 y 1964/65, de 2,5 libras (6,3 dólares) en 1966 y de 2,8 libras (7 dólares) en 1967. Superfosfato simple: subsidio de 3 libras (7,5 dólares) en 1962/63, 1963/64 y 1964/65, de 3,4 libras (8,7 dólares) en 1966, y de 3,6 libras (9 dólares) en 1967. Sulfato de potasio: subsidio de 2,2 libras (5,5 dólares) en 1962/63, 1963/64 y 1964/65, de 2,4 libras (6,1 dólares) en 1966 y de 2,3 libras (5,8 dólares) en 1967. Muriato: subsidio de 1,5 libras (3,7 dólares) en 1967.

Guam: Precios al por menor.

Nueva Zelandia: Precios en almacén al por menor o f.o.b. en fábrica, excepto las escorias de desfosforación que son f.o.b. en puerto. A partir de agosto de 1965 se paga un subsidio a los fabricantes para cubrir las dos terceras partes de los costes de transporte desde la fábrica a la explotación agrícola si rebasan la cifra de 3 dólares neozelandeses por tonelada.

Islas del Pacífico (bajo admón. de los EE.UU.): Precios f.o.b. en puertos de los Estados Unidos o japoneses. Se venden los fertilizantes mediante almacenes agrícolas del gobierno a estos precios además de los costes de distribución.

221. TRACTORES Y MAQUINARIA AGRICOLA - Precios pagados por los agricultores

Encabezamientos: País y tipo de maquinaria. Precio por unidad en monedas nacionales. Precio por unidad en dólares estadounidenses.

Australia: Dólares, por unidad.

Tractores

De ruedas, de 30-50 cv, diesel, con neumáticos.
De ruedas, de 30-50 cv, de gasolina, con neumáticos.
De ruedas, de 30 a 50 cv, diesel.
De ruedas, de más de 50 cv, diesel.
De oruga, de 30 a 50 cv, diesel.

Maquinaria agrícola

Arados, de 3 surcos, de vertedera.
Arados, de 3 surcos, de disco, montados en tractor.
Rastras de discos, de doble fila, de 7 pies.
Rastras, de 8 secciones, articuladas.
Escarificadores (de reja en espiral) de 12 pies, con 24 dientes, en tractor.
Distribuidoras de fertilizantes, de 9 pies.
Sembradoras de discos, de 16 hileras.
Sembradoras de dientes, de 16 hileras.
Sembradoras y distribuidoras combinadas, de 20 hileras, de dientes.
Segadoras de hierba, de 6 pies.
Plataformas espigadoras, de 12,5 pies, con toma de fuerza.
Descremadoras de 100 galones de capacidad.
Máquinas de ordeñar para 3 puestos.
Máquinas de esquilar de 2 puestos.
Clasificadoras de frutas, giratorias, de 9 depósitos.[8]
Pulverizadoras, de 2 ruedas con neumáticos, con toma de fuerza.
Motores Diesel, de 4 3/4 cv, con refrigeración por agua.
Molinos de viento, de 14 pies de diámetro, sobre torre de 30 pies.

Alemania, Rep. Fed. de: Marcos por unidad.

CUADRO

Tractores

De 13 a 17 cv.
De 18 a 24 cv.
De 25 a 34 cv.
De más de 34 cv.
De un eje.

Maquinaria agrícola

Arados para tractor.
De dos rejas.
Rastras.
Cultivadores de patatas de 2 hileras con herramientas para la siembra, binado y rastrillado.
Sembradoras de 2 m, 15 hileras.
Distribuidoras de estiércol.
Distribuidoras de abonos químicos.
Distribuidoras de abonos químicos, tipo cajón.
Distribuidoras de abonos químicos, tipo pulverización mecánica.
Henificadora.
Barra segadora.
Picadoras de forraje.
Segadoras-atadoras, de 5 a 7 pies.
Cosechadoras-trilladoras.
Arrancadoras-limpiadoras de patatas.
Recogedoras empacadoras.
Trilladoras para 400 a 750 kilogramos de grano.
Molinos machacadores de 300 a 400 kilogramos de capacidad.
Cocedores para alimentos del ganado, de 100 litros de capacidad.
Picadoras-ensiladoras.
Transportadores neumáticos.
Abrevaderos de tracción animal.
Elevadoras de cuchara para heno y maíz, de 400 kilogramos con polea y motón.
Recogedoras-cargadoras, tractor.
Vehículos de granja de 3 toneladas, sobre neumáticos.
Ordeñadoras mecánicas portátiles de 5 puestos.
Motores eléctricos trifásicos, 5 cv.
Cercados de alambre electrificados, sin estacas, con aislador, 300 metros.

Japón: 1 000 yens por unidad.

Arados japoneses, fijos.
Descascaradoras automáticas, de cilindros, de 3 pulgadas.
Cultivadoras a motor, tipo de arrastre, 5 cv.
Trilladoras, de autoalimentación, automáticas, SEL, 45.
Máquinas de fabricar cuerda, accionadas a mano.
Vehículos de granja, de tipo medio, con neumáticos de 26 pulgadas.
Motores eléctricos trifásicos, de 1 cv.
Motores de gasolina, refrigerados por agua, de 3-4 cv.

Estados Unidos: Dólares por unidad.

Tractores

De ruedas, de menos de 20 cv a la polea.
De ruedas, de 20 a 29 cv a la polea.
De ruedas, de 30 a 39 cv a la polea.
De ruedas, de 40 a 49 cv a la polea.
De ruedas, de 50 a 59 cv a la polea
De oruga, de menos de 25 cv a la barra.
De oruga, de 25 a 34 cv a la barra.
De oruga, de 35 a 49 cv a la barra.

Maquinaria agrícola

Arados, para tractor, de vertedera, de un cuerpo.
Arados, para tractor, de vertedera, dos cuerpos.[8]
Arados, para tractor, de vertedera, tres cuerpos.[8]
Rastras de discos, simples, 4 pies.
Rastras de discos, de doble hilera, 5-6,9 pies.
Rastras de discos, de doble hilera, 7-8,9 pies.[8]
Gradas de dientes rígidos, barra de acero.[8,9]
Cultivadoras, de 2 hileras, de tractor 70 bu.[8]
Distribuidores de estiércol, de 2 ruedas, con neumáticos 70 bu.[8]
Plantadoras de maíz, de 2 hileras, con dispositivo para distribución de fertilizantes.[1]
Sembradoras de cereales, para tractor,
de 16 tubos.[8]
de 20 tubos.
Segadoras, para tractor, de 7 pies.[1]
Henificadoras con descarga lateral tractor.[1]
Recogedora embaladora con toma de fuerza.[1]
Cosechadoras automotrices de 12 pies.[8]
Cosechadoras automotrices de 10 pies.[8]
Cosechadoras de 5 a 6 pies, con toma de fuerza.[8]
Cosechadora de maíz, de 2 hileras.[1]
Machacadoras.[1]
Descremadoras eléctricas, de 750 libras de capacidad.
Ordeñadoras de un puesto.[8]
Vehículos de granja, para neumáticos de goma, sin neumáticos.
Pulverizadores mecánicos, de rampa, sobre remolque.
Motores de gasolina de 1 1/2 cv.[8]
Motores eléctricos de 1 1/4 cv.[8]

Notas explicativas:

[1] Los promedios anuales se refieren a la campaña agrícola: Australia, de junio a junio; Dinamarca, República Federal de Alemania, India (Uttar Pradesh), Italia, Países Bajos, Puerto Rico, Sudáfrica, Reino Unido, de julio a junio; Japón, de abril a marzo; India (Punjab) y Suecia, de septiembre a agosto; Israel, de octubre a septiembre.
[2] No se incluye en el índice general.
[3] A partir de 1966/67, nuevo índice; base: octubre de 1965-septiembre de 1966 = 100.

NOTA: Para la descripción de los métodos de cálculo de esta serie de índices, véase el Anuario de 1960, págs. 463-468. Han aparecido reseñas sobre las series revisadas posteriormente en los *Anuarios de producción* de 1961, pág. 374, para Austria, en el de 1962, pág. 375, para Australia y el Reino Unido, y en el de 1964, pág. 417, para el Japón y en el *Anuario de Producción 1965*, pág. 431, para Brasil y la República Federal de Alemania, así como en el *Boletín mensual de economía y estadística agrícolas*, de mayo de 1962, para Francia.
El símbolo † indica una interrupción en las series; las cifras que figuran a continuación de dicho signo se han calculado sobre una base revisada.

223. INDICES DE PRECIOS AGRICOLAS Y DE PRECIOS GENERALES AL POR MAYOR

Encabezamientos: País y grupo.

Véanse las NOTAS al final del Cuadro.

NOTA: Siempre que ha sido posible, se han convertido los índices nacionales al período base 1963 = 100, con objeto de lograr su comparabilidad internacional. Salvo indicación expresa en contrario, los números índices de los precios agrícolas se refieren a los productos agropecuarios de origen animal y vegetal, prescindiendo de los productos forestales y de los forrajes.

El símbolo † indica una interrupción en la serie; las cifras que figuran a continuación de dicho signo se han calculado sobre una base revisada.

Notas explicativas:

[1] Consumo doméstico de alimentos y materias primas industriales.
[2] A partir de 1966, base: 1964 = 100.
[3] Indice de productos alimenticios (Irán, antes de 1959).
[4] Incluidos los alimentos elaborados.
[5] Basado en los distintos sectores de la economía.
[6] Antes de 1960, no comprende El Sarre.
[7] No es parte del índice general (Irak, a partir de 1962).
[8] Base: julio de 1963-junio de 1964 = 100. Doce meses que empiezan el 1 de julio del año indicado.
[9] Antes de 1959 base: 1959 = 100.

CUADRO

PRECIOS (Conclusión)

[10] Base: julio de 1962 = junio de 1963 = 100. Doce meses que terminan el 30 de junio del año indicado.
[11] Precios de los productores de productos industriales.
[12] Fuente: Fundação Getulio Vargas.
[13] Incluidos los productos forestales no cultivados, salvo la madera.
[14] 1954.
[15] Base: octubre de 1962-septiembre de 1963 = 100. Antes de enero de 1967 se calcula el índice a partir de los precios controlados.
[16] Antes de 1959, únicamente Teherán, base: 1958 = 100.
[17] Productos agrícolas comestibles.

224. INDICES DE PRECIOS AL POR MENOR DE LOS ALIMENTOS Y DEL COSTO DE LA VIDA

Encabezamientos: País y grupo.

NOTA: Siempre que ha sido posible, se han convertido los índices nacionales al período base 1958 = 100, con objeto de lograr su comparabilidad internacional.

El símbolo † indica una interrupción de la serie; los datos que le siguen están calculados sobre base revisada.

Notas explicativas:

[1] Antes de 1958, Viena solamente.
[2] Base: 1958 = 100 (Austria y China Taiwán), antes de 1958; Honduras Británico y Polinesia francesa, antes de 1959.
[3] Base: 1966 = 100 (Austria y Somalia, a partir de 1967; Barbados, a partir de 1966.
[4] Sin incluir alquileres (Austria, antes de 1958; Dinamarca, antes de 1965; Granada, antes de 1964; Malasia occidental, antes de 1959).
[5] Indice de los precios estatales al por menor.
[6] 1954.
[7] Base: 1964 = 100 (Dinamarca, a partir de 1965; Paraguay y Argelia, a partir de 1964).
[8] Antes de 1962, índice correspondiente a París.
[9] Base: 1962 = 100 (Francia, República Federal de Alemania, Panamá, Mauricio, y Túnez, antes de 1962; Uruguay, antes de 1963).
[10] Incluido el tabaco (República Federal de Alemania y Túnez, a partir de 1962).
[11] Antes de 1960, no comprende El Sarre.
[12] 1954.
[13] Antes de 1959, Atenas solamente.
[14] Base: 1959 = 100 (Grecia, Laos y Malasia occidental, antes de 1959; Singapur y Viti, antes de 1960).
[15] Incluidos los impuestos directos (Islandia, a partir de 1959; Sudáfrica, antes de 1958).
[16] Base: 1965 = 100 (Luxemburgo, a partir de 1966; Granada, a partir de 1964).
[17] Promedio de menos de 12 meses.
[18] Prescindiendo del seguro social obligatorio y de los impuestos sobre salarios.
[19] Base: 1960 = 100 (España, antes de 1961; Perú, Tailandia, y Nigeria, antes de 1960).
[20] Base: 1967 = 100 (Suiza, a partir de 1967).
[21] Base: 1961 = 100 (Reino Unido, antes de 1962; Paraguay, antes de 1964; Argelia, antes de 1963; Mozambique, antes de 1961).
[22] Zona metropolitana de San José solamente.
[23] San Salvador, Mejicanos y Villa Delgado.
[24] Antes de 1964, trabajadores agrícolas.
[25] Incluido el jabón, los combustibles, el alumbrado y el tabaco.
[26] Excepto gastos diversos.
[27] Excepto los alquileres y los gastos diversos.
[28] Prescindiendo del seguro social obligatorio y de los impuestos sobre salarios.
[29] Antes de 1964, excepto Alaska y Hawaii.
[30] Diciembre.
[31] Georgetown y New Amsterdam.
[32] Antes de 1962, incluido el combustible.
[33] Clase obrera.
[34] 1953 y 1957, clases medias, funcionarios públicos, Taipei solamente.
[35] A partir de 1965, base: septiembre de 1963-agosto de 1964 = 100.
[36] A partir de 1964, nuevas series.
[37] Antes de 1964, 28 ciudades solamente.
[38] Antes de 1966, Seúl solamente.
[39] Funcionarios públicos.
[40] A partir de 1959, todas las razas (malayos, chinos e indios). Antes de 1959, trabajadores malayos en Kuala Lumpur únicamente.
[41] Trabajadores industriales.
[42] Fuente: Banco Central de Filipinas.
[43] A partir de 1960, todas las razas.
[44] Antiguo territorio de Aden solamente.
[45] Antes de 1962, 19 productos alimenticios, jabón, kerosene y cigarrillos; base: 1962 = 100.
[46] Antes de 1960, Bangkok solamente.
[47] Prescindiendo de los gastos de vestuario, alquileres y diversos (Mozambique, antes de 1961).
[48] Europeos.
[49] Prescindiendo de los gastos de vestuario y de alquileres (Túnez, antes de 1962).
[50] Clase media.

CUADRO

[51] Indice suplementario para los europeos.
[52] Familias con ingresos bajos.
[53] Africanos.
[54] Marzo.
[55] Población blanca.
[56] Funcionarios de sueldo bajo.
[57] A partir de 1960, trabajadores indios y de las islas Viti. Antes de 1960, trabajadores indios en Suva únicamente.

SALARIOS Y FLETES

225. SALARIOS AGRICOLAS

Encabezamientos: Año. Salarios en monedas nacionales. Salarios en dólares estadounidenses.
C - Salario íntegro (trabajadores remunerados enteramente en efectivo).
P - Parte en efectivo de la remuneración (cuando ésta se percibe parte en efectivo y parte en especie). La remuneración en especie puede incluir las estimaciones siguientes: (*a*) valor de las comidas; (*b*) valor del alojamiento.

EUROPA

Austria: I - Obreros permanentes, conductores de caballerías.
II - Obreras permanentes, ordeñadoras.
III - Jornaleros, conductores de caballerías.
IV - Jornaleras, ordeñadoras.

Bélgica: I - Peones agrícolas, varones adultos.
II - Peones agrícolas, personal femenino adulto.
III - Jornaleros, adultos.
IV - Jornaleras, adultas.
V - Jornaleros, adultos.
VI - Jornaleras, adultas.

Bulgaria: I - Explotaciones estatales, trabajadores agrícolas ambos sexos.
II - Explotaciones estatales, peones agrícolas auxiliares, ambos sexos.
III - Explotaciones estatales, toda clase de trabajadores, incluso empleados y personal joven.

Pág. 678:

Notas explicativas

[1] Promedio de jornales para febrero, mayo, septiembre, noviembre; a partir de 1960, promedio de febrero, mayo, agosto, noviembre.
[2] 1955-57, marzo; a partir de 1958, abril.

EUROPA

Bulgaria: IV - Estaciones de maquinaria agrícola y tractores, obreros y obreras.
V - Estaciones de maquinaria agrícola y tractores, jornaleros y jornaleras auxiliares.
VI - Estaciones de maquinaria agrícola y tractores, toda clase de trabajadores, incluso empleados.

Checoslovaquia: Sector socializado, excepto cooperativas agrícolas, toda clase de trabajadores varones empleados en agricultura y montes.

Dinamarca: I - Peones agrícolas, hombres, de 21 o más años, contratados por los 12 meses que terminan el 31 de octubre del año indicado.
II - Peones agrícolas, mujeres, de 18 o más años, contratadas por los 12 meses que terminan el 31 de octubre del año indicado.
III - Jornaleros ocasionales, adultos, hombres.

Finlandia: I - Peones agrícolas, hombres.
II - Peones agrícolas, mujeres.
III - Toda clase de trabajadores.
IV - Toda clase de trabajadoras.

Francia: I - Peones agrícolas, hombres.
II - Peones agrícolas, mujeres.

Pág. 679:

Notas explicativas

[1] Promedio de mayo, junio, septiembre y diciembre.
[2] Preliminar.

EUROPA

Alemania Oriental: Sector socializado, trabajadores agrícolas de ambos sexos; incluidos los forestales; 1955-62, comprendidos los parques de maquinaria agrícola, incluso subsidios familiares.

Alemania, Rep. Fed. de: I - Trabajadores agrícolas; salarios mínimos mensuales.
II - Trabajadoras agrícolas; salarios mínimos mensuales.
III - Jornaleros calificados; salario mínimo por hora.
IV - Jornaleros; salario mínimo por hora.
V - Jornaleras, salario mínimo por hora.

Hungría: I - Sector estatal: explotaciones estatales, obreros y empleados.
II - Sector estatal; parques de maquinaria agrícola y tractores, trabajadores y empleados.
III - Sector estatal; empresas agrícolas especializadas, trabajadores y empleados.

CUADRO

SALARIOS Y FLETES (Continuación)

IV - Sector estatal; explotaciones estatales, parques de maquinaria agrícola y tractores, empresas agrícolas especializadas, empresas forestales del Estado, trabajadores y empleados.
V - Sector estatal; explotaciones estatales, parques de maquinaria agrícola y tractores, empresas agrícolas especializadas, empresas forestales del Estado, trabajadores.

Pág. 680:

Notas explicativas
